Appointment of KA3HDO as VP-Human Spaceflight Programs

AMSAT-NA President Barry Baines is pleased to announce that effective August 1, 2012, Frank Bauer, KA3HDO, will be returning as AMSAT's Vice President for Human Spaceflight Programs. This role will include AMSAT's leadership on the Amateur Radio on the International Space Station (ARISS) Program and amateur radio operations pursuits on other Human Spaceflight vehicles proposed by NASA, International Space Agencies and domestic and international commercial spaceflight organizations.

Bauer made the following comment regarding his reappointment: "I look forward to working again with AMSAT as we bring the excitement of human space exploration pursuits and amateur radio communications into the communities of the world, inspiring youth to pursue Science, Technology, Engineering and Math (STEM) careers".

Frank Bauer stepped down as V.P. for Human Spaceflight in May 2009 due to increasing work responsibilities at NASA. At the time, Bauer was Chief Engineer for the Exploration Systems Mission Directorate at NASA HQ. He retired from NASA in September 2011. However, Bauer has been unable to fully support ARISS or other human spaceflight pursuits due to a post-retirement one year "cooling off" period with NASA and with the International Space Agencies. President Barry Baines clarifies: "Effective September 3, Frank will be able to communicate with NASA and the other International Space Agency officials again. Until then, Frank will start working with the AMSAT

Board and Senior executives in re-establishing his role within the AMSAT-NA community". He further adds: "Once he is able to fully engage, Frank intends to work with AMSAT, NASA, the ARRL, the ARISS team and the International space community to continue to evolve and expand the ARISS program. And to work with the commercial spaceflight community on potential new endeavors as they develop and evolve their human spaceflight vehicles."

The V.P. for Human Spaceflight is a position that is appointed by the AMSAT President that provides leadership and guidance to the AMSAT President, BoD and executives on AMSAT's Human Spaceflight Operations and Development.

[ANS thanks AMSAT President Barry Baines, WD4ASW for the above information]

2012 AMSAT Space Symposium Call For Papers

AMSAT announces the 2012 AMSAT Space Symposium will be held on Friday, October 26th through Sunday, October 28th at the Holiday Inn, Orlando-International Airport, Orlando, Florida.

Symposium Proceedings Editor, Dan Schultz, N8FGV is eagerly awaiting your abstract about the title/topic of your paper and presentation as soon as possible.

Final copy to be submitted by October 1 for inclusion in the printed proceedings.

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv at amsat.org.

Watch the AMSAT Symposium Web Pages for the latest information.

[ANS thanks Symposium Proceedings Editor, Dan Schultz, N8FGV for the above information]

ARRL Names Satellite Operator WA4OVO Instructor of the Year

The ARRL Board of Directors announced at their July meeting they have selected Joe Lowenthal, WA4OVO, of Memphis, Tennessee, as the recipient of the 2012 Herb S. Brier Instructor of the Year Award. Joe is also an amateur satellite operator.

The Board noted that Lowenthal ☐has a demonstrated record as an outstanding instructor for Amateur Radio classes, with hundreds of students benefitting from his expertise in the classroom and generous mentoring.☐

The Award cites Joe's skills in his use of creative instructional approaches, demonstrated success rate in students passing thier exam, personal enthusiasm, ability to recruit students, and he models the highest values of the amateur radio community

Herb S. Brier, W9AD, long-time CQ Novice Editor, represented the spirit of effective, caring Amateur Radio instruction. The ARRL, in conjunction with the Lake County (Indiana) Amateur Radio Club, sponsors this award in his memory to recognize the very best in volunteer Amateur Radio instruction and recruitment.

[ANS congratulates Joe Lowenthal, WA4OVO and thanks Rick Tillman, WA4NVM and the ARRL for the above information]

Successful ARISS School Contacts This Week

ESA Space Camp, Dublin, Ireland

An Amateur Radio on the International Space Station (ARISS) school contact with the ESA Space Camp, Dublin, Ireland was successfully completed on July

22.

The European Space Agency has locations in several European countries. The annual summer space camp is an occasion when the children of staff employed at ESA get a chance to mix with each other in an environment which allows them to be immersed in space activities and cultural events. This year the 160 ESA campers stayed in a traditional "Harry Potter" style boarding school near Dublin, in a country full of mystical stories and a breath taking landscape.

As part of their 2 week stay at the camp, the children aged 8-17 years, took part in sporting events, field trips where they will explore more about what earth is made of, look more closely at how we explore other planets and design their own launchers and space suits. They will be visited by an ESA astronaut who will join in the activities and explain about astronaut training and human spaceflight.

Women in Engineering Program at Rochester Institute of Technology

An Amateur Radio on the International Space Station (ARISS) school contact with the Women in Engineering Program at Rochester Institute of Technology (WE@RIT), Rochester, NY was successfully completed on July 23. WE@RIT is dedicated to increasing the representation of women engineers and women leaders within the engineering profession. Founded in 2003, WE@RIT strives towards achieving gender parity within the Kate Gleason College of Engineering and hosts a comprehensive series of pre-engineering outreach, recruitment, and community building programs in support of this vision.

Astronaut Sunita Williams, KD5PLB was operating the Kenwood TM-D700 ham radio station located in the International Space Station□s Service Module using the callsign NA1SS on 145.800 MHz. The station at the Rochester Institute of Technology used the callsign W2RIT.

See the press release on the Rochester Institute of Technology web.

Television coverage of RIT on TV News: Chat with International Space Station.

Irkutsk, Russia

An Amateur Radio on the International Space Station (ARISS) school contact with the 2nd International Industrial Forum of Youth, "Engineers Future 2012", in Irkutsk, Russia was successfully comleted on July 23. This was a direct contact via RKØSWB. No additional school information was available at press time.

Virginia Air and Space Center

An Amateur Radio on the International Space Station (ARISS) school contact with the Virginia Air and Space Center, Hampton, VA was successful on July 26. The contact was carried on a direct link between NA1SS aboard the Space Station and KE4ZXW at the Museum.

The Virginia Air and Space Center is a non-profit education center that serves as the Visitor Center for NASA Langley Research Center as well as being home to the NASA LaRC Educator Resource Center.

The Center offers education programs to schools, scouts, home schoolers, and the general public. They host ERC and NASA teacher workshops, STEM activities, events such as NASA's Sun-Earth Day, and the International Observe the Moon Night. They serve the community at large and provide programming for the under-served youth population.

Their on-site ham radio station was used for this contact. It is used to educate students and the public on what ham radio is, how it works, and how satellites work as a means for communication.

[ANS thanks ARISS for the above information]

ARISS Contact Announced for Scouting Space Jam 6

Space Jam 6 takes place August 3-5 at the Chanute Air Museum in Rantuol, IL. (near Champaign-Urbana, 3 hours south of Chicago)

The Space Jamboree Workshop (or just Space Jam for short), is the midwest's largest technology oriented gathering of all Boy Scouts and Girl Scouts.

Put on by Explorer Crew 272 of Fountain County, IN, and Troop 17 of Champaign, IL, Space Jam is about fun with a purpose: their mission is to see Scouts go on to become scientists, engineers, entrepreneurs, teachers, musicians, technicians, and much more. Boy Scouts, Girl Scouts, and Webelos are all welcome to continue and develop excellence in teaching and share what we learn.

Planned activities include hands-on coaching and learning in high tech merit badge fields covering 31 topics in electronics, aviation, aerospace, computers. Additional opportunities will include:

International Space Station Radio ContactLive NASA Digital Learning Network Video ContactHigh Altitude Balloon LaunchAmateur ("Ham") RadioSearch and Rescue Demonstration

The ARISS contact is scheduled for Sunday, August 5 at 10:06:53 UTC. Explorer Crew 272's WB9SA station will provide a direct connection with NA1SS on the 58 degree elevation pass over the midwest. Stations in the United States will be able to copy the 145.800 MHz downlink.

Space Jam 6 details are posted at: http://www.spacejamboree.com/

[ANS thanks Space Jam 6 and the ARISS Contact Schedule by Charlie Sufana, AJ9N for the above information]

Replacement Ericsson VHF Radio in Preparation for ISS Columbus Module

The ARISS International Team Teleconference held on Tuesday, July 17, 2012, reported that a team lead by ISS Amateur Radio Project Engineer Kenneth Ransom, N5VHO were in the final stages of preparing the certification for flight of a replacement radio for the Ericsson VHF radio currently aboard the Columbus Module. The radio will be launched to the ISS aboard an

upcoming re-supply mission.

The ARISS UHF digipeater on 437.550 MHz, which has operated in parallel with the 145.825 MHz system, has continued operation on 437.550 MHz (up/down) after the VHF digi is temporarily off the air. The same digi alias ARISS on UHF is still used.

This change was started with the docking of the ESA Automated Transfer Vehicle (ATV). The ATV is an expendable, unmanned resupply spacecraft delivering propellant, water, air, payloads and experimental supplies to the International Space Station (ISS).

Packet operations were moved to the Columbus Module UHF radio when the Kenwood D700 radio was recently powered off due to needing an additional air purifier to support the ATV. Normally the air purifier is located in the ATV but recent power support issues related to the ATV and ISS necessitated the system be relocated to the Service Module. The purifier is now using the power outlet that the Kenwood radio normally uses. The Russian team has agreed to briefly power the purifier off for the scheduled ARISS school events but then will re-activate the purifier right afterwards. This appears to be a long term impact as ATV is currently scheduled to depart from ISS in September.

[ANS thanks Kenneth Ransom, N5VHO for the above information]

August 2 Atlas Launch From Vandenberg to Launch Four ELaNa Cubesats

On August 2, 2012 an Atlas V rocket will launch a combination of 11 satellites from Vandenberg Air Force Base in California for the US Government and NASA ELaNa university cubesats.

The primary mission will launch a pair of US Navy Ocean Surveillance Satellites (NOSS). These satellites carry equipment to track ships and aircraft by triangulation of radio transmissions. The two NOSS satellites have a combined weight of 6500 kg. They will separate a few days after being placed into a 1100 km circular orbit at 63°

inclination.

This is the first Atlas V launch with modified helium tanks in the Centaur upper stage. The change has created room in the aft skirt to accommodate 8 P-POD dispensers for cubesats. This launch carries 11 cubesats, to be released into 470 x 770 km, 63° orbit about 3 hours after launch and following maneuvers by the Centaur upper stage.

NASA ELaNa LAUNCH AND DEPLOYMENT

3 P-Pods will carry 4 cubesats NASA sponsored "ELaNa VI" cluster:

(1) CINEMA (Cubesat for Ion, Neutral, Electron, Magnetic fields)

http://www.eecs.berkeley.edu/Pubs/Te...CS-2010-83.pdf

First in a trio of identical nano-satellites studying Space Weather effects in near-Earth space, 3U cubesat from University of California at

Berkeley,Uplink uses a serial connection with a data rate of 9600 bps.Downlinks for engineering telemetry and command are in the 2400-2450 MHz range; Science telemetry is in 2200-2300 MHz range.1 Mbps data rate, Reed-Solomon encoded bitstream.

(2) CSSWE (Colorado Student Space Weather Experiment)

http://lasp.colorado.edu/home/about/quick-facts-csswe/

3U-CubeSat designed and developed by students at the University of Colorado at Boulder (CU-Boulder). The objective of the science mission is to address fundamental questions pertaining to the relationship between solar flares and energetic particles.Downlink 437.345 MHz, 9k6 with AX25

(3) CP5 (PolySat)

http://polysat.calpoly.edu/CP5.php

California Polytechnic State University at San Luis Obispo mission with De-Orbiting Experiment Using A Deployed Thin-Film Mechanism.Downlink 437.405 MHz at 1 watt, AFSK on LSB AX.25 over NRZI at 1200 baud, every 2 minutes, begins 3.5 hours after first turn-on

(4) CXBN (Cosmic X-Ray Background Nanosatellite)

http://universe.sonoma.edu/CXBNanosat/

Morehead State University mission to map the entire sky in the X-ray spectrum using high energy cosmic background radiation measurements in the 30-50 keV range. 2U cubesat.Downlink 437.525 MHz, GFSK, AX.25

US Government Payloads

5 P-PODs will carry 7 US Government payloads (list subject to confirmation):

(1) Aeneas

http://www.uk.amsat.org/9034

http://www.isi.edu/projects/serc/aeneas

Department of Homeland Security satellite technology demonstration program to track cargo containers worldwide, 3U cubesat built by the University of Southern California. Proof of concept mission to prove the concept of WiFi based tag tracking from Low Earth OrbitFirst cubesat to deploy 2.4 GHz Dish Antenna. WIFI transmitter will transmit on 2425.0 MHz with 1 watt of output power.Downlink 437.600 MHz AX25 1200 bps beacon every 10 seconds and a spread spectrum two-way link elsewhere in the 70cm band.

(2) ORSES (ORS Enabler Satellite)

Operationally Responsive Space office, 3U cubesat for the US Army Space and Missile Defense Command.

(3) Horus

One of a satellite pair (with Re) has optical sensors to detect orbiting payloads and debris for orbit measurement, 3U cubesat from Lawrence Livermore National Laboratory.

(4) Re

Second satellite of a pair (with Horus) has optical sensors to detect orbiting payloads and debris for orbit measurement, 3U cubesat from Lawrence Livermore National Laboratory,

(5, 6, 7) Aerocube 4A, 4B, 4C

Built and operated by the Aerospace Corporation for technical research.

[ANS thanks NASA, the CubeSat Teams noted above, AMSAT-UK, and Gunter's Space Page for the above information]

First US Woman Astronaut Sally Ride Passes

This week the space community noted the passing of NASA Astronaut Sally Ride. The press release (included below) best summarizes her remarkable career and contributions to science and space.

NASA OFFERS CONDOLENCES ON THE PASSING OF PIONEERING ASTRONAUT SALLY RIDE

WASHINGTON -- In a space agency filled with trailblazers, Sally K. Ride was a pioneer of a different sort. The soft-spoken California physicist broke the gender barrier 29 years ago when she rode to orbit aboard space shuttle Challenger to become America's first woman in space.

"Sally Ride broke barriers with grace and professionalism -- and literally changed the face of America's space program," said NASA Administrator Charles Bolden. "The nation has lost one of its finest leaders, teachers and explorers. Our thoughts and prayers are with Sally's family and the many she inspired. She will be missed, but her star will always shine brightly."

"Sally was a personal and professional role model to me and thousands of women around the world," said NASA Deputy Administrator Lori Garver. "Her spirit and determination will continue to be an inspiration for women everywhere."

Ride's contribution to America's space program continued right up until her death at age 61 this week. After two trips to orbit aboard the shuttle, she went on to an award-winning academic career at the University of California, San Diego, where her expertise and wisdom were widely sought on matters related to space. She holds the

distinction of being the only person to serve as a member of both investigation boards following NASA's two space shuttle accidents. She also served as a member of the Review of U.S. Human Spaceflight Plans Committee in 2009 which informed many of the decisions about NASA's current human spaceflight programs.

However, Ride's place in history was assured on June 18, 1983 when she rocketed into space on Challenger's STS-7 mission with four male crewmates.

"The fact that I was going to be the first American woman to go into space carried huge expectations along with it," Ride recalled in an interview for the 25th anniversary of her flight in 2008. "That was made pretty clear the day that I was told I was selected as a crew. I was taken up to Chris Kraft's office. He wanted to have a chat with me and make sure I knew what I was getting into before I went on the crew. I was so dazzled to be on the crew and go into space I remembered very little of what he said."

"On launch day, there was so much excitement and so much happening around us in crew quarters, even on the way to the launch pad," Ride said. "I didn't really think about it that much at the time -- but I came to appreciate what an honor it was to be selected to be the first to get a chance to go into space."

Ride joined NASA as part of the 2008 astronaut class, the first to include women. She and five other women, along with 29 men, were selected out of 8,000 applicants. The class became known as the "Thirty-Five New Guys" and reported to the Johnson Space Center the next summer to begin training. Ride trained for five years before she and three of her classmates were assigned to STS-7. The six-day mission deployed two communications satellites and performed a number of science experiments.

Following that historic flight, Ride returned to space on another shuttle mission, STS-41G in 1984. The 8-day mission deployed the Earth Radiation Budget Satellite, conducted scientific observations of Earth, and demonstrated potential satellite refueling techniques. She was assigned to a third flight, but transitioned to a role on the Rogers Commission that investigated the Challenger accident after that shuttle was lost in January 1986. When the investigation was completed, she accepted a job as a special assistant to the NASA administrator for long range and strategic planning.

Ride left NASA in 1989 to join the faculty at the University of California, San Diego, as a professor of physics and director of the University of California's California Space Institute. In 2001, she founded her own company, Sally Ride Science, to pursue her long-time passion of motivating girls and young women to pursue careers in science, math and technology.

A native of Los Angeles, Ride graduated from high school there in 1968 and enrolled at Stanford University. At Stanford, she earned four degrees, including a doctorate in physics in 2008. She also was an accomplished athlete who played varsity tennis at Stanford after being nationally ranked as a youth.

Ride received numerous honors and awards during the course of her career. Most notably, she was inducted into the National Women's Hall of Fame and the Astronaut Hall of Fame, and received the Jefferson Award for Public Service, the von Braun Award, the Lindbergh Eagle, and the NCAA's Theodore Roosevelt Award.

(4) Actor Wil Wheaton, "The Next Generation's" Wesley Crusher, hosts this look at the Mars Science Laboratory mission and its rover, Curiosity:

http://www.youtube.com/watch?v=xwhn2...layer_embedded

(5) On the same night Curiosity lands on Mars, a "Martian Triangle" will appear in sunset skies of Earth. The first-magnitude apparition on August 5th gives space fans something to do while they wait for news from the Red Planet.

http://spaceref.com/astronomy/scienc...-sky-show.html

(6) Mars Landing Countdown Clock and dozens of Mars Landing resources can be found at:

+ http://getcurious.com

+ http://www.exploremars.org

NASA has made available on YouTube the video they produced on the 40th Anniversary of the Apollo 11 moon landing. It covers the full scope of the Apollo program and features interviews with many of the Apollo astronauts. More information about Apollo can be found when you visit http://www.nasa.gov/apollo The video can be viewed at: http://www.youtube.com/watch?feature...&v=ez0bFWKR9-0A Raspberry Pi single

board computer has been used to send live images from near space. Dave Akerman has used a Raspberry Pi computer board as the flight computer on a High Altitude Balloon and sent back live images from near space at an altitude of almost 40 km. The balloon, called PIE1, was launched from Brightwalton, in Berkshire on July 14, 2012. The images were transmitted on 434.650 MHz (300 bps, 600 Hz shift) in the amateur radio 70cm band using the Slow Scan Digital Video (SSDV) standard. PIE1 reached an altitude of 39,994 metres and images were received as far away as Northern Ireland, over 500km distance, from the 10mW transmitter on 434.650 MHz. The full story and pictures are on Dave Akerman's website http://www.daveakerman.com/?p=592 (Southgate)The next Hudson Valley Satcom net dates are Thursday, August 2, August 16, and August 30, 8PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). An echolink connection is available onthe N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)A 3-Part Video Series, "Introduction to satellite tracking and listening" is available from the Southgate ARC site. This video covers the basics of satellite tracking using the free Orbitron software. See: http://tinyurl.com/3PartSatelliteTrackingVideoVideo showing Special Event Station 8J3A operating the amateur radio satellite FO-29 is available at: http://tinyurl.com/8J3AKanham (Southgate)An article on the CQ Magazine Newsroom on-line notes the 10th anniversary of the reviving of AO-7. Launched in 1974 it operated until its batteries short-circuited in 1981. Twenty-one years later, in 2002, the satellite incredibly came back to life. Ten years after returning to the air, AO-7 is still going strong. The article also notes the recent distance records set via AO-7. Read more at: http://www.cqnewsroom.blogspot.com (thanks to CQ Magazine)NASA astronaut Joe Acaba, KE5DAR, will play Disk Jockey in space on Friday, August 3rd. That's when he will do a live remote from the International Space Station as a part of a two-hour music and talk show to be streamed over Internet station Third Rock Radio. Third Rock Radio is calling this outing "The Joe Show." It describes it as a blend of science, technology, engineering and mathematics and art. Third Rock Radio is a project of Houston, Texas radio veterans. It is produced under a NASA Space Act Agreement with RFC Media. The "Joe Show" is mainly aimed at younger Americans. It can be heard as an audio stream at ThirdRockRadio.net with Acaba's appearance beginning at 4 p.m. Eastern time, on Friday, August 3. (via Amateur Radio Newsline Report 1824 ☐ July 27 2012)A new "Phases of the Moon" app for Android (with iOS version promised soon can be downloaded to your phone ($0.99) Examples and screenshots on-line at: http://tinyurl.com/MoonPhasesApp

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind the day a princess potato told her parents, the king and queen potato, about her plans to marry the local television newscaster. The parents were shocked, all they could do was to declare, "But he is not royalty, he is merely a commentator!"

Amateur Radio CubeSats to Launch from Vandenberg:

Posted: 30 Jul 2012 05:11 PM PDT
http://www.eham.net/articles/28703

On August 2, 2012 an Atlas V rocket will launch a combination of 11 satellites from Vandenberg Air Force Base in California for the US Government and NASA ELaNa university CubeSats. The primary mission will launch a pair of US Navy Ocean Surveillance Satellites (NOSS). These satellites carry equipment to track ships and aircraft by triangulation of radio transmissions. The two NOSS satellites have a combined weight of 6500 kg. They will separate a few days after being placed into a 1100 km circular orbit at 63° inclination. This is the first Atlas V launch with modified helium tanks in the Centaur upper stage. The change has created room in the aft skirt to accommodate 8 P-POD dispensers for CubeSats. This launch carries 11 CubeSats, to be released into 470 x 770 km, 63° orbit about 3 hours after launch and following maneuvers by the Centaur upper stage.

//
Changes to IOTA Rules:

Posted: 30 Jul 2012 05:11 PM PDT
http://www.eham.net/articles/28702

The IOTA Contest takes place on 28 and 29 July and there are some important rules changes for participants. The scoring for Island-World and World-World QSOs has changed, to increase the importance of working island stations. The World Multi-op category has been discontinued. A QSY rule for Island Multi-Op stations has been introduced, because some entrants have been operating with more than one multiplier station. Finally, low power expedition entrants are now allowed to use any antenna. The 2012 rules are on the Contest Committee section of the RSGB website. All operators are asked to please be careful to use contest preferred band segments, as penalties will be applied to stations who do not observe these limits.

//
Amateur Radio Still Fascinates 92-Year-Old:

Posted: 30 Jul 2012 05:11 PM PDT
http://www.eham.net/articles/28701

COLUMBUS (AP) -- For the Depression-era farm boy fascinated with science, research was relegated to pondering the occasional lightning strike or puddles dappled with tractor oil. Yet Paul Herman vowed to climb from his Pennsylvania roots to answer life's nagging questions. "I found things interesting that, it seemed to me, the other kids didn't pay attention to," he said. "I imagined that I might be different from other kids." The towering radio antenna outside his Clintonville home today is evidence the 92-year-old still is different, and still is searching the airwaves for information. He's one of about 703,000 ham-radio operators nationwide, according to the Connecticut-based National Association for Amateur Radio. "There are more operators in the country than ever before," said association spokesman Allen Pitts. "And it is growing." Those aren't Facebook numbers, but they're evidence that one of the oldest forms of electronic communication isn't ready to die just yet.

//
Solar Storm is Expected to Hit Earth on Tuesday:

Posted: 30 Jul 2012 05:10 PM PDT
http://www.eham.net/articles/28700

A medium-size solar flare erupted from the sun this weekend, hurling a cloud of plasma and charged particles toward Earth on a cosmic path that is expected to deliver a glancing blow to our planet on Tuesday, according to space weather forecasters. The M6-class solar flare exploded from the sun on Saturday, unleashing a wave of plasma and charged particles, called a coronal mass ejection (CME), into space. The CME is expected to reach Earth tomorrow, and could deliver a glancing blow to Earth's magnetic field at around 11 a.m. EDT, according to the website Spaceweather.com, which regularly monitors space weather events. "This is a slow-moving CME," astronomer Tony Phillips wrote on Spaceweather.com. "The cloud's low speed (382 km/s estimated) combined with its glancing trajectory suggests a weak impact is in the offing. Nevertheless, polar geomagnetic storms are possible when the cloud arrives."

//
Stratospherium II -- HALO:

Posted: 30 Jul 2012 04:44 PM PDT
http://www.eham.net/articles/28699

Saturday, August the 4th, at around 8:00 LT (05:00 UTC) the YO3KSR team will try to launch a High Altitude Balloon (HALO), Stratospherium II. This time, the balloon will have some scientific experiments on board and the APRS position and telemetry will be sent
on 144.850 MHz in order to give a chance for foreign radioamateurs to directly receive the beacon. We will digipeat the beacons onto 144.800 MHz in order to put Stratospherium II onto the APRS.FI via local I-Gates. The launching site coordinates are around Mizil in Buzau County, depending on
last minute flight path simulations:

//
Press Release: Ham Radio Deluxe v5.24.28 Release:

Posted: 30 Jul 2012 04:43 PM PDT
http://www.eham.net/articles/28698

Mike Carper, WA9PIE, said, "We've doubled the number of testers and the results reflect the level of effort they've put into it. The response we're gotten with the 'soft launches' shows the long hours invested by our development team have made v5.24 the most solid release ever."

//
VU7M Operations:

http://www.eham.net/articles/28696

Sorry, We have no capability for 160m and 6m operations. We like CW more than SSB, and the low power we run, helps only CW working. Some of our young men may try SSB. Pse wait and see.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

August 1, 2012

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- See You On the Ultra-Highs - ARRL UHF Contest
- Mega-message Merriment - Worked All Europe
- CQ WW Tightens Log Deadlines
- Automagic Contest Calendar by DL2NBY
- WRTC 2014 - Testing One, Two...Fifteen!
- ARRL DX Phone - Extended Writeup Online
- Getting a Leg Up on Tower Alignment
- Is a dB or Two Worth the Effort?
- Bring on the Rookies!

NEW HF OPERATORS - THINGS TO DO

If you are chasing your Worked All States <http://www.arrl.org/was/>
award (WAS) there can hardly be imagined a better opportunity for
putting those "last few" in the log than the one-day-only North
American QSO Party sponsored by the NCJ. The CW version is this
Saturday and the Phone version is on the 18th - both are 100 watts and
all you have to exchange is your name and state! The Worked All
Europe's CW weekend opens up the fall contest season, too.

BULLETINS

For those of you reading this from outside the United States and Canada
and who have yet to submit your IARU HF Championship log, please be
sure that your Cabrillo log includes the tag line "LOCATION: DX" in the
header at the beginning of the file. If this is missing, the log will
be rejected by the contest's log submission robot. Logs should be
submitted to iaruhf@iaru.org. (Thanks, ARRL Contest Branch Manager,
Sean KX9X)

BUSTED QSOS

OSCAR 1, which launched on December 12, 1961 was actually the first
satellite constructed with private sponsorship, something of which the
amateur community in general, and the amateur satellite community
```

particularly, is justifiably proud. (Thanks, Paul K9NO)

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

August 4-5

- ARRL UHF Contest
- North American QSO Party--CW
- Int'l Lighthouse-Lightship Contest
- TARA Grid Dip Shindig--Digital
- 10-10 Summer Phone QSO Party
- European HF Championship
- South Africa DX SSB Contest

August 11-12

- OK1WC Memorial Contest (Aug 6)
- CWops Monthly Mini-CWT Test (Aug 8)
- Worked All Europe--CW
- Maryland-DC QSO Party
- Fall VHF Sprints
- Straight Key Weekend Sprintathon
- NJQRP Skeeter Hunt--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

CQ WW Director, Bob Cox K3EST announced, "With the technology available today and the presence of the Internet practically everywhere, it has been decided to reduce the log submission time for all CQ contests to five (5) days. Approximately 70% of all electronic logs (more than 10,000!) were received within 7 days after the contest. We realize that in some cases circumstances may not allow a timely submission. If an entrant requires more time to submit a log, an extension can be granted for legitimate reasons by contacting questions@cqww.com. Send your email to that address prior to the submission deadline - including before the contest if you expect to require more time. We encourage clubs to notify their members of the new deadline as they may not be aware of the rule change. This is an excellent opportunity for clubs to help members generate and email Cabrillo-formatted logs if they have not done so before." CQ Editor, Rich W2VU notes, "The five-day log submission deadline takes effect with the SSB weekend of the 2012 CQWW DX Contest in October. The deadline for the 2012 CQWW RTTY DX Contest (Sept. 29-30) remains 15 October, as published in the July issue of CQ."

Also from CQ Communications, we receive word that John Lindholm, W1XX, has stepped down as director of the CQ WW VHF Contest. John ran the VHF contest for 10 years and quintupled the number of logs submitted. Steve Bolia, N8BJQ, (who was once the CQ WPX Director) has graciously agreed to step into John's shoes. In addition to his current responsibilities as WPX Award Manager, Steve has already been helping

John with VHF Contest log-checking for the past several years. Thanks to both John and Steve for their service!

Carl Luetzelschwab K9LA presented a July 2012 Webinar reviewing the recent solar minimum, Cycle 24's present status, and propagation in relation to the progress of Cycle 24. The effect of trees on HF and MF propagation and the best height for your antenna were also discussed. You can find the webinar on the Potomac Valley Radio Club's website <http://www.pvrc.org/> archive of past webinars.

Array Solutions <http://arraysolutions.com> has just announced affordable band-pass filters for 160 (AS-160) through 10 meters (AS-10). Shown at right, these are designed for Field Day operations, club purchases, and DXpeditions. The filters are an improved version of the I.C.E. model 403-411 two-resonator filters and are symmetrical so that they can be connected in either orientation. The website includes vector network analyzer data <http://www.arraysolutions.com/Products/as-bpffilters.htm> on the filters, too.

Dave W9GRX requests that VHF+ contesters send a copy of their recent logs "for use in compiling the VHF Super Check Partial (SCP) Database. This is a complement to the excellent HF Contest SCP Database maintained by WA1Z. Logs are kept in confidence. The previous year of logs is deleted when the June Database is released. The various files can be found at www.k3lr.com/w9zrx/ <http://www.k3lr.com/w9zrx/>. The trailing / is required. Cabrillo files should be emailed to zephd@indy.rr.com.

Many DX cluster nodes are now carrying Reverse Beacon Network <http://www.reversebeacon.net/> (RBN) spots in addition to traditional spots. If you go to the online DX Cluster directory <http://www.dxcluster.info/telnet/index.php> and check only the boxes for AR Cluster and CC Cluster, you will find cluster nodes that offer that option identified in the left-hand column. Both ARCluster and CC Cluster offer extensive filtering options particularly designed for handling Skimmer spots. (Thanks, Pete N4ZR)

Is there an iPad app for logging contacts? Hans K0HB reports finding "HamLog" in the online store at a cost of 99 cents.

Hans also reports excellent results from new hearing aids featuring a Bluetooth link to a stereo audio source. "Wow! It's like you have your head inside the radio! No headset needed! I don't need to abandon CW after all." Sounds like he likes it. Many new models feature this wireless link including both behind-the-ear and in-the-ear aids.

Here's a ham in the news - the new Prime Minister of Serbia is Ivica Dacic, YU1YU. Will a tribander appear over the presidential residence? (Thanks, Venci Z39Z)

Steve Powlishen K1FO
<http://www.arrl.org/news/noted-em-qst-em-author-steve-powlishen-k1fo-sk>

became a Silent Key this past week. Steve designed high-performance antennas that are standards in the VHF+ contest community. He was also a QST and QEX author with several ground-breaking articles on VHF+ antennas and amplifiers.

Web Site of the Week - David K2DSL relayed word of this Google Calendar formatted online contest calendar <https://sites.google.com/site/dl2nbycontestcalendar/> by DL2NBY. By clicking the Google icon at the bottom right, you can add this calendar to your own Google Calendar.

WORD TO THE WISE

ID - it's not just for ragchews anymore! The availability of Internet spotting networks does not remove the requirement to send your call sign in contests - we need to know who you are!

==> SIGHTS AND SOUNDS

The WRTC 2014 <http://wrtc2014.org> team was busy checking out their station design with 15 stations participating in the IARU HF Championship under "WRTC Conditions". Event co-chair, Randy K5ZD, "...drove 7.5 hours and 286 miles over the weekend. Visited 7 of the 13 stations <http://photobucket.com/2012test_k5zd>. It was very impressive to see all of the stations look so professional - and similar! The enthusiasm and effort of the volunteers was truly outstanding." Allen N2KW took many photos of the Sholan Farms site <http://photobucket.com/2012test_n2kw> and "Beam Team" leader K1RX also provided a photo tour <http://photobucket.com/2012test_k1rx> of his efforts, too.

The London Olympics special station 2O12L is making a lot of QSOs on the bands - here's their website <http://www.2o12l.com/> showing a pretty nice set-up. (Thanks, Bob N6TV)

Bob N6TV also discovered an online audio archive <http://ol5q.nagano.cz/audio.php> maintained by OL5Q. The audio is in Ogg Vorbis format and more information about playing these files is available from the Wikipedia <http://en.wikipedia.org/wiki/Wikipedia:Media_help_%28Ogg%29>.

Tim, N6WIN has created an extensive website <http://www.n6win.com/index_files/VP9I.htm> about his VP9 operation with Kurt W6PH during the 2012 ARRL DX Phone contest - great info about Bermuda and operating from VP9!

The Mars Science Laboratory is going to be landing on the Red Planet on August 5th - its advanced landing mechanism has heightened the curiosity of millions around the world. For some pre-landing preparation, AMSAT <http://www.amsat.org/> Bulletin ANS-211 including the following videos:

- "19 Minutes to Earth"
<http://www.youtube.com/watch?feature=player_embedded&v=dBBZFjN9hvg>
about the Viking orbiter (1976)
- "Seven Minutes of Terror
<http://www.youtube.com/watch?v=Ki_Af_o9Q9s&feature=player_embedded>"
on the Curiousity rover's landing from JPL
- "The Science of Curiosity: Seeking Signs of Past Mars Habitability
<http://www.youtube.com/watch?v=oHLbXTOaw7w&feature=player_embedded>"
also by JPL
- An overview
<http://www.youtube.com/watch?v=xwhn2knY6EE&feature=player_embedded> of
the Mars Science Laboratory mission and rover, hosted by Wil Wheaton

There's a lot going on overhead lately and here's a neat story about a
satellite
<http://gizmodo.com/5929857/tiny-satellite-to-scrawl-morse-code-messages-across-the-night-sky>
that will beam 200 watts of Morse code down to Earth as visible light!
Deployment from the ISS is scheduled for Sep 6.

A chart of the electromagnetic spectrum adorns a lot of workshops,
offices, and ham shacks - here's a free download version
<http://unihedron.com/projects/spectrum/moreinfo.php> from Unihedron
and a full-size printed copy can be purchased as well. (Thanks, AMSAT
<http://www.amsat.org/> Bulletin ANS-197)

Speaking of well-equipped shacks, does your shack need a "makeover"?
Jake K9WN turned up this oldie-but-goodie
<http://www.yccc.org/Articles/Makeover/The_YCCC_CQWW_Makeover.pdf> from
the Yankee Clipper Contest Club archives.

Lightning at 7,207 images per second is just as impressive - and maybe
more - than a real-time strike. You can see for yourself in this
high-speed movie on Astronomy Picture of the Day
<http://apod.nasa.gov/apod/ap120723.html>.

==> RESULTS AND RECORDS

The work of the Regional writeup authors has been collected and the
2012 ARRL DX Phone extended results article
<http://www.arrl.org/contest-results-articles>is now online. Although
there are a couple more to add, thanks to all of the volunteers who
contribute to this article. Diego LU8ADX tells the tale in both Spanish
and English for contesters from Central and South America.

Certificates for the 2011 ARRL August UHF Contest should be hitting the
mailboxes shortly. They are in the spiffy new graphic format that was
so well-received for the ARRL June VHF Contest. (Thanks, ARRL Contest
Branch Manager, Sean KX9X)

The 14th running of the NCCC Sprint Ladder
<http://www.ncccsprint.com/>, 'NSL XIV - Spring 2012' has come to a
close with 67 unique stations participating. Congratulations to
winners:

Atlantic: Eric ('Ty') Tichansky, NO3M
East Central: Tor Clay, N4OGW
West Central: Todd Dravland, WD0T
West: Danny Eskenazi, K7SS
NCCC: Ken Keeler, N6RO
The 15th Sprint Ladder begins tomorrow night (Aug 3, 0230-0300Z) on 5 bands during the single 30-minute contest period! (Thanks, Bill N6ZFO and Ken KE3X for the NCCC Sprint Contest)

The Oceania DX (OCDX) contest committee reports the results <http://www.oceaniadxcontest.com/2011_Results.htm> of the 2011 contest are now available. "What a difference one year can make! After many years of hibernation the 10 meter band finally exploded back to life with more than 20% of the action in the 2011 contest occurring on this band. The 2011 OCDX contest was the biggest so far with a total of 1259 logs being submitted. In particular it was pleasing to see an 81% increase in the number of logs submitted from North American stations. (Thanks, Brian ZL1AZE for the OCDX Contest Committee)

The final results of the UBA Contest CW 2012 are online at the UBA website <http://www.uba.be/en/hf/contest-results/contest-results-selection?year=2012&vid=3109> including downloadable contest certificates <http://www.uba.be/en/hf/contest-results/contest-certificates>. (Thanks, Marc ON7SS/OO9O)

Results of the 2012 Ukrainian DX Classic RTTY Contest <http://urdxc.org/rtty/results2012.php> are already available at the contest website. (Thanks, Leon UT7CL)

OPERATING TIP

Retired USCG Radioman, Chris K4HC relays that "the proper meanings of the Procedural Words Roger and Wilco are:
Roger - Message received and understood
Wilco - Message received and understood, and I will comply.
Therefore, saying "Roger Wilco" is akin to saying "73's". The two are NEVER used together. Hollywood got it wrong on this one."

==> TECHNICAL TOPICS AND INFORMATION

With several generations of Rohn tower sections "in play" across the land, there are reports of difficulties in getting them to fit together. Rich KL7RA devised a handy gauge of copper pipe to help with alignment chores. "I soldered two 90-degree ½-inch elbows to a pipe. It measured a perfect fit for the top legs of Rohn 25 as a quick check. If my leg gauge didn't fit I would put that section aside and [used] a big pipe to bend the leg in or out. The ½-inch pipe matches the OD of the top legs very closely to indicate misalignment and fits inside the bottom of the legs."

Pat N9RV weighs in with some advice for Rohn 25 tower builders, as well. "File off the galvanizing [slag] first. There are at least two problems to tower fit - legs out of round and legs not true (slightly bent). Mate pairs of sections and mark them. Correct for legs out of round (oval) by pounding simultaneously with sledges on the wide parts until they are sufficiently close to circular (both sections). Correct for legs out of true by spreading or compressing using something that is stiff and can give you leverage (such as a [length] of pipe)."

Locknuts or lockwashers? Grant KZ1W writes that "Engineering tests <http://www.boltscience.com/pages/twonuts.htm> show that double nuts properly tightened are superior to lock washers and the Nylock nut is somewhat better as the second nut. Even if the nylon insert degrades (there are non-nylon inserts as well) the double nut friction still is better than a lockwasher. There are other choices as well to insure the fastener stays tight. Perhaps the easiest and most reliable is Loctite. The medium strength grade (blue 242) can be disassembled with hand tools (no heat required). However, the bolt surface should be clean so use the Loctite to prevent SS galling."

Assembling our favorite connector (the PL-259) is a never-ending source of suggestions and favorite procedures. Here's a good process <http://www.w5fc.org/files/how-to/PL259.PDF> for PL-259's with the RG-58/59/8X adapters by K6MHE from W5FC's website that has the benefit of allowing you to see what the finished solder job looks like. (Thanks, Paul W9AC)

But will they make a Smart Toolbag for tower work? This Gadget Freak Case #221 <http://www.designnews.com/author.asp?section_id=1362&doc_id=247463&dfpPParams=htid_66,bid_30,aid_247463&dfpLayout=blog> presents "Smart Toolbox Finds the Right Tool".

A free online EDN course <http://www.edn.com/electrical-engineers/education-training/courses/4218470/Fundamentals-of-Solar--Off-Grid?cid=Newsletter+-+EDN+on+Analog> covers the fundamentals of off-grid, stand-alone photovoltaic (PV) systems, with a good overview of the technologies, topologies and electronics that make up such systems. An earlier course--Fundamentals of Solar: Grid Connected--focused on PV systems connected to the power grid; if you're considering connecting your system to the grid at any point, please check out that course, too.

Aggregate concrete finishes can look more attractive than plain concrete surfaces. Scott W5WZ explains the difference: "Aggregate concrete (in our market more commonly called "washed concrete") is simply regular concrete that is finished differently. Instead of using trowels to get the smooth surface, at that point in the curing process, the upper layer of cement is washed away with water to expose the aggregate which is contained in the ready-mix. This principle works well on mixes of strength between 2500 & 4500 PSI, albeit the stronger mixes require more precise timing of the washing operation." He notes that your local ready-mix plant will help you get the look and strength

you need.

Technical Web Site of the Week - Is 1 or 2 dB worth the bother? Judge for yourself at Dave AB7E's "Minimum Discernable Difference <http://www.ab7e.com/weak_signal/mdd.html>" website.

==> CONVERSATION

Bring On the Rookies!

In just over two-and-a-half weeks (Aug 19th) the August edition of the ARRL's Rookie Roundup <http://www.arrl.org/rookie-roundup> contest will hit the airwaves for six hours - 1800 through 2359Z. This is a perfect opportunity to give those promising new operators you met at Field Day some hands-on time in the shack. It's important to put the word out early so that busy end-of-the-summer weekend time can be added to the all-important Master Refrigerator Calendar.

This is the digital edition of Rookie Roundup - meaning RTTY. Many younger hams are far more comfortable wrangling a keyboard than they are a microphone or Morse key so encourage them to "drop by and make a few QSOs". I'll bet they find it exciting and interesting enough to stay for quite a while!

There have been some recent changes in the Rookie Roundup rules to encourage teamwork and group mentoring. After receiving a number of requests for it, the Multioperator category is now a reality. Any number of Rookie operators may now band together at a single QTH and take turns operating using a single call and submitting a single score. This also works for a stream of operators dropping in for some chair time. Note that Multioperator teams are allowed only a single transceiver.

In the new Team Competition up to five Rookie Single-Operator entrants can operate from separate stations and combine their scores for a cumulative team score. Team members can be located anywhere. Note that Multioperator entrants and non-Rookies are not eligible to be part of a Team, only Rookie Single-Operators. Operators are also limited to being on only one team for each RR. Team registration will begin one week before each RR starts; look for the link to Team Registration in the At-A-Glance section of the ARRL's Rookie Roundup <http://www.arrl.org/rookie-roundup> web page. How about your club challenges another local club to see whose team of Rookies do the most rounding up?

As always, Non-Rookies are encouraged to help the Rookies through on-site Elmering during the contest and by getting on the air and working Rookies in the event itself. If you're not on RTTY, this event is a great testing ground for hooking up the necessary pieces - just a couple of cables and your contest logging software, most likely - will get you going.

If you're considering hosting a couple of new members - put out the word today! An email to the club email reflector or website is a good way to get started. If your club newsletter comes out at the beginning of the month - be sure to send the editor a note. And then follow up with photos and an after-event report to encourage more activity throughout the contest season.

73, Ward N0AX

==> CONTESTS

1 August through 14 August 2012

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Int'l Lighthouse-Lightship Contest--Phone, CW, Digital, from Aug 4, 0000Z to Aug 5, 2359Z. Bands (MHz): 1.8-28. Exchange: Serial or ARLHS mbr/light nr and name, S/P/C. Logs due: Aug 31. Rules <http://illw.org/>

TARA Grid Dip Shindig--Digital, from Aug 4, 0000Z to Aug 4, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: Name and 4-char grid square. Logs due: Sep 3. Rules <http://www.n2ty.org/seasons/tara_grid_rules.html>

10-10 Summer Phone QSO Party--Phone, from Aug 4, 0001Z to Aug 5, 2359Z. Bands (MHz): 28. Exchange: Call, name, 10-10 number, S/P/C. Logs due: Aug 20. Rules <http://www.ten-ten.org/>

European HF Championship--Phone, CW, from Aug 4, 1200Z to Aug 4, 2359Z. Bands (MHz): 1.8-28. Exchange: RS(T), last two digits of 1st year licensed. Logs due: Aug 31. Rules <http://lea.hamradio.si/%7Escc/euhf/euhfc.htm>

North American QSO Party--CW, from Aug 4, 1800Z to Aug 5, 0600Z. Bands (MHz): 1.8-28. Exchange: Name and state. Logs due: 14 days. Rules <http://ncjweb.com/>

South Africa DX SSB Contest--Phone, from Aug 5, 1300Z to Aug 5, 1630Z. Bands (MHz): 3.5-14. Exchange: RS and serial. Logs due: 14 Aug. Rules <http://www.sarl.org.za/>

OK1WC Memorial Contest--Phone, CW, from Aug 6, 1600Z - see website. Bands (MHz): 3.5, 50, 144, First through fourth Monday of each month; see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

CWops Monthly Mini-CWT Test--CW, from Aug 8, 1300Z - see website. Bands (MHz): 1.8-28. Multiple operating periods, twice monthly on 2nd and 4th Wed. Frequencies: 18 to 28 kHz above band edge. Exchange: Name and member number or S/P/C. Logs due: 2 days. Rules

<http://www.cwops.org/onair.html>

Worked All Europe--CW, from Aug 11, 0000Z to Aug 12, 2359Z. Bands (MHz): 3.5-28. Exchange: RST and serial (see website for QTC rules). Logs due: 15 days. Rules <http://www.waedc.de/>

Maryland-DC QSO Party--Phone, CW, Digital, from Aug 11, 1600Z - see website. Bands (MHz): 1.8-28, 50-440. Exchange: Maryland county/city or S/P/C. Logs due: Sep 14. Rules <http://mdcqsoparty.w3vpr.org/>

Straight Key Weekend Sprintathon--CW, from Aug 12, 0000Z to Aug 12, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member nr if member. Logs due: 5 days. Rules <http://www.skccgroup.com/>

NJQRP Skeeter Hunt--CW, from Aug 12, 1700Z to Aug 12, 2100Z. Bands (MHz): 3.5-28. Frequencies: QRP calling frequencies. Exchange: RST, S/P/C, Skeeter number or power. Logs due: 30 days. Rules <http://w2lj.blogspot.com/p/njqrp-skeeter-hunt.html>

VHF+ CONTESTS

ARRL UHF Contest--Phone, CW, Digital, from Aug 4, 1800Z to Aug 5, 1800Z. Bands (MHz): 222+. Exchange: 4-char grid square. Logs due: Sep 6. Rules <http://arrl.org/contests>

Fall VHF Sprints--Phone, CW, Digital, from Aug 11, 2000Z to Aug 11, 2400Z. Bands (MHz): 50. Exchange: 4-character grid square. Logs due: 30 days. Rules <http://www.svhfs.org/>

TARA Grid Dip Shindig--Digital, from Aug 4, 0000Z to Aug 4, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: Name and 4-char grid square. Logs due: Sep 3. Rules <http://www.n2ty.org/seasons/tara_grid_rules.html>

1392. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.misc
Date: 2012-08-01 06:00:03 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1343800801@panix.com>
Source record: 2309
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.2 2011/11/02 04:08:53
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

** DXCC: SP ; Square: JO84 ; start 2012-08-05 **

Rolf, DK2ZF will be qrv from Holiday Place in JO84TH Holiday style -
most of the time will be fishing.. hopefully succesful ! But will
join the Perseids !!! No internet - its an isolated site - 70.200
with QSX 69.950/990 for DL
SOURCE: tnx to Rolf, DK2ZF, direct to MMMonVHF

** DXCC: EI ; Square: IO42 ; start 2012-08-09 **

EI9E/P - Perseid meteor shower from IO42SD - LATEST NEWS from EI8IQ,
dated 2012-07-12: EI9E/P - Perseid meteor shower from IO42SD
We hope to be QRV from the evening of the 9th to the afternoon of
the 13th from IO42.(Dates may vary). Will be on ON4KST when operation
starts. Equipment,QRG,s,Modes,Dates to be decided and when confirmed
will be updated here. QSL Direct or via Bureau. For direct QSLs please
send via EI8IQ with donation to cover return postage.
SOURCE: tnx to EI8IQ direct to MMMonVHF

** DXCC: LA: Norway ; square JP60 ; start 2012-08-11 **

LA9DFA will activate JP60bg again this year. Primary target will be 144MHz,
but if more operators go with me this time, perhaps we will do some 70MHz and 50MHz to.
Will go to JP60bg sometime between July 23 and 29 to setup antennas for 144MHz.
Will do some operating that day to test antennas and PA. Will announce this on
ON4KST chat in advance. It's weather depended. Will use 2x9el and a 250W on 144Mhz.
Frequency and mode will be announced on ON4KST chat. Will operate random and please follow
me on Shout for info about beamheadings, frequency and tx-periode and so on.
Found that the following hams do need JP60 on 144MHz:
DD3SP DF5NK DF6YL DG1VL DG9YIH DH6DAO DH6JL DJ6AG DK5DQ DK7BY DK7LFG DL0UL DL1RNW DL1SUZ

CQ to Revamp Publication Schedule for Contest Results:

Posted: 01 Aug 2012 06:36 AM PDT
http://www.eham.net/articles/28707

(Hicksville, NY August 1, 2012) -- CQ magazine will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner, Editor Rich Moseson, W2VU, announced today. On average, contest results will appear four months sooner than at present. The new schedule will be phased in over the course of 2013 and will be fully in place by 2014.

Hamfest Invades Cullman:

Posted: 31 Jul 2012 05:02 PM PDT
http://www.eham.net/articles/28705

CULLMAN, Ala. (WIAT) -- When disaster strikes and the communication network breaks down there's always amateur radio. That's an old saying for HAM radio operators, many of whom were in Cullman this afternoon for the 6th annual Hamfest. The event is designed to bring radio enthusiasts together to swap stories and equipment but most importantly to get to build trusting relationships so everyone is ready when disaster strikes.

Amateur Radio Operators Help During Storm:

Posted: 31 Jul 2012 05:02 PM PDT
http://www.eham.net/articles/28704

The Chemung County Amateur Radio Emergency Service community was put on standby Thursday morning by the National Weather Service and Chemung County Emergency Services Director Mike Smith.

Radio operators followed the storm's development while broadcasting a standby message over a repeater system. When the storm hit, the radio operators provided real-time ground reports, by way of the SkyWarn network, to the weather service by direct radio contact to Binghamton.

RAC Bulletin 2012-040E - Canadian Call Sign Search RAC Web Site
2012-07-31

Over the past several months there have been a number of issues with regard to the "Canadian Call Sign Quick Search" which is available on the main page of the RAC website at <www.rac.ca>.

One issue was that the Amateur address information was displayed. The other was related to the Amateur's address being incorrect as listed.

Both of these issues can only be corrected*_by the holder of the call sign_*contacting Industry Canada (IC) at 1-888-780-3333, or via email tospectrum.amateur@ic.gc.ca <mailto:spectrum.amateur@ic.gc.ca>or creating a user account on the Industry Canada website athttp://www.ic.gc.ca/eic/site/025.nsf/eng/home. A link is provided on the call sign query results page that takes you directly to the page to create your account.

Since the Industry Canada database is downloaded daily to the RAC website, it can only be changed by contacting Industry Canada. There is a legal requirement by Industry Canada that Amateurs keep their address current in their file. If an Amateur chooses not to publish their information online, that option is available through Industry Canada.

Hopefully this will clarify these two issues in future. RAC would appreciate if this information was included in Club newsletters or other Club correspondence.

RAC Bulletin 2012-041E - Canadian Amateur Radio Clubs Listing
2012-07-31

There is a listing of Canadian Amateur Radio Clubs on the RAC website at http://www.rac.ca/en/amateur-radio/clubs/. The information contained in the listing is maintained by Geoff Smith, VA3GS, but it can only be accurate if it is updated. There are some clubs that have not been updated for a few years.

As of January 1, 2013, Geoff will delete any club listing that has not been updated within the last two years. And will be purged bi-annually in the future.

If your club is not current and the club wishes to have their club information listed, please contact Geoff Smith at cdnclubs@gmail.com.

This list is not to be confused with the RAC Affiliated Club list which is displayed under the link "Affiliated Club Program, RAC" in the Site Map on the RAC website.

Len Morgan, VE9MY
RAC Affiliated Clubs Program Coordinator.

NEWS RELEASE

For Release: IMMEDIATE (8/1/12)

For more information, contact: Rich Moseson, Editor

516-681-2922 / w2vu@cq-amateur-radio.com

CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS;

MAJOR RESULTS TO APPEAR FOUR MONTHS EARLIER

(Hicksville, NY August 1, 2012) -- CQ magazine will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner, Editor Rich Moseson, W2VU, announced today. On average, contest results will appear four months sooner than at present. The new schedule will be phased in over the course of 2013 and will be fully in place by 2014.

"The phase-in is necessary because of new and old dates overlapping," Moseson explained, "as well as scheduling needs for non-contest articles including our special focus issues and Dayton new product reports. As a result, some contest results will be temporarily relocated in 2013 and some specials will be rearranged as well.

"In addition, there will be two sets of CQ WPX Contest results published in 2013 -- the 2012 scores in January (SSB) and February (CW), followed by the 2013 results in September (SSB) and November (CW). The CQ World Wide DX Contest results, which currently appear in the August (SSB) and September (CW) issues, will be published as of 2013 in the April and May issues, respectively. For one year only (2013), the CQ World Wide VHF Contest results will be published in CQ VHF magazine, and will return to CQ as of 2014, appearing in the January issue."

This schedule change has been made possible by the fact that the vast majority of contest entrants submit their logs online, as well as advancements in technology for log-checking, earlier log submission deadlines announced last month and advances in publishing technology.

"For years, both participants and contest directors have been asking us to publish the results sooner," Moseson explained, "and at last, all of the pieces have fallen into place to make it possible. The new schedule represents the minimum amount of time needed to not only collect and process the logs, but to resolve issues with problem logs and take the necessary steps to assure the ongoing integrity of our contest results."

A complete calendar of contest results issues for 2013 and 2014 will be posted on the CQ website at www.cq-amateur-radio.com>.

Lasting Moments of First Excitement

Posted: 31 Jul 2012 09:52 AM PDT
http://forums.qrz.com/showthread.php?356083-Lasting-Moments-of-First-Excitement&goto=newpost

We are excited to announce that we have started on an ambitious project to expand the WS4FSM exhibit at the South Florida Science Museum that we are calling "Lasting Moments of First Excitement". To help raise the necessary funding we have launched a project on KickStarter to take our story to the world. We know Amateur Radio has had a significant impact on the technological developments of the 20th century. And we want to excite and inspire young minds with Amateur Radio to continue that tradition in the 21st century. The youth of today are not just the future of Amateur Radio but the future of scientific discovery.

Combining the technology available with computers and the information available via the Internet with the world wide wireless communications offered by Amateur Radio will lead to a new generation of creativity and scientific advancement. And with Amateur Radio as a motivator it will be a fun experience for those making the journey.

We invite you to visit our KickStarter project at http://www.kickstarter.com/projects/...rst-excitement and join with us in creating "Lasting Moments of First Excitement".

And please take a moment to visit our club website at www.wpbarc.com and "Like" us our Facebook page at www.facebook.com/WestPalmBeachAmateurRadioGroupInc

RAC Bulletin 2012-042E - Norm Rashleigh VE3LC to represent the RAC on the Canadian Interoperability Technology Interest Group (CITIG) 700 Mhz definition working group
2012-08-02

Recently, CITIG invited the Radio Amateurs of Canada, as a member group, to appoint a representative to the 700 Mhz definition working group. This group will help to define the network architecture and technical interoperability requirements for a Nation wide broadband mobile data network operating in the 700 Mhz band.

Norm has served the RAC in many ways. Currently he is the RAC Radio Advisory Board of Canada, RABC representative, and has just completed a term as Vice President Industrial Liaison. Norm, many thanks for your continued efforts on our behalf. We sincerely appreciate your knowledge and experience, and thank you for yet again coming to our aid.

==> + ARRL BOARD OF DIRECTORS: ARRL SOUTHEASTERN DIVISION VICE DIRECTOR
ANDREA HARTLAGE, KG4IUM, ANNOUNCES RESIGNATION

ARRL Southeastern Division Vice Director Andrea Hartlage, KG4IUM,
announced that she has resigned her position from the ARRL Board of
Directors, effective August 1. Hartlage -- who graduated from the
Georgia Institute of Technology in May -- will be moving to the
Washington, DC area to begin her career. The ARRL Articles of
Association require that a Director or Vice-Director must reside in the
Division. ARRL President Kay Craigie, N3KN, has appointed James

Millsap, WB4NWS, of Acworth, Georgia, to fill the vacancy, also effective August 1. Millsap, who has a background serving in the ARRL's Georgia Field Organization, currently serves as the ARRL Metro Atlanta District Emergency Coordinator.

"I want to make it clear that while I will no longer be a member of the Southeastern Division or a Board member, I plan to remain involved in ham radio and to continue serving the Amateur Radio community," Hartlage told Southeastern Division amateurs. "I will continue to be an active member of the Youth in the Second Century Committee, will continue to help the ARRL staff and Board in any way possible and look forward to becoming an active member of the Roanoke Division." Read more here <http://www.arrl.org/news/james-millsap-wb4nws-appointed-vice-director-of-the-arrl-southeastern-division>.

==> + ARRL BOARD OF DIRECTORS: MINUTES OF 2012 SECOND MEETING NOW AVAILABLE

The ARRL Board of Directors met <http://www.arrl.org/news/arrl-board-plans-for-2014-centennial-celebration-at-2012-second-meeting> July 20-21 in Windsor, Connecticut for its 2012 Second Meeting. The Minutes of that meeting have now been posted <http://www.arrl.org/board-meetings> on the ARRL website.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of July -- takes a look at the 2012 Second Meeting of the ARRL Board of Directors, an ARRL-sponsored webinar on hurricane response, an interview on ham radio with an astronaut, W1AW services, integration of the ARRL's LoTW program with CQ's WPX Award, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-48>.

==> + FCC NEWS: FCC DENIES PETITION SEEKING TO DESIGNATE NATIONWIDE EMERGENCY CALLING FREQUENCY

Saying that it believes that the Amateur Radio Service "allows flexibility to provide emergency communications in a way that takes into account channel availability and other local conditions," the FCC denied a Petition for Rulemaking on July 31 that sought to create a nationwide emergency calling frequency. The Petition -- filed by Bryan Boyle, WB0YLE, of Morrisville, Pennsylvania, and Jim Dixon, WB6NIL, of Alhambra, California -- called upon the FCC to designate 146.550 MHz as a "non-exclusive nationwide Amateur Radio Service emergency communications channel using FM wideband modulation." Read more here <http://www.arrl.org/news/fcc-denies-petition-seeking-to-designate-nationwide-emergency-calling-frequency>.

==> + FCC NEWS: FCC UPHOLDS $7000 FORFEITURE ORDER TO CALIFORNIA CB OPERATOR

After a Merced, California man refused to let FCC investigators inspect his Citizens Band (CB) radio station, the FCC issued -- and upheld -- a Notice of Apparent Liability for Forfeiture (NAL) for $7000 for not allowing the inspection. In issuing the NAL in March 2011, the FCC found that Ira Jones "apparently willfully and repeatedly" violated Section 303(n) of the Communications Act of 1934, as amended, and Section 95.426(a) of the Commission's rules (CB Rule 26) by failing to permit the inspection. Jones responded to the NAL, but the FCC upheld the forfeiture amount, saying that Jones' arguments were "irrelevant" and "unpersuasive." Read more here <http://www.arrl.org/news/fcc-upholds-7000-forfeiture-order-to-california-cb-operator>.

==> + IVICA DACIC, YU1YU, ELECTED PRIME MINISTER OF SERBIA

Former Serbian Internal Affairs Minister Ivica Dacic, YU1YU <http://sps.org.rs/en/president/>, was elected as that country's newest Prime Minister on July 27. He succeeds Mirko Cvetkovic, who served as Serbia's Prime Minister from 2008-2012. Dacic is the leader of the Socialist Party of Serbia; from 2008 until his election as Prime Minister, he served as First Deputy Prime Minister, as well as Minister of Internal Affairs. In March 2012, Serbia became a candidate for membership in the European Union (EU <http://europa.eu/index_en.htm>).

Dacic is a member of the Amateur Radio Union of Serbia (SRS <http://www.yu1srs.org.rs/>), Serbia's IARU Member-Society and is said to be a member of his local club, YU1AAV <http://www.yu1fjk.org/yu1aav/>. The club was founded in 1978 as one of nine sections of the Novi Beograd (New Belgrade) Amateur Radio Club, YU1FJK <http://www.yu1fjk.org/yu1aav/>. According to its website, YU1AAV's primary goal has been to teach kids Morse code and Amateur Radio Direction Finding skills: "The 1990s brought us war, sanctions and social crises, but it also brought the good opportunity to move kids from the streets to learn ham radio. These were the years when the most kids from the neighborhood finished the course to get their basic ham license."

Boban Kojic, YT9A, told ARRL Chief Executive Officer David Sumner, K1ZZ, that he was "happy that Ivica had become a ham and had passed his telegrapher's class. It is exciting that today's Prime Minister passed his second class exam in high school and has supported his club throughout the years. I first met Ivica at the 2005 Region 1 ARDF Championships in Tara, when I was SRS President. He helped to gather funds for the event, and together, we went from ministry to ministry in search of financial support. Ivica himself called the president of Bajina Bašta [a town located in the western mountains of Serbia where the opening ceremony would be held] and sought his assistance to fund the opening ceremony. Now this wasn't a small amount of money; it was money for the buses from Tara to Bajina Bašta and back, the renting of a stadium, cleaning and decorating, organization of about 15-20 minutes

of cultural and arts programs and cocktails for representatives of the national associations, as well as gift bags for each and every one of them."

In another e-mail to Sumner, Ivan Mastilovic, YU1LA, said that while he has not heard Dacic on the bands, "it is probably because his job takes all his free time. I have met him a few times with the SRS and he is a very nice young man with a real interest in Amateur Radio. No doubt that when his political career ends, he will be on the air more with a true love for ham radio. Now, as our Prime Minster, I'm sure he can help our ham radio community."

Prior to his election as Prime Minister, Dacic served as the spokesman for the Socialist Party of Serbia (SPS <http://sps.org.rs/en/>) from 1992-2000; he has served as president of the SPS since December 2006. He holds a degree in political science from the University of Belgrade. According to the SPS, Dacic, 46, is fluent in both Russian and English, is married and the father of two children. -- Thanks to ARRL MVP Associate Sanijela Zanovic for providing translating services

==> ON THE AIR: SPECIAL EVENT STATIONS IN LONDON AND WALES ON THE AIR FOR 2012 OLYMPIC AND PARALYMPIC GAMES

Two British special event call signs have been activated to celebrate the London 2012 Olympic and Paralympic Games: 2O12L from London, England and 2O12W from Barry, Wales. Both stations will be on the air for the duration of the Games -- July 25-August 12 -- and continuing through September 9. Organizers hope to make at least 80,000 contacts during the seven weeks that 2O12L and 2O12W are on the air. Read more here <http://www.arrl.org/news/special-event-stations-in-london-and-wales-on-the-air-for-2012-olympic-and-paralympic-games>.

==> SOLAR UPDATE

Tad "I'm up before the Sun <http://www.youtube.com/watch?v=k6o1vuNQmIo>" Cook, K7RA, reports: The average sunspot numbers this week were up more than 47 points to 99.3, while the average daily solar flux rose nearly 35 points to 131.7. The solar flux jumped from 139.8 on Tuesday, July 31 to 150.1 on Wednesday, August 1. The predicted solar flux is 155 on August 2-3, 150 on August 4, 145 on August 5-6, 140 on August 7, 135 on August 8-9, 140 and 130 on August 10-11, and back down to 120 on August 12-13. The solar flux is expected to drop below 100 on August 16-21. The predicted planetary A index is 10 and 8 on August 2-3, 5 on August 4-19, 8 on August 20-21, 5 on August 22-23, and then 8, 8, 12 and 8 on August 24-27. Look for more on the ARRL website on Friday, August 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by DEVO's Working in a Coal Mine <http://en.wikipedia.org/wiki/Devo>.

==> SILENT KEY: NOTED QST AUTHOR STEVE POWLISHEN, K1FO (SK)

Steve Powlishen, K1FO, of Madison, Connecticut, passed away July 28
due to complications from cancer. He was 60. An ARRL Life Member,
Powlishen was best known for his antenna designs for weak signal work.
His company, Lunar-Link Systems -- founded by Powlishen in 1994 --
manufactured and sold high-performance amplifiers that allowed more
amateurs to experience Earth-Moon-Earth (EME), often called
"Moonbounce," on 432 MHz. Powlishen -- who had 613 unique contacts on
70 cm EME -- penned more than 10 articles for QST, QEX and Ham Radio
Magazine on weak signal operation. Read more here
<http://www.arrl.org/news/noted-em-qst-em-author-steve-powlishen-k1fo-sk>.

==> + ARRL RECOGNIZES: CARL LUETZELSCHWAB, K9LA, WINS JULY QST COVER
PLAQUE AWARD

The winner of the July QST Cover Plaque award is Carl Luetzelschwab,
K9LA, for his article "Our Recent Solar Minimum and Sunspot Cycle 24
Progress." Congratulations Carl! The QST Cover Plaque award -- given
to the author or authors of the best article in each issue -- is
determined by a vote of ARRL members on the QST Cover Plaque Poll web
page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your
favorite article in the August issue today.

==> + W1AW: W1AW'S ECHOLINK AND IRLP NODES BACK IN SERVICE

With the recent upgrades
<http://www.arrl.org/news/disruptions-possible-as-arrl-reconfigures-internet-
services>
to the ARRL's Internet system completed, the W1AW EchoLink Conference
Server W1AWBDCT and W1AW's IRLP Node 4292
<http://www.arrl.org/echolink-irlp> are now back in service. Amateurs
are able to once again listen to code practice transmissions and
digital bulletins via the W1AW EchoLink Conference Server.

==> THIS WEEK IN RADIOSPORT

This week:

- August 3 -- NCCC Sprint Ladder
- August 4 -- TARA Grid Dip Shindig; European HF Championship
- August 4-5 -- ARRL UHF Contest
<http://www.arrl.org/news/the-bands-heat-up-for-the-2012-arrl-august-uhf-cont
est>;
North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 5 -- RSGB RoPoCo CW; SARL HF Phone Contest
- August 7 -- ARS Spartan Sprint
- August 8 -- NAQCC-EU Monthly Sprint
- August 8-9 -- CWops Mini-CWT Test

Next week:

- August 10 -- NCCC Sprint Ladder
- August 11-12 -- Maryland-DC QSO Party; WAE DX Contest (CW)

- August 12 -- SKCC Weekend Sprintathon; Feld Hell Sprint
- August 15 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- August 3-4 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2>, Austin, Texas
- August 3-5 -- Pacific Northwest DX Convention <http://www.arrl.org/hamfests/pacific-northwest-dx-convention-1>, Portland, Oregon
- August 11 -- ARRL Ohio State Convention <http://www.arrl.org/hamfests/ohio-state-convention>, Columbus, Ohio
- August 18 -- ARRL West Virginia State Convention <http://www.arrl.org/hamfests/west-virginia-state-convention-2>, Weston, West Virginia
- August 18-19 -- ARRL Southeastern Division Convention <http://www.arrl.org/hamfests/southeastern-division-convention-huntsville-hamfest>, Huntsville, Alabama
- August 19 -- ARRL Kansas State Convention <http://www.arrl.org/hamfests/kansas-state-convention-2>, Salina, Kansas
- August 24-26 -- ARRL New England Division Convention <http://www.arrl.org/hamfests/new-england-division-convention-1>, Boxboro, Massachusetts
- August 26 -- ARRL Western Pennsylvania Section Convention <http://www.arrl.org/hamfests/western-pennsylvania-section-convention-2>, New Kensington, Pennsylvania
- September 14-15 -- W9DXCC Convention <http://www.arrl.org/hamfests/w9dxcc-convention-2>, Elk Grove Village, Illinois
- September 15 -- ARRL Virginia Section Convention <http://www.arrl.org/hamfests/virginia-section-convention-virginia-beach-hamfest>, Virginia Beach, Virginia
- September 22 -- ARRL Washington State Convention <http://www.arrl.org/hamfests/washington-state-convention-36th-annual-spokane-hamfest>, Spokane Valley, Washington
- September 22-23 -- ARRL Illinois State Convention <http://www.arrl.org/hamfests/illinois-state-convention-peoria-superfest-2012>,

Peoria, Illinois
- September 28-29 -- SEDCO/W4DXCC VIII Convention
<http://www.arrl.org/hamfests/sedco-w4dxcc-viii-convention>, Pigeon
Forge, Tennessee
- October 12-14 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-pacificon-2012>,
Santa Clara, California
- October 13 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2012>,
Sergeant Bluff, Iowa
- October 13-14 -- ARRL Florida State Convention
<http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest-1>,
Melbourne, Florida

RAC Bulletin 2012-043E - RAC Incoming QSL Bureau
2012-08-02

Following changes made to the RAC QSL Bureau system, RAC members are reminded that all VE/VA cards to VE/VA amateurs are to be sent to the RAC Incoming Bureau in Saint John, not to the Outgoing QSL Bureau. QSL's sent to the Outgoing Bureau will experience delivery delays. This QSL service is only available to RAC members.

Also some amateurs are choosing not to receive QSL cards via the bureau. If you are one of those amateurs, please notify your respective bureau and also post your QSL requirements to services such as QRZ.com, etc. Thousands of QSL's are received annually, sorted, sent to the various Provncial/Territorial Bureau's at RAC's expense, only to take up valuable storage space and never claimed. Bureau volunteers would appreciate your assistance with this issue.

Len Morgan, VE9MY
RAC Incoming Bureau Manager

1409. Amateur Radio Newsline(tm) Report 1825 - August 3 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-08-03 09:00:18 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <20120803090002.7EBE033C91@panix2.panix.com>
Source record: 2326
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

Amateur Radio Newsline(tm) Report 1825 - August 3 2012

Amateur Radio Newsline report number 1825 with a release date of August 3rd 2012 to follow in 5-4-3-2-1.

The following is a QST. The United States prepares for W-R-C 2015, The FCC denies a request to create an emergency calling channel on 2 meters; South Africa's hams wonder if a change in the nations regulatory structure will affect them; the European Union provides protection for hams in interference cases and a new 2 meter radio will soon be on its way to the International Space Station. Find out the details are on Amateur Radio Newsline(tm) report number 1825 coming your way right now.

RESTRUCTURING: A LOOK AT THE UPCOMING WRC 2015

A proposed permanent secondary allocation to the amateur service at or near 5 MHz is among agenda items for the World Radiocommunication Conference in 2015. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

There are numerous items on the 2015 World Radiocommunications meeting agenda, as spelled out at the end of the recently concluded 2012 conference. One is the proposal for a possible new allocation to the amateur service on a secondary basis within the band 5.250 to 5.450 MHz. The International Amateur Radio Union has described such an allocation as being among the best for hams to use to provide around the clock emergency communications. So far, little in the way of objections has been heard in public.

According to the publication Radio World, it is the National Telecommunications and Information Administration that coordinates United States participation in the WRC conferences, doing so though a number of government departments and agencies are involved. According to N-T-I-A's website, the next conference will consider spectrum requirements for uses ranging from mobile service allocations for broadband to controlling unmanned aircraft from space.

These conferences are held by the International Telecommunication Union every few years to talk about international radio regulations. An FCC

advisory group will start to meet this month in preparation for the next one. The commission also has set up a website with information about WRC-15. While WRC-15 may seem far away, the planning for it is already getting underway.

For the Amateur Radio Newsline, I'm norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Another item of interest on the WRC 15 agenda is the feasibility of achieving a continuous reference time-scale. This either by the modification of coordinated universal time or some other method. (RW)

**

RADIO RULES: FCC DENIES PETITION ASKING FOR EMERGENCY CALLING FREQUENCY ON 2 METERS

Don't hold your breath waiting for the FCC to create a nationwide emergency calling frequency on 2 meters or any other Amateur Service band. That's because in denying a petition filed by Bryan Boyle, WB0YLE, of Morrisville, Pennsylvania, and Jim Dixon, WB6NIL, of Alhambra, California, the regulatory agency basically said that it's not necessary to have such a frequency cast in stone in the Part 97 rules. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, has the details:

--

Bryan Boyle, WB0YLE, and Jim Dixon, WB6NIL had jointly filed a rule making request that asked the FCC to designate 146.55 MHz in the 2 meter band as a non-exclusive nationwide Amateur Radio Service emergency communications FM channel. In their petition the pair noted that other services, such as Citizens Band Radio, the Aviation Service and the Maritime Service have specific channels set aside for emergency communications. They argued that a similar designated channel in the Amateur Service could serve the same purpose.

But in its denial order dated July 31st the FCC claimed that Dixon and Boyle had not shown that a problem existed that would be addressed by designating a nationwide Amateur Service emergency calling frequency. To the contrary, the regulatory agency noted that the rules as they now stand provide the Amateur Service with what it calls the flexibility to provide emergency communications in a way that takes into account frequency availability and other local conditions.

The FCC observed that under the current Amateur Service rules that licensed operators can use multiple channels on the same or different amateur bands if needed for an event. They can also use multiple channels in the same band when multiple, but different events occur.

Translated into plain English, what the Commission is saying is that plenty of spectrum exists on 2 meters and other ham radio bands for

radio amateurs to provide emergency communications services. This, without the regulatory agency stating that a given frequency is designated for that purpose.

The agency also noted that the Boyle and Dixon proposal for the channel to be a non-exclusive nationwide is essentially no different from the way things are right now. This is because all Amateur Service frequencies are already shared and as such they may be used for providing emergency communications as the need arises. If hams in a given region or even nationwide want to create such designated channels on a voluntary basis that the Amateur Radio community already has the authority to do so.

For the Amateur Radio Newsline, I'm Heather Butera-Howell, KB3TZD, near Berwick, Pennsylvania.

--

The bottom line. The FCC seems to be saying that if such a non-exclusive nationwide emergency calling frequency is needed, nothing in the Part 97 rules prevents the amateur community from voluntarily establishing such channels, be it on 2 meters or for that matter, any other Amateur Service band. (FCC)

**

RESTRUCTURING: WILL SOUTH AFRICAS NEW ELECTRONIC COMMUNICATIONS AMENDMENT BILL AFFECT AMATEUR RADIO

The South African Department of Communications is planning to create another body parallel to its Independent Communications Authority of South Africa or ICASA. This, to take over the singular duty of spectrum management.

This move comes as one of the many changes proposed in the Electronic Communications Amendment Bill of 2012. That is a measure that among other things calls for the establishment of a new Spectrum Management Agency within the portfolio of the Minister of Communications with the overall responsibility for the country's electromagnetic spectrum.

Along with the proposed law comes an explanatory document. It states that the Minister of Communications will act as the custodian of the spectrum on behalf of the people of South Africa as well as representing that nation before the International Telecommunications Union. This includes the allocation of the radio frequency spectrum to various radio communication services including amateur radio. The minister will also be responsible for all international spectrum matters pertaining to South Africa, including Regional and sub-Regional spectrum planning, all cases concerning international harmful interference and international frequency coordination.

The South Africa Radio League Council says that it is currently studying the draft bill to see what impact it might have on that

nations amateur radio service. South African radio amateurs are invited to send comments to the South Africa Radio League by August 15th. Please address them to secretary (at) sarl (dot) org (dot) za.

(SARL)

**

RADIO LAW: EUROPEAN UNION ACCEPTS EMC DIRECTIVE THAT PROTECTS HAMS

It appears as if ham radio operators in the European Union are safe from being treated as sources of massive radio frequency interference. On July 10th the Internal Market and Consumer Protection Committee of the European Parliament voted on a the new version of the an Electromagnetic Compatibility directive containing an amendment fostered by Germany's Deutscher Amateur Radio Club and the Political Relations Committee of the International Amateur Radio Union to protect the rights of radio amateurs. The original draft amendment to the definition of an "electromagnetic disturbance" could in the worst case have led to the signal of an amateur station being treated as an annoyance or intrusion. (Southgate)

**

HAM RADIO IN SPACE: NEW 2 METER RADIO TO LAUNCH TO THE ISS

A new VHF ham radio system will soon be headed to the International Space Station. At the July 17 ARISS meeting Kenneth Ransom, N5VHO, reported that his group is in the final stages of preparing the flight certification for of the replacement hardware for the degraded Ericsson 2 meter radio. That rig is part of the 2nd ISS amateur radio station that is located in the Columbus module.

According to Ransom, they had been hoping to launch of the equipment on flight 33-S on December 5th. Now however comes word that the new radio could be carried aloft ob flight 49-P that's slated to launch on November 1st. As such, Ransom's group is trying to finish the certification process in time for this earlier flight option.

The degraded Ericsson VHF radio may be returned on flight 32-S in October. The team is very interested in trying to determine what the problem has been with this particular piece of gear. And we will have more space related ham radio news later on in this weeks Amateur Radio Newsline report. (ARISS)

ENFORCEMENT: UNLICENSED OREGON OPERATOR FINED $15000

The FCC has issued a Notice of Apparent Liability in the amout of $15,000 to Joshua McMurchie of Prineville, Oregon. This for his alleged operation of a an unauthorized station on 97.9 MHz.

Back in 2011 agents from the FCC's Portland Office of its Enforcement Bureau responded to a complaint and traced the signal to McMurchie's home. Local law enforcement officers accompanied the FCC agents and left a Notice of Unlicensed Operation with another resident of the house and also mailed a notice as a backup. According to the FCC McMurchie signed for the latter notice in October 2011,

This past May, the FCC's Portland Enforcement Bureau received another complaint about an illegal station on 97.9 MHz. Both the FCC and Prineville Police officers went to his home, were granted admittance and found a transmitter broadcasting at that location. The FCC says that McMurchie admitted he operated the station and offered to surrender his equipment to the agents.

Now the FCC has issued a proposed penalty. In reaching its decision, the agency boted that the base fine for operating an illegal station is $10,000. However the commission fined McMurchie $15,000 because of his repeated violations. He too has the customary 30 days from receipt of the notice to pay the proposed fine or to file an appeal. (FCC)

**

ENFORCEMENT: FCC FINES CALIFORNIA CB OPERATOR $7000 FOR REFUSAL TO PERMIT STATION INSPECTION

The FCC has affirmed a $7000 fine issued to a California Citizens Radio operator. This after he refused to let the FCC inspect his station on several occasions. Amateur Radio Newsline's Bruce Tennant, K6PZW, is here with the details:

--

This case dates back to March 19, 2010. That's when agents from the San Francisco FCC Office responded to a complaint of interference to the radio communication system equipment of the Merced County Fire Department. The agents then monitored the radio transmissions on frequency 27.165 MHz and used radio direction finding techniques to locate the source of the signal associated with the interference to a CB radio station operating from an Ira Jones' residence in Merced.

The agents approached Jones, identified themselves and told him about the interference. He denied being the source of the interference. They then asked to inspect Jones CB radio station but he refused.

The scenario was basically repeated on August 27th, 2010 when FCC agents, this time accompanied by officers of the Merced Police Department again visited Jones residence. Once again they were refused

admittance. On both occasions the FCC issue Jones written warning notices that he refused to accept.

On March 10, 2011, the San Francisco Office issued a Notice of Apparent Liability for Monetary Forfeiture in the amount of $7,000 to Jones for failing to allow authorized FCC personnel to inspect his CB radio station. Jones responded to the N-A-L on March 30th. At that time he argued that he has not seen the complaints of the alleged the interference, that he did not receive the described warnings from the San Francisco agents, and that the agents did not produce valid identification cards.

But the FCC was not persuaded by any of Jones claims. On July 27th it affirmed the Forfeiture Order that gives Jones the customary 30 days to pay the $7000 fine or to file a further appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

This is the second time in recent weeks that an 11 meter C-B operator has been fined in relation to radio gear that in some way was found to interfere with some form of public service communications. In this case the fine is based not on the interference caused by the C-B operators station but rather because he refused an order from the FCC to inspect it. (FCC)

**

ENFORCEMENT: UNLICENSED OPERATOR CAUGHT ON VK REPEATER

An unlicensed operator who haunted an Australian repeater has been caught.

About three weeks ago several members of a radio club were contacted by what appeared to be a person operating with a phony call over the Redcliffe repeater. The operator was using the call sign VK4NFL. It did not take very long for that unidentified operator to get caught after authorities became involved.

Australia's Communications and Media Authority or A-C-M-A located the station and the matter is now in the hands of the Commonwealth legal authorities. It appears as though they do not waste very much time with unlicensed violators like this one, down-under. (WIA)

**

RADIO BUSINESS: HEATHKIT FILES FOR BANKRUPTCY

The Herald-Palladium newspaper says that the remnants of the famed Heathkit Company that once employed up to 1,800 people in St. Joseph Township, Michigan, is now on the auction block.

Owner Don Desrochers told the paper that the company, which was down to half a dozen employees at the end, defaulted on its lease and has filed for bankruptcy.

The organization was last known as Heathkit Educational Systems. Desrochers told the Herald-Palladium that this business was primarily dependant on federal and state funding for schools. Unfortunately, spending in education continued to drop and as such it was economically unfeasible to continue operating.

Founded in 1926 as an aircraft company, Heathkit shifted its focus to electronics after World War II when it bought surplus electronic parts to build kits. Heathkit left the kit business in 1992, focusing on educational materials, then announced it was getting back into the kit business in 2011. According to Desrochers it was losing the educational business faster than it could grow the electronics business, which was not sustainable.

RADIO TECHNOLOGY: AN FDMDV OPEN SOURCE 1400 BPS HF MODEM

David Rowe, VK5DGR, has made available open source software for a 1400 bps High Frequency FDMRV modem.

FDMDV stands for Frequency Division Multiplexed Digital Voice and is described as basically being a grouping of slow modems running in parallel. For example FDMDV has 14 carriers spaced 75 Hz apart, each running at 50 symbols a second. Due to multipath problems on the High Frequency bands this approach is claimed to work better than one carrier running at 700 symbols per second.

One of the applications of this modem technology will be Digital Voice since it offers fast sync, no multi-second training sequences, the ability to recover quickly after a fade, and no automatic re-transmit of "bad" packets.

Those interested in experimenting with HF digital voice using this technology can find further information and source code at tinyurl.com/hf-digital-voice-modem (Southgate)

NAMES IN THE NEWS: W1HEO RESEARCHING DXPEDITION COSTS

Dee Logan, W1HEO, is researching an article for the DX Magazine on the rising costs of DXpeditons and would like to hear from DXpeditioners for their comments on how to these ever increasing costs. Specific areas of interest include examples of specific costs and reasons for their larger amounts and suggestions for new sources or approaches to donations. If you can help please contact W1HEO by e-mail as soon as possible at deverelogan (at) gmail (dot) com (W1HEO)

**

NAMES IN THE NEWS: KA3HDO RETURNS TO AMSAT AS VP OF HUMAN SPACEFLIGHT

Frank Bauer, KA3HDO, has returned to AMSAT North America as Vice President for Human Spaceflight programs. Bauer stepped down from this position in May 2009 due to increasing work responsibilities at NASA. At the time he was the Chief Engineer for the Exploration Systems Mission Directorate at NASA Headquarters.

Bauer retired from NASA in September 2011. but has been unable to fully support ARISS or other human spaceflight pursuits. This is due to a post-retirement one year "cooling off" period with NASA and with the International Space Agencies. That period ends in about a month.

The Vice President for Human Spaceflight is a position that is appointed by the AMSAT President. It provides leadership and guidance to the AMSAT President, BoD and executives on AMSAT's Human Spaceflight Operations and Development. (AMSAT)

HAM HAPPENINGS: RADIO AMATEURS OF CANADA CANCELS 2012 NATIONAL CONVENTION

The 2012 Radio Amateurs of Canada National Convention slated for the weekend of August 10th to the 12th has been cancelled. According to a press release, planners cite a low number of per-registrants as one of the reasons that the Canadian national Amateur Radio society has taken this action. The organizers will be immediately refunding any registrations received prior to cancellation and say they are already working on plans for their 2013 show. They also apologized to anyone who had arranged other vacation or travel plans around this convention. What little else is known about the cancellation can be found on-line at convention 2012 dot rac dot ca. (VA7AEJ, RAC)

**

HAM HAPPENINGS: WEST VIRGINIA'S TARA CLUB TO CELEBRATE 50th HAMFEST

And a word of congratulations to West Virginia's Tri-State Amateur Radio Association which will host its 50th annual hamfest from 8:30 a.m. to1 p.m. on August 11th. For ithis golden anniversary the event will be at the Life and Health Center of Christ Temple Church complex in the city of Huntington. This is a new location will offer unlimited free parking and a new, modern facility for the event. More about the group is on-line at www (dot) orgsites (dot) com/wv/taraclub. (TARA)

HAM RADIO IN SPACE: EME CONFERENCE IN THE UK AUGUST 15 - 19

The 15th international EME conference hosted by the U-K Microwave Group is being held at Churchill College Cambridge between August 15th and 19th. It will also feature a star studded scientific cast. RSGB news reader Jeremy Boot, G4NJH, has the details:

--

This is the first time that this conference has been held in the UK, and it provides an opportunity to learn about this most technically challenging aspect of our great science based hobby. Earth-Moon-Earth communications has much in common with radio astronomy and deep space communications and, in addition to EME specific lectures, there will be presentations on both these subjects.

Two Nobel Physics Laureates from the world of Radio Astronomy will be present at the conference. Joe Taylor, K1JT is a keen EME enthusiast and will be presenting a paper on MAP65, while Professor Antony Hewish, FRS, is the speaker at the conference gala dinner on Saturday 18th.

With over 150 delegates and 60 partners from five continents already registered, this promises to be a great event.

I'm Jeramy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

More information on this event can be found on-line at www.eme2012.com. (GB2RS)

**

BEACON NEWS: THE KH6HME BEACONS ARE WELCOME TO STAY ON MONA LOA

The late Paul Lieb, KH6HME's beacon system located at the 8200 foot of Hawaii's Mona Loa Volcano in Hawaii is welcome by the site manager to continue to operate from that location.

According to Don Mussell, the KH6HME beacons are located in the building that was formerly under the control of KGMB-TV. Over the past few years that site was taken over by Hawaii Public Radio, and put under Mussell's supervision.

Mussell says that Hawaii Public Radio is happy to have the beacons located at the site and will leave the operation and maintenance to a ham radio club that also operates equipment inside the building. It will be up to them to decide if the beacon operation will continue. (Don Mussell, CGC)

**

EMERGING TECHNOLOGY: NANO COAX CABLES AND THEIR USES

Nano technology is in the news once again. This time as a way to store energy. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

--

With all the research on nano-technology, perhaps we shouldn't be surprised that one of the latest involves coaxial cables on a nano-scale.

The main interest in the nano-coaxial cable is as an energy storage device due to the very high capacitance between the inner and outer conductor. A study conduced at Rice University found that the capacitance of the nano-cable is at least 10 times greater than would be predicted with classical electrostatics. The capacitance of the new nano-cable is up to 143 microfarads per centimeter-squared.

Study co-author Jun Lou notes that for energy storage, he can envision a large scale energy storage device consisting of millions of tiny nano-cables side by side in large areas. Lou also says that this cable might also be used as a transmission line for radio frequency signals at the nano scale. This could be useful as a fundamental building block in micro and nano sized electromechanical systems like lab-on-a-chip devices.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW.

--

It appears as if nano technology has come a long way since we began reporting on it only a few short years ago. (TV Technology)

**

HAM HAPPENINGS: ILLW REGISTRATION STILL OPEN FOR AUGUST 18 - 19 EVENT

With 315 registrations so far, the 15th annual International Lighthouse and Lightship Weekend is headed for what right now appears to be yet

another record year for participation.

So far, Australia has the most registrations followed by the United States and Germany. With many other nations represented. Among the new ones are Austria, Chile, China, Curacao, Gibraltar, Honduras, Island of Man, Italy, Northern Ireland, Romania, Spain, Sri Lanka, Switzerland and the Ukraine.

With only a few weeks to go, there is still time to register a lighthouse or lightship for the 48 hour fun event slated for August 18th and 19th. To do this, simply visit illw.net for online registration and guidelines of the popular unique event. (VK3PC)

**

RADIOSPORTS: CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS

In contesting news, CQ magazine says that it will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner. According to Editor Rich Moseson, W2VU, on average, contest results will appear four months sooner than at present.

This change has been made possible by the fact that the majority of contest entrants submit their logs online along with advancements in technology for log-checking. Also assisting are the earlier log submission deadlines announced last month and advances in publishing technology.

The new schedule will be phased in over the course of 2013 and will be fully in place by 2014. A complete calendar of contest results issues for 2013 and 2014 will be posted on the CQ website at www dot cq-amateur-radio dot com. (CQ)

DX

In DX, Bill Moore NC1L, the ARRL Awards Branch Manager has announced that the 2012 H44UD operation from the Solomon Islands has been approved for DXCC credit. Cards for that operation may now be submitted.

On the air, listen out for HA9MDN who will be active stroke 9A from Vir Island. Operations will be on SSB, RTTY and SSTV. QSL to HA9MDN via the Bureau or using eQSL.

JH1DVG will be active as V63JX from Pohnpei Island between November 23-26th. His operations will be on 40 through 10 meters using various modes. QSL to his home callsign, direct or via the bureau.

Three operators will be on the air from Praslin Island between October 21st and November 4th. Their activity will be holiday style on 80 through 10 meters using CW, SSB and RTTY. QSL S79LC via I5IHE direct

only. QSL S79YY via I5OYY direct with an SASE or electronically using Logbook of the World. QSL's for S79XX go via IK5RUN, also direct with an SASE or using Logbook of the World.

Lastly, JA1XGI will be active as V63XG from Yap Island between December 5th to the 12th. His activity will probably be on 20 through 6 meters using mainly CW, with some SSB and Digital modes. QSO's will be uploaded to Logbook of the World as soon as possible. QSL via JA1XGI, direct or by the bureau.

Above from various DX sources

THAT FINAL ITEM: THE CASE OF THE VANISHED VENTURA CALIFORNIA UNLICENSED BRIADCAST STATION

And finally this week the story of the vanishing unlicensed broadcaster in the city of Ventura, California. Did he get scared off the air or did he simply get tired of playing a want-to-be broadcaster, Amateur Radio Newsline's Bill Pasternak, WA6ITF, has what we know about this interesting here and gone station:

--

Actually, what we know comes by way of Bob Gonsett, W6VR, and his CGC Communicator broadcast industry electronic newsletter. According to Bob, this past July 11th a complaint was filed with the FCC field office in Los Angeles concerning a n unlicensed station on 89.7 MHz reportedly operating from Channel Drive in the coastal city of Ventura, California. The station referred to itself as "KSSR... The People's Radio." It even had its own business card and Website.

But on July 25th the CGC Communicator received word that the station had vanished from the airwaves and has shut down their Website. In fact the last Web update was reported on July 24th and said - quote --"It was nice while it lasted."

According to the CGC Communicator, one of the people involved with the complaint isn't sure if the FCC paid the station a visit, or if the broadcaster saw his vehicle pass by in front of the alleged station location with an antenna in the middle of the vehicle roof and decided to shut it down before the FCC showed up. Either way, the unlicensed broadcaster is gone, at least for now.

So where does this all lead? According to the CGC Newsletter, for many the temptation to find such an unlicensed station is almost overwhelming. It is something most can do with simple direction finding equipment. That's fine if it can be done secretly. The problem with obvious and overt DFing is that the unlicensed station may shut down prematurely only to surface again elsewhere.

The CGC Communicator says that in dealing with unlicensed broadcasters that there is a definite advantage in letting the FCC handle these

cases from start to finish. The CGC Communicator notes that once a federal case is opened, the unlicensed station is more likely to stay off the air and that means a lot less work for everyone involved.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, not all that far from Ventura in the Newsroom in Los Angeles.

--

By the way, according to Bob Gonsett, W6VR, the real KSSR-FM is located in the city of Santa Rosa, California and operates on 95.9 MHz. (CGC Communicator)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

WIANEWS WEEK COMMENCING AUGUST 5 2012.

ALARA CONTEST reminder

ircDDB DStar-net Wednesdays 19:30 AEST on DCS014B

WIA RD Contest latest

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING AUGUST 05 2012.

Hello, I'm Peter Ellis VK1PE, host for the opening speeches of the annual
Remembrance Day Contest next weekend. I have again asked a senior serving
Defence officer to give the opening keynote speech.

His biography reads like a world map. He is a civil engineer, who has:

Seen military service in Bosnia, Timor Leste, Tonga, PNG and Afghanistan;
Had United Nations service as a civilian in Niger (West Africa); and
He has commanded the 3rd Combat Engineer Regiment based in Townsville.
and... in January 2013 he takes over as the Defence Attach in the
Australian Embassy in Paris, France.

Here is a snippet from the speech.

SPEAKER:
I wish to acknowledge the five Australian soldiers who have been killed in Afghanistan since the last RD Contest:

Private Matthew Lambert (2RAR),
Captain Bryce Duffy (4Rgt, RAA),
Corporal Ashley Birt (6 Eng Spt Rgt),
Lance Corporal Luke Gavin (2RAR), and
Sergeant Blaine Diddams (SASR).

VK1PE:
So, please listen for the opening speech in the 20 minutes before the RD Contest opens at 0300 UTC, Saturday 11 August 2012.

Over to you.

Peter
VK1PE

WIA RD OPENING ADDRESS AUDIO AVAILABLE FROM 1000 UTC WEDNESDAY AUGUST 8 2012

You will find it on the WIA RD Page along with the rules for 2012.
http://wia.org.au/members/contests/rdcontest/

Also on the WIA Home page from Wednesday Evening in association with any last minute updates/news about the 2012 RD.
http://wia.org.au

MOST IMPORTANT:-
The start time of the RD is earlier this year, hence you will need to play this special program at exactly 0240 UTC Saturday 11 August 2012

"Good Luck In The Contest!"

SPECIAL EVENTS AND ON AIR CONTEST COLUMN - D A T E L I N E 2012

Hello, this is Alan, VK4SN, RD Contest Manager.

Remember to keep August 11th and 12th free for the RD contest.
This year, a new start and finish time of 0300z applies.
That's 1PM eastern Australian Time.

Trophy donors have come forth to sponsor some sections of the contest.
These include

1. South Pacific Contest club - Multi-multi section
2. CW Operators QRP Club - Highest scoring QRP station
3. VK Classifieds - Highest scoring individual
4. VKham - Highest Scoring rookie.
5. Contest Director, Trent VK4TS - Highest scoring team.

Thank you for supporting Australia's Premier contest.

Sincere thanks to participating software writers, Mike VK3AVV for his VKCL Logger, and John Drew VK5DJ for his RD logger, and Deane VK3TX for his Cabrillo log checker. All have liaised closely with me regarding the new rules

and Cabrillo template, to help bring smarter logging and log checking in to our modern times.

If you wish to form a team, remember to email the contest manager with your selected team members . All info can be found in the rules.

Hoping to make contact with you in the contest. Good luck to everyone.

73 This is Alan, VK4SN

"Hi, this is Lesley, VK5LOL, the Alara Contest Manager. The 32nd Alara Contest is on the last weekend of this month, Saturday 25th and Sunday 26th from 0400 UTC to 1359 UTC each day; that is 0400 UTC to 1359 UTC each day. Details are on the ALARA website. This is where OMs can talk to lots of YLs. Don't disappoint them girls! Look forward to hearing you all on air, Lesley VK5LOL."

Again the RD date is August 11-12, ALARA August 25-26

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

When people think of DXpeditions, they think of operators under palm trees on exotic islands with the world of amateur radio enthusiasts trying to talk to them.

While this is where every DXpedition tries to get to, there is a LOT of work that has to happen before this is possible!

ED VK2ARE, Australian Publicity Officer for ZL9HR gives us a great insight in this report.

"Months or even years before, the event planning starts and permits are requested, equipment assembled and transport both of equipment and operators arranged.

Accommodation organised and all red-tape worked through. All of this requires a lot of work from the organisers and also requires finance in the form of contributions from those taking part in the event and from sponsors. Without sponsors no DXpedition can take place and the ZL9HR DXpedition to Campbell Island on November 28 to December 9 this year is no exception.

This DXpedition is rightly being billed as one of the most important DXpeditions in 2012 and the HARAOA is very happy to announce that many of the sponsors that supported earlier DXpeditions are helping again with ZL9HR. It is hoped that there will be additional sponsors "signing up" over the next few weeks, but we would like to thank those who have already committed to support the DXpedition.

Commercial sponsors:
RF Solutions
Spiderbeam

Club & Organisations;
British Colombia & Northwest Washington - ORCA DX & Contest club
Danish DX Group

German DX Foundation.
Lone Star DX Association.
Long Island DX Association.
Mediterraneo DX Club.
Northern Illinois DX Association.

There are also currently 24 individuals who are sponsoring the event.

For the complete up-to-date list please refer to
ZL9HR.COM

The survey on the website is also getting a good response with keen DX-ers
who are looking to get ZL9 on a particular band and mode to move towards a
DXCC or other award voting for their preferences. Please don't miss out if
you haven't already placed your vote please do so.

73 From ED VK2ARE, Australian Publicity Officer for ZL9HR and member of the
Hellenic Amateur Radio Association of Australia."

For those that missed the recent 9 M 0 L DXpedition to Spratly Island there
is another opportunity coming up to work this quite rare DXCC entity.
>From 7 - 13 August 2 operators will be active from Spratly using the callsign
9M4SLL. They will be on 80 - 10m using CW, SSB and RTTY.
QSL manager is M0URX.

A group of operators from Switzerland known as the Radio 7 Team will be
active from Rodrigues Island as 3 B 9 SP from between October 16 and 23.
Most operation will be on CW and SSB with some RTTY and PSK 31.
QSL via HB9ACA.

As part of the 50th Anniversary of Independence celebrations in Algeria
several special stations are active until the end of 2012.
Prefix hunters will have the opportunity to work 7U50I, 7V50I, 7W50I and
7Y50I.

E I 25 D B Dublin Bus celebrates its 25th Birthday.
To celebrate the event a Special Event Station EI25DB will be aired
between 1st July 2012 and 30th June 2013.
QSL to EI 9 HQ or LOTW

The team who were so "bad" at Cape Liptrap last August have decided to be bad
again! VK3BAD that is. At the end of August a 20 strong team will travel
into the Otway Ranges. The Station will operate on most HF frequencies 160 - 10mtrs
and on 6 and 2 metres and 70cm with contact to the Melbourne Area via the
Geelong 2 mtr repeater.

So please listen out for VK3BAD on 31st August through until September 3rd.

Further details on QRZ.com under VK3BAD

Prefix hunters, remember Croatia is marking their 20th Anniversary of the
allocation of the 9A prefix. Operators there are now permitted to insert the
figures '20' into their callsigns.

For example 9A2AA will become 9A202AA, 9A1MM becomes 9A201MM etc.

These prefixes are available throughout 2012.

Hefty fine for hoax mayday caller

A Tasmanian (VK7) man who made hoax mayday calls has been ordered to pay the Australian Maritime Safety Authority $30,000 for sparking a major air and sea search.

In April 2011, Damien Goodluck made two hoax calls on marine radio indicating a fisherman was in trouble off Bruny Island.

The Magistrate's Court heard the 30-year-old was under stress at the time, suffering from the breakdown of his relationship with his mother and the loss of his father.

The court also heard that he suffered from limited intellectual capabilities.

Magistrate Olivia McTaggart ordered Goodluck to do 140 hours of community service and set a good behaviour period of 18 months.

Randolph Wierenga from the Police Association of Tasmania says the sentence should serve as a deterrent.

"You're talking about police officers, you're talking about significant physical resources to go out and respond to calls like this and they have to be treated seriously and when people needlessly make these calls then the full penalty of the law should apply," he said.

Spam-not in our backyard

Sophos's international spam-relay rankings indicate that Australia's ranking has markedly improved from 25th in September 2011 to 52nd in the most recent quarter, with Australia accounting for only 0.26 per cent of spam globally.

Spam is a global problem, said ACMA Chairman Chris Chapman. 'But you can't deny the success we have had in Australia. With the ACMA's record in penalising scammers and getting businesses to avoid spamming, as well as world class Australian Internet Security Initiative, we are streets ahead of many other parts of the world.

'In 2011-12, the ACMA saw a sixfold increase in spam reports,' Mr Chapman added. 'This massive increase tells us that our awareness activities have worked. Australians know to "Ignore it; Report it; and Delete it" as our consumer slogan says. Every scam email and SMS reported to us is a message that doesn't potentially catch out an Australian.'

In the last financial year, the ACMA gave 4,200 informal warnings to businesses about potential breaches of Australia's spam laws.

THERE'S A STAR ON VK4BJT'S HORIZON... A D-STAR

"Hello out there, I'm here to let you know that D-Star in Australia has entered a new level in its development, one that opens the way for it to become a more vibrant and reliable network inside Australia, and Internationally.

This has been made possible with the introduction of the ircDDB network.

The ircDDB network is an open and responsive network that promotes the use of both Icom and non-Icom repeaters, and other hardware.

A new D-Star DCS Reflector has been commissioned in Australia. Located in Sydney, and administered from the Gold Coast, this reflector will cover not only Australia, but most likely Oceania. With its 26 modules and other technical advances, it is a vast improvement on the existing reflectors, and it will be actively maintained in order to provide a dependable and responsive foundation on which to base D-Star communications.

We hope many of you out there will dust off your Icom D-Star transceivers and dongles, and meet us on the ircDDB DStar-net on Wednesdays 19:30 AEST on DCS014B.

If your local repeater is not ircDDB enabled, we urge you to contact your repeater administrator and discuss options for expanding access to the D-Star network.

Any queries join the Yahoo group called DCS014, which is an uncensored and unmoderated forum.

I'm John VK4BJT President of the Gold Coast Amateur Radio Society, C U on DStar."

Interesting speaker meetings

In response to the interest shown to the Council of Amateur Radio Victoria, it has introduced quarterly meetings where members can come along and listen to expert speakers on various topics.

The first meeting is on Tuesday August the 14th with popular presenter Mark Tell, from the ACMA.

Support the speaker meeting by turning up at 8pm on the night at 40g Victory Boulevard, Ashburton.

Other speaker nights will be in November, during next year's Centre Victoria RadioFest, and at the Annual General Meeting in May.

TARC Member Subs time

To all TARCadians, a timely reminder that your member subs for 2012/2013 needed to be paid by the 30th June 2012.

Get on it right away and contact Treasurer Bob VK4AAH if you are having any problems paying.

Bob can be contacted on telephone 07-47880939 a/h

Now from the Sunshine Coast VK4VP

Sunfest - Its on again for 2012

Its getting close to Sunfest time again, this year the date is September 8 and it's in the usual spot as the past few years at the Woombye School of Arts building in the main street of Woombye starting from 09:00.

The usual tables of equipment will be there along with great food and friendship.

Tables are $20 each and that gets you two entry tickets and general entry is a low $5 each. There will be signage and a call in on the linked repeaters of 146.825 and 146.850.

For more information or to book a table contact the Sunfest Coordinator Glenn VK4FSCC on 07 5437 2183, 0415 662 577 or email sunfest@vk4wis.org

We hope to see you there

F-Troop is a weekly net that has been running since June 2011. During that time we've had over 350 contacts with amateurs across VK6. F-troop is intended for new and returning hams and it's a place to get your feet wet in a place where other amateurs are happy to help newly licensed amateurs get on-air and participate. F-troop is run as a "spoke and hub" net, which means

that you only need to remember two callsigns, yours and that of the host, which at the moment is mostly me, though over the past year several others have kindly hosted the net in my absence and I expect that to continue, to the point where anyone who wants to have a go at hosting a net can do so, the more the merrier.

F-troop runs for about an hour every Saturday morning at 08:00 WST, or midnight UTC and as of two weeks ago you don't need to be in range of the VK6RAP repeater in Roleystone in Western Australia to participate. Thanks to the work of Ronald VK6XS and the conference run by Tony VK3JED, we now can announce that F-troop is also available via EchoLink and IRLP.

To participate, you need to either connect your local repeater to the 9558 IRLP node, or connect to the VK3JED EchoLink conference. If you're unsure how to do that, the details can be found online at the club website of the Hills Amateur Radio Group

harg.org.au

So, next week you'll be able to check-in and say hi to other amateurs. I should point out that this is not a net exclusively for Foundation calls, anyone who is interested in welcoming new and returning hams is encouraged to participate.

Those details again, it's the 9558 IRLP node or the VK3JED EchoLink conference. F-troop runs for about an hour every Saturday morning at 08:00 WST, or midnight UTC.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

HEATHKIT DECLARES BANKRUPTCY, CLOSES FOR GOOD (AGAIN)

Heathkit employed more than 1800 people in its heyday after World War II.

When it finally closed, its workforce totalled fewer than six people.

This is the second time since 1992 that Heathkit Educational Services has shuttered its doors. In August 2011, Heathkit announced it was returning to the kit building business, and in September, that it would once again be manufacturing Amateur Radio kits.

But it was not to be!

Read more here

THE SOUTH AFRICAN ELECTRONIC COMMUNICATIONS AMENDMENT BILL

The Department of Communications is planning to create another body next to ICASA to take over spectrum management. One of the many changes proposed in the Electronic Communications Amendment Bill, 2012 is the establishment of a Spectrum Management Agency within the portfolio of the Minister of

Communications with the overall responsibility for the country's spectrum as contemplated in the White paper on Broadcasting Policy, 1998.

The explanatory document addendum to the bill states that the Minister of Communications acts as the custodian of the spectrum on behalf of the people of South Africa. It further states that the Minister represents South Africa in the ITU. This includes allocation of the radio frequency spectrum to various radio communication services, like amateur radio.

Android phones hijacked via 13.560 MHz radio

The BBC report that a skilled hacker has shown how to hijack a smartphone via a short-range radio technology known as Near Field Communication (NFC).

NFC operates in the short wave band using a frequency of 13.560 MHz

New Russian Satellite RS-40

Was built by students and research staff of the Siberian State, Aerospace University and launched on July 28 and it's understood signals from RS-40 are on 435.365 MHz.

Appointment of KA 3 HDO as VP-Human Spaceflight Programs.

AMSAT-NA President Barry Baines has announced effective August 1, Frank Bauer, KA 3 HDO, will be returning as AMSAT's Vice President for Human Spaceflight Programs.

This role will include AMSAT's leadership on the Amateur Radio on the International Space Station (ARISS) Program and amateur radio pursuits on other Human Spaceflight vehicles proposed by NASA, International Space Agencies and domestic and international commercial spaceflight organizations.

WW SPECIAL INTEREST GROUPS --- IOTA
http://rsgbiota.org

International Lighthouse & Lightship Weekend

ILLW, IOTA and Tasman Island

Mike VK7FB lets us know that as far as he knows, there has been no amateur HF activity on Tasman Island since 1969 when Anne, then VK7LY, and Mike, VK7FB, lived in the number 3 quarters.

>From the 18th until the 25th of August, Anne, now VK7BYL, and Mike will be out there again as part of the "Friends of Tasman Island" maintenance visit, coinciding with the ILLW.

Power will be provided by a portable generator.

Mike and Anne will be accommodated in the same house, number 3, and will probably have the gear in the same room as before!

For those who collect numbers, the locator is QE46AS, the ILLW number is AU0101 and the IOTA number is OC-233.

http://illw.net/

(73, Mike, VK7FB)

WW SPECIAL INTEREST GROUPS --- ILLW

ILLW continues toward another record year

With around 370 registrations for the 15th annual International Lighthouse and Lightship Weekend, there will be plenty of on air activity for this 48 hour fun event.

North, Central and South America have 80 stations registered. In the USA alone there are more than 55 stations.

For the United Kingdom a total of 45 registrations have been received and in Europe many more are to be worked.

Nearly 70 have been received from Australia and New Zealand. There are stations in Asia, Russia, South Africa and lots more locations.

No matter where you are there will be plenty to work. Most issue special QSL cards.

The International Lighthouse and Lightship Weekend is on August the 18th and 19th. Visit the website ILLW.NET for an online registration and explore it for more details.

(Jim Linton VK3PC)

WW SPECIAL INTEREST GROUP --- NAVAL

The Royal Naval Amateur Radio Society in the UK has organised a social event in Coventry. It will take place on Friday 14th, Saturday 15th and Sunday 16 September.

A special event callsign GB 0 CGT has been issued

For details see the Society web site: rnars.org.uk

WW SPECIAL INTEREST GROUPS --- QRP and WEAK SIGNAL COMMUNICATION

The Russian QRP Club is celebrating its 10th anniversary this year and is using the callsign R 10 QRP during August.

Listen out for R 10 QRP from the RU QRP Rally which started last Thursday and runs till today, Sunday 5th August.

The rally is a 4 day camp on the banks of the River Ugra, around 200 miles SE of Moscow

RAOTC August REMINDER.

Hallo everyone, this is Clive VK6CSW. Tomorrow Monday August 6th is the first Monday of the month and that means it's time once again for the RAOTC bulletin.

The principal HF transmissions can be heard on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for Eastern states listeners, and again at 0200 beamed West for Western Australia.

During tomorrow numerous local relays will also take place on various VHF and lower HF frequencies. To find a frequency and time for your area, please visit the RAOTC website at www.raotc.org.au

Everyone, RAOTC members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, stories and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday August 6th.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh'.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

http://forums.qrz.com/showthread.php?356353-All-portable-and-special-event-stations-please-read&goto=newpost

I get several eqsl`s each month from stations who were portable/mobile or were using a special event call not their home station call but they send out eqsl with home call which I reject because it is not the call sign in my logbook you were using at the time we worked. Please guys create a linked account at eqsl & LOTW with your portable or special call sign. For eQSL log into your account go to the home page, my accounts, create new account (middle lower page). This new account will be linked to your home call sign.

LOTW has similar features for these situations I look forward to confirming our contacts with the correct call.

Thank you for reading post just wanted to get this off my chest.

RAC Bulletin 2012-044E - Conference Cancellation: Edmonton, Alberta, August 10,11,12.
2012-08-03

The organizers of the Conference that was to be held at the Concordia University College in Edmonton, Alberta, on 10, 11, 12 August 2012 have advised RAC that the Conference has been cancelled.

RAC wishes to thank the organizers for their hard work in preparing for that conference and regrets the need for the cancellation. RAC understands that those persons who have registered are in the process of having their registration fee refunded and that the Conference Organizing Committee will be contacting registrants directly. If you do not hear from the Organizers then you may wish to contact them by email at :convention2012@rac.ca <mailto:convention2012@rac.ca>or telephone 780-466-5779.

SARL NEWS - SUNDAY 5 AUGUST 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on "Amateur Radio Today" and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 MHz FM from Pretoria with relays on 7 066 and 3 695 kHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that we have to announce that the key of Clive Bean, ZS6AVP, went silent on Wednesday morning at 06:45 after a long struggle with cancer.

Our sincerest condolences to his relatives and many friends.

(PAUSE)

In the news today:

BOOK NOW FOR THE RTA IN GAUTENG ON 18 AUGUST

A LOOK AT THE UPCOMING WRC 2015

SARL HF CONTEST

You are listening to ZS6SRL. Stay tuned for more details on these items and other important and interesting items.

BOOK NOW FOR THE RTA IN GAUTENG ON 18 AUGUST

Bookings have opened for the Radio Technology in Action Symposium to be held at the National Amateur Radio Centre on Saturday 18 August. Full details of the symposium are available on line at www.sarl.org.za. Eddie Leighton, ZS6BNE, joins the RTA team on 18 August with a presentation about RaDAR, Rapid Deployed Amateur Radio. It is a fun presentation with hints and kinks how to fun from outdoor amateur radio.

If you pre book you will automatically take part in a prize draw for the ARRL Book "Basic Antennas". If you like a programme to be sent to your inbox send an email to rta@sarl.org.za with RTA NARC in the subject line and a PDF copy will be mailed to you.

A LOOK AT THE UPCOMING WRC 2015

A proposed permanent secondary allocation to the amateur service at or near 5 MHz is among the agenda items for the World Radio Communication Conference in 2015.

There are numerous items on the 2015 World Radio Communications meeting agenda, as spelled out at the end of the recently concluded 2012 conference. One is the proposal for a possible new allocation to the amateur service on a secondary basis within the band 5,250 to 5,450 MHz. The International Amateur Radio Union has described such an allocation as being among the best for radio amateurs to use to provide around the clock emergency communications. So far, little has been heard in public in the way of objections.

The SARL has applied for a license for pilot operation on 5 MHz for propagation experimentation purposes. ICASA recently told the SARL that the agency is looking at suitable frequencies and expects to make a decision soon.

DO YOU HAVE BACK COPIES OF RADIO ZS?

The SARL is in the process of binding Radio ZS in book form but has some copies missing. If you have, and can spare the following editions, please contact Francois, ZS6BUU, on 011 679 5260

2003 Mar/Apr, May/Jun, Jul/Aug, Sep/Oct 2004 Jan/Feb. Mar/Apr, May/Jun 2009 Sep/Oct, Nov/Dec 2010 Sep/Oct, Nov/Dec 2011 May/Jun, Jul/Aug.

SARL HF CONTEST

The SARL HF Contest will take place today from 15:00 to 18:30 CAT. Get the full details in the SARL Update mailed to your inbox a few days ago or visit www.sarl.org.za.

Besides the certificate and trophies there are some additional prizes to be won. The winner will receive a 2012 ARRL Handbook. All logs will be entered into the lucky draw of an ARRL book "Basic Antennas". There is also a best shack photograph competition. Send in a high resolution photograph of you operating in your shack and you will go into the draw for an ARRL Antenna Book. Send the picture to saardt@intekom.co.za.

SWAINS ISLAND DXPEDITION

Barry, ZS1FJ, reported to SARL News that he is a team member of the Swains Island DXpedition from 5 - 19 September. There are 20 operators, 16 American, 1 Swede, 2 Germans and 1 South African. Swains Island is very rare and is no 30 on the world's most wanted list.

It is important that ZS stations who want to work KH8S should inform Barry of the beam headings from that part of the Pacific to ZS. The team has a target of 300 QSOs worked per hour! Barry also requires the times of the day in UTC time when you would expect to hear KH8S. This is vital. Contact Barry by email to bf207@starhub.net.sg.

The team will fly from Honolulu to Pago Pago in American Samoa and then sail on a chartered boat for a 24 hour trip to Swains Island. There is no communication whatsoever. They will operate there with seven stations. After that, the boat picks up the team and returns to Pago Pago and they fly back to Honolulu. The team will be in tents and have two cooks who come with from Pago Pago.

Barry says he is taking a South African flag for ZS1FJ and a Singapore flag for his 9V1FJ call.

Logs are uploaded daily by satellite. If you have a PC system with Clublog, you will see the picture and name of the operator. The DXpedition website is www.nh8s.org.

IVICA CVETKOVIC, YU1YU, ELECTED PRIME MINISTER OF SERBIA

Former Serbian Internal Affairs Minister Ivica Dacic;, YU1YU, was elected as that country's newest Prime Minister on July 27. He succeeds Mirko Cvetkovic who served as Serbia's Prime Minister from 2008-2012. Dacic is the leader of the Socialist Party of Serbia; from 2008 until his election as Prime Minister, he served as First Deputy Prime Minister, as well as Minister of Internal Affairs. In March 2012, Serbia became a candidate for membership in the European Union (EU).

Dacic is a member of the Amateur Radio Union of Serbia (SRS), Serbia's IARU Member-Society and is said to be a member of his local club, YU1AAV. The club was founded in 1978 as one of nine sections of the Novi Beograd (New Belgrade) Amateur Radio Club, YU1FJK. According to its website, YU1AAV's primary goal has been to teach kids Morse code and Amateur Radio Direction Finding skills: "The 1990s brought us war, sanctions and social crises, but it also brought the good opportunity to move kids from the streets to learn ham radio. These were the years when the most kids from neighborhood finished the course to get their basic ham license."

Prior to his election as Prime Minister, Dačić served as the spokesman for the Socialist Party of Serbia (SPS) from 1992-2000; he has served as president of the SPS since December 2006. He holds a degree in political science from the University of Belgrade. Fluent in both Russian and English, Dacic is 46, married and the father of two children.

WIN A HUGE ARRANGEMENT OF FLOWERS IN THE YL SPRINT

To celebrate Woman's Day, the SARL is holding its annual YL Sprint on 9 August 2012 from 11:00 to 12:00 CAT. The logs from all YL participating in the event will be entered into the lucky draw for a beautiful flower arrangement to be delivered to the winner's home. To qualify please

include your home address in the log submission.

The exchange is a signal report and YL or OM. The sprint takes place in the 40-metre band, 7060 to 7100 and 7130 to 7200 kHz. Contacts between YL stations are worth 5 points. Contacts between YL and OM stations are worth 3 points and contacts between OM stations are worth 1 point.

Log sheets and summaries shall be submitted within 7 days after the contest, by e-mail to zs4bfn@netactive.co.za or by mail to the Bloemfontein RAC, Box 12104, Brandhof, 9324.

Closing Date for Log Submission: 16 August 2012.

HAVE YOU RENEWED YOUR SUBSCRIPTION OF THE SARL?

If you have not yet renewed your subscription for the current year, please do so urgently to avoid loosing membership benefits. Invoices were mailed during June and were due for payment on 1 July. If you did not receive an invoice or have mislaid it, please call Mariska on Monday at 011 675 2393 or mail her at admin@sarl.org.za.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected solar activity will be at low to moderate levels. There are currently many sunspot regions visible but none are posing a threat for strong solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 95.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the higher solar activity.

For the afternoon's SARL SSB contest it will be best to start on 20 m as contacts between all the divisions will be possible. Later in the afternoon 40 m will be best before the day can be ended on 80 m.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

5 August - That is this afternoon, SARL HF competition, 13:00 to 16:30 UTC. 5 August - YL Sprint from 11:00 to 12:00 CAT. 15 August - ELECTRONIC COMMUNICATIONS AMENDMENT BILL, last date to send comments to the SARL by email to secretary@sarl.org.za. 16 August - Last day to submit logs for the YL Sprint to zs4bfn@netactive.co.za or Bloemfontein RAC, Box 12104, Brandhof, 9324. 18 August - RTA in GAUTENG, pre-book now to also enter for an additional prize draw. 19 August - SARL HF digital competition. 26 August - SARL HF CW competition.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding

the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by Dick, ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George Honiball, ZS6NE.

Thank you for listening. 73. /EX

U.S. Coast Guard Day...04 August 2012...K7IWH.

Posted: 03 Aug 2012 08:19 PM PDT
http://forums.qrz.com/showthread.php?356490-U-S-Coast-Guard-Day-04-August-2012-K7IWH&goto=newpost

K7IWH will host a special event on Saturday 04 August 2012 from 0001 to
2359 Pacific Day Light Savings Time (Uniform Time). Celebrating the 222nd
anniversary of the founding of the U.S. Coast Guard on

20 metres from 14,240 to 14,250 mHz, where ever a frequency is available.
If the band is too crowded we will move to 15 metres in the General Class
sub-band. All USCG affiliated stations please suffix your call with "stroke
Charlie Golf". Please note that operators will be taking breaks and may be
called away for other jobs. SWL reports are welcome. QSL via K7IWH. If your
station worked K7IWH/MM/R2 in the 1950s through the 1970s we hope to hear
from you again.

SEMPER PARATUS Tom, Wil and Dan.

North GA Laryngitis Net frequency Change, Effective 8-9

Posted: 02 Aug 2012 06:14 PM PDT
http://forums.qrz.com/showthread.php?356360-North-GA-Laryngitis-Net-frequency-Change-Effective-8-9&goto=newpost

Hi Friends,

first, a Big thank you to all the Hams who have checked into the net, We've had a lot of fun, Lots of laughs and great information too. Due to "bumping heads" with other established Nets, We are going to QSY to 28.320 effective 8-9-2012. the Net will still be on thursday nights at 8 PM ET (Summer or winter so thats 0000 Winter, 0100 Summer UTC. We are still doing the "Door Prize" - that is, we randomly pull a name from the list we had that night 9 (if more than 7 check ins) We have given away DONATED stuff: a couple of 10 meter ham sticks and Mag mounts, rolls of Coax (RG6 and rg 11 mostly- Still great stuff for a dipole or Vetical, And our website is still at www.qsl.net/ngln.

We are in the planning stages of a Special event- Just got to find something special around here to blab about!

Hope to hear you on the net sometime soon! Nice bunch of Ladies and Guys. PLEASE CHECK IN!

73,

Drewski

NCS

North GA Laryngtis Net

Chatsworth, GA

RFinder The World Wide Repeater Driectory now supports iPad screens!

Posted: 03 Aug 2012 09:19 AM PDT
http://forums.qrz.com/showthread.php?356420-RFinder-The-World-Wide-Repeater-Driectory-now-supports-iPad-screens!&goto=newpost

For immediate release...

8/2/2012

From TI5/W2CYK at the foot of the Arenal Volcano, Costa Rica

After many requests from our users to support iPad screen formats, well,
you asked for it, you got it!

RFinder- The World Wide Repeater Directory's latest release in the App
Store now supports the iPad screen geometry fully, with rotation, etc.

RFinder already runs on iPhone and Android and http://web.rfinder.net. The
World Wide Repeater Directory is also accessible from RTSystems radio
programmers and via CHIRP on Windows, Linux and Macintosh with the same
user/password you use on handheld devices. Our goal is to have the WWRD
accessible from most pervasive platforms. To that end Windows Phone and
Symbian versions are in development and slated for release this fall. The
web version has been tested and works on Blackberry. RFinder web has
downloads for POI's for TPE and most major GPS's, including AvMap G5/G6,
the GPS for Amateur Radio Operators.

Android Pad format is now in development, look for it in September!

We have connected with the Frequency coordinators in Costa Rica while here
and the full set of repeater data for TIx will be online in the next few
weeks, adding yet another country to the WWRD.

73's de TI5/W2CYK (packing to go home after the YDXA Youth DXPedition which
we sponsor...support the youth of Amateur Radio!)

Here's how it looks in Shanghai!

Loop Head Lighthouse to Hit the Air Waves:

Posted: 03 Aug 2012 06:01 PM PDT
http://www.eham.net/articles/28745

Loop Head Lighthouse in County Clare will be amongst hundreds of lighthouses and lightships worldwide to participate in a unique event aimed at promoting public awareness of lighthouses and lightships and their need for preservation and restoration. The Limerick Radio Club, comprising members from Limerick, Clare, Kerry and Tipperary, will broadcast non-stop for 48 hours from the West Clare Lighthouse on August 18-19th as part of the 15th International Lighthouse /Lightship Weekend (ILLW). During the broadcast, visitors to the lighthouse will be able to listen into communications with some of the other participating ham radio operators broadcasting from 400 other lighthouses and lightships in 50 countries. The annual event, which is conducted under the sponsorship of the Ayr Amateur Radio Group (AARG) in Scotland, is always held on the third full weekend in August starting at 0001 UTC on Saturday and finishing at 2359 UTC on Sunday. It also coincides on the Sunday with International Lighthouse Day, an event organised by the Association of Lighthouse Keepers whereby many world lighthouses are open to the public for the day.

//
Warrington Amateur Radio Club Hits the Airwaves:

Posted: 03 Aug 2012 05:59 PM PDT
http://www.eham.net/articles/28744

VOLUNTEERS from a radio club in Warrington has been preparing to broadcast across the world. Warrington Amateur Radio Club has been granted a special event licence and call sign from Ofcom to use throughout the London Olympics. GB2012MV (Manchester Venue) is one of only a select few commemorative call signs allocated for this historic event. Members of Warrington Amateur Radio Club, in partnership with West Manchester and South Manchester Radio Clubs, will be proudly representing the region with transmissions from all three club headquarters - including Grappenhall in Warrington. Operating started last Wednesday at 7am and will continue until the Paralympic closing ceremony on September 9.

Global Networking at the 2012 International Lighthouse Lightship Weekend:

Posted: 03 Aug 2012 05:58 PM PDT
http://www.eham.net/articles/28743

JUPITER -- Technology in our time races forward at lightning and sometimes frightening speed. But have you ever wondered what would happen if our communications technology failed on a local or global scale? It may seem like a question for science fiction fans but in a real disaster, the solution to communication already exists and is wonderfully preserved by small groups of dedicated Ham Radio Clubs and Lighthouse Stations. On Aug. 18 and 19, 2012, the Jupiter Inlet Lighthouse and Museum will celebrate International Lighthouse-Lightship Weekend (ILLW) with two local Amateur Radio operating groups. The Jupiter-Tequesta Repeater Group (JTRG) and the Martin County Amateur Radio Association (MCARA) will be set up behind the Museum building from 9:30 a.m. on Saturday through 3 p.m. on Sunday with two radio stations. The public is invited to stop by and get on the air. Amateur Radio callsign, "W4J" will be tuning in fellow ham operators at other lighthouses and lightships all around the world to "Say Hello," joined by Boy Scout troop 721 of Palm Beach Gardens.

Propagation Forecast Bulletin #31 de K7RA:

Posted: 03 Aug 2012 12:10 PM PDT
http://www.eham.net/articles/28738

Average daily sunspot numbers this week were up over 47 points to 99.3. Average daily solar flux rose nearly 35 points to 131.7. Solar flux jumped from 139.8 on Tuesday, July 31 to 150.1 on Wednesday, August 1. Predicted solar flux is 135 on August 3-4, 130 on August 5-6, 125 on August 7-9, 130 on August 10-11, and 120 on August 12-13. Solar flux is expected to drop below 100 on August 16-21. Predicted planetary A index is 8 on August 3, 5 on August 4-19, 8 on August 20-21, 5 on August 22-23, then 8, 8, 12 and 8 on August 24-27.

South Jersey's Biggest Hamfest - Sept 16 - GCARC

Posted: 04 Aug 2012 07:47 AM PDT
http://forums.qrz.com/showthread.php?356522-South-Jersey-s-Biggest-Hamfest-Sept-16-GCARC&goto=newpost

Sunday Sept 16

Gloucester County Amateur Radio Club in Mullica Hill, NJ (W2MMD). South Jersey's biggest hamfest!

$6 admission - non-ham wives and kids under 16 are free

$10 tables (yours or ours) or table space up to 8ft under covered pavilions (does not include price of admission)

$5 tailgating per vehicle space up to 10ft in open grassy areas only (does not include price of admission). Tailgating under covered pavilions falls under "Table Rules" rates.

22 miles from Philadelphia

28 from Wilmington, DE

67 miles from Dover, DE

77 miles from Reading, PA

81 miles from Allentown, PA

91 miles from Baltimore

107 miles from NYC

125 miles from Harrisburg, PA

4-H Fairgrounds, 240 Bridgeton Pike (Route 77 South), Mullica Hill, NJ. Off of exit 2 on NJ Turnpike.

Map: http://maps.google.com/maps?q=240+Br...93.076172&z=16

Website: www.w2mmd.org

If you like a beautiful scenic drive, full of farmland, this is the place. Trust me. I grew up in Carteret, NJ and worked in the NYC/ northern NJ area til 2002.

Record year for the ILLW

Posted: 04 Aug 2012 10:30 AM PDT
http://forums.qrz.com/showthread.php?356539-Record-year-for-the-ILLW&goto=newpost

Record year for the ILLW ?

With less than two weeks to go, the International Lighthouse
and Lightship Weekend continues to grow in its 15th year. The 48 hour fun
event has steadily grown from the 158 in its first year and most of those
early registrations continue to be involved.

In the United Kingdom there are 60, and half of those can be found in
England.

There are plenty throughout Europe including Germany on 52 and
The Netherlands 25.

North, Central and South America have more than 80 stations
registered with Argentina, Canada, Chile, Curacao, Honduras, Mexico,
Panama and Puerto Rico plus 55 in the USA.

Nearly 70 been received from Australia and New Zealand, South
Africa has 15 and no matter where you are there will be plenty to work.
Most issue special QSL cards.

The mainstream media continues to run the story.

The Clare Herald reports that the Loop Head Lighthouse in County Clare will
be on air courtesy the Limerick Radio Club EI0LHL. It will join others to
participate in promoting public awareness of lighthouses and lightships
and their need for preservation and restoration.

The International Lighthouse and Lightship Weekend is on August the 18th
and 19th.

Visit its website ILLW.NET to make an online registration, read the
guidelines and explore it for more details.

//
RSGB (UK) statement on prEN50561-1 (Proposed in home BPL EMC standard)

Posted: 04 Aug 2012 10:00 AM PDT
http://forums.qrz.com/showthread.php?356536-RSGB-(UK)-statement-on-prEN50561-1-(Proposed-in-home-BPL-EMC-standard)&goto=newpost

www.rsgb.org/emc/docs/pdf/update-draft-plt-standard-pren50561-1.pdf

Update on draft PLT standard prEN50561-1

In 2011 a PLT EMC standard known as prEN 50561-1 was proposed by CENELEC. This proposed standard was rejected by a majority of the National Standards Committees (NCs) of the EU countries who approve all new standards. Many NCs made comments to help improve the draft and some comments questioned the very high radio pollution levels that would be permitted from PLT devices. Other comments would have helped to improve the test methodology. Usually in these situations

the CENELEC committee preparing the proposed standard would take note and make changes that reflect the comments with the aim of achieving full consensus of all stakeholders.

A revised version of the PLT standard is about to be circulated, to be voted on by the NCs. For all intents and purposes we believe it is identical in material terms to the previous rejected standard.

Many of the valuable and helpful comments from the NCs have essentially been ignored. Representatives of PLT manufacturers dominate the CENELEC Working Group 11 (WG11) that wrote the proposed standard. It is likely that PLT manufacturers have been aggressively lobbying members of the NCs to approve the standard as it would provide a legal basis for high PLT emission levels.

The EU Commission's EMC advisor, who is responsible for ensuring that all EU EMC standards comply with the EMC Directive, has stated that the proposed PLT standard does not meet the Essential Requirements of the EMC Directive and has notified CENELEC. However, CENELEC has decided to ignore the advice of the EU EMC advisor and continue with putting the proposed PLT standard out for voting by the NCs.

Should prEN 50561-1 be supported by the National Committees, it risks manufacturers of virtually any new device or product wanting to use the very high radio pollution levels allowed by prEN 50561-1, claiming it as a precedent. An example case would be the invertors used to connect solar cells to the grid where a proposed standard could allow emission levels similar to PLT but at all frequencies with no amateur band notches (a "notch" is a range of frequencies where the transmit power of the PLT device is reduced). Other products that could take advantage of this precedent include LED lighting.

In effect, the proposed PLT standard will make the provisions of the EMC Directive irrelevant. It's not just HF but higher radio frequencies that are at risk from what will be legally sanctioned pollution. Wireline services could also become victims, with new high speed DSL technologies such as G.fast facing issues due to PLT emissions being coupled from power cables to phone cables.

There is only a very short time window to take action to prevent what will be an EMC disaster. Many National Committees will vote early, due to the summer vacations. It is absolutely critical that anyone who values unpolluted radio spectrum urgently takes the following actions;

Contact your national amateur radio society and ask what it is doing.

Find out who is on your NC, contact them and explain the situation, it is important that they understand that the proposed PLT standard sets a precedent and its approval could lead to widespread spectrum pollution.

A list of NCs can be found at

www.cenelec.eu/dyn/www/f?p=104:5:43324536040578

Get the word out, forward this statement to your local message boards and radio clubs.

When you have a QSO ask other European amateurs if they have heard about this issue.There is a great deal of "disinformation" being spread by PLT lobbyists. Some of the statements that have been made are clarified below;

PLT claim: Notching will protect the Amateur Bands

Reality: The depth of the notch will depend on how linear the power network is. Resonances in cabling resulting in high voltage levels of PLT signals combined with non-linear components in devices such as switched mode power supplies, can lead to the notches "filling in" with "hash" noise which is difficult to identify as PLT.

PLT claim: Ratification of EN50561-1 will protect the Amateur Bands

Reality: In the same way that PLT manufacturers now flout EN55022 they will be able to flout EN50561-1. It is just that the motivation will be less - at least until the next scheme for increasing data rate comes along. The only aspects of the new Standard that can be verified in the field by National Enforcement Agencies (such as OFCOM in the UK) are the maximum transmit level and the positions of the Notching Band edges. Within the new Standard the maximum transmit level is set

at a higher level than today's typical PLT transmit power levels, and the notched frequencies follow today's practice as set by long-standing commercial considerations.

PLT claim: EN 50561-1 will control PLT emissions, as there is currently no PLT standard.

Reality: PLT devices are already covered by EN 55022 which is the EMC standard for IT equipment ☐ this has been confirmed by the EU Commission.

http://www.europarl.europa.eu/sides/...60&language=en

PLT claim: PLT cannot work at EN 55022 levels.

Reality: PLT devices can work at EN 55022 levels in most situations. Running at high power ensures PLT works in the remaining 1% of difficult"

situations. Mesh networking can address almost all of these difficult situations. High levels of pollution could result in "spectrum cleansing" where other spectrum users abandon spectrum to PLT due to PLT pollution.

http://www.compliance-club.com/PLT/PLT%20book.pdf Page 23

PLT claim: Dynamic notching will protect the broadcast bands.

Reality: PLT manufacturers committed to PA Consultants to introduce dynamic notching in Quarter 3 of 2010. PA Consulting was researching PLT on behalf of the Ofcom (UK regulator). This failure to demonstrate dynamic notching in production units could mean that it doesn't actually work in the real world. This may be confirmed by the fact that there is no requirement in EN50561-1 that dynamic notching work in the presence of any interference (PLT for example).

http://stakeholders.ofcom.org.uk/bin.../pltreport.pdf Pages 22 and 23

PLT claim: Power control will reduce PLT pollution levels.

Reality: PLT manufacturers committed to PA Consulting to introduce power control in Quarter 2 of 2010. PA Consulting was researching PLT on behalf of the Ofcom (UK regulator). This function has yet to be seen generally in production devices. PA consulting based its conclusions and recommendations on this commitment and the failure to deliver on this commitment makes a significant difference in the report's conclusions.

http://stakeholders.ofcom.org.uk/bin.../pltreport.pdf Page 57

The power control requirement in EN50561-1 is specified using an unrealistic test situation.

Produced by the EMC Committee of RSGB 25 July 2012

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Tuesday, 31st-July, through Tuesday, 7th-August there were 207 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, P5, PA, PJ7, PY, PZ, R1FJ, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, TA, TF, TG, TI, TK, TN, TT, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5X, UGANDA (Pirate!). Nick, G3RWF, reports, "Someone is currently pirating my Ugandan call (G3RWF) - he/she/it was on 20m today (August 1st) at about 1215 UTC - also on 40m a few days ago (and also last March fwiw). I hope

to return to Uganda in October, but no dates yet fixed." Nick told OPDX, "Current plans are for a return to Uganda in mid-October for 8 weeks - taking in CQWWCW (maybe SSB too if I can find my mic) and the ARRL 10m contest (if 10m wakes up again properly!)."

9M, SPRATLY ISLANDS (Reminder). Just a reminder that operators John/9M6XRO and Steve/9M6DXX will be active as 9M4SLL from Pulau Layang Layang, Spratly Islands (AS-051) this week between August 7-13th. Activity will be on all bands from 80-10 meters using CW, SSB and RTTY, using two stations with linear amplifiers to vertical antennas on the edge of the ocean. Spratly Islands are ranked 29th in the current The DX Magazine "100 Most Needed Countries" survey (world-wide, mixed modes), up from number 32 last year. The QSL Manager for 9M4SLL is Tim Beaumont, M0URX. QSL direct with SAE + 2 USDs or 1 new IRC, OQRS (see <http://m0urx.com/oqrs>) or via the RSGB bureau (all bureau cards MUST be marked "via M0URX"). Logs will be uploaded to LoTW as soon as possible after the end of the operation (within a few days), but there will be NO online log during the DXpedition itself. (Note for users of computer logging programs: The 9M4 prefix is issued to special event stations that may be anywhere on Malaysian territory; this includes the DXCC entities of West Malaysia, East Malaysia or, as in this case, Malaysian islands in the Spratly group.)

CORRECTION DEPARTMENT. In OPDX.1072, under "VK0H, HEARD ISLAND (Update)", The callsign for Joe Taylor (Nobel physics) was incorrect and should be K1JT (not N1JT). We have been informed by Bob, KK6EK, that it is now corrected on the Heard Island Web page.

CQ NEWS. Rich, W2VU, sent out the following press release on August 1st: "CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS; MAJOR RESULTS TO APPEAR FOUR MONTHS EARLIER -- CQ magazine will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner, Editor Rich Moseson, W2VU, announced today. On average, contest results will appear four months sooner than at present. The new schedule will be phased in over the course of 2013 and will be fully in place by 2014.
'The phase-in is necessary because of new and old dates overlapping,' Moseson explained, 'as well as scheduling needs for non-contest articles including our special focus issues and Dayton new product reports. As a result, some contest results will be temporarily relocated in 2013 and some specials will be rearranged as well.'
'In addition, there will be two sets of CQ WPX Contest results published in 2013 -- the 2012 scores in January (SSB) and February (CW), followed by the 2013 results in September (SSB) and November (CW). The CQ World Wide DX Contest results, which currently appear in the August (SSB) and September (CW) issues, will be published as of 2013 in the April and May issues, respectively. For one year only (2013), the CQ World Wide VHF Contest results will be published in CQ VHF magazine, and will return to CQ as of 2014, appearing in the January issue.'
This schedule change has been made possible by the fact that the vast majority of contest entrants submit their logs online, as well as advancements in technology for log-checking, earlier log submission deadlines

announced last month and advances in publishing technology.
'For years, both participants and contest directors have been asking us to publish the results sooner,' Moseson explained, 'and at last, all of the pieces have fallen into place to make it possible. The new schedule represents the minimum amount of time needed to not only collect and process the logs, but to resolve issues with problem logs and take the necessary steps to assure the ongoing integrity of our contest results.' A complete calendar of contest results issues for 2013 and 2014 will be posted on the CQ website at < www.cq-amateur-radio.com>."

CY9, ST. PAUL ISLAND (QRT). The CY9M St. Paul Island DXpedition went QRT earlier then expected on July 31st, around 1625z due to a forecast of poor weather conditions and at the request of the skipper. They departed from St. Paul Island at 1900z. In 4.5 days of operating, the team made over 33k QSOs. All contacts will be verified via LoTW once they return home, and for those who want paper QSLs, Tim Beaumont, M0URX, will be the QSL Manager. The log is now available on ClubLog. The final totals are as follows: 33219/QSOs and 12715/Unique Calls. Mode breakdown is: 15561/CW, 16143/SSB, 62/PSK, 705/RTTY and 748/PSK63F. Continent breakdown is: 441/AF, 0/AN, 514/AS, 17438/EU, 13548/NA, 233/OC and 1045/SA.

D6, COMOROS (Reminder/Update). A team of Europeon operators will be active as D64K from Ngazidja (Grande Comore), Comoros Islands (IOTA AF-007), between August 8-20th. The current list of operators mentioned are Salvador C31CT/EA3QS, Sigi/DL7DF, Josep/EA3AKY, Fabrizio/IW3SQY, Paolo/IV3DSH, Franco/IZ8GCE and Les/SP3DOI. The team has already obtained all permissions, and the license has been sent to the DXCC Desk. Pilot station is Stan/KH6CG. Their license covers from 160 to 6 meters, so the guys will be active on all bands and modes, and they are even considering the possibility of working on 60m and 6m. They will have four stations on the air using 2x Elecraft K3, 2x Elecraft K2 all with amps, into 2x Spiderbeams, 2 element vertical array (80/40/30) and HF vertical Multi-band. Suggested frequencies are:
CW • 1826, 3506, 7006, 10106, 14026, 18076, 21026, 24896 and 28026 kHz
SSB • 1845, 3780, 7060/7150, 14150, 18140, 21270, 24940 and 28470 kHz
RTTY • 7035, 10142, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50130/CW-SSB and 50193/EME

The QSL Manager will be Paolo, IV3DSH. Watch the following Web sites for updates: http://www.d64k.net
https://twitter.com/#!/D64K

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
H44UD • Solomon Islands; 2012 Operation

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2008 - T88CJ Palau Koror Island DXpedition:
http://www.youtube.com/watch?v•uSLKOiZsI

2005/2007 - 6W/ HA7TM & J5UTM DXpeditions:
http://www.youtube.com/watch?v=wbm0Vh36k
1999 - 7A0K Semut Kecil Island DXpedition:
http://www.youtube.com/watch?v=fh4MAx_4k
1998 - E30HA & E30GA Eritrea DXpedition:
http://www.youtube.com/watch?v=WXNC0jWhs

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

FO, FRENCH POLYNESIA (IOTA Op!). Didier, F6BCW, will be active as FO/F6BCW (or possibly a special callsign) from various French Polynesian Islands between October 2nd and November 8th. Activity will be holiday style, CW only, and using 100 watts into dipoles strung-up between coconut trees on the following islands:
October 2-6th - Tahiti Island (OC-046); no or very little activity
October 6-15th - Huahine Island (OC-067); 40-10 meters
October 15-19th - Raiatea Island (OC-067); 30/20/17 meters
October 19-22nd - Tahaa Island (OC-067); 40/30/20/17 meters
October 22-26th - Maupiti Island (OC-067); 30/20/17 meters
October 22nd(?)-November 8th - Huahine Island (OC-067); 40-10 meters
QSL via his home callsign, direct or by the Bureau.

FR, REUNION ISLAND. Willi, DJ7RJ, will once again be active as FR/DJ7RJ from Reunion Island between September 26th and October 21st. Activity will be on all bands 160-10 meters using, CW and SSB, and will pay special attention to the low bands for US and JA. QSL direct to his home callsign.

IOTA NEWS.....
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/ Single-Band (??) entry. QSL via eQSL.

AS-105. Kim (Tia), DS2NMJ, will be active as DS2NMJ/2 from Yonghung Island between August 12-13th. Activity will be on 15 and 12 meters SSB. QSL via his home callsign, direct (preferred) or by the Bureau.

AS-190. (Update/New IOTA) A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB between October 5-11th. Operators mentioned are Abdul/7Z1CQ, Suli/7Z1SJ, Abdullah/HZ1AR, Bader/ HZ1BF, Abdullah/HZ1BW, Abdul/HZ1DG, Firas/HZ1FS, Hani/HZ1HN, Mohamad/HZ1MD and Nhaw/HZ1TL. More details and a Web page will be forthcoming. See their logo on QRZ.com.

EU-012. Look for a YL DXpedition to be active as GB2YLS from Fair Isle (IOSA SH-09, WLOTA 1319) between August 16-22nd. Operators mentioned are Unni/LA6RHA, Chantal/PA5YL, Ruth/IT9ESZ/HB9LFM, Nicky/MM5YLO, Elaine/2E1BVS and Denise/MM6ZDW. Activity will

be on the HF bands using CW and SSB, as well as an entry in
the International Lighthouse/Lightship Weekend (August 18-19th)
from Fair Isle South (Skaddan) Lighthouse (ILLW UK0127, ARLHS
SCO-079, BARLS A3750, TWLHD WLH GM-028). QSL via MM5YLO, by
the Bureau or direct. Visit their Web site at:
http://www.radioclubs.net/gb2yls

EU-028. Paolo, IZ5NFD, will be active as IA5/IZ5NFD from St. Andrea
(WW Loc. JN52BT) in the north western part of Elba Island
between August 6-12th. Activity will be holiday style on
40-2 meters on CW during his early mornings (0500z) and his
evenings (2100z). QSL via his home callsign, direct or by
the Bureau.

EU-042. Mike, DG5LAC, will be active as homecall/p from Amrum Island
(GIA N-018, WFF DLFF-013, WLOTA 2464) between August 11-24th.
Activity will be holiday style on 80-10 meters SSB. QSL via
his home callsign, direct or by the Bureau. Log will be
uploaded to LoTW, WFF and eQSL.

EU-064. Members of the Radio Club Vend�en (F6KUF) will be active as
F6KUF/p from the Sebastopol Polder (FFF-218) on Noirmoutier
Island between August 20-21st. Operators mentioned are:
CW Team - Pat/F6ACD and Alain/F5OEV
SSB Team - Phil/F5TRO and Seb/F4BHZ.
Activity will be on the usual WFF frequencies, +/- QRM permit-
ting. QSL cards are via the Bureau; SWL cards are welcome.

EU-84. Operators Stefan/SA0AEK, Alexander/SA0AEX and Oskar/SA0ASG will
be active as SC0UT/5 from the Scout Camp Boomerang on Vassaro
[V�ssar�] Island until August 10th. Activity will be on 80-12
meters SSB. QSL SC0UT via the Bureau.

EU-165. Massimo, I0PNM, will once again be active as IM0/I0PNM from
San Pietro Island (IIA CI-007, MIA MIS-050, WLOTA 2989) between
August 10th and September 3rd. Activity will be mainly 20/15/10
meters using SSB, RTTY and PSK31. QSL via his home callsign
direct only.

EU-182. (Correction) One of the Russian-Ukrainian team's operator who
was listed a R6LP in OPDX.1072 from their press release is
actually Oleg, RL6LP, and was active as UT/RL6LP from Ankudinov
Island during the IOTA Contest last weekend. QSL via LoTW or
eQSL.
NA-124. Manuel, XE2HUQ, will be active as XF1F from San Francisco
Island sometime in October. Specific dates were not announced.
Activity will probably be on 80/40/20/17/15/12/10 meters using
SSB only. QSL via XE2HUQ.

JW, SVALBARD (Update). Torkel, LA6VJA, will once again be active as
JW6VJA from the JW5E club station in Longyearbyen on Spitsbergen Island
(EU-026) between August 10-12th. Fredrik, LA6TMA, will also join him

and be active as JW6TMA. Activity by JW6VJA will mainly be CW with some SSB, while JW6TMA will be active mostly on the Digital modes. QSL via their home callsigns, direct or by the Bureau. PLEASE NOTE the new postal address for direct QSL cards. Also, JW6VJA will upload his log to LoTW. For more details, visit: http://www.bitwrap.no/web/index.php?id=

KP2, U.S. VIRGIN ISLANDS (On the Birds!). Wyatt, AC0RA, reports that he made a QSO on August 2nd with Rich, KP2CT, from St. Thomas on FO-29 for his first satellite contact. For equipment he has a Icom 706 and an arrow antenna. He is manually tuning for Doppler and still getting the hang of it. Wyatt states, "He (Rich) is going to only be on the SSB satellites for now and probably only FO-29 due to the ease of working semi duplex on mode J vs mode B. Though we might try on VO52 at some point. He is still picking up on things that make it easier and need to trouble shoot a few problems we found during our first QSO! He will try to be QRV on fo29 during the next few week ends and possibly during the week depending on his free time due to his unpredictable work schedule. He also asked that people not try to contact him for skeds. If he knows he can make a certain pass or passes I will try to make an effort to post to the AMSAT BB."

NCDXF PRESS RELEASE (Dated July 28th): "The Northern California DX Foundation is the recipient of a 4000 USDs donation from the Northern California DX Club. This is the largest donation ever received from a club. More and more DX clubs are donating to NCDXF. NCDXF thoroughly analyzes the financial needs of planned DXpeditions and helps provide critical funding to DXpedtions high on the Most Wanted List. Often without support such DXpeditions would not be possible. Several expensive DXpeditions in the Top Ten Most Wanted are in the early or mid planning stages. Contributions from individuals and from clubs to NCDXF will help make these DXpeditions happen."

NCDXF PRESS RELEASE (Dated August 48th): "The Northern California DX Foundation is pleased to announce the addition of two new Directors to fill vacancies created by retiring board members. Tom Berson, ND2T, and Glenn Rattmann, K6NA, were elected to fill these positions.

Tom Berson, ND2T, became a ham at the age of 11. He has lived and worked abroad for 7 ½ years. He is a past president and director of the International Association for Cryptologic Research, Inc. Professionally, Tom is an expert in cryptography, computer security, information conflict, and high-tech business. Tom has been on several high profile DXpeditions and will be headed to NH8S Swains Island very soon. Tom has lived in Palo Alto, CA, since 1977.
Glenn Rattmann, K6NA, has been DXing and contesting since age 14. He has a degree in Marine Geology and has had successful careers in oceanographic survey work, electronic sales and manufacturing and aerospace. He retired from Northrop Grumman in 2007. He has participated in many DXpeditions and is very active in contesting. He has worked all current DX entities and loves the low bands. He has been very active in the San Diego DX Club. Glenn lives in Valley Center, CA.
More extensive biographies for Tom and Glenn can be seen at:
http://www.ncdxf.org/pages/officers.html
An eleven member Board of Directors oversees all of the Foundation's business. These Directors and the volunteer advisors who assist them have held responsible positions in the business or academic worlds. They all are active DXers. The Foundation does not have a paid staff, and no Foundation officer, director or advisor receives a salary or compensation in any form.
In keeping with the original intent of the founders, NCDXF has supported over 500 DXpeditions, large and small. For the expensive "mega" DXpeditions, NCDXF is usually the "anchor" sponsor and its grant often makes the difference in whether the DXpedition goes forward. Since its founding in 1972, NCDXF has donated in excess of $1 million to worthy DXpeditions. NCDXF also supports the world-wide NCDXF/IARU Beacon Project and provides for scholarships for worthy recipients in cooperation with the ARRL Foundation.
The Northern California DX Foundation relies heavily upon the generosity of its contributors to fund various projects. The NCDXF is an organization described in Section 501(c)(3) of the Internal Revenue Code and all contributions are tax-deductible to the extent permitted by law for U.S. taxpayers.
73, Glenn W0GJ"

OD5, LEBANON. Members of the Lebanese Army Ham Radio (HAM RADIO DX GROUP) will be active as OD5ARMY during the month of August. Activity is to celebrate the founding of the Lebanese Army, and to "thank the Lebanese Army for their effort and their faithfulness to the Land, to the Country, to their parents, and the Lebanese people." Gabriel, ON5NJ, informs that the following will be participants during this event: Joe/OD5TE, Raja/OD5MV, Puzant/OD5NH, Gaby/OD5NJ, George/OD5QB, Maria/OD5QT and Anthy/OD5YY. QSL via OD5NJ.

OJ0, MARKET REEF. Pasi, OH3WS/OG3A, who was active as OH0/OH3WS from Ecker½, Aland Island (EU-002) on Friday, is now active as OJ0W from Market Reef (EU-053, ARLHS MAR-001, WLOTA 0542) until August 10th. Activity will take place during his spare time. QSL via OH3WS.

P3, CYPRUS (Update). Mark, M0DXR, will be active as P3F (not 5B/M0DXR as first announced) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via his home callsign.

PT0, ST. PETER AND ST. PAUL ROCKS (Update). Members of the Araucaria DX Group, in conjunction with the TX3A Team, will activate St. Peter and St. Paul Rocks (PY0S), under the callsign PT0S approximately between November 10-22nd. They suggest on their Web page to please visit and check their Web site regularly for news updates or announcements. (Like all things maritime, the exact dates of their travel to the rocks will be subject to the weather and issues related to the boat.) The Web page also menitoned that two operators of the PT0S Team (PY2XB and AA7JV) went out on a survey voyage to St. Peter and St. Paul Rocks this past weekend to find a suitable site for a platform to hold their operating and sleeping tent. This is necessary as there is no flat land available on the rocks. They have only 5 hours on the rocks to complete their survey, which, in addition to the platform site, will include surveying potential antenna sites and generator location.
Once again, operators for the PT0S operation will be Fred Carvalho/PY2XB (PY2XB/PY0F, PQ0F, VP5/PY2XB, 8P9XB), Peter Sprengel/PP5XX/PY5CC (PY0FM, PW0T, HK0NA). Tomi Pekarik/HA7RY and George Wallner/AA7JV. The operation will have a strong low band focus. There will be a dedicated 160 meter station operating on 160 meters from sunset to sunrise. A second station will be on 80 and 40 meters at night. During the day they will operate two stations on the higher bands -- and 6 meters -- based on conditions. RTTY will also be supported. An "Online QSL Request Service" (OQRS) will be set up on their Web site for both direct or Bureau QSLs. For direct cards via the mail, QSL via HA7RY (read details on the Web page). The log will be uploaded on LoTW, generally within 36 hours of the QSO taking place. For further information, please visit: http://pt0s.com

NEW MANAGER. Buzz, NI5DX, is now serving as QSL Manager for Clive, 3B8CW, on Mauritius Island. Buzz has Clive's past logs and will be able to confirm contacts made with 3B8CW from September 1, 2011, onward. Clive is using a Mosley TA-33 antenna at the present time, but is considering building/buying a HexBeam to improve his signal and allow operation on the 79-WARC bands. A QSL card is now being designed and will be printed soon. Please allow for a short delay in response if sending for a card before they arrive from the printer. This is generally 4-6 weeks after the order is placed.

OJ0R LoTW. Nigel, G3TXF, reports that the OJ0R log will be uploaded to LoTW just as soon as the LoTW Cert arrives. He also states that both Don, G3XTT, and himself had a great time, and they are grateful to Teemu, SM0W, for setting it all up. Nigel has provided a few photos from last weekend's IOTA Contest trip to Market Reef (OJ0R) at: http://www.g3txf.com/dxtrip/OJ0R-July-12/OJ0R.html

QSL STATUS S55CERKNO & S555E. Dan, S50U, reports, "All S55CERKNO & S555E direct QSL request (OQRS is preferred) will be honored by a special stamp released for the occasion! Please SASE with 2 USDs to: Radioclub Cerkno, P.O. BOX 16, 5282 Cerkno, Slovenia, with priority return when getting cards from the printer in early 2013. Request your direct QSL with special stamp at <http://www.s50e.si>. "

TM0BI (EU-032) IS QRT. The complete log is uploaded on the OQRS provided by ClubLog. Direct and Bureau QSL are via ON4ZD and can be requested via this OQRS (the prefered way). OQRS access is also available directly on the Web page: http://www.qrz.com/db/tm0bi

QSL RECEIVED VIA LoTW: 9A5SM, 9A5TN, CE2/VE7SV, CN4P, CO2JD, EA1ALD, ES6RW, GM2T, GW4TTA, HK1MW, HK3C, IC8TEM, IZ1NGW, IZ2GMT, K4LTA, K4RO, K4WW, KL7J, KP2MM, M3W, MD4K, MU0FAL, MW0REN, N0SM, N1GKE, N3UA, N4OGW, OH0X, OK6DJ, OZ4FF, PJ7MF, PY1NX, RI1ANF, RT3DX, RY9C, S51YI, S57L, SA1A, SV0XCC/9, TK5EP, UY0ZG, V31MX, V31WH, V55V, VB6A, VK2DX, VU2PAI, W2NO, W4MYA, w4PM, W8PN, WG4F, XE1RZL, YO3FRI, YU2VZ and ZS6A

QSLS RECEIVED VIA MAIL: 3B8CF, 3B8FE, 3C0E, 3C6A, A5A, CO7EH, CT1HZE, CU2CE, EZ8BP, FW0NAR, GR100MGY, HK0NA, JD1BLY, JT1CO, KP4RV, OD5NJ, OM5DP, PJ5/SO6X, PY0FF, SV9/HB9CRX, TA3X, V73NS, V85SS, VP2MQR, VR2KF, XX9E and YI9EO

QSLS RECEIVED VIA THE BUREAU: OP4K, OX3XR, S9DX, T77NM and Z36A

SILENT KEYS.....
Well-known operator Paul Caboche, 3B8AD, became a Silent Key (SK) on July 25th. Paul is remembered as a communications pioneer and was active on many islands in the Indian Ocean. He was inactive in recent years due to illness. Older DXers may remember Paul as VQ8AD, etc. <http://hamgallery.com/qsl/country/Mauritius/vq8ad.htm> He was 94. Jacky, 3B8CF, made the following announcement on the IARU Region 1 Web site, "Paul was the oldest ham in Mauritius. His first call was VQ8AS in the Chagos back in 1937. Later he got the call VQ8AD, then in 1970 he became 3B8AD. He was the first chairman of MARS (Mauritius Amateur Radio Society) and held this post for many years, from 1967 to 1993. He has done much to protect the interests of ham radio in Mauritius and to promote this hobby over the years. May he rest in Peace! Jacky, 3B8CF."

OPDX was also informed that Sven Lutzen, OZ3SA/OX3SA, recently had a heart attack and is now a Silent Key (SK). No other details were provided.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above Silent Keys.

TZ, MALI. "The Daily DX" reports this past week that Fernando, Z21BB/EA4BB (ex-9Q5BB, D2BB, ST2BF, TU5JL), has left Zimbabwe and has taken a new assignment in the Mali Republic. He is expected to receive a TZ6BB license in a couple of week. QSL via W3HNK.

V5, NAMIBIA. Hans, DF2UU, informs OPDX that he will once again be active from Namibia between the end of August to the middle of September as V5/DF2UU. Activity will be on 160-6 meters. He will also be active during some contests. In the SSB FD, September 1-2nd, he (and others) will be active as V55V/P as a Multi-Single entry. In the WAE SSB, September 8-9th, he states that the callsign is not sure, but if he works Single-Op it will be V5/DF2UU and if it is Multi-Op then V55V.

VU7, LAKSHADWEEP ISLAND (aka Laccadive Islands)[IOTA/Lighthouse/WFF Op]. Members of the Bangalore Amateur Radio Club (VU2ARC) and a small group of amateur radio volunteers will be active as VU7M from Minicoy Island (AS-106, WFF VU-103, ARLHS LAK009 and also IND017 [to be deleted!!]) between August 13-22nd. The group received special permission from Ministry of Communication and Information Technology, and the Government of India on July 26th, to use the special callsign VU7M to represent India during the 2012 International/Lighthouse and Lightship Weekend, August 17-18th. Operators mentioned are Arasu/VU2UR, Laxmanan/VU2LX, Srikantha/VU2GSM, Govind/VU2GGM, Ramesh/VU2LU and Lion/VU2JHM. Details on QRZ.com state that they will be "setting up humble HF station" and the QSL route is "DIRECT or through the Bureau". For more details (plently of URLs to look at) and updates, watch QRZ.com under VU7M.

YN, NICARAGUA. Jeff, N6GQ, will once again be active as YN2AA from Grenada, Nicaragua, between October 23-29th. Activity will be on 160-6 meters, and he will participate in the CQWW DX SSB Contest (October 27-28th) as a Single-OP/All-Band/High-Power entry. Jeff will probably use a K3 radio

and 1 KW amp into the following antennas: a Tribander, 2 element 40m beam,
wires and beverages for 80/160m. QSL via NN3W, by the Bureau or direct. U.S.
stations, please send SASE; DX stations, please send SAE with GS or IRC.
Bureau service will take time. Logs will also be uploaded to LoTW.

ZL9, CAMPBELL ISLAND (Update). It was announced on August 5th: "The HARAOA
ZL9HR DX&#65533;Pedition to Campbell Island in the Great Southern Ocean (IOTA
OC-037) is delighted to have been granted an award from the prestigious
ARRL Colvin foundation.
The Colvin Award is conferred in the form of grants in support of Amateur
Radio projects that promote international goodwill in the field of DX
and the HARAOA are honored to have received this award.
Preparations for this major DX&#65533;Pedition are on schedule for the
activation dates of November 28th. to December 9th, 2012."

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 5th August 2012

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 4th October at 2 p.m. in the ComReg Offices in Dublin. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. The closing date for applications to sit this examination is Thursday, 20th September Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

IOTA Contest

The RSGB Islands On The Air Contest, held last weekend, is one of the more popular contests in the EI contesters calendar. Most reports from the participants suggest that band conditions were quite favourable -good openings on the high bands, 20 metres open all night and better-than-usual 80 metre conditions with little summer static.

There were at least a dozen EI and GI stations operating from the mainland. One of the big signals from the mainland was Olivier EI8GQB, who used the contest call sign EI1A for the IOTA weekend. He has posted a claimed score showing over 1,200 QSOs; of particular interests is the fact that much of the power he used during the contest weekend was derived from wind and solar energy.

Two Echo-Juliet island stations were heard: EJ0PL, a Polish / Irish team, who were on Little Saltee Island, and EJ3Z - members of the Shannon Basin Radio Club and Galway Radio Club - who were on Inisbofin.

South Eastern Amateur Radio Group.

The annual Inistioge Vintage Rally takes place today Sunday the 5th Of August 2012 in Inistioge Co Kilkenny (weather permitting). See

www.searg.com for latest news regarding event going ahead. There will be a large collection of Vintage Cars, Tractors, Motorbikes, Stationary Engines and lots of other attractions for the family.

The South Eastern Amateur Radio Group will also be there where we will have a station in operation using the call sign EI2WRC on the site we will mainly be using HF but we will also be available through the Southern Ireland Repeater Network should anyone require directions etc. We will also have radio equipment from times gone past on display. If you're in the area Sunday why not come on in for a chat and see the station in operation. We will be delighted to talk to anyone who's involved in radio or anyone who wants to learn more about it.

South Dublin Radio Club

South Dublin Radio Club will be closed for the holidays over the next two Tuesdays - i.e. no meeting on 7th or 14th August. Meetings will resume on Tuesday 21st August at the usual time of 8.00 pm. SDR meets in the Ballyroan Community Centre on Marian Road, Rathfarnham, Dublin 14; visitors are very welcome.

The 5MHz Newsletter

The latest edition - No. 04, Summer 2012 - of The 5 MHz Newsletter is now online on Google docs at http://bit.ly/RdM8PY and includes news on the ITU working party for the WRC2015 5 MHz Agenda Item, plus technical correspondence on NVIS from Marcus Walden, G0IJZ

EI DXCC List

The latest EI DXCC List includes a number of interesting changes: Patrick EI4IR enters the list for the first time, while Brendan EI3GV has jumped over the 'magic' 300 limit of confirmed DXCC entities - he now has 303 entities confirmed (just a few more to go, Brendan!).

We also note a big increase in confirmed entities by Pat EI9HX and Trevor EI2GLB. The EI DXCC List is on the IRTS web site at www.irts.ie/dxcc and is updated regularly.

DX News

A multinational DXpedition to the Comoros in the Indian Ocean will take place from 8 - 20 August. The callsign will be D64K. IOTA reference is AF-007 and the QSL info is via IV3DSH. Pasi OH3WS was QRV from the Aland Islands as OH0/OH3WS on 3 August. He has followed this by travelling on to Market Reef where he will be active as OJ0W until 10 August.

W4XP is going to the Chagos Archipelago from 9 - 25 August. He will activate the callsign VQ9XP. QSLs go via his home call.

Torkel LA6VJA and Fredrik LA6TMA will be active as JW6VJA and JW6TMA from Svalbard from 10 - 12 August. Look for them on CW, SSB and digital.

St. Paul Island (CY9M), the DXpedition to St. Paul Island, which has been in the Top 50 of the "Most Wanted DXCC Entities" for many years, is now QRT. St. Paul Island is an uninhabited island off the East coast of Canada, at the entrance to the Gulf of St. Lawrence. A team of radio amateurs from North America and Europe were active on the island from 27th to 31st July, using the call sign CY9M, achieving a total of more than 30,000 QSOs. The log shows 60 EI call signs, with Ark EI9KC's 12 QSOs topping the leaderboard.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Before Chatroulette, There Was Ham Radio:

Posted: 04 Aug 2012 05:24 PM PDT
http://www.eham.net/articles/28747

As you read this, a dead language is flying through the air all around you -- at least, it's dead for most official uses. It's the Morse code, a binary digital system that dates back to the 1850s. Among its primary users today are amateur radio operators, better known as hams. I am one of these and am proud to say I'm fluent in Morse. I was texting way, way before it was cool. Ham radio is a pastime dating back more than a century. Hobbyists built transmitting and receiving equipment long before radio stations, such as KALW, went on the air. These days, several large manufacturers make most of the amateur radio equipment sold. It's been computerized, digitized and miniaturized over the years, and while hams are numbered among the most advanced techno-geeks among us, many of the original attractions of this hobby have changed very little. Ham operators are no longer required to demonstrate proficiency in Morse to obtain an FCC license. Still, code transmission, or CW, as hams call it, remains one of the most popular modes of communication. The majority of contacts are made by voice. This method of communicating may seem quaint in the Internet age, yet the ranks of ham operators continue to grow, with more than 700,000 licensees in the U.S. alone.

GB2RS NEWS

Sunday 5th August 2012

[Note to newsreaders: There is a pronunciation guide in red text in the last main news story]

The news headlines:

Olympic Flagship station working via satellites

RSGB statement criticises PLT growth

Consultation now running on RSGB Interim Board Strategy and Governance proposals

Olympic Special Event Station 2 Oscar 12 Whiskey has been active on the amateur radio satellites, working stations in the USA and across Europe. The 2o12W satellite station has been operated by Ken, GW1FKY. He is using a Kenwood TS-2000 feeding a 5 element dual-band Elk antenna mounted on a rotator on the portable cabin. Other Olympic stations have also been enjoying great success on the bands and getting interesting visits from the public. For details of all the Olympic stations, check out the RSGB website at www.rsgb.org/operating/ and click on London Olympics 2012.

The RSGB has issued a statement expressing grave concern at the continuing headlong rush to legitimise high levels of emission from PLT devices, in contravention of the Essential Requirements of the EMC Directive. You can read the full statement on the RSGB website www.rsgb.org, click on Update on draft PLT standard prEN50561-1.

Consultations are now running on the RSGB Interim Board proposals on Strategy and Governance. All members are encouraged to share their views, on what are arguably the most important consultations that the Society has ever undertaken. All responses will be carefully considered and the more input that is received, the more robust the final documents will be. The Interim Board intends to bring final proposals for Governance to an Extraordinary General Meeting in November and needs your comments by 20 August. Two Litmus Tests are being run through the RSGB website to facilitate comment and discussion on the proposals. Alternatively you can send comments by e-mail to strategy@rsgb.org.uk or governance@rsgb.org.uk, or submit written comments to the Board at HQ. Follow the link from the main page of the RSGB website, www.rsgb.org.

The latest edition of The 5MHz Newsletter is now online on Google docs at http://tinyurl.com/c86r3l4. It includes news on the ITU working party for the WRC2015 5MHz Agenda Item, plus technical correspondence on NVIS from Marcus Walden, G0IJZ.

Former Serbian Internal Affairs Minister Ivica Daci [ee-VEET-sah DAH-chich], YU1YU, was elected as that country's newest Prime Minister on July 27. Daci is a member of the Amateur Radio Union of Serbia, the SRS Serbia's IARU Member-Society and is said to be a member of his local club, YU1AAV.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Today, 5 August, the Chippenham & DARC Radio Boot Sale takes place at the Chippenham Sea Cadet HQ, off Long Close, Chippenham, approximate post code SN15 3JZ. Doors open at 9am for booters, £5 per boot, foot entry is £1 on the gate, with under 16s free. There is an on site car park and visitors are asked not to park in Long Close.

King's Lynn ARC Rally & Car Boot will be held today, 5 August, at Gaywood Community Centre, PE30 4DZ. Doors open at 10am and admission is £2. There are trade stands and a car boot area. More details from Ray, G3RSV on 01553 849 700.

Today, 5 August, the Lorn Radio Amateur Rally is being held in Crianlarich Village Hall, Crianlarich, near Oban FK20 8QN. Admission is £1 and there are trade stands, a Bring & Buy and a car boot area.

The Cockenzie & Port Seton ARC 19th Annual Mini-Rally Night will take place on 10 August at the Community Centre, Main Hall, Port Seton. Bring along your own junk and sell it yourself. Tables are on a first come first served basis and admission is £2 for everyone. Doors open from 6.30 to 9.30pm.

On 12 August the Flight Refuelling ARS Hamfest takes place at Cobham Sports and Social Club Ground, Merley, near Wimborne, Dorset, BH21 3DA. Doors open at 10am and there will be trade stands and a car boot area. More details from Mike, M0MJS on 01202 883 479.

Now for the news of special events

Sandford Mill Museum in Chelmsford will be open to the public on the first three Sundays in August from 2 to 5pm. The museum is home to an extensive collection of historic radio equipment. Many fascinating radio exhibits are displayed there including spark transmitters from the late 1890's and a fully equipped ship's radio room. The Chelmsford Amateur Radio Society will be operating GB1000MWT on August 5, 12 and 19 from the 2MT Marconi hut inside the museum, postcode CM2 6NY. Admittance and parking are free.

Riviera Amateur Radio Club will be operating the special event station GB4TSF at Torbay Steam Fair today, 5 August. More details are available

at the club website at www.rivieraarc.org.uk.

Oldham Amateur Radio Club will be operating from Royton Park, Royton, Oldham today, 5 August, from 10.30am until 4pm using GB8RTC to celebrate Royton being 800 years old. Operation will be from 40m to 70cm. For more details about the station and events going on at the park please contact Chris, G7OOD on 0774 934 7142.

Carrickfergus Amateur Radio Group will be operating GN0LIX/P from Chaine Memorial Tower in Larne, County Antrim between 18 and 19 August as part of the International Lighthouse and Lightship Weekend. The station will be active on 20m, 40m and 10m SSB, conditions permitting. All QSL will be via the bureau. For further information, visit the Carrickfergus Club website at www.radioclubs.net/carg.

Hinckley Amateur Radio Electronics Society will be putting a special event station on the air on 10 August from Bruntingthorpe Proving Grounds, Bruntingthorpe, Lutterworth LE17 5QS, for On Your Marks 2012. This is a charity fund raising day including flying displays and a motorcycle stunt display.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast. Kent Weald Radio Club is operating GB1HA over the weekend of 11 and 12 August from Headcorn airfield, Kent. Operation will be on HF and VHF to demonstrate amateur radio during the military show that is taking place there over the two days. Further details can be obtained from Patrick via email to palybl@btinternet.com.

Telford and District Amateur Radio Society will be operational from early on Saturday 11th until 4pm on Sunday 12th August using the callsign GB0WPB for William Penny Brookes. The station is celebrating the life of Doctor William Penny Brookes, founder of the Wenlock Olympian Association, who organised the first Annual Wenlock Olympian Games in October 1850. The first Games, held in October 1850, were a mixture of athletics and also traditional country sports such as quoits, football and cricket. The station will be based at Much Wenlock Scout Hut, Bull Ring, Much Wenlock, TF13 6HS. Three stations will be running, 2m/70cm using a vertical, 40 and 80m using a dipole and 20, 15 and 10m using a tribander. Fellow amateurs who happen to be in the area are welcome to visit and operate.

A pair of twinned Special Event Stations, GB175PO and TM175PO, will be running in Dover and Calais to celebrate 175 years of P&O. Operation starts on 11 August and will be running for 30 days. Both stations will have the opportunity to work from ferries at various times during the operation.

And now the DX news compiled from 425 DX News and other sources

Bill, K9HZ will be on the air from St Lucia as J68HZ from 4 to 19 August. The IOTA reference is NA-108 and he will be active on all bands from 40 to 6m. QSLs go via his home callsign.

Stefan, DL4ST is in Afghanistan until the end of September. He is active as T6SS and so far has been worked mainly on 20m.

>From 7 to 13 August John, 9M6XRO and Steve, 9M6DXX will be active from Spratly Island using the callsign 9M4SLL. They will be on 10 to 80m using CW, SSB and RTTY. QSL manager is M0URX.

A multi-national group will activate the Comoros Islands from 8 to 20 August. The callsign will be D64K. QSL info is via IV3DSH and full details of the expedition can be found on www.d64k.net.

Erik, LA2US is now active as JW2US from Bear Island, EU-027, until November. He operates mainly SSB with some CW on 40-10 metres.

Now the contest news

Today, 5 August, the 432MHz low power contest finishes at 1200UTC. Using all modes the exchange is signal report, serial number, locator and postcode.

The UK Microwave Group's Microwave Field Day also takes place today, 5 August, from 0900 to 1700UTC. Using the 1.3 and 10GHz bands, the exchange is signal report, serial number and locator.

The 144MHZ UK Activity Contest takes place on 7 August from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast. August is the first month of the new 80m Club Sprint series, which continues until November. The CW leg takes place on Wednesday 8th from 1900 to 2000UTC. The whole series is limited to 100 watts output. The exchange is both callsigns, serial number and name.

The 5th 70MHz Cumulative Contest takes place from 1400 to 1600UTC on 12 August. Using all modes the exchange is signal report, serial number and locator.

The first of this year's Worked All Europe contests takes place for the entire 48 hours of the 12th and 13th. This month it's CW. Work non-European stations only. There are country multipliers and the added dimension of QTCs, reporting the details of previously held QSOs, enables those who choose to send and receive them to boost their score significantly. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

And now the solar factual data for the period from Friday the 27th to Thursday the 2nd of August, compiled by Martin Harrison, G3USF, on Friday the 3rd of August

Solar activity ranged between very low and moderate. Every day brought a crop of C-class flares, but they had little apparent impact on propagation. M-class flares were reported on the 27th, 28th, 29th and 30th. Of these, an M6.1 flare on the28th was the most significant,

bringing increased geomagnetic activity on the 2nd. Solar flux levels increased from 123 on the 27th to 150 on the 1st, then 135 on the 2nd. The average was 135 units 36 up on the previous week. The 90 day solar flux average on the 2nd was 127, two units up on last week. X-ray flux levels increased from B4.8 on the 27th to B6.3 units by the 1st, averaging B5.5. Geomagnetic activity was at quiet to unsettled levels for much of the period, However, on the 30th, the coronal mass ejection associated with the flare on the 28th brought `active' levels and an Ap index of 13. A brief disturbance occurred on the 2nd, when the Ap index was up to 16. For most of the rest of the week it was in single figures. The average Ap for the week was 9. Solar wind speeds reported by the ACE spacecraft ranged between 307 and 455 kilometres per second. Particle densities were generally low, but reached 14 per cubic centimetre during the disturbance on the 2nd. Bz varied between minus 11 and plus 13 nanoTeslas during that disturbance, but otherwise ranged between minus 3 and plus 4 nanoTeslas. Although the disturbance on the 30th was quite mild one, it brought extensive auroral propagation from early afternoon to mid-evening, which at peak reached southward to central England. Though the event on the 2nd was more intense few auroral contacts were reported.

And finally the forecast. Solar activity and solar flux levels are expected to be below last week's levels, though there is a chance of occasional M-class flares bringing moderate levels. The solar flux should be in the 130's for most of the week. The geomagnetic field is expected to be `active' at times during the next few days due to a recurring coronal hole. Quiet conditions should return by midweek, although an Earth- directed coronal mass ejection cannot be totally ruled out. MUFs at equal latitudes should be around 21MHz in the south and 18MHz in the north. Paths to Japan, currently among the more difficult, should have a maximum usable frequency, with a 50 per cent success rate, of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 16MHz. The best time to try this path will be between 1000 and 1400 hours.

The summer sporadic-E season is now well past its peak, but brief openings may still occur on both 50 and 70MHz. MS operators should find the Perseids shower moving towards its peak next weekend.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Wythall Radio Club is holding club net on 145.225MHz today and next Sunday. On Tuesday there's a free 'n' easy evening at the club, while Friday sees a social evening in the shack. Next weekend the club is running a special event station at Hanbury Vintage Country Show. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications is holding a club net on Monday from 7pm, on 144.165 USB, vertical polarisation. Tuesday sees a station meeting from 7pm, to which non-members are welcome. On Wednesday there is a M3+M6 club net on GB3FR from 7.30pm. Friday sees the regular club net on GB3FR from 8pm. For more information contact the FELCC Information Line on 07554 362 020.

Lincoln Short-Wave Club is taking part in the 144MHz UK AC on Tuesday from the Shack, 8pm onwards. On Wednesday G6COL is on the air from the shack and there's a 50/50 auction at the BSA Club from 8pm. On Thursday the simplex club net takes place on 145.375MHz from 8pm. Next weekend's Saturday Surgery starts at 9am in the shack, then next Sunday there's the 70MHz Cumulative Contest at the shack from 3pm. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Wednesday 8 August Telford & District Amateur Radio Society will be displaying the books and equipment that paid- up members can borrow on Wednesday, and invites members to bring their fully charged gel cells for capacity tests. Next weekend will see GB3WPB on the air from Much Wenlock. Contact Mike, G3JKX, on 01952 299 677.

Now we return to the traditional listing in date order. On Monday 6 August Aldridge & Barr Beacon Amateur Radio Club is having a general discussion and CW tuition. Details from Albert, G0KFS, on 01922 614 169.

On Monday 6 August Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Monday 6 August Gloucester Amateur Radio & Electronics Society is closed. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

On Tuesday 7 August Loughborough & District Amateur Radio Club is holding a walking 2m DF, starting at 8pm from the Glenmore Centre. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 8 August Midland Amateur Radio Society is holding an open meeting. Details from Norman, G8BHE, on 07808 078 003.

On Wednesday 8 August South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Thursday 9 August Central Radio Amateur Circle is holding a night on the air on 145.300MHz from 20:00. Contact Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast. On Thursday 9 August Salop Amateur Radio Society is having a natter night and holding a committee meeting. Details on the club website at www.salop-ars.org.uk.

On Friday 10 August Coventry Amateur Radio Society is having a barbecue and portable night at Newbold Comyn. Contact John, G8SEQ, on 07958 777 363.

On Friday 10 August Hinckley Amateur Radio Society is running a special event station at Bruntingthorpe Proving Grounds. Details from John, M0JAV, on 07836 731 544.

On Friday 10 August South Birmingham Radio Society is doing shack and aerial work. Contact Don, on 01214 581 603.

NEWS FOR THE NORTH OF ENGLAND We start with clubs that have several events this week. Hornsea Amateur Radio Club is taking part in the RoPoCo CW contest today. On Wednesday it's the 80m Club Sprint CW and activity night, then next weekend it's the Work all Europe DX CW contest. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

Wakefield & District Radio Society is having a talk by Phil, 2E0GBF on the TS2000X on Wednesday. Next Saturday the Intermediate course continues with Chris, M0KJP and the Advanced course continues with Dave, G0EVA. For training information contact Dr David Lockwood, G4CLI, on 07748 221 855, and for general club information it's Ken, G8FSO, on 07900 563 117.

Now we return to the traditional listing in date order.

On Monday 6 August Tyne and Wear Repeater Group is holding its AGM at Angel of the North Amateur Radio Club from 7.30pm. All are welcome. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 6 August Bolton Wireless Club is having a talk on building your own HF antennas by Dave, G0BOR and Dennis, G4IAD. For details, send an email to boltonwireless@gmail.com.

On Monday 6 August Sheffield Amateur Radio Club is holding a social evening. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 7 August Morecambe Bay Amateur Radio Society is having a members' night. Contact Sheila, on 07867 516 836.

On Wednesday 8 August Denby Dale Radio Club is on the air from 7.30pm on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 8 August Goole Radio and Electronics Society is holding a barbecue. Contact Ken, G6YYN, on 01757 638 539., rpsmail73@btinternet.com

On Thursday 9 August South Manchester Radio and Computer Club is having a talk on cooking with chillies. Details from Ron, G3SVW, on 01619 693

999.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast.

NEWS FOR SCOTLAND On Tuesday 7 August Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 8 August Lothians Radio Society is holding an informal pub night. Contact Alan J Masson, GM3PSP, on 0131 623 4580.

On Thursday 9 August Aberdeen Amateur Radio Society is holding a VHF fox hunt. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 10 August Cockenzie & Port Seton Amateur Radio Club has its 19th annual mini-rally night. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Farnborough & District Radio Society is running an 80 metre slow CW net on 3.570MHz today from 1 to 2pm. There is a 2m net on Tuesday from 8 to 9pm on 144.675MHz. Friday sees an 80m CW net from 1 to 2pm on 3.570MHz, then a club Top Band net on 1.995MHz from 8 until 9pm. Contact Neville, G3SPD, on 01252 404 816.

Wimbledon & District Amateur Radio Society is dismantling its annual camp today, Sunday, and is closed on Friday. Contact Andrew Maish, G4ADM, on 02083 353 434.

Now we return to the traditional listing in date order. On Sunday 5 August Chippenham & District Amateur Radio Club is holding a radio boot sale at Chippenham Sea Cadet HQ, off Long Close, Chippenham. Contact G3VRE@hotmail.com.

On Sunday 5 August Worthing & District Amateur Radio Club is holding its monthly breakfast meeting at The Goring Caf© from 9am, then operating special event station GB4SLB at Selsey Lifeboat Station. Contact John, G8FMJ, on 01273 593 232.

On Monday 6 August Braintree & District Amateur Radio Society is planning its summer camp planning and having a natter night with show and tell. For more information contact John, M5AJB, on 01787 460 947.

On Monday 6 August Burnham Beeches Radio Club is meeting at the pub. Contact Dave, G4XDU, on 01628 625 720.

On Monday 6 August East Kent Radio Society is closed. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 6 August Southdown Amateur Radio Society is meeting at Chaseley. Details from John, G3DQY, on 01424 424 319.

On Monday 6 August Surrey Radio Contact Club is having a talk. Contact John, G3MCX, on 02086 883 322.

On Tuesday 7 August Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 7 August Stevenage & District Amateur Radio Society is having a social evening. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday 8 August Chesham & District Amateur Radio Society is holding a members' forum and invites members to bring along their radio equipment.. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 8 August Darenth Valley Radio Society is on the air and having a natter night. The club aims to make as many contacts as possible on 40/20m during the evening. Details from Bob, M0RAW, on 01322 663 804.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast. On Wednesday 8 August Harwich Amateur Radio Interest Group is looking at hills & islands. Details from Kevan, 2E0WMG, on 07766 543 784.

On Wednesday 8 August Norfolk Amateur Radio Club is having an informal social and construction evening. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 8 August Southgate Amateur Radio Club is holding a barbecue in the Spinney. Contact David Sharp, M0XDS, by email to david.sharp1@tesco.net.

On Wednesday 8 August Worthing & District Amateur Radio Club is having a talk by Peter Dodd, G3LDO. Contact John, G8FMJ, on 01273 593 232.

On Thursday 9 August Bredhurst Receiving and Transmitting Society is having a talk on valves by G3TCI. Details form Charles G4VSZ, on 07982 244 788.

On Thursday 9 August Edgware & District Radio Society is closed for the summer break. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 9 August Huntingdonshire Amateur Radio Society is holding a club meeting. Contact David Leech, G7DIU, on 01480 431 333.

On Thursday 9 August Reading & District Amateur Radio Club is on the air at Woodford Park, hosted by Tom Cannon, G0VQR. Details from Pete, G8FRC, on 01189 695 697.

On Thursday 9 August Vange ARS is watching a DVD. More information from Steve, G0KVZ, on 01268 552 606.

On Thursday 9 August Verulam Amateur Radio Club is having a social with the GB3VH repeater group. Contact Ralph, G1BSZ, on 01923 265 572.

On Friday 10 August Cambridge & District Amateur Radio Club is having a talk on constructing and operating a low cost fox hunt transmitter by Mike, M0BLP. Contact Ron, G3KBR, on 01223 501 712.

On Friday 10 August Crystal Palace Radio and Electronics Club is holding its Foundation exam. Contact Bob, G3OOU, on 01737 552 170.

On Friday 10 August Loughton & Epping Forest Amateur Radio Society is holding a Bring & Buy table top sale. Details from Marc Litchman, G0TOC, on 02085 021 645.

On Friday 10 August Mid-Sussex Amateur Radio Society is having a radio night. Contact Rob, 2E0RJA, on 01444 232129.

On Saturday 11 August South Essex Amateur Radio Society is operating Olympic Games station GB1HF from the Island Yacht Club. Details from Dave, G4UVJ, on 01268 697 978.

On Sunday 12 August Newbury & District Amateur Radio Society is visiting the Flight Refuelling Hamfest and Royal Signals Museum at Blandford. Contact Rob, G4LMW, on 01635 862 737.

Copyright © RSGB 2012. Not for public release before Monday 6 August 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society has its 80m net on Monday at 19.45, the 2m net on Tuesday at 19.45 and the 4m net on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday 6 August Riviera Amateur Radio Club is having a club night. Details from Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday 6 August Weston Super Mare Radio Society is having a natter night. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 8 August Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 9 August Swindon & District Amateur Radio Club is closed. Contact Den, M0ACM, on 07810 317 750.

On Thursday 9 August Yeovil Amateur Radio Club is holding a portable HF evening in the car park. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 10 August Torbay Amateur Radio Society is having a natter night and holding an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES On Monday 6 August Dragon Amateur Radio Club is holding the Chairman's quiz. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 7 August Carmarthen Amateur Radio Society has its annual barbecue and on the air night. Contact Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday 7 August Wrexham Amateur Radio Society is having a talk on the involvement of amateurs at Bletchley Park. Details from Carl Morris, MW0TBB, by email to tydraig@wrexham-ars.co.uk.

On Thursday 9 August Aberystwyth & District Amateur Radio Society is closed. Details from Ray, GW7AGG, on 01970 611 853.

So, how do the RSCB represent, "all radio amateurs and short wave listeners"
when they hold back notice of an event until the day after for those of us
who
live within walking distance, less than half a mile away?

Ehktually, I did know it was on, because it was the Chairman of
the local radio club who had called on me a week ago today to lend
me his Vibroplex, but I'd forgotten all about it.

A reminder would have been useful, but my comment was intended as a
political criticism of the new politburo regime at Bedford sewage works, who
seemed to follow a common trend in re-organising social clubs. ie, they
feel that "something must be done" and get themselves elected on a reforming
manifesto, but when they arrive in the hot seat, they haven't a clue about
what is to be their strategy for arriving at their target.

Delaying the news bulletin and charging for the use of the QSL buro seem
to me to be two destructive and vindictive actions, not in keeping with
a positive mental attitude of "something must be done".

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
30 July - 05 August 2012

Solar activity was at low to moderate levels. The summary period
began at moderate levels due to an M1/Sn flare at 30/1548Z from
Region 1536 (S22, L=173, class/area Eao/100 on 01 August). Later on
30 July, Region 1538 (S22, L=117, class/area Eso/220 on 04 August)
produced a C6 x-ray event with Type II (730 km/s) and Type IV radio
signatures and an associated non-Earth-directed CME. From 31 July
through the remainder of the summary period, solar activity was at
low levels. On 04 August, Region 1539 (S22, L=099, class/area
Cro/030 on 02 August) produced a long duration event (LDE) that
began at 04/1104Z, peaked at 04/1500Z and ended at 04/1649Z.
Associated with this event was an Earth-directed, partial halo CME
with an estimated velocity of 905 km/s. Other activity of note
included an LDE from Region 1535 (N18, L=135, class/area Eai/150 on
01 August). At 31/1130Z, the region produced a C5/Sf with Type II
(880 km/s) and Type IV radio signatures and an associated
non-Earth-directed CME. Later in the day, Region 1536 produced a
C4/Sf at 31/1727Z with a Type II (592 km/s) radio signature. On 02
August, a C1 x-ray event was recorded in the vicinity of old Region
1526 (S17, L=273) which rotated around the west limb on 01 August.
Associated with this event was a non-Earth-directed CME. Region 1539
produced a C2/1f flare at 03/0600Z with a Type II (622 km/s) radio
signature and a non-Earth-directed CME.

A greater than 10 MeV proton enhancement at geosynchronous orbit was
observed late on 02 August through midday on 03 August with a peak
of 1 pfu at 02/1820Z. This enhancement was most likely associated
with the 02 August limb event.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels throughout the summary period.
```

Geomagnetic field activity ranged from quiet to minor storm conditions. The period began at quiet to unsettled levels with isolated active intervals due to a period of sustained southward IMF Bz to -8 nT from about 30/ 0600 - 1800Z. From 31 July to midday on 02 August, quiet levels were observed. At about 02/1000Z, the 28 July CME arrived at the ACE spacecraft producing active to minor storm periods from 02/1200 - 2100Z. During this time frame, IMF Bz was negative multiple times, peaking at about -12 nT at 02/1220Z while solar wind readings indicated a slight increase from near 450 km/s to about 500 km/s. For the remainder of the summary period, quiet to unsettled conditions prevailed.

Forecast of Solar and Geomagnetic Activity
06 August - 01 September 2012

Solar activity is expected to be at low to moderate levels through 14 August as Regions 1539 and 1540 (S27, L=087, class/area Dso/110 on 05 August) rotate off the visible disk. From 15 - 20 August, mostly low levels are expected. A return to low to moderate levels is expected from 21 August - 01 September as Regions 1532 (S20, L=185, class/area Fho/510 on 28 July) and 1536 rotate back onto the visible disk.

A greater than 10 MeV proton event at geosynchronous orbit is possible through 14 August as Regions 1539 and 1540 traverse the visible disk and again from 21 August - 01 September as Regions 1532 and 1536 rotate back onto the visible disk.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels throughout the period.

Geomagnetic field activity is expected to be at predominately quiet levels from 06 - 07 August. Quiet to unsettled conditions with isolated active intervals are expected on 08 - 09 August due to glancing blow effects from the 04 August CME. Predominately quiet conditions are expected from 10 - 18 August, 21 - 23 August, and 27 August - 01 September. Quiet to unsettled conditions with isolated active intervals are expected from 19 - 20 August and again from 24 - 26 August due to weak coronal hole high-speed stream effects.

http://forums.qrz.com/showthread.php?356659-Southeastern-US-Special-Event-Station-W4T-NVIS-Test&goto=newpost

I should have posted this announcement in this forum instead of the General Section:

The 2nd Brigade of the Tennessee State Guard will be operating Special Event Station W4T under emergency field conditions from 17-19 August 2012 from their training area just outside of Tullahoma TN.

This operating time will be an addition to our operations on Military/MARS frequencies, and we would like to have signal reports from all Tennessee Counties as well as from hams in the Southeast US Region.

We will be QRV on 80 and 40 meters SSB/CW/PSK31 along with some 2 meter FM Simplex work. We'll be using NVIS antennas on HF and Vertical yagis on 2 meters. After 19 August the test will continue from Dickson TN EM66 until 29 August 2012.

All hams are invited to contact us and exchange signal reports during this time.

Please give this information the widest possible publication. We look forward to contacting you.

QSL via W4ETT.

RFinder - The Worldwide Repeater Directory introduces "Bring a Friend"

Posted: 05 Aug 2012 05:16 AM PDT
http://forums.qrz.com/showthread.php?356614-RFinder-The-Worldwide-Repeater-Directory-introduces-quot-Bring-a-Friend-quot&goto=newpost

New promo "Bring a Friend" to the WWRD

For every user you bring on to RFinder - The World Wide Repeater Directory
you will get 2 months added to your subscription! No limit! For instance
if you bring 6 users you get a year free!

To redeem:

Go to http://coupon.rfinder.net

put in for a COUPON CODE your friend's email used in RFinder

put in for an EMAIL ADDRESS your email used in RFinder

"Fine print"...

Please allow one week for the extension to process.

This promo is good for users signed up on or after 5 August, 2012

This offer can be withdrawn or modified at any time.

City To Enlist Volunteer Corps to Help Keep Vancouver Safe:

Posted: 06 Aug 2012 03:45 AM PDT
http://www.eham.net/articles/28752

Group will be tasked with responding to disasters as well as working community events, such as the Celebration of Light: For more than 30 years, Bryan Farrar has been volunteering as an amateur radio operator, providing a vital communications link when telephones or a more recent invention, the Internet - stop working. He's still waiting for the Big One, the levelling earthquake that will call on his honed skills to reconnect disconnected communities. In the meantime, he offers nearly 400 hours of his life every year to coordinate HAM radio services through the city's Vancouver Emergency Community Telecommunications Organization. This month he and his wife Linda, also an amateur radio operator, began taking on new volunteer roles in Vancouver, patrolling public events such as the Honda Celebration of Light fireworks festival as part of an initiative by the city to set up a volunteer corps. On Saturday night, and again on Wednesday, they found themselves at English Bay directing people, providing information and relaying information by radio to a central command.

//
Growth Continues for the ILLW:

Posted: 06 Aug 2012 03:45 AM PDT
http://www.eham.net/articles/28751

With less than two weeks to go, the International Lighthouse and Lightship Weekend continues to growing in its 15th year. The 48 hour fun event has steadily grown from the 158 in its first year and most of those early registrations continue to be involved. In the United Kingdom there are 60, and half of those can be found in England. There are plenty throughout Europe including Germany on 52 and The Netherlands 25. North, Central and South America have more than 80 stations registered with Argentina, Canada, Chile, Curacao, Honduras, Mexico, Panama and Puerto Rico plus 55 in the USA. Nearly 70 been received from Australia and New Zealand, South Africa has 15 and no matter where you are there will be plenty to work. Most issue special QSL cards.

//
Update on Draft PLT standard prEN50561-1:

Posted: 05 Aug 2012 03:24 PM PDT
http://www.eham.net/articles/28750

In 2011 a PLT EMC standard known as prEN 50561-1 was proposed by CENELEC. This proposed standard was rejected by a majority of the National Standards Committees (NCs) of the EU countries who approve all new standards. Many NCs made comments to help improve the draft and some comments questioned the very high radio pollution levels that would be permitted from PLT devices. Other comments would have helped to improve the test methodology. Usually in these situations the CENELEC committee preparing the proposed standard would take note and make changes that reflect the comments with the aim of achieving full consensus of all stakeholders.<

RSGB Convention LOG4OM presentation

Posted: 31 Jul 2012 02:31 AM PDT
http://forums.qrz.com/showthread.php?356053-RSGB-Convention-LOG4OM-presentation&goto=newpost

There will be a presentation of the new LOG4OM free logbook program at the
RSGB Convention in October this year.

The presentation is scheduled for 11.15am on the Sunday and it will be
given by Terry Genes G4POP.

Topics to be covered will be...

Installation and use of the program for the everyday Ham

Integration with external software

Contest an DXPedition use

Presentation of new program features.

How to get the best from a logging program

Plus some exciting news about the future of this free logging program.

Terry G4POP

... and why the unseemly rush? For a wireless club that is 100 years old and
which has a tradition
of keeping things very close to their chest and otherwise being _VERY_
economical with the
truth (if the comments made by the representatives of the RSCB who posted in
this NG about
who set up the Fools' Licence is anything to go by), requiring a response in
only a couple of weeks
for a rushed conclusion in November is suggestive that there is a hidden
agendum from which
as little disruption as possible is to be tolerated.

RAC Bulletin 2012-045E - New Ontario Section Boundaries
2012-08-06

I am very pleased to announce that on schedule, September 1, 2012 the current Ontario Section will be replaced by four new Sections: Ontario North (ONN), Ontario East (ONE), Ontario South (ONS), and the Greater Toronto Area (GTA). The new sections are composed of the following municipalities, regions, and municipal districts.

I am also thrilled to advise that all four Section Manager Positions have been filled and I will circulate a formal introduction in the week to come.

Ontario North (ONN)

All of northwest Ontario including Manitoulin Island, Northeastern Manitoulin and the Islands, Killarney, the cities of Greater Sudbury and North Bay and Nipissing District.

Ontario East (ONE)

Algonquin Park, Renfrew, Hastings, Prince Edward, Haliburton, Peterborough and Northhumberland Counties, and the cities and counties to the east.

Greater Toronto Area (GTA)

The City of Toronto and the Regions of Halton (including the City of Burlington), Peel, York, and Durham.

Ontario South (ONS)

Parry Sound District, the counties of Simcoe, Grey, Bruce, Dufferin, Wellington, the City of Hamilton, the Region of Niagara, and the remainder of south-western Ontario.

Please see attached map.

http:///www.rac.ca/en/news/bulletins/2012/Ont_Section_Boundaries._Ver_2.jpg

The ARRL has recognized the four new sections and they will be effective for the ARRL November Sweepstakes. Several other vendors of logging/contest software have also announced changes, some not effective until January 2013. Please verify with your vendor well in advance of upcoming contests.

International Radio Emergency Support Coalition (IRESC) Organization in
Special Consultative Status with the Economic and Social Council since
2012 PRESS RELEASE August 6, 2012

Greetings:

To all concerned:

The United Nations Economic and Social Council (ECOSOC) at its substantive session of July 2012 adopted the recommendation of the Committee on Non-Governmental Organizations (NGOs) to grant special consultative status to the International Radio Emergency Support Coalition (IRESC).

The United Nations Economic and Social Council (ECOSOC) at its substantive session of July 2012, adopted the recommendation of the Committee on Non-Governmental Organizations (NGOs) to grant special consultative status to the International Radio Emergency Support Coalition (IRESC).

IRESC is a worldwide coalition of volunteer communicators, with dedicated members spread around the globe, providing assistance to those in need at all times of day or night.

UN NGO Accreditation: The Conditions

Generally, UN accreditation or affiliation is done either through the Economic and Social Council (ECOSOC) or the Department of Public Information (DPI).

The qualifier for UN accreditation of an NGO is that the aims and purposes of the organization shall be in conformity with the spirit, purposes and principles of the Charter of the United Nations" - in the case of ECOSOC accreditation, ?promote knowledge of the principles and activities of the United Nations.- in the case of DPI accreditation, and "support the Charter of the United Nations - in the case of accreditation by the Committee on the Exercise of the Inalienable Rights of the Palestinian People.

I. Economic and Social Council (ECOSOC) accreditation: There are three categories of ECOSOC accreditation available to NGOs: general consultative

status, special consultative status, and roster. These are the rules surrounding the process of accreditation. Three Categories:

General Special Roster "Once an application from an NGO has been reviewed and approved by the Committee [on NGOs] it is only considered recommended for consultative status. As soon as possible during its next meeting, the Economic and Social Council reviews these recommendations, takes note of the Committee's report and makes the decisions final."

b. What promises or undertakings are required to be entitled to accreditation:

Resolution 1996/31 " The following principles shall be applied in establishing consultative relations with non-governmental organizations: The aims and purposes of the organization shall be in conformity with the spirit, purposes and principles of the Charter of the United Nations.

The organization shall undertake to support the work of the United Nations and to promote knowledge of its principles and activities, in accordance with its own aims and purposes and the nature and scope of its competence and activities.

Consultative relationships may be established with international, regional, sub regional and national organizations, in conformity with the Charter of the United Nations and the principles and criteria established under the present resolution.

The consultative status of non-governmental organizations with the Economic and Social Council and the listing of those on the Roster shall be suspended up to three years or withdrawn in the following cases:

(a) If an organization, either directly or through its affiliates or representatives acting on its behalf, clearly abuses its status by engaging in a pattern of acts contrary to the purposes and principles of the Charter of the United Nations including unsubstantiated or politically motivated acts against Member States of the United Nations incompatible with those purposes and principles;

1. General Consultative Status:

a. What is it:

Resolution 1996/31 "22. Organizations that are concerned with most of the activities of the Council and its subsidiary bodies and can demonstrate to the satisfaction of the Council that they have substantive and sustained contributions to make to the achievement of the objectives of the United Nations in fields set out in paragraph 1 above, and are closely involved with the economic and social life of the peoples of the areas they represent and whose membership, which should be considerable, is broadly representative of major segments of society in a large number of countries in different regions of the world shall be known as organizations in general consultative status."

b. To what does it entitle the organization:

Resolution 1996/31 " Organizations in general consultative status may propose to the Council Committee on Non-Governmental Organizations that the Committee request the Secretary-General to place items of special interest to the organizations in the provisional agenda of the Council.

Organizations in general consultative status and special consultative status may designate authorized representatives to sit as observers at public meetings of the Council and its subsidiary bodies. Those on the Roster may have representatives present at such meetings concerned with matters within their field of competence. These attendance arrangements may be supplemented to include other modalities of participation.

Written statements relevant to the work of the Council may be submitted by organizations in general consultative status and special consultative status on subjects in which these organizations have a special competence. Such statements shall be circulated by the Secretary-General of the United Nations to the members of the Council, except those statements that have become obsolete, for example, those dealing with matters already disposed of and those that had already been circulated in some other form.

(a) The Council Committee on Non-Governmental Organizations shall make recommendations to the Council as to which organizations in general consultative status should make an oral presentation to the Council and on which items they should be heard. Such organizations shall be entitled to make one statement to the Council, subject to the approval of the Council. (b) Whenever the Council discusses the substance of an item proposed by a non-governmental organization in general consultative status and included in the agenda of the Council, such an organization shall be entitled to present orally to the Council, as appropriate, an introductory statement of an expository nature. Such an organization may be invited by the President of the Council, with the consent of the relevant body, to make, in the course of the discussion of the item before the Council, an additional statement for purposes of clarification.

Organizations in general consultative status may propose items for the provisional agenda of commissions.

Organizations in general consultative status and special consultative status may designate authorized representatives to sit as observers at public meetings of the commissions and other subsidiary organs of the Council.

Written statements relevant to the work of the commissions or other subsidiary organs may be submitted by organizations in general consultative status and special consultative status on subjects for which these organizations have a special competence.

(a) The commission or other subsidiary organs may consult with organizations in general consultative status and special consultative status either directly or through a committee or committees established for the purpose. In all cases, such consultations may be arranged upon the request of the organization;

Non-governmental organizations in general consultative status, special consultative status and on the Roster, that express their wish to attend the relevant international conferences convened by the United Nations and the meetings of the preparatory bodies of the said conferences shall as a rule be accredited for participation.

(c) Organizations in general consultative status and special consultative status shall submit to the Council Committee on Non-Governmental Organizations through the Secretary-General every fourth year a brief report of their activities, specifically as regards the support they have given to the work of the United Nations. Based on findings of the Committee's examination of the report and other relevant information, the Committee may recommend to the Council any reclassification in status of the organization concerned as it deems appropriate. However, under exceptional circumstances, the Committee may ask for such a report from an individual organization in general consultative status or special consultative status or on the Roster, between the regular reporting dates;

All organizations in consultative relationship shall be able to consult with officers of the appropriate sections of the Secretariat on matters in which there is a mutual interest or a mutual concern. Such consultation shall be upon the request of the non-governmental organization or upon the request of the Secretary-General of the United Nations.

The Secretary-General may request organizations in general consultative status and special consultative status and those on the Roster to carry out specific studies or prepare specific papers, subject to the relevant financial regulations.

The Secretary-General shall be authorized, within the means at his disposal, to offer to non-governmental organizations in consultative relationship facilities that include:

(a) Prompt and efficient distribution of such documents of the Council and its subsidiary bodies as shall in the judgment of the Secretary-General be appropriate; (b) Access to the press documentation services provided by the United Nations; (c) Arrangement of informal discussions on matters of special interest to groups or organizations; (d) Use of the libraries of the United Nations; (e) Provision of accommodation for conferences or smaller meetings of consultative organizations on the work of the Economic and Social Council; (f) Appropriate seating arrangements and facilities for obtaining documents during public meetings of the General Assembly dealing with matters in the economic, social and related fields."

c. Which NGOs have it: No Amateur Radio NGO has this status at this time.

2. Special Consultative Status: a. What is it:

Resolution 1996/31 Organizations that have a special competence in, and are concerned specifically with, only a few of the fields of activity covered by the Council and its subsidiary bodies, and that are known within the fields for which they have or seek consultative status shall be known as organizations in special consultative status.

Organizations to be accorded special consultative status because of their interest in the field of human rights should pursue the goals of promotion and protection of human rights in accordance with the spirit of the Charter of the United Nations, the Universal Declaration of Human Rights and the Vienna Declaration and Programme of Action."

To what does it entitle the organization:

Resolution 1996/31 Organizations in general consultative status and special consultative status may designate authorized representatives to sit as observers at public meetings of the Council and its subsidiary bodies.

Those on the Roster may have representatives present at such meetings concerned with matters within their field of competence. These attendance arrangements may be supplemented to include other modalities of participation.

Written statements relevant to the work of the Council may be submitted by organizations in general consultative status and special consultative status on subjects in which these organizations have a special competence. Such statements shall be circulated by the Secretary-General of the United Nations to the members of the Council, except those statements that have become obsolete, for example, those dealing with matters already disposed of and those that had already been circulated in some other form.

(a) In the absence of a subsidiary body of the Council with jurisdiction in a major field of interest to the Council and to organizations in special consultative status, the Committee may recommend that organizations in special consultative status be heard by the Council on the subject in its field of interest;

Organizations in general consultative status and special consultative status may designate authorized representatives to sit as observers at public meetings of the commissions and other subsidiary organs of the Council.

Written statements relevant to the work of the commissions or other subsidiary organs may be submitted by organizations in general consultative status and special consultative status on subjects for which these organizations have a special competence.

(a) The commission or other subsidiary organs may consult with organizations in general consultative status and special consultative status either directly or through a committee or committees established for the purpose. In all cases, such consultations may be arranged upon the request of the organization;

(b) Non-governmental organizations in general consultative status, special consultative status and on the Roster, that express their wish to attend the relevant international conferences convened by the United Nations and the meetings of the preparatory bodies of the said conferences shall as a rule be accredited for participation.

(c) Organizations in general consultative status and special consultative status shall submit to the Council Committee on Non-Governmental Organizations through the Secretary-General every fourth year a brief report of their activities, specifically as regards the support they have given to the work of the United Nations. Based on findings of the Committee's examination of the report and other relevant information, the Committee may recommend to the Council any reclassification in status of the organization concerned as it deems appropriate. However, under exceptional circumstances, the Committee may ask for such a report from an individual organization in general consultative status or special consultative status or on the Roster, between the regular reporting dates;

All organizations in consultative relationship shall be able to consult with officers of the appropriate sections of the Secretariat on matters in which there is a mutual interest or a mutual concern. Such consultation shall be upon the request of the non-governmental organization or upon the request of the Secretary-General of the United Nations.

The Secretary-General may request organizations in general consultative status and special consultative status and those on the Roster to carry out specific studies or prepare specific papers, subject to the relevant financial regulations.

The Secretary-General shall be authorized, within the means at his disposal, to offer to non-governmental organizations in consultative relationship facilities that include:

(a) Prompt and efficient distribution of such documents of the Council and its subsidiary bodies as shall in the judgment of the Secretary-General be appropriate; (b) Access to the press documentation services provided by the United Nations; (c) Arrangement of informal discussions on matters of special interest to groups or organizations; (d) Use of the libraries of the United Nations; (e) Provision of accommodation for conferences or smaller meetings of consultative organizations on the work of the Economic and Social Council; (f) Appropriate seating arrangements and facilities for obtaining documents during public meetings of the General Assembly dealing with matters in the economic, social and related fields."

Which NGOs have it:

IRESC International Radio Emergency Support Coalition Special Consultative Status and IRESC is presently the highest status conferred upon an Amateur Radio NGO in the United Nations.

#3. Roster status: a. What is it:

Resolution 1996/31 "24. Other organizations that do not have general or special consultative status but that the Council, or the Secretary-General of the United Nations in consultation with the Council or its Committee on Non-Governmental Organizations, considers can make occasional and useful contributions to the work of the Council or its subsidiary bodies or other United Nations bodies within their competence shall be included in a list (to be known as the Roster)."

b. To what does it entitle the organization:

Resolution 1996/31 "Organizations on the Roster may have representatives present at [public] meetings that are concerned with matters within their field of competence?

(f) The Secretary-General, in consultation with the President of the Council, or the Council or its Committee on Non-Governmental Organizations, may invite organizations on the Roster to submit written statements.

(b) On the recommendation of the Secretary-General and at the request of the commission or other subsidiary organs, organizations on the Roster may also be heard by the commission or other subsidiary organs.

Non-governmental organizations in general consultative status, special consultative status and on the Roster, that express their wish to attend the relevant international conferences convened by the United Nations and the meetings of the preparatory bodies of the said conferences shall as a rule be accredited for participation.

c) Organizations in general consultative status and special consultative status shall submit to the Council Committee on Non-Governmental Organizations through the Secretary-General every fourth year a brief report of their activities, specifically as regards the support they have given to the work of the United Nations. Based on findings of the Committee's examination of the report and other relevant information, the Committee may recommend to the Council any reclassification in status of the organization concerned as it deems appropriate. However, under exceptional circumstances, the Committee may ask for such a report from an individual organization in general consultative status or special consultative status or on the Roster, between the regular reporting dates;

All organizations in consultative relationship shall be able to consult with officers of the appropriate sections of the Secretariat on matters in which there is a mutual interest or a mutual concern. Such consultation shall be upon the request of the non-governmental organization or upon the request of the Secretary- General of the United Nations.

The Secretary-General may request organizations in general consultative status and special consultative status and those on the Roster to carry out specific studies or prepare specific papers, subject to the relevant financial regulations.

The Secretary-General shall be authorized, within the means at his disposal, to offer to

non-governmental organizations in consultative relationship facilities that include:

(a) Prompt and efficient distribution of such documents of the Council and its subsidiary bodies as shall in the judgment of the Secretary-General be appropriate; (b) Access to the press documentation services provided by the United Nations; (c) Arrangement of informal discussions on matters of special interest to groups or organizations; (d) Use of the libraries of

the United Nations; (e) Provision of accommodation for conferences or smaller meetings of consultative organizations on the work of the Economic and Social Council; (f) Appropriate seating arrangements and facilities for obtaining documents during public meetings of the General Assembly dealing with matters in the economic, social and related fields."

Which NGOs have it: International Amateur Radio Union (IARU) Roster Status and Observer and IARU is presently the 2ndhighest status conferred upon an Amateur Radio NGO in the United Nations and the oldest at this time.

The IARU is recognized by the United Nations as a Non-Governmental Organization (NGO) by virtue of its consultative status with other United Nations bodies, i.e., the ITU. The ITU recognizes the IARU as an international organization (CV/Art.19, No. 230).

Therefore, IRESC has a special duly and obligations to the United Nations and all legal organizations and persons.

IRESC duly also extends to other important issues beside amateur radio as well in our special status.

IRESC officially extends this open letter to all concerned; including the IARU and the ARRL and any legally recognized Amateur Organizations as mandated by the United Nations guidelines.

IRESC is a major Amateur Radio Organization that will hold conference with various organizations that are respectful and in willing to helping the world in conjunction with the United Nations programs and resources. We will include this in our reports to the United Nations and encourage you to join IRESC at: www.irescintl.com/

There are many Amateur Radio Organizations that are not legally recognized by the United Nations standards. These are some of the reasons:

(a) Said Amateur Radio Organization does not respect customs and any laws or rule of land by failure to register their organization legally and be accountable and recognized. This has occurred with revoked IRESC former members, who fail to obey this, yet promote a worldwide recognized Amateur Radio Organization and may even attend or participate in seminars and conferences attended by United Nations recognized agencies or NGO□s.

(b)The International Telecommunication Union (Union internationale des télécommunications, in French), previously the International Telegraph Union, is the specialized agency of the United Nations which is responsible for information and communication technologies. ITU coordinates the shared global use of the radio spectrum, promotes international cooperation in assigning satellite orbits, works to improve telecommunication infrastructure in the developing world and establishes worldwide standards. This includes the Amateur radio operators.

ITU is based in Geneva, Switzerland, is a member of the United Nations Development Group

[1] and its membership includes 193 Member States and around 700 Sector Members and Associates. A good example is the IARU who works as a NGO with them, this could not be done if the IARU and IRESC were not in guidelines to the United Nations as described in paragraph (a) or it associates who were in conflict with said United Nations mandates and guidelines.

So IRESC respects and looks forward to working with all concerned and is excited of its status with the United Nations as a NGO.

IRESC is a worldwide coalition of volunteer communicators, with dedicated members spread around the globe, providing assistance to those in need at all times of day or night.

Currently, IRESC has members in at least 40 countries and it continues to grow. Most members are also affiliated with their respective national organisations; for example, the International Red Cross, the Magen David Adom, the Salvation Army, RAYNET, local amateur radio clubs, along with many others.

Consultative status for an organization enables it to actively engage with ECOSOC and its subsidiary bodies, as well as with the United Nations Secretariat, programmes, funds and agencies in a number of ways, including opportunities to consult with member states and the United Nations system at large.

IRESC therefore wishes to thank all those who have supported the organization from its inception. IRESC is committed to working with all stakeholders locally, regionally and internationally as it seeks to contribute towards the implementation of the United Nations Millennium Development Goals.

In Trinidad and Tobago, the Trinidad and Tobago Amateur Radio League (TTARL), a registered NGO, is closely affiliated with IRESC. Mr. Julien Dedier, chairman of the TTARL is also President of IRESC Trinidad and Tobago.

In the USA , Carl E Caracol President of IRESC , Salvadore Torres Senior VP , Karl E. Arriola, USA East, Richard F Buckley, Emergency Mgt. USA

In Turkey IRESC President Urcun CANEL

In Israel IRESC President PINI (PINCHAS) AVIV

In Italy IRESC President Massimo Giuseppe MALDARIZZI

In Israel IRESC President PINI (PINCHAS) AVIV

In India IRESC President Bharathi Devulapalli Prasad

In United Kingdom IRESC President Stephen Williams

In Portugal IRESC President JOAO MANUEL DUARTE PARRA PLACIDO

In Pakistan IRESC President Khalid Shoaib

All IRESC Members and Supporters

The United Nations committees and councils and all the persons and support from various organizations that encouraged us and supported us.

Sincerely,

International Radio Emergency Support Coalition

Carol Caracol

President/ United Nations Officer

Salvadore Torres

Senior Vice President/ Director of Presidents/United Nations Officer.

Julien Dedier/IRESC Board of Directors/ President of IRESC Trinidad and Tobago/ United Nations Officer

AMSAT NEWS SERVICE

ANS-218

ANS is a free, weekly, news and information service of AMSAT North America, The Radio Amateur Satellite Corporation. ANS reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analog and digital Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor@amsat.org

In this edition:

* AMSAT-UK Colloquium 2012

* Russian Satellite RS-40 Yubileiny-2 Launched

* MSU Attracts NASA Attention With Computer System for Spacecraft

* Olympic Station 2o12W Active on the Amateur Radio Satellites

* Kickstarter Fund Raiser for Ham Radio at South Florida Museum

* Mars Rover Landing News From JPL

* Satellite Shorts From All Over

* ARISS Status - 30 July 2012

AMSAT-UK Colloquium 2012

The AMSAT-UK Colloquium 2012 will be held at the Holiday Inn, Egerton Road, Guildford GU2 7XZ starting at 1000 am on Saturday 15 September, and finishing at approximately 17.00 pm on Sunday 16 September 2012.

The colloquium attracts an international audience from across Europe as well as North America and the Middle East. Attendees range from the builders of the CubeSats and Nanosats, those who communicate through them and beginners who wish to find out more about this fascinating branch of the hobby.

This event provides a rare opportunity to chat with satellite designers and builders, discussions frequently continue until the early hours of the morning.

There will be a beginner's session starting approximately 4pm on Friday 14 September. A Friday Night dinner will be held at the hotel. If you wish to attend, please contact Jim Heck by email at g3wgm@amsat.org at least one week before the event.

A Gala dinner is held on the Saturday evening along with the fund raising auction.

Call for Speakers and Papers

AMSAT-UK invites speakers, to cover topics about micro-satellites, CubeSats, Nanosats, space and associated activities, for this event. They are also invited to submit papers for the "Proceedings" document which will be published at the same time but printed papers are not mandatory. We normally prefer authors to present talks themselves rather than having someone else give them in the authors' absence. We also welcome "unpresented" papers for the Proceedings document.

Submissions should be sent ONLY to David Johnson G4DPZ, via these routes:

e-mail: david dot johnson at blackpepper dot co dot uk.Postal address at http://www.qrz.com/db/G4DPZ

Change in Booking Procedures

There is a booking change this year. Do not book your room with the hotel. Instead you need to book your room with AMSAT-UK at the on-line shop: http://shop.amsat.org.uk - the hotel will only hold rooms reserved for AMSAT-UK until August 24. If you book after this date, you risk there not

being a room available.

Also, Saturday's Gala Dinner must be booked in advance in the on-line shop.

Additional accommodation package information can be found on the 2012 Colloquium web pages: http://www.uk.amsat.org/colloquium/twelve

[ANS thanks AMSAT-UK for the above information]

Russian Satellite RS-40 Yubileiny-2 Launched

A Russian research satellite, with experiments built by students and research staff of the Siberian State Aerospace University and launched on July 28. Signals from RS-40 on 435.365 MHz were first reported by Maik Hermenau on the AMSAT-DL mailing list.

Jan, PE0SAT published information about RS-40 on his web page. While the new satellite uses amateur 70cm downlinks it does not appear to include an amateur radio mission. Details of the downlink signalling protocol have not been made available.

Yubileiny-2 mission aboard this 65 kilograms satellite includes testing advanced technological solutions to be incorporated into future missions:

Contoured heat pipesNew technological enhancements for onboard radio equipment.Small-sized attitude control elements including magnetic torquers.Testing optical properties of solar concentrators using an experimental solar panel module.Compact navigation receiver using the GLONASS and GPS technology.

Siberian State Aerospace University student built components and experiments include:

Earth sensing technology with a camera observing the earth surface.Small WeB-camera to continuously observe the satellite's deployment mechanisms and monitor the performance of satellite components, structures and instruments made of advanced composite materials.

Jan, PE0SAT reports that the signals he received from RS-40 switch between two downlink frequencies:

Signals were first copied on 435.265 MHz FM,Then switched to 435.365 MHz FM.After about six minutes the received waterfall patern changed and there where only signals on 435.365 MHz FM

Jan posted details of the received signals at: http://www.pe0sat.vgnet.nl/2012/i-re...ta-from-rs-40/ He includes 2-line orbital elements as well as audio samples and screenshots of the received signals on this page.

First signal reports from RS-40 are documented at:

http://www.pe0sat.vgnet.nl/2012/firs...ls-from-rs-40/

[ANS thanks Jan, PE0SAT for the above information]

MSU Attracts NASA Attention With Computer System for Space

Evelyn Boswell for MSU News Service

Bozeman MT (SPX) Jul 30, 2012

http://tinyurl.com/MSU-Experiment (www.spacemart.com)

Two Montana State University graduate students who are building a radiation-proof computer system for use in space have received an extra boost from NASA. Justin Hogan and Raymond Weber recently learned that their project with faculty member Brock LaMeres was one of 14 selected by NASA for development and demonstration on commercial launch vehicles in 2013 or 2014.

The Montana State University cubesat, William A. Hiscock Radiation Belt Explorer, has been orbiting the Earth since Oct. 28, 2011.

MSU's computer system is designed to lay on top of a reprogrammable hardware fabric, LaMeres said. If the system works the way it's designed, it will detect radiation and high-energy particles. If radiation strikes - or looks like it will strike - an active circuit, the computer system can shut down the active circuit and use one of the abundant spare circuits. As a result, astronauts may be able to get by with less shielding than they currently carry into space to

protect their computers. They should also be able to work without stopping to fix computer malfunctions.

NASA launched a flight test of their computer aboard a rocket on June 21 from Wallops Island. The rocket soared 73 miles above the Atlantic Ocean, exposing the experiments to zero-gravity and the radiation found in 11 miles of space. Within 15 minutes of launch, the rocket splashed down about two miles from Wallops Island. A commercial fishing boat retrieved the experiments and returned them to the students for analysis.

Hogan and Weber are wrapping up their work on their radiation-tolerant, reconfigurable computer system so it will it into a cube approximately four inches on each side. The cube will head to the Columbia Scientific Balloon Facility at Fort Sumner, N.M. to be launched in early September as part of the High Altitude Student Platform (HASP) program through NASA and the Louisiana Space Consortium. The high-altitude balloon is expected to carry the computer system 22 miles above Earth and stay aloft for 15 to 20 hours.

Olympic Station 2o12W Active on the Amateur Radio Satellites

Olympic Flagship Special Event Station 2 Oscar 12 Whiskey (2o12W) has been active on the amateur radio satellites working stations in the USA and across Europe.

The 2o12W satellite station has been operated by Ken Eaton, GW1FKY a member of the Barry Amateur Radio Club and AMSAT-UK.

The satellite equipment comprises a Kenwood TS2000 feeding a 5 element dual-band "Elk" antenna mounted on a rotator on the portable cabin about 2.5 meters (8 feet) above the ground.

Ken says the station is located on the promenade and the many electrical amusements in the Fairground generate considerable interference on the VHF/UHF bands which has made reception difficult.

The station 2o12W is planned to be on-the-air until September.

For photos and more information see:

http://www.uk.amsat.org/9322

Kickstarter Fund Raiser for Ham Radio at South Florida Museum

The West Palm Beach Amateur Radio Group has built and operates a permanent Amateur Radio exhibit at the South Florida Science Museum in West Palm Beach Florida.

Both the Museum and the amateur radio group are non-profit entities. The museum gave the space for the exhibit but everything from the carpet on the floor, the paint on the walls, the overhead lighting, the electrical wiring and up has been donated and supplied by club members and limited supporters.

Presently the amateur radio facilities are on the very modest side. They operate on loaned radios and wire antennas. The club says, "We get hundreds of youngsters visiting our exhibit every week, only a handful get to experience that 'Lasting Moment of First Excitement' due to our limited facilities."

The club has started an on-line pledge drive using Kickstarter to meet their goal of more modern radio and put up a tower next to the building with an antenna on it that will be high enough to get over the substation next door.

They also need to add exhibits that explain how basic radio, electronics and antennas work for building the level of excitement.

Visit the West Palm Beach Amateur Radio Group's "Lasting Moment of First Excitement" Kickstarter Project page at:

http://www.kickstarter.com/projects/...rst-excitement

The club web pages are at: http://www.wpbarc.com - and -

Mars Rover Landing News From JPL

If you have an iPad or an iPhone with a camera, here's a chance to create personalized photos with a high-resolution 3D model of the Curiosity rover.

Download Spacecraft 3D from the Apple Apps Store. It's free! (Android version to be out in a few weeks).Print a couple of copies of the paper "Targets" before landing night.Place the Target where you want the rover to appear.Compose the desired photo, then tap the "Gear" icon and press the Photo button to take snapshots of the rovers with old and new friends on landing night.Send your pictures to: jplpublic@jpl.nasa.gov We'll put together a collection of photos after the landing.

Other free Curiosity software to play with:

Xbox - Mars Rover Landing

Try your own skills on landing Curiosity through this Xbox game

Downloadable through the Xbox menu system or at:http://marketplace.xbox.com/en-US/Pr...5-d80258480836

Satellite Shorts From All Over

Congratulations to Ted Doty, AA5CK on earning his Satellite Worked All States Award #332. Ted wrote, "I want to express my thanks and appreciation to all of our great Satellite Ops, working from home and portable, to make this award and others a possibility.Remembering this week, that August 2, 1971 was the date when the Apollo 15 lunar module Falcon left the Moon in first televised lunar liftoff: http://en.wikipedia.org/wiki/Apollo_Lunar_Module#Media includes videos.An English language NHK TV news story covers the amateur radio CubeSat FITSAT-1 (NIWAKA) which launched to the International Space Station (ISS)

on July 21: http://tinyurl.com/FitsatOnNHK (Southgate)Listen for Nikolai, VE3NKL operating portable from Newfoundland on a vacation trip. He will be on SO-50 and AO-27 time permitting. He is active in grid squares GN09 and GN19. He posts details on his callsign lookup web page at QRZ.com. (via K4FEG)Listen for Norm, N3YKF operating satellites with a portable station he brought with him during his vacation in Peru.

[ANS thanks everyone for the above information]

ARISS Status - 30 July 2012

1. Upcoming School Contact

Space Jam 6, which will be held at the Octave Chanute Aerospace Museum in Rantoul, Illinois, comleted an Amateur Radio on the International Space Station (ARISS) contact on Sunday, August 5 at 10:06 UTC.

The Space Jamboree Workshop is the Midwest's largest technology oriented gathering of Boy Scouts and Girl Scouts. The theme this year is "The History of Aviation." Subjects that will be taught and merit badges that may be earned include the following: Space Exploration, Radio, Aviation, Electronics, Robotics, Soil/Water Conservation, Environmental Science, Energy, Metalwork, Computers, Geology, Nuclear Science, Engineering and Inventing. The Jamboree is working with the University of Illinois, Purdue, and DePauw Universities (high altitude balloon launches, FIRST Robotics, Nuclear Engineering) to help Scouts plan for the future.

2. Girls from WE@RIT Camp Speak with Sunita Williams in Space

Fifth and sixth grade girls attending the "Everyday Engineering" camp at Kate Gleason College, sponsored by the Women in Engineering @ Rochester Institute of Technology (WE@RIT) in New York took part in an Amateur Radio on the International Space Station (ARISS) contact on Monday, July 23. The girls talked with on-orbit astronaut

Sunita Williams, KD5PLB who currently holds the record for longest space flight by a woman. The contact highlighted camp activities that focus on engineering-based themes to teach the engineering design process through hands-on build and design activities. This year's camp theme is "World in Motion." Also attending the contact were students from the grade 7-9 camp (held two weeks ago), the students attending this week's RoboCamp, and the Lil' Kids on Campus Space Week kids. To view video of the contact, see:

http://www.youtube.com/watch?v=bdlpcw_VD4M

3. Virginia Air and Space Center Contact Successful

On Thursday, July 26, Sunita Williams, KD5PLB held an Amateur Radio on the International Space Station (ARISS) contact with youth volunteers from the Virginia Air and Space Center in Hampton, Virginia. The volunteers give tours, provide demonstrations to the public and support the center in its efforts to educate the public. The center

has its own amateur radio exhibit and during these summer months, it also welcomes NASA exhibits Destination Station, the Orion Test Vehicle and the Mars Science Laboratory.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

Curiosity Imprints Morse Code on Mars Surface

Posted: 06 Aug 2012 03:07 AM PDT
http://forums.qrz.com/showthread.php?356724-Curiosity-Imprints-Morse-Code-on-Mars-Surface&goto=newpost

Mars Science Laboratory, Curiosity Rover vehicle tires have tread patterns that imprint the acronym JPL in Morse Code in the dusty soil of the Mars surface. The wheel tread pattern is made by square and rectangular holes in the wheels. When in motion riding around the sandy Gale Crater, this pattern is viewed by the driver using some of the 17 cameras aboard this interplanetary SUV. It takes about 14 minutes for radio waves to travel from the red planet to earth, through the Mars Odyssey orbiter relay satellite using UHF. Since there is a more than a 30 minute round trip delay between the driving commands and finding out the result of the measured moves, there is a need for the earth-bound drivers to maintain visual orientation and checks of distance traveled... this can be gauged by incremental count of the tread pattern repeats. Curiosity has 6 of these morse-coded wheels, and uses a rocker-bogie suspension, enabling it to climb obstacles. Who knows how many years these tread patterns will last on Mars? Perhaps when future Martian archaeologists study these strange fossil tread patterns a few hundred years from now, they will try to find someone studied in ancient radio lore to decode the meaning.

Tiny satellites to write Morse code, visible in the night sky

Posted: 27 Jul 2012 08:59 AM PDT
http://forums.qrz.com/showthread.php?355628-Tiny-satellites-to-write-Morse-code-visible-in-the-night-sky&goto=newpost

http://dvice.com/archives/2012/07/tiny-satellites.php

I just saw this at dvice.com and thought I would share.

"An unmanned Japanese cargo vessel headed for the International Space Station (ISS) this week is carrying some unusual cargo. In addition to regular supplies, the vehicle contains some tiny, cube-shaped satellites that, when deployed, will write Morse codemessages visible in the night sky.

One of the mini satellites, known as cubesats, has the job of helping researchers test optical communication techniques in satellites. The cubesat will use LEDs to first twinkle like an artificial star and eventually blink in Morse Code.

The cubesat is known as FITSAT-1 and was developed by Japan's Fukuoka Institute of Technology (FIT). It weighs just under three pounds and carries high output, 200 watt LEDs that will turn the cube into a flashing Morse code beacon.

Project leader Takushi Tanaka, an FIT professor of computer science and engineering discusses one of the most exciting elements of the project on the FITSAT-1 website:

"These [Morse code flashes], we hope, will be observable by the unaided eye or with small binoculars," Tanaka says.

It is expected the FITSAT-1 will be deployed from the ISS on September 6, by Japanese astronaut Akihiko Hoshide, using the Kibo module's robotic arm. Once in orbit the FITSAT-1 will travel between 51.6 degrees south latitude and 51.6 degrees north latitude, according to researchers.

The orbit and orientation is important to the success of the project. The tiny satellite contains a neodymium magnet that will always point it to magnetic north. This way, when the satellite rises above the horizon it will be to the south of the FIT ground station.

The flashing lights and Morse code signals from the FITSAT-1 will be received by the FIT ground station telescope and photo-multiplier device linked to an antenna. The ground gear and the satellite's LEDs will be aligned so the ground will receive the main beams.

The FITSAT-1 project will conduct high-speed and optical communication experiments for three minutes as the satellite moves through orbit, to prove the viability of optical communication with satellites.

Tanaka's website has additional detailed information on the construction of the FITSAT-1, communication frequencies and what it will be transmitting during the testing.

Seeing the little satellite in action firsthand might be challenging, but even if we only get to see the sky's newest inhabitant work via video from Tanaka's lab, it's cool to know we can wish upon a whole new star!"

Amateur Radio Newsline☐ Report 1824 ☐ July 27 2012

Amateur Radio Newsline report number 1824 with a release date of July 27 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. The International Amateur Radio Union to vote on admitting two new members; Solar Cycle 24 heats up with a massive East coast VHF band opening; the London 2012 Olympics ham radio stations take to the air and four new ham radio CubeSats go skyward. Find out the details are on Amateur Radio Newsline☐ report number 1824 coming your way right now.

(Billboard Cart Here)

**

HAM POLITICS: IARU VOTING ON TWO PROPOSED NEW MEMBERS

The International Amateur Radio Union could have two new members before years end. Amateur Radio Newsline☐s Heather Butera-Howell, KB3TZD, is here with the details:

MDC QSO Party

Posted: 07 Aug 2012 06:03 AM PDT
http://forums.qrz.com/showthread.php?356850-MDC-QSO-Party&goto=newpost

Hi Guys and Dolls:

Just wanted to remind everyone that this weekend in the MDC QSO Party,
August 11 and 12.

Full rules are at www.w3vpr.org .

Also a couple notes: The sponsor this year, the AARC, Inc, promises a
certificate to anyone working at least 10 MDC stations during the event and
then submitting a proper entry into the contest. That is in addition to the
usual winner awards.

Rare Worchester County will be on the Air as NI2W/3 and his operating
partners N3ARZ and WB3FTQ head to the eastern shore of Md to provide that
rare county to those interested.

I, WA3EOP , will mobile through a few Mid to Western MD Counties,
Howard, Carroll, Frederick,And Washington in support of the event on
Saturday. If you are looking for 10 MD stations, A mobile contact counts as
a different station in each county worked. There could be a few other
mobiles out there too.

Several clubs are expected to be on the air during the event including
KI3DS, W3VPR, W3HAM and probably

others. If you are in it to win it, Club are 10 point contacts on each band
worked and mobiles are 5 points for each valid contact.

Its billed as the FUN CONTEST. Its not a huge state QSO Party like
California, Pennsylvania and a few others but it is different and helps
keep a little fun in the hobby. See you there?

//
Northwest US Special Event Station W4T for ToorCamp, Aug 8th - 12th

Posted: 06 Aug 2012 05:24 PM PDT
http://forums.qrz.com/showthread.php?356810-Northwest-US-Special-Event-Station-W4T-for-Too
rCamp-Aug-8th-12th&goto=newpost

ToorCamp is the American hacker camp. This year, we're gathering on the beautiful coastal beaches of Washington State from August 8th to 12th. In an effort to share amateur radio with a group of over 500 hackers, coders, makers and artists, we are running special event station W4T.

Anticipate activity primarily in the mornings and evenings Pacific time on the 10 through 80 meter bands. Operators will most likely spend a great deal of time scanning the bands, but look for activity on 14.240 and 7.182.

QSL via LoTW or Direct to N2IHK.

Mars Link for Timaru Man (ZL3PN):

Posted: 06 Aug 2012 05:18 PM PDT
http://www.eham.net/articles/28756

MESSAGE FROM SPACE: Timaru amateur radio enthusiast and technology buff George Boorer receives a signal from Nasa's Curiosity. Relevant offersThere was excitement in Timaru's Newton St last night. Timaru amateur radio enthusiast and technology buff George Boorer watched with anticipation as Nasa's Curiosity sent a signal from Mars. It was a moment he had waited 12 months for after receiving news that his name would be encoded on a chip aboard the craft. Mr Boorer, 68, known on Mars as ZL3PN, received a certificate of authentication after he applied to have his details sent to the planet. The retired electrician is a life member of the South Canterbury Amateur Radio Club and has built an impressive setup at his home where he listens in and chats with other operators around the world.

(e-mail: dj1yfk@darc.de)

5H, Tanzania:
Roland, DL4ME will be QRV as 5H3ME from August 14th to September 3rd during his vacation with his son Mike, 5H3EE. Operation will take place from 80 m to 6 m in CW and digital modes.
QSL via homecall.

D6, Comoros:
Fabrizio, IW3SQY, Paolo, IV3DSH, Antonello, IT9YVO, Franco, IZ8GCE, Giorgio, IZ4AKS, Les, SP3DOI, and Salvador C31CT/EA3QS will be active as D64K from August 8th to 21st from Comoros (AF-007).
They will operate from 160 m to 6 m in all modes. QSL via IV3DSH.
http://www.d64k.net/
https://twitter.com/#!/D64K

DL, Germany:
The two special event call signs DP775BLN and DQ775BLN will be QRV till the end of this year, celebrating the 775th anniversary of Berlin. These and other club stations from Berlin will have the special DOK BLN775. More than 10,000 QSOs have been logged so far.
http://www.darc.de/distrikte/d/775bln

Also DP87SIXD will be QRV throughout the year, for the 87th Enduro Team World Championship (Six Days). For the first time in 23 years, the International Six Days Enduro (ISDE) take place in Germany again.
QSL via bureau.

FP, St. Pierre et Miquelon:
Mike, VE2XB, will be FP/VE2XB between August 10th and 20th from St. Pierre et Miquelon (NA-032) on all bands with a focus on 6 m. With a 500W-PA by THP and a Hexbeam we can expect a good signal from him.
QSL via VE2XB.
http://fp-ve2xb.jimdo.com/

G, England:
GB2012OLY is one of the special stations for the Olympics 2012.
QSL via M0DOL.

OD, Lebanon:
Special event station OD5ARMY is QRV during August in celebration of
the founding of the Lebanese Army. QSL via OD5NJ.

OJ0, Market Reef:
Pasi OH3WS will be active as OJ0W from August 4th to 10th from Market
Reef, (EU-053, ARLHS MAR-001, WLOTA 0542) in spare time. QSL via OH3WS.

ON, Belgium:
On the occasion of the 29th Oldtimer FlyDrive-in in Schaffen on August
11/12, the radio club ON4DST will activate the special call ON29IOF on
80 m to 10 m in SSB and CW. QSL via ON4AMM.

SM, Sweden:
SA0AEK, SA0AEX and SA0ASG plan to be active as SC0UT/5 until August
10th from the Scout Camp Boomerang 2012 on Vassaro Island (EU-084).
QSL via SC0UT (b).
http://www.radioscouter.se/

SP, Poland:
Until October 2nd, the special call sign SN63DNI will be on the air
to remember the 63rd anniversary of the Warsaw Uprising.
QSL via SP5NHV.

A list of more than 1500 Polish special call signs since 2007 can be
accessed at:
http://www.uke.gov.pl/uke/redir.jsp?place=galleryStats&id=54443

UA, Russia:
Members of the AFARU (Armed Forces Amateur Radio Union) will be
active as R100WWS from any areas of Russia between August 10th to
18th to celebrate the 100th anniversary of the Military Air Forces
of Russia (formed on August 12, 1912).
QSL via RV3YR.

VU7, Lakshadweep:
Members of the Bangalore Amateur Radio Club (VU2GGM, VU2GSM, VU2JHM,
VU2LU, VU2LX and VU2UR) have been granted permission to operate from
the Lakshadweep Islands. They will use the call sign VU7M from
Minicoy Isl. (AS-106) and lighthouse from August 13th to 22nd with
a "humble HF station". QSL via VU2JHM.
http://www.qrz.com/db/VU7M

YB, Indonesia:
Members of the YB Land DX Club (YBDXC) will activate the special
event station YB67RI between August 10th and August 17th, celebrating
the 67th anniversary of Indonesia's independence.
QSL via YB2DX direct or LoTW only.

YL, Latavia:
Vitaly, YL3AFK, Alex YL3BU, Evgeny, YL2TD and Grigorij, YL2NS will
be active on the 11th and 12th of August 2012 from Edole Castle
(WCA YL-00022, COTA-YL Z-007, WW Loc. KO07ua) as YL11WCA on the
HF bands in CW and SSB close to the WCA frequencies.
QSL via bureau. Their log will be uploaded to WCA E-Log.
http://www.yl3bu.lv/news/WCA_Edole_castle

YN, Nicaragua:
Ben, TI4SU is QRV as HT9H to commemorate the 250th anniversary of
the Battle of the Rio San Juan. QSL via TI4SU, direct.

DXCC:
The Solomon Island activation of H44UD (2012) was approved for
DXCC credit..

New deadline for CQ-Contests:
The log submission deadline for the CQ-Contests has been reduced to
five days after the end of the contest. Extensions may be given on
request (questions@cqww.com) under certain circumstances. The first
contest affected by this new deadline will be the CQ WW SSB Contest
taking place in October.
http://www.cqww.com/

UPCOMING CONTESTS

Aug 11/12 WAE DX Contest (CW)

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

AF-006; VQ9; Diego Garcia Island: Chuck, W4XP, plans to be active from
August 9th to 25th from Diego Garcia Atoll (AF-006, WLOTA 1645,
LOC MI62) as VQ9XP from the club station VQ9X. The focus of his
activity is 6 m, he's also QRV on HF.
QSL direct via W4XP and LotW.

AS-105; HL2; Kyonggi-Do Province group: Tai, DS2NMJ, will be active
from Yonghung Do (AS-105) on August 12/13 as DS2NMJ/2. He will
be QRV only in SSB on 15 m and 12 m.
QSL via DS2NMJ (direct or bureau).

EU-012; GM/MM; Shetland and Fair Isle: Members of the Grantham Amateur
Radio Club members (Alan, G0RCI, Pete M0USY, Harry G7DEH, M0UXX,
Dave G4IAR, Judith G4IAQ and Alec M0PUD) will be active as GS0GRC
from Bressay Isle (IOSA SH06, SCOTIA SI08, WLOTA 1079, LOC IP90,
WAB HU43), Shetland & Fair Isle (EU-012) from 14th to 19th August.
QSL via G0RCI (direct or bureau).
http://www.garc.org.uk/

Dave, G4IAR and Judith, G4IAQ will also activate the Bressay-
Kirkabister Ness lighthouse (BARLS A3776, ILLW UK0035, ARLHS

SCO-021, TWLHD WLH GM-009, WLOTA 1079) as GB0BL on the ILLW.
Additional activities include using the WAB Awards Group Call
GM4WAB from WAB HU43.
QSLs via G4IAR (direct or bureau).

EU-014; TK; Corsica Island: Jack, IZ3DBA, will be active from Corsica
(EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) as TK0/IZ3DBA from
8-16th August.
QSL via IZ3DBA (direct or bureau, LotW, eQSL)

EU-015; SV9; Crete Island: SV1GSU will be active from Crete Island
(IOTA EU-015) from August 4th to 8th as SV9/SV1GSU on 40 m, 20 m
and 15 m in CW, SSB and PSK31.
QSL via SV1GSU.

EU-026; JW; Spitsbergen Island: Torkel, LA6VJA and Fredrik, LA6TMA plan
to be active as JW6VJA and JW6TMA, respectively, from Longyearbyen,
Spitsbergen Island (EU-026, WLOTA 0125), Svalbard Archipelago, from
10th to 12th of August. JW6VJA plans to be on CW and SSB while
JW6TMA will mostly use digital modes.
QSL via home calls.
http://www.bitwrap.no/web/index.php?id=6

EU-028; IA5 Tuscany Region Group incl. Toscano Archipelago: Paolo, IZ5NFD
will be active holiday style as IA5/IZ5NFD from Elba Island (EU-028)
on August 6th to 12th. Look for him to operate mainly in CW in the
early mornings around 5 UTC and after 21 UTC on 40 m to 2 m.
QSL via IZ5NFD (direct or bureau)

EU-038; PA; Noord Holland/Friesland/Groningen Province group: Texel Island
is the second planned destination of Marco/IZ3GNG between August 13th
and 16th (WLOTA 0043, LOC JO23), using PA/IZ3GNG on the HF bands.
QSL via IZ3GNG (direct or bureau)

EU-042; DL; Schleswig-Holstein State North West group: Mike, DG5LAC/p will
spend his vacations on Amrum Island (WLOTA 2426) between August 11th
and 24th. He also plans an activity from DLFF-013 (National Park
Schleswig-Holsteinisches Wattenmeer); note that those activities
from DLFF-013 do not count for IOTA and vice versa.
QSL via DG5LAC (direct or bureau, LotW)

EU-052; SV; Ipeiros/ Dytiki Ellas Region group: Fabio, IZ7FLQ, will be
touring Greek Islands starting on August 8th through August 18th.
He will be active from Lefkada, Itaca, Meganisi, Kefallonia Islands
with the following callsigns and references:
SV8/IZ7FLQ/LI Lefkada no IOTA
SV8/IZ7FLQ/TI Itaca EU-052
SV8/IZ7FLQ/MI Meganisi EU-052
SV8/IZ7FLQ/KI Kefallonia EU-052
The activation of further islands may be possible.
QSL via IZ7FLQ (direct or bureau)
http://iz7flq.jimdo.com/

EU-056; LA; More og Romsdal County Centre group: From August 13th to 17th Glenn LA8XRA and Trond, LA9VDA will be active as LA6Q from Sandoy Island. It will be the first activation of WLOTA LH-2769. Activities will take place in CW, SSB and RTTY from 80 m to 10 m.
QSL via LA9VDA (direct or bureau, requests via la9vda[at]gmail.com).

EU-064; F; Pays de la Loire Region group: Geoffrey, F4FVI, Chris, HB9ELV, Johan F4GTD, Phillipe F5TRO and Nicolas F8BDB plan to operate as TM1NOI from Barbatre, Ile de Noirmoutier (EU-064, DIFM AT020, WLOTA 1224) from August 12th to 14th. They will be active around the IOTA frequencies in SSB.
QSL via HB9ELV (direct) or F4FVI (bureau) and LotW/eQSL.
http://www.qrz.com/db/TM1NOI

EU-079; LA; More og Romsdal County South group: Glenn, LA8XRA and Trond, LA9VDA plan activate Jonsholmen Island (EU-079) as LA6Q from August 10th to 13th. Activities will be on 80 m to 10 m in CW/SSB/RTTY. They may make short side trips to Dimna Island (EU-079, WLOTA 2438) and Nerlandsoy Island (EU-079, WLOTA 2193).
QSL via LA9VDA (direct or bureau)

EU-132; SP1; Szczecin/Koszalin Province group: From August 10th to 19th, Jacek/SP5OXJ will be active from Karsibor (SPFF-269) as SP5OXJ/1. Activities will take place on the HF bands in CW and digital modes.
QSL via SP5OXJ (direct, bureau, LotW)

EU-135; SM2 Vasterbotten District Group: Tomas, SM3DMP will be active as SF2CW from Holmon Island (EU-135) on August 6th to 9th.
QSL via SM3DMP (direct or bureau)

EU-146; PA; Zuid Holland/ Zeeland Province group: Marco, IZ3GNG will be active as PA/IZ3GMG on 40 m to 6 m in SSB from Schouwen-Duiveland (EU-146, WLOTA 3089, LOC JO11) on August 8th to 12th.
QSL via IZ3GMG (direct or bureau)

EU-165; I*0; Sardinia's Coastal Islands: Massimo/I0PNM will be active as IM0/I0PNM from S.Pietro Island (IOTA EU-165) from August 10th to September 3rd on 20 m to 10 m mostly SSB, RTTY and PSK31.
QSL via I0PNM (direct only)

NON-IOTA
Operators Ron, KB9NW, Frank, K9TIE and Fritz, WD9FMB will activate and try to qualify Coopers Island (USi IL040, LOC EN50en), located in the Illinois River, Tazewell County, Illinois, on 11th of August using the special callsign K9C. They will be QRV around 7250 kHz, 21350 kHz, 28450 kHz but mainly 14250 kHz to 14260 kHz.
QSL via WD9FMB.

//
Sir Bernard Lovell, Jodrell Bank Observatory founder, dies aged 98

Posted: 07 Aug 2012 05:53 PM PDT
http://forums.qrz.com/showthread.php?356938-Sir-Bernard-Lovell-Jodrell-Bank-Observatory-fo
under-dies-aged-98&goto=newpost

The celebrated physicist and radio astronomer Sir Bernard Lovell has died
at the age of 98, the University of Manchester has announced.

http://www.guardian.co.uk/science/2012/aug/07/jodrell-bank-observatory-bernard-lovell-dies

Jodrell Bank is dominated by the 76-metre (250ft) Lovell telescope,
conceived by the astronomer.

Lovell began working with the engineer Sir Charles Husband to build the
telescope in 1945 and it has since become a symbol of British science and
engineering and a landmark in the Cheshire countryside.

A hugely ambitious project at the time, the telescope was the world's
largest when it was completed in 1957 and within days tracked the rocket
that carried Sputnik 1 into orbit, marking the dawn of the space age.

It is still the third largest steerable telescope in the world and a series
of upgrades means it is now more capable than ever, observing phenomena
undreamed of when it was first conceived. The telescope plays a key role in
world-leading research on pulsars, testing our understanding of extreme
physics including Einstein's general theory of relativity.

Last year, Jodrell Bank Observatory was placed on the British government's
shortlist for World Heritage Site status, recognising its important role in
research and education.

//
Political Ads on QRZ

Posted: 07 Aug 2012 12:33 PM PDT
http://forums.qrz.com/showthread.php?356901-Political-Ads-on-QRZ&goto=newpost

Yes, it's that season again where every TV, newspaper, and many billboards
carry political slogans and advertisements of all kinds.

Several people have written to complain about the political ads on QRZ and
I just wanted to take this opportunity to mention that QRZ does not endorse
any political candidate for any office. The political ads which appear on

our site are supplied by Google and no political candidate, entity, party, or action committee has contracted directly with QRZ for any advertising. We would not accept such direct advertising if offered.

Some have suggested that a proliferation of Anti-Obama ads have marked QRZ as a right winged organization. This is patently false, as QRZ supports nobody. Google uses sophisticated techniques to determine the demographics of each website and places ads on those sites which best fit those demographics. You will notice that we don't get any ads for feminine products, and that's because Google knows full well that the average QRZ user is a middle aged male. Their analytic methods decide which ads will get the most clicks for their clients and evidently, they believe that middle aged men are an active voting block.

So, if you're tired of seeing political ads, then turn off your TV, your internet, and close your eyes for a few more months. Otherwise, do what I do and simply ignore them. This too, will pass.

//
Hurricane Watch net to activate for Ernesto

Posted: 06 Aug 2012 06:39 PM PDT
http://forums.qrz.com/showthread.php?356816-Hurricane-Watch-net-to-activate-for-Ernesto&goto=newpost

The Hurricane Watch Net is being activated for tropical storm Ernesto. Forecasts call for the storm to achieve hurricane status during morning hours Tuesday, August 7, 2012. The net will be active on 14.325 MHz to report observed conditions to the National Hurricane Center. Net operations will begin at 1300 Eastern Daylight, 1700 UTC Time. Amateur stations in the affected area should be aware of the storm, and be prepared to operate from a place of safety. We will be looking for condition reports from stations in the affected area. We do appreciate the consideration of Amateur Operators in keeping our frequency clear, and listening for possible relays. For information on the storm and the Hurricane Watch Net, go to http://www.hwn.org. We are also on Facebook.

UPCOMING METEOR SHOWERS: AUGUST 2012

August marks the return of one of the most popular meteor showers: the Perseids.
Although this shower has proven to be very dynamic in recent years
(as in 2009, for example), only the ï¿½normalï¿½ peak, with ZHR around 100 hr-1,
is expected to occur this year. According to IMO, the maximum in 2012 is
expected to occur on August 12, between 12h and 14h30m UT, with peak having ZHR = 100 hr-1.
No encounters with other trails are expected this year.
Please note that recent IMO observations found that timing of ï¿½traditionalï¿½ broad
maximum
varied between λsol=139ï¿½8 to 140ï¿½3, equivalent to 2012 August 12, 07h UT to 19h30m
UT.
Of course, some minor showers will also be active in August, κ-Cygnids, Aurigids and
daylight γ-Leonids being the most significant.
Last but not least, donï¿½t forget the great help given by Sporadic Meteors:
their rates are very close to annual maximum in August.

MMMonVHF and DUBUS 144 MHz Meteorscatter-Sprint Contest (World Wide)
The VHF-DX-Portal MMMonVHF in cooperation with the magazine DUBUS invites you
to take part in our 144 MHz Meteorscatter Sprint Contest.
>Date: 12./13. August 2012 Time period for 48 hours. More information:

****

** DXCC: EW ; Belarus ; Square: KO32-KO42 ; start 2012-08-01 **

LATEST NEWS from US8ZAL, dated 2012-08-06:
We're leaving tomorrow. At 4:00 am local time. Way by the car about 1,100 km.
Unfortunately,
us now three only, and we reserve EME antenna at 432 MHz at home. We will take only one
antenna
at 432 MHz - 17el DK7ZB. We can't received callsign of the club, so we will QRV as
EW/UY5HF, EW/UR7GO and EW/US8ZAL.
Still we not have info about Belarus internet, but think what must be OK. 73! Vlad

LATEST NEWS from US8ZAL, dated 2012-07-31:
Unfortunately, we linger. Not yet obtained a license. In any case,
we will be QRV for at least 10 days. Hopefully, this week everything will be decided.

>From August 1 to August 10, the team SUDXF will QRV MS, EME, TROPO
of squares KO42, KO32. We start at the same time of two squares:
one EME, from another MS and TROPO. After four days, changing squares.
Call - EW/UT2GWW. Range - 144 MHz? may be and 432 MHz.
Frequencies: EME - 144,138 MHz, MS - 144.353 MHz. The work is always in the
first period.
Operators: EME - Anatoly, UY5HF, Alex, UR7GO. MS - Vlad, US8ZAL, Mike, US0GM.
QSL via US8ZAL

** DXCC: LA: Norway ; square JP60 ; start 2012-08-11 **

LA9DFA will activate JP60bg again this year. Primary target will be 144MHz,
but if more operators go with me this time, perhaps we will do some 70MHz and 50MHz to.
Will go to JP60bg sometime between July 23 and 29 to setup antennas for 144MHz.
Will do some operating that day to test antennas and PA. Will announce this on
ON4KST chat in advance. It's weather depended. Will use 2x9el and a 250W on 144Mhz.
Frequency and mode will be announced on ON4KST chat. Will operate random and please follow
me on Shout for info about beamheadings, frequency and tx-periode and so on.
Found that the following hams do need JP60 on 144MHz:
DD3SP DF5NK DF6YL DG1VL DG9YIH DH6DAO DH6JL DJ6AG DK5DQ DK7BY DK7LFG DL0UL DL1RNW DL1SUZ

Curiosity Rover Tags Mars with Morse Tire Tracks:

Posted: 07 Aug 2012 05:00 PM PDT
http://www.eham.net/articles/28765

NASA's Curiosity rover may not look like an urban menace, but the robot explorer will in fact be steadily tagging the Martian surface as it trundles, leaving a name-check of the Jet Propulsion Laboratory back home. The clandestine graffiti is thanks to part of the rover's visual odometry system, John Graham-Cumming points out, which tracks the marks left by a series of asymmetrically arranged holes in the wheels. The position of those holes, however, isn't random: in fact, it's Morse Code. In fact, there are three sets of notches, which progressively leave three rows of dots and dashes in the Mars grit. That pattern is ". - - -"; ". - - ."; ". - . ." or, translated into English, "JPL", the acronym for the Jet Propulsion Laboratory.

Mission to make Curiosity count

With the Curiosity Mars landing Aug 6, The Canberra Times interviewed
radio amateur Len Ricardo VK1ALR. Now it just so happens that VK1ALR is
Operations Manager at the Canberra Deep Space Communication Complex.

Len has had a passion for space since the launch of the first Sputnik mission
in October 1957. A nine-year-old in Brisbane at the time, he watched the
tiny white speck pass overhead in the night sky and heard the ''beep, beep,
beep'' signal on the evening radio news (TV had not arrived in VK4 at that

time.)

''I started to play at amateur radio at school and I had a crystal set I got for my birthday,'' he said. ''I'm still a ham radio operator, I just never expected to have a set this big (indicating Tidbinbilla's 70-metre dish which is even larger than the 1950/60s instrument at Parkes).

Read the full story at
canberratimes.com.au/act-news/mission-to-make-curiosity-count-20120801-23fq1.html

The Mar Rover Curiosity transmits around 401 MHz but the transponder on the Mars Reconnaissance Orbiter (MRO) has a C.C.S.D.S. Forward Frequency in the 437 MHz Amateur-Satellite Service band.

435-438 MHz is shared with the Military and 432-438 MHz is also a Space SAR Band. General Space usage extends beyond that.

The MRO has a UHF transponder "MELACOM" (401 to 437 MHz) and 2 patch antennas to communicate with any landed asset on Mars surface supporting the CCSDS Proximity-1 protocol.

http://www.spaceops2012.org/proceedings/documents/id1295328-Paper-003.pdf

http://descanso.jpl.nasa.gov/DPSummary/MRO_092106.pdf

Speaking of radio telescopes, British physicist and astronomer Bernard Lovell, who developed one of the world's largest radio telescopes, has died at 98.

Lovell was founder of England's Jodrell Bank Observatory and creator of its massive 76-metre-wide radio telescope that has borne his name since 1987.

Lovell's was the only Western device able to pinpoint and track Sputnik's booster rocket October 4, 1957. Lovell also led an important World War II research project that developed the world's first radar system for scanning the ground. The H2S radar technology was used on British bombers from 1943 onward to identify ground targets at night and low visibility.

(sbs news on line plus southgate)

Codan Acquisition of Canadian Land Mobile Radio Communications Company.

Codan Limited has entered into an agreement to acquire all of the shares in Canadian-based company, Daniels Electronics Limited, a leading designer, manufacturer and supplier of land mobile radio communications solutions in North America.

Codan's Managing Director, Donald McGurk, said "The acquisition of Daniels delivers on Codan's stated strategy of growing market share and diversifying its radio communications product offering. The Board believes that Codan's extensive international distribution network will deliver significant growth opportunities to the Daniels business. Codan will seek to offer land mobile radio solutions across its global distribution network, especially in the emerging world".

An aside to the Codan story, many of us have commercial Codan transceivers modified for the ham bands, but what if we reversed that and had a ham transceiver capable of transmitting on a commercial channel?

Stay tuned when we present "the final final" this week.

(various press reports)

A group from the Adelaide Hills Amateur Radio Society will travel to Cape Willoughby at the eastern end of Kangaroo Island, to operate over the Lighthouse and Lightship weekend, August 18th and 19th.

A special call VI5CW has been allocated. Operation will be on 80, 40 and 20 metres phone, as well as 2metres and 70cm. A special QSL card has been produced for the weekend.

Operators are Paul VK5PAS, Hans VK5YX, Lesley VK5LOL, Mark VK5VW, Sasi VK5SN and Aysha VK5FASH and David VK5KC, with support from Spouses.

Google VI5CW for more information.

We look forward to a contact with you.

General public reads about the ILLW

>From The Inlander, Kangaroo Island in South Australia, is an article about this VI 5 CW who reports that the worldwide event was initiated in 1993 in Scotland, as a way to promote the hobby and shine a light on the need to restore and preserve lighthouses and lightships.

VI 5 CW at Cape Willoughby during this weekend when the Lighthouse will be open to members of the public.

And reception from KI to your QTH should be excellent, years ago, in 1930 actually a Radio Amateur George Anderson, on Kangaroo Island, was responsible for linking the King's voice in the UK with Australia.

When the Melbourne wireless reception was a total failure through unfavourable atmospheric conditions, Anderson was appealed to. He picked up the King's voice which he then relayed to Adelaide and Melbourne.

More on ILLW later in this the GLOBAL edition of WIA NATIONAL NEWS.

Hello .This vk4fnaa Ian wells from Biloela.

On Sunday the 5th of august the Banana Shire Repeater Association Inc held
its special agm meeting in Biloela and it was decided that the bsra would
welcome amateur radio operators in banana shire to become members of the
association .

The association is also looking forward to installing a 2 meter and 70 cm
repeater on banana range pending approval by the WIA and the acma.

Membership to this new association is welcome to all amateur and CB users
and further information is available by contacting the secretary Ian wells
vk4fnaa on 0409 159 932 or by visiting

kerinvale comaudio
3a murchision street
biloela.

Thank You ,Ian Wells

Web - www.vk4wip.com
Email - vk4wip@wia.org.au
Main 2 meter repeater - 146.900, linked to 438.375 and 439.300

If you have been thinking about attending the 50 -year celebration dinner for
the Ipswich and District Radio Club on Saturday August 25, now is the time to
spring into action.

To make this night a success, we need early bookings to be confirmed with payment before August 17.

A hot and cold buffer dinner, including dessert is only $40 per person. It's a 6 for 6.30pm start at the Ipswich Turf Club.

More details are on the club website www.vk4wip.com, or contact club treasurer John Edwards VK4IE to reserve your seat and arrange payment. (Phone 07 3379 6296 or jkedw@bigpond.com).

Graham Kemp VK4BB has kindly agreed to be guest speaker.

We also plan to have some club memorabilia on display, along with a selection of photographs from the archives of club members.

Overnight visitors can choose from a range of local accommodation. Check out the Discover Ipswich website (www.discoveripswich.com.au) with links to nearby hotels and online bookings.

Partners are especially welcome, along with past, present and future members - in other words everyone is welcome.

If you know someone who may be interested in attending please share this information with them as soon as possible.

Reporting from Ipswich, this is Allan VK4FABR.

DISCUSSION POINT

Last Sunday we brought you news of the F-troop net running on Echo-Link for about an hour every Saturday morning at 08:00 WST, or midnight UTC thanks to the work of Ronald VK6XS and the conference server run by Tony VK3JED.

BUT for our "new comers" what is IRLP and EchoLink?

Over the past few weeks I've been playing with an Amateur Radio technology that links my work-life and my hobby together. For some, that might be a boon, for me, I have been trying to get out of the office - I work from home - to have a life and Amateur Radio is my escape from the world of Information Technology. Little did I realise at the start that the two go hand in hand. You win some, you lose some.

Anyway, the technology I've been playing with is called EchoLink. It's a way of linking radios across the Internet which allows you to communicate with Hams across the world, without needing HF, or even a radio for that matter.

Before I get too far into this, I should point out that there is a common held misconception that Foundation Licence holders are not allowed to use this technology. This is not true. You are not allowed to hook your computer to your radio, but there's no license condition that prevents you using the set-up that another Ham is running. This means that you cannot run an EchoLink Sysop node, but you can obtain and legally use EchoLink with your Foundation call-sign.

I should also point out that there are two Internet linking technologies - well, there are many more, but for the purposes of this discussion, two - that achieve similar things. EchoLink is one, IRLP, or Internet Radio Linking Project, is the other.

Both allow you to link Hams together. IRLP links radios (using specialised hardware and a copy of Linux), EchoLink on the other hand links software, which may or may not be connected to a radio. That's right. You can use EchoLink on your computer without a radio. You can also use it on your iPhone and Android powered phone. No projects under way for any other smart phones at this time. And of course, you can use EchoLink and IRLP via a radio if you are in range of an IRLP node or an EchoLink Sysop none, using DTMF tones to control them.

Back to EchoLink. You can download it for nix at echolink.org and once you've scanned in your Amateur License and emailed it to EchoLink to verify that you're in fact a licensed Ham, you're good to go.

You'll find that there are places where you can link to many Amateurs at once, or you can have a one-on-one QSO with another Ham.

I should also mention that there are also special nodes that have both EchoLink and IRLP installed, which allows you to link the two. You'll find that there are many 'nets around that use this technology. A home grown one is the Friday Night Technical Net, which is run by Reg, VK6BQQ, on Friday Night - Ontario Time, and Saturday Morning in VK. You can find it at the VAN-IRLP EchoLink node, which is run from Vancouver.

With the help of a few local Amateurs, we have the F-troop 'net, which is a weekly hour of chat that I host for New and Returning Hams available via EchoLink too, which allows people across the country to sign in and participate.

So, if you don't have a radio yet, or if your radio is nowhere near where you are, you can use EchoLink to still stay in touch.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

"Writtle Calling" celebrates 90th anniversary of 2MT

On the 90th anniversary of the start of regular broadcasting in the UK by 2MT Writtle, the communications regulator Ofcom have issued a licence to broadcast station "Writtle Calling" on 87.7 MHz FM.

In 1922, regular broadcasting started from the 2MT (Two-Emma-Toc) Marconi hut at Writtle near Chelmsford, Essex. The hut is now preserved in the Chelmsford Sandford Mill museum.

Writtle Calling aims to commemorate this anniversary and from September 10 to 18 will be broadcasting from the grounds of Writtle College, Essex, near to the site of the original Two-Emma-Toc station.

Information on Writtle Calling
http://www.writtlecalling.co.uk/pr3.pdf

You can listen to Writtle Calling online at
http://www.writtlecalling.co.uk/

in related news, a developer buys former Chelmsford Marconi site.

The BBC report that the Marconi New Street factory is to be redeveloped
after being left derelict for several years.

Marconi New Street was the world's first purpose designed and built wireless
factory. Opened in June 1912 it has stood empty since 2008.

RADIO AMATEURS OF CANADA CANCELS 2012 NATIONAL CONVENTION

The 2012 Radio Amateurs of Canada National Convention slated for this weekend
August 10th to the 12th has been cancelled.

According to a press release, planners cite a low number of per-registrants
as one of the reasons that the society has taken this action.

The organizers say they now working on plans for the 2013 show. They also
apologized to all who had arranged vacation or travel plans around this
convention.

What little else is known about the cancellation can be found on-line
convention2012.rac.ca

NEWS FROM ARNEWSLINE USA

A LOOK AT THE UPCOMING WRC 2015

A proposed permanent secondary allocation to the amateur service at or near
5 MHz is among agenda items for the World Radiocommunication Conference in
2015.

Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

There are numerous items on the 2015 World
Radiocommunications meeting agenda, as spelled
out at the end of the recently concluded 2012
conference. One is the proposal for a possible
new allocation to the amateur service on a
secondary basis within the band 5.250 to 5.450
MHz. The International Amateur Radio Union has

described such an allocation as being among the best for hams to use to provide around the clock emergency communications. So far, little in the way of objections has been heard in public.

According to the publication Radio World, it is the National Telecommunications and Information Administration that coordinates United States participation in the WRC conferences, doing so though a number of government departments and agencies are involved. According to N-T-I-A's website, the next conference will consider spectrum requirements for uses ranging from mobile service allocations for broadband to controlling unmanned aircraft from space.

These conferences are held by the International Telecommunication Union every few years to talk about international radio regulations. An FCC advisory group will start to meet this month in preparation for the next one. The commission also has set up a website with information about WRC-15. While WRC-15 may seem far away, the planning for it is already getting underway.

For the Amateur Radio Newsline, I'm norm Seeley, KI7UP, Scottsdale, Arizona.

Another item of interest on the WRC 15 agenda is the feasibility of achieving a continuous reference time-scale. This either by the modification of coordinated universal time or some other method.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Bill Moore NC1L, the ARRL Awards Branch Manager has announced that the 2012
H 44 UD operation from the Solomon Islands has been approved for DXCC credit.
Cards for that operation may now be submitted.

A pair of twinned Special Event Stations, GB175PO and TM175PO,
will be running in Dover and Calais to celebrate 175 years of P&O.
Operation starts on 11th August and will be running for 30 days.
Both stations will have the opportunity to work from ferries at
various times during the operation.

Stefan, DL4ST is in Afghanistan until the end of September. He is
active as T6SS and so far has been worked mainly on 20m.

Prefix hunters, remember Croatia is marking their 20th Anniversary of the
allocation of the 9A prefix. Operators there are now permitted to insert the
figures '20' into their callsigns.

For example 9A2AA will become 9A202AA, 9A1MM becomes 9A201MM etc.

These prefixes are available throughout 2012.

Also in Media Watch it's congratulations to VK4SSB Craig Huth from Taree
who is a finalist in this year's Commercial Radio Australia awards.

Craig from the Super Radio Network's MAX-FM and 2RE is nominated for
Best Talks Presenter, Best Current Affairs Presenter and for
Best Community Service Project.

WW SPECIAL INTEREST GROUPS --- RESCUE RADIO
IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

Invitations have been issued to attend MYGAREC 2012, the 8th Global Amateur Radio Emergency Conference on November 12 to 14, in Port Dickson, Malaysia.

This international conference is an informal forum by radio amateurs from IARU societies and others involved in providing support communications to emergency and relief services in times of any emergencies or disaster.

Delegates are invited to make submissions, whether they are proposals, information papers and reports, only about emergency or disaster relief operations they may have been involved in since September 2011.

MYGAREC 2012 is hosted by MARTS (Malaysian Amateur Radio Transmitters Society) and aims to promote more awareness between government ministries, departments, agencies and regulatory authorities.

Some delegates from countries which have experienced recent disasters will be giving their presentations on the lessons learned through their involvement.

MARTS believes there are countries short on knowledge about the resources that can be provided by amateur radio volunteers, which have up till now remained almost unused.
The conference is for all whether they already have an organised emergency communications response team with ideas to share, in search of more solutions, or are in the process of setting a group up.

Attendance at MYGAREC 2012 will share more about the modern functions and roles of such teams in the amateur radio service.

For more information visit the website http://www.mygarec2012.com/garec/

ATV exponents ready to party

The World QSO Digital Amateur Television Party takes place on Friday August the 24th and Saturday the 25th involving Australia, California and Arizona in the US, plus the British Amateur Television Club website.

Bob Minnick W8ARZ and Lee Weitzel K0CCU, both in Arizona, will use the resources of linked ATV repeaters.

Lee K0CCU has Skype video of very high quality and tested through the DATV repeater VK3RTV. The digitisation of VK3RTV has been made possible by the WIA Club Grants Scheme and funding from Amateur Radio Victoria.

Peter VK3BFG described this as an exciting development as it will significantly increase participation in a wide area of Arizona.

It will again hook up with Don Hill KE6BXT and the Southern Californian ATV network.

The first such QSO Party organised by Peter Cossins VK3BFG occurred during the Centenary celebrations of Amateur Radio Victoria last year.

Peter VK3BFG will run the event through the Melbourne repeater VK3RTV with live direct contact from stations in the Melbourne and Geelong areas, mingled with images and sound received outside its coverage area via Skype.

There will also participation from VK2, VK3, VK4, VK5 and VK7. Although there is no active ATV Repeater in the area, Don VK5ADM will receive signals transmitted to him on various microwave frequencies and act as the local anchor.

The Radio and Electronics Association of Southern Tasmania VK7OTC will participate from its studios in Hobart.

Cradle Coast Amateur Radio Club are having great success with their ATV experiments. At a meeting recently in Penguin, Winston 7EM, Dion 7DB and Dave 7DC demonstrated their progress of the Digital ATV Repeater.

This was done by putting it to air in a closed room situation and transmitting some of the video footage which was taken on the day of the battery replacement on Mt Duncan, all in attendance said that the quality of the video was mind blowing, it will open new doors in the hobby of Amateur radio for many on the North West Coast of Tasmania.

Amongst the good attendance on that test day was a visitor from the North, Alvin VK7NDQ and a new comer to the North West, Malcolm, VK4ZMM who in an earlier life was actively involved with commercial TV in Brisbane, as was his XYL.

WW SPECIAL INTEREST GROUPS --- ILLW

Plenty of lighthouses to be on air

The International Lightship and Lightship Weekend fun event occurs next Saturday and Sunday with hundreds of registrations already received.

Organisers report that the final week usually results in up to 100 registrations as we head towards a record year.

In the lead is Australia just ahead of the USA, then comes Germany, England, The Netherlands, Scotland, South Africa, Argentina, Canada, Sweden, Switzerland and Wales.

A total of 43 countries are represented, mostly with smaller numbers, but most welcome activations.

It was started by John Forsyth GM4OOU and the late Mike Dalrymple GM4SUC, both members of Ayr Amateur Radio Group which operates GB2LT at Turnberry Lighthouse in Scotland.

No matter where you are there will be plenty of Lighthouses or Lightships and vessels to work on the weekend, which publicises amateur radio and the former maritime navigation structures.

The 15th annual International Lighthouse and Lightship Weekend is August 18th and 19th.

There are online registrations, guidelines, statistics and more at ILLW.NET

NOV 11 VK3 Yarra Valley Amateur Radio Group Hamfest

NOV 25 VK3 SPARC HAMFEST AT ROSEBUD

Important News from The Blue Mountains Amateur Radio Club.

The Blue Mountains Amateur Radio Club wish to apologise to everyone, because this year's BMARC Winterfest has been cancelled !

The executive committee has decided that since some vendors, have withdrawn from the event, due to stock availability, and also considering the current state of a new clubhouse, they have made the drastic decision NOT to hold Winterfest this year, but to instead improve facilities and have a better Winterfest next year instead.

They did not take this decision lightly, and again apologise to members, friends, the WIA, ARNSW and vendors for making this decision at such late notice.

If you know of someone who was intending to come, could you please pass on the news.

BMARC will now regroup, improve facilities and have a great Winterfest next year instead.

73s from Erik Houseman
(VK2EJH - Publicity Officer for BMARC.)

FINAL FINAL

BUYER BEWARE - VK3ARM

A month ago, I purchased an upgrade IF Board for my trusty Kenwood TS-930S HF Transceiver. This board, commonly known as a PIEXX Board, comes from a supplier in Hillsboro, New Hampshire.

As advertised, it provides more stability, better VFO controls, a standard serial interface and 100 memories instead of the standard eight.

The TS-930S is a good workhorse that suffers with niggling problems from its original IF Board, so this upgrade is very popular with TS-930S owners.

The new board duly arrived and I installed it. The transformation to my radio was instant and I was extremely pleased with it, until I found that my HF radio is now capable of being used to transmit on any HF frequency outside the Amateur Bands.

On contacting the supplier I learned that he's been supplying these boards in an 'Open' state by default as so many people have asked for that modification when ordering.

I am now faced with the prospect of having to remove the board and send it back to the US for a firmware change, so that my radio will again be legal. I spoke with Mark Tell from the Compliance Section of theACMA about this.

While he was sympathetic to my problem, he reminded me that the onus to ensure that my radio complied with regulations under the Radio Communications Act fell directly on my shoulders. It was a case of 'Buyer Beware.'

So my warning is this:
Do look at available updates that make your life as an Amateur better but do ensure that anything you do to your radio doesn't result in an illegal installation that could lead to a knock on your door and a compliance warning or actual loss of your prized rig.

I'm Robert, VK3ARM.

A few of we 'full calls' queried this before running Roberts item and further came via VK3ARM from Mark Tell, Assistant Manager Field Operations, Australian Communications and Media Authority.

"Amateur Radios that are designed and limited to cover amateur radio bands only do not have to meet Australian standards, however, if the radio covers frequencies, or has been modified to cover frequencies outside of internationally recognised amateur bands, then it must meet the standards for equipment operating in those bands, as well as carry the appropriate regulatory compliance marking. As such, equipment which does not meet these standards is defined as non-standard equipment.

Please also see the link on wia.org.au which endorses this.

http://www.wia.org.au/licenses/licensing/amateurequipment/ which includes;

It is unlawful to be in possession of a radio transmitter that by applying power and pressing the PTT or transmit switch will transmit on a commercial frequency that the person concerned does not have a valid radiocommunications

licence.

Of course if you're a VK3 you can get along to the "Speaker night"
and hear the entertaining and informative Mark Tell of the Australian
Communications and Media Authority Field Office this Tuesday night at the
Amateur Radio Victoria office, 40g Victory Boulevard, Ashburton.

The meeting starts at 8pm on August the 14th with the latest on interference
detection, the education processes and last resort enforcement action taken
by our regulator, the ACMA

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh' and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Reminder of the Old Mulkey Meetinghouse Special Event

Posted: 08 Aug 2012 10:45 AM PDT
http://forums.qrz.com/showthread.php?356990-Reminder-of-the-Old-Mulkey-Meetinghouse-Special-Event&goto=newpost

Wanted to write a few lines to remind everyone again about our Special
Event coming up in September on the dates of 14th, 15th and 16th. We will
be on 3 bands as of now - 10 (if open), 20 and 40 meters. We are offering a
QSL card and a Certificate again this year. We also will be requiring a
S.A.S.E. #10 business size envelope. A # 10 business size envelope is 4
1/8" X 9 1/2". If you send the small envelope you will ONLY get the QSL
card. If you dont want the Certificate folded, then please send a 9" X 12"
yellow envelope with at least $1.20 return postage. If the yellow envelope
is not sent then we will fold it into the business sized envelope. Please
note!...we cannot and will not try to fold into a small envelope. Its
impossible!...And if you send your QSL without any S.A.S.E., then you will
get nothing! You can send your QSL & Certificate request to my home address
(KD4QHG) or to the Old Mulkey State Park at 38 Old Mulkey Park Rd.
Tompkinsville, Ky. 42167. On friday the 14th the children from the local
schools will be joining us to help make contacts. They will also be
lectured on the math and science behind amateur radio before they actually
get a chance to get on the radio. Please be patient with the children
because they may be a little mic. shy and they might not talk loud into the
mic also. We are expecting 160 kids this year!. Hopefully we can get as
many on the mic as possible. Also it is scheduled for saturday the 15th for
the Boy Scouts & the Cub Scouts to earn thier "Radio Merit Badge", so if
all goes well we will have them there with us. They will probably ask

certain question so please take the time to help answer what they ask. Please visit my page (KD4QHG) at QRZ.com and there is pictures of some of the students that came last year. For a little history on our event....We are commemorating the burial site of Hannah Boone Pennington who is the sister to the great pioneer Daniel Boone. She was the youngest of the 11 children of the Boone Family. She first married John Stewart in 1765, and had four daughters, Sarah, Mary, Rachel and Elizabeth Stewart. After he (John Stewart) was killed by Indians in Kentucky, she married in 1777 to Richard Pennington and they had four more children were born - Joshua, Daniel B., John Stewart and Abigail Pennington. Richard served his country during the Revolutionary War at Capt. Enoch Osborn's Fort in Virginia. The Penningtons migrated to the area of Mill Creek in lower Kentucky in 1798. Hannah died there on April 9, 1828. They worshipped at Old Mulkey Meetinghouse. They lived in Montgomery Co., VA, 1792 in what is now Grayson Co., VA, and in 1790 in Wilkes Co., NC. They moved from Wilkes Co., NC, to KY on the 7 Aug 1797, settling on the Little North Elkhorn River, 9 miles from Lexington. From there, they moved south of the Green River to Barren (now Monroe) Co., KY. They settled on Line Creek near the present day hamlet of Gamaliel, Monroe Co., KY. They moved to White Co., TN, where Richard died; Hannah then moved back to Monroe Co. and lived the rest of her life at the home of her son, Daniel Pennington near Old Mill Creek Church. Hannah is buried at what now is the Old Mulkey Meetinghouse State Park. It is known that Hannah was attacked by indians and was partially scalped, But, partially was because either someone caught the indians and killed them or they seen some men coming after them and they ran. But Hannah did survive the partial scalping and lived into her 80's. We The Monroe County Amateur Radio Group (of Kentucky) hope that we can make contact with you during our event....From all of us...73's and chat with you soon!:D

CASHOTA Heritage Award in September 2012

Posted: 08 Aug 2012 09:24 AM PDT
http://forums.qrz.com/showthread.php?356984-CASHOTA-Heritage-Award-in-September-2012&goto=newpost

CASHOTAS(Castles and Stately Homes on the Air)annual UK & IRE heritage award will be commencing from the 18th August until the 30th September 2012. This event is held to highlight the European Heritage Open Days that will be held throughout the UK and Ireland (Please note each region has varied dates).

If interested in participating either as an activator or heritage chaser, then visit http://www.cashota.co.uk/apps/calend...7279&pageNum=1 for more details and a list of stations that are registered so far.

or if you wish to register a station now then please complete a form at http://www.cashota.co.uk/activationform.htm

so lets enjoy our heritage on air in 2012. :D

1st time in its 95 year history Lorain Harbor Light, US0143, will be On The Air!

Posted: 09 Aug 2012 06:41 AM PDT
http://forums.qrz.com/showthread.php?357073-1st-time-in-its-95-year-history-Lorain-Harbor-Light-US0143-will-be-On-The-Air!&goto=newpost

Press Release

For Immediate Release, 5 August 2012

Lorain County Wireless Operators

Will Operate From The

Lorain Harbor Light, US0143

LORAIN COUNTY OHIO ☐ The LCWO is pleased to announce its first group project. LCWO, in conjunction with the Lorain Lighthouse Foundation, Inc. will operate NW8S from the Lorain Harbor Light, US0143, in support of the International Lighthouse Lightship Weekend, 18 & 19 August 2012.

The goal of the event is to ☐Promote public awareness of lighthouses and lightships and their need for preservation and restoration, and at the same time to promote amateur radio and to foster International goodwill. Lighthouses are fast becoming an endangered species with the introduction of Global Positioning Systems and Satellite Navigation and the automation of the light source to solar power which has resulted in the withdrawal of management personnel (Keepers). It is hoped that this event will highlight this situation and help prevent further desecration of these magnificent structures all around the world.☐ (Source: ILLW)

This will mark the first time an amateur radio station has operated from the lighthouse and the first time in decades that the lighthouse will be occupied overnight. There are three light structures in Lorain Harbor. From east to west; Lorain East Detached Breakwater Light, Lorain Middle Breakwater Light & Lorain Harbor Light. The US Army Corps of Engineers completed the lighthouse in 1917 resting it in 30☐ of water in wooden cribs filled with sandstone then later encasing its base in concrete. The original focal plane, at 58☐, was a Forth Order Fresnel Lens which could be seen for approximately 15 miles out on Lake Erie. The USCG manned the lighthouse from 1939 thru 1965. In 1965 it was decommissioned and slated for demolition. After falling into years of disrepair & vandalism, and an

uncertain fate, a group of concerned citizens formed the Port of Lorain Foundation, Inc. saving the lighthouse from the wrecking ball. Currently restoration efforts are underway to return the lighthouse to her status as ☐Jewel of the Port☐

Please visit www.nw8s.com and www.lorainlighthouse.com for more information. Or contact Jeff Evans, KB8ZUN, at kb8zun@gmail.com .

UltraBeam presents the world premiere of a new reference standard of Yagi, the DX ser

Posted: 08 Aug 2012 07:45 PM PDT
http://forums.qrz.com/showthread.php?357048-UltraBeam-presents-the-world-premiere-of-a-new-reference-standard-of-Yagi-the-DX-ser&goto=newpost

UltraBeam presents the world premiere of a new reference standard of Yagi, the DX series.

The new UB-1020 DX and UB-1040 DX utilize ten EHU motor unit, which through different combinations of electronic, create drawings dedicated yagi on all bands, this is a guarantee of optimum spacing for maximum value of gain and F / B.

UB-1020 DX: the equivalent of real five monoband, 8 elements for 10/12/15 elements and 6 elements for 17 and 20 meters band.

UB-1040 DX: seven monoband, 8 elements for 10/12/15 elements, 6 elements for 17-20 and 4 elements for 30 and 40 meters band.

The best dynamic antenna ever made in the world to date!

The dream of every DXer

UB-1020 DX Features :

- Frequency Range 14 - 30 Mhz

- 8 elements yagi 10☐12-15 meters

- 6 elements yagi 17-20 meters

- Gain 10-12-15 (dBd) 10,9 ☐ (dBi 13.15)

- Gain 17-20 (dBd) 9,3 ☐ (dBi 11,45)

- F/B ratio (dB) 23-25

- Power (PeP) 3500 watt

- Longest elements 11 meter

- Boom length 18 meter

- Boom trellis aluminum square 200x200 mm.

- Max wind-area 2,1

- Rotating radius 11,40 meters

- Mast diameter 76,2 mm.

- Weight 96.5 Kg.

- Controller Included

UB-1040 DX Features :

- Frequency Range 7 - 30 Mhz

- 8 elements yagi 10□12-15 meters

- 6 elements yagi 17-20 meters

- 4 elements yagi 30-40 meters

- Gain 10-12-15 (dBd) 10,9 □ (dBi 13.15)

- Gain 17-20 (dBd) 9,3 □ (dBi 11,45)

- Gain 30-40 (dBd) 8 □ (dBi 10,15)

- F/B ratio (dB) 23-25

- Power (PeP) 3500 watt

- Longest elements 21,5 meter

- Boom length 18 meter

- Boom trellis aluminum square 200x200 mm.

- Max wind-area 4,3

- Rotating radius 14,86 meters

- Mast diameter 100 mm.

- Weight 185 Kg.

- Controller Included

Tiny satellites to write Morse code, visible in the night sky

Posted: 27 Jul 2012 08:59 AM PDT
http://forums.qrz.com/showthread.php?355628-Tiny-satellites-to-write-Morse-code-visible-in-the-night-sky&goto=newpost

http://dvice.com/archives/2012/07/tiny-satellites.php

I just saw this at dvice.com and thought I would share.

"An unmanned Japanese cargo vessel headed for the International Space
Station (ISS) this week is carrying some unusual cargo. In addition to
regular supplies, the vehicle contains some tiny, cube-shaped satellites

that, when deployed, will write Morse codemessages visible in the night sky.

One of the mini satellites, known as cubesats, has the job of helping researchers test optical communication techniques in satellites. The cubesat will use LEDs to first twinkle like an artificial star and eventually blink in Morse Code.

The cubesat is known as FITSAT-1 and was developed by Japan's Fukuoka Institute of Technology (FIT). It weighs just under three pounds and carries high output, 200 watt LEDs that will turn the cube into a flashing Morse code beacon.

Project leader Takushi Tanaka, an FIT professor of computer science and engineering discusses one of the most exciting elements of the project on the FITSAT-1 website:

"These [Morse code flashes], we hope, will be observable by the unaided eye or with small binoculars," Tanaka says.

It is expected the FITSAT-1 will be deployed from the ISS on September 6, by Japanese astronaut Akihiko Hoshide, using the Kibo module's robotic arm. Once in orbit the FITSAT-1 will travel between 51.6 degrees south latitude and 51.6 degrees north latitude, according to researchers.

The orbit and orientation is important to the success of the project. The tiny satellite contains a neodymium magnet that will always point it to magnetic north. This way, when the satellite rises above the horizon it will be to the south of the FIT ground station.

The flashing lights and Morse code signals from the FITSAT-1 will be received by the FIT ground station telescope and photo-multiplier device linked to an antenna. The ground gear and the satellite's LEDs will be aligned so the ground will receive the main beams.

The FITSAT-1 project will conduct high-speed and optical communication experiments for three minutes as the satellite moves through orbit, to prove the viability of optical communication with satellites.

Tanaka's website has additional detailed information on the construction of the FITSAT-1, communication frequencies and what it will be transmitting during the testing.

Seeing the little satellite in action firsthand might be challenging, but even if we only get to see the sky's newest inhabitant work via video from Tanaka's lab, it's cool to know we can wish upon a whole new star!"

==> + ON THE AIR: PERSEIDS SHOULD BE FUN FOR METEOR SCATTER ENTHUSIASTS
AND VIEWERS ALIKE

On the night of Saturday, August 11 and well into the next day, Earth
will make its annual passage through the bulk of the debris shed by a
comet known as Swift-Tuttle
<http://en.wikipedia.org/wiki/109P/Swift-Tuttle>. Much of the debris is
composed of dust-sized grains, but when these fragments come plunging
into our atmosphere they can create a dazzling meteor display. Not only
are the meteors fascinating to watch, they also leave short-lived
streams of ionized gas in their wake. As hams have known for years,
these meteor trails are excellent reflectors of radio waves. The
Swift-Tuttle meteor showers are known as the Perseids
```

<http://www.amsmeteors.org/2012/08/viewing-the-2012-perseid-meteor-shower/>
because they appear to come from a point in the sky that lies within
the constellation Perseus.

This year's Perseid meteor shower occurs when the Moon is at a
waning crescent phase, which means bright moonlight won't diminish the
number of visible meteors. According to Spacedex.com
<http://www.spacedex.com/perseids/>, the lack of bright moonlight means
that the fainter meteors should not be concealed from view: "It is
advisable to observe the meteor shower during the predawn hours on the
mornings of August 11, 12 and 13. With up to 60-100 meteors per hour
predicted, observers may catch plenty of bright meteors streaking along
in the light of the Moon." As an added treat, the Moon will be sweeping
past Venus and Jupiter in the eastern predawn sky.

While the meteors are certainly bright, they are typically not much
larger than a grain of sand; however, as they travel at immense speeds,
these tiny particles put on an impressive show. Due to the way the
comet's orbit is tilted, dust from the Swift-Tuttle falls on Earth's
northern hemisphere. Unfortunately, this leads to extremely low
visibility for those in Australia, New Zealand and portions of South
America.

Amateur Radio and the Perseids

If you own a 6 or 2 meter SSB/CW transceiver, you can get in on the
action, bouncing your signals off Perseid meteor trails and making
quick meteor scatter <http://en.wikipedia.org/wiki/Meteor_scatter>
contacts over hundreds of miles, and possibly even as much as 1200
miles. Meteor scatter operation is particularly easy on 6 meters where
100 W and an omnidirectional antenna will do the job. On 2 meters, a
directional antenna (such as a multielement Yagi) usually yields better
results.

Some meteor scatter operators prefer to use SSB, making rapid
exchanges of signal reports and grid squares. In recent years, digital
meteor scatter has been increasing in popularity. With the free
sound-card-based WSJT <http://physics.princeton.edu/pulsar/K1JT/>
software suite by Joe Taylor, K1JT, it is possible to make digital
meteor scatter contacts almost any time of the day or night, not just
during annual showers. Most WSJT scatter operators use a mode known as
FSK441 and center their activities on calling frequencies 50.260 and
144.140 MHz. They also announce their availability by using Web sites,
such as N0UK's Ping Jockey Central
<http://www.pingjockey.net/cgi-bin/pingtalk>.

Watching the Perseids

To get the most enjoyment while watching for Perseids, find a dark spot
with an open sky view, bundle up thoroughly in blankets or a sleeping
bag and lie back in a reclining chair. Spacedex.com
<http://www.spacedex.com/perseids/> recommends that once you have

settled down at your observation spot, look approximately half way up the sky toward the northeast: "This way you can have the Perseids' radiant within your field of view. Looking directly up at the sky or into the radiant is not recommended since this is just the point in which they appear to come from. You are more likely to see a trail when looking slightly away from this point." Just gaze into the stars and be patient. Any light pollution will cut down on the numbers, as will the radiant's lower altitude earlier in the night. But the brightest few meteors shine right through light pollution, and the few that happen when the radiant is low are especially long, skimming the upper atmosphere and flying far across the sky.

Not all the meteors in the sky are Perseids. In addition to occasional random, sporadic meteors, the weaker Delta Aquarid shower <http://meteorshowersonline.com/showers/delta_aquarids.html> is also active during Perseid season. The Delta Aquarids are slower, often yellower and track away from a radiant point in eastern Aquarius. Weaker still are the Kappa Cygnids <http://www.astronomia.org/shower?la=en&s=KCG>, identifiable by their flight direction away from Cygnus in an altogether different part of the sky.

==> + MARS ROVER CURIOSITY SUCCESSFULLY LANDS ON RED PLANET

The Jet Propulsion Laboratory (JPL) confirmed that the rover Curiosity, after a 36 week space flight, landed successfully on Mars at 10:32 PM PDT on August 5 (0532 UTC August 6). Built by JPL and launched on November 26, 2011, the 2000 pound machine features something on its wheels that radio amateurs are sure to appreciate: Morse code.

If you look carefully at Curiosity's wheels, you might notice that along with treads, there are square and rectangular holes that have an interesting pattern. According to JPL Rover Mechanical Engineering Team Manager Richard Rainen, these holes actually have a purpose: odometer markers. "We will be looking at the visual odometer markers that we have on the wheels," he explained in a video. "There are asymmetric patterns, actually holes, inside the wheels of the rover that will leave an imprint on the surface of Mars. We're going to be looking at these imprints and verifying that it has traversed the distance it expects to traverse. If it looks like it's not traversing, even though the wheels are going, that is an indication that the vehicle is getting stuck and it will stop and call back home." Read more here <http://www.arrl.org/news/mars-rover-em-curiosity-em-successfully-lands-on-red-planet>.

==> + ON THE AIR: ITU ASSIGNS NEW PREFIX FOR NIUE: E6A-E6Z

On August 3, the ITU updated its Table of International Call Sign Series <http://www.itu.int/online/mms/glad/cga_callsign.sh?lng=E> to reflect a call sign change for Niue. The island will now have the entire E6 prefix block. Niue -- an island located approximately 1700 miles northeast of New Zealand -- is a self-governing island nation

that has been in free association with New Zealand since 1974. Prior to the change, the island used ZK2. According to the CIA World Factbook <https://www.cia.gov/library/publications/the-world-factbook/geos/ne.html>, Niue is about 1.5 times the size of Washington, DC, and has a population of almost 1300 people.

==> ON THE AIR: EXPLORE THE UPPER REACHES OF THE AMATEUR RADIO SPECTRUM IN THE ARRL 10 GHZ AND UP CONTEST

If you enjoy the technical side of Amateur Radio and being on the cutting edge, you might want to take a look at the microwave bands. The weekends of August 18-19 and September 15-16 give you a perfect chance to explore this portion of the radio spectrum with the 2012 ARRL 10 GHz and Up Contest. The contest period for both weekends starts at 6 AM local time on Saturday and runs until midnight local time on Sunday. Points are awarded based on the distance of each QSO, and operating from several locations during the contest period is not only allowed, it's encouraged. According to ARRL Contest Branch Manager Sean Kutzko, KX9X, most participants use SSB, although some choose to operate using CW. "Power levels are relatively low compared to HF," he explained. "Most stations only run several hundred milliwatts, and a station running just a few watts is considered a 'big gun.' Antennas are usually dishes, such as those used for receiving satellite TV." Read more here <http://www.arrl.org/news/explore-the-upper-reaches-of-the-amateur-radio-spectrum-in-the-arrl-10-ghz-and-up-contest>.

==> + ON THE AIR: RAC ANNOUNCES NEW ONTARIO SECTION BOUNDARIES, ABBREVIATIONS

In March 2012, the Radio Amateurs of Canada (RAC) announced that it would split its Ontario Section into four new Sections "to create a management model that better communicates with, and represents the interests of, the overall Ontario amateur population." The new Section boundaries go into effect as of September 1, 2012. On August 8, RAC Chief Field Services Officer Doug Mercer, VO1DTM/VO1DM, announced the new Section boundaries, names and abbreviations. Read more here <http://www.arrl.org/news/rac-announces-new-ontario-section-boundaries-abbreviations>.

==> + FCC NEWS: VANITY CALL SIGN FEE TO INCREASE SEPTEMBER 4

On August 3, the FCC announced via a Final Rule in the Federal Register that the cost of an Amateur Radio vanity call sign will increase 80 cents, from to $14.20 to $15. The new fees take effect 30 days after publication, making September 4, 2012, the first day the new fee is in effect. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order, seeking to raise the fee for Amateur Radio vanity call signs. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new 10 year term. Read more here <http://www.arrl.org/news/vanity-call-sign-fee-to-increase-september-4>.

==> + FCC NEWS: FCC DENIES CALIFORNIA HAM'S PETITION REGARDING VANITY CALL SIGN

Two years after Marvin Gin, W6VM, passed away on January 13, 2010, his call sign became available in the FCC's vanity call sign system and eligible for reassignment to those radio amateurs who hold an Amateur Extra class license. According to the FCC <http://transition.fcc.gov/Daily_Releases/Daily_Business/2012/db0808/DA-12-1281A1.pdf>,
Mario Vesnaver, W6EX, of Laguna Niguel, California, Steven Greathouse, AC6EA, of Akron, Ohio, and others "filed timely applications requesting modification of [their] amateur licenses to reflect call sign W6VM." Greathouse's application was randomly selected and granted on February 4, 2012.

According to paragraph 32 in a 2006 Report and Order (WT Docket 04-140 <http://apps.fcc.gov/ecfs/document/view?id=6518531249>), whenever the FCC receives an application from more than one amateur on the same day requesting a vanity call sign, the FCC uses a lottery mechanism to select the first application to be processed. Via this method, Greathouse's application was the first one selected and he received W6VM.

Vesnaver filed a Petition for Reconsideration with the FCC, requesting that the Commission review its decision regarding its assignment of W6VM. "When an amateur is initially licensed, the Commission assigns the station the next available call sign based on the licensee's geographic region and license class [as affirmed in WT Docket 09-209 <http://apps.fcc.gov/ecfs/document/view?id=7021755180>]" the FCC stated in denying Vesnaver's Petition. "You argue that Mr Greathouse's application should not have been granted because, at the time he requested call sign W6VM, he lived in Ohio, which is in the sequential call sign system's 8th call sign district."

The FCC stated that when it adopted the rules for the vanity call sign system, it addressed whether a vanity call sign applicant should be limited to requesting only those call signs for the region where the licensee resides. The FCC chose not adopt such a restriction, noting in PR Docket 93-305 <http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-94-343A1.pdf> that "'the applicant's choice of vanity call signs would be reduced to ten percent or less of the call signs that would otherwise be assignable to the station. A limitation based upon the person's place of residence, moreover, could easily be circumvented by using a mailing address in another call sign region.' Other than a call sign in Alaska, Hawaii, the Caribbean Insular Areas and the Pacific Insular areas, the licensee of an amateur station with a mailing address in the United States may apply for any available call sign corresponding to an appropriate license class."

Based upon its procedures, the FCC concluded that its assignment of W6VM was "proper" and denied Vesnaver's Petition.

==> + NCVEC HOLDS 2012 ANNUAL MEETING

Larry Pollock, NB5X, Chairman of the National Conference of Volunteer Examiner Coordinators, presided over the NCVEC's 27th annual meeting, held via teleconference on July 20. The meeting offered an opportunity for representatives of the VECs to discuss issues facing the volunteer examination program and interact with FCC staff members. Representatives from 13 of the nation's 14 VECs took part in the teleconference. ARRL VEC Manager Maria Somma, AB1FM, and ARRL VEC Assistant Manager Perry Green, WY1O, represented the ARRL VEC. Read more here <http://www.arrl.org/news/ncvec-holds-2012-annual-meeting>.

==> SOLAR UPDATE

Tad "Sunrise, sunset <http://www.youtube.com/watch?v=nLLEBAQLZ3Q>" Cook, K7RA, reports: The average daily sunspot numbers rose more than 20 points this week -- or about 20 percent -- to 119.4, while the average daily solar flux was up 3 points to 134.7. Geomagnetic activity was quiet, with unsettled conditions around August 2. The NOAA/USAF prediction has solar flux at 130 on August 9-10, 125 on August 11-13, then 115, 110, 105, 90 and 95 on August 14-18, back up to 100 on August 19-20, then 110, 115, 120, 125, 130, 135, 140 and 145 on August 21-28, then 140 on August 29-31. The predicted planetary A index is 10 on August 9, 5 on August 10-18, 8 on August 19-20, and 5 on August 21-23, and 8 on August 24-25, and 12 on August 26. Look for more on the ARRL website on Friday, August 10. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Sunrise, Sunset from Fiddler on the Roof <http://en.wikipedia.org/wiki/Fiddler_on_the_Roof>.

==> NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- How often do you use EchoLink or IRLP?
- What is your favorite HF band?
- How many Amateur Radio books do you own?
- Do you prefer to send paper QSLs to your DX contacts directly or via the QSL Bureau system?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the November 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- August 10 -- NCCC Sprint Ladder
- August 11-12 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 12 -- SKCC Weekend Sprintathon; Feld Hell Sprint
- August 15 -- NAQCC Straight Key/Bug Sprint

Next week:

- August 17 -- NCCC Sprint Ladder
- August 18-19 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/10-ghz-up>; SARTG Worldwide RTTY Contest; North
American QSO Party (SSB)
- August 19 -- ARRL Rookie Roundup (RTTY)
<http://www.arrl.org/rookie-roundup>
- August 20 -- Run for the Bacon QRP Contest
- August 22 -- SKCC Sprint
- August 22-23 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- August 11 -- ARRL Ohio State Convention
<http://www.arrl.org/hamfests/ohio-state-convention>, Columbus, Ohio
- August 18 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-2>,
Weston, West Virginia
- August 18-19 -- ARRL Southeastern Division Convention
<http://www.arrl.org/hamfests/southeastern-division-convention-huntsville-ham
fest>,
Huntsville, Alabama
- August 19 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-2>, Salina,
Kansas
- August 24-26 -- ARRL New England Division Convention
<http://www.arrl.org/hamfests/new-england-division-convention-1>,
Boxboro, Massachusetts
- August 26 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-2>,
New Kensington, Pennsylvania
- September 14-15 -- W9DXCC Convention
<http://www.arrl.org/hamfests/w9dxcc-convention-2>, Elk Grove Village,
Illinois
- September 15 -- ARRL Virginia Section Convention
<http://www.arrl.org/hamfests/virginia-section-convention-virginia-beach-hamf
est>,

Virginia Beach, Virginia
- September 22 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-36th-annual-spokane
-hamfest>,
Spokane Valley, Washington
- September 22-23 -- ARRL Illinois State Convention
<http://www.arrl.org/hamfests/illinois-state-convention-peoria-superfest-2012
>,
Peoria, Illinois
- September 28-29 -- SEDCO/W4DXCC VIII Convention
<http://www.arrl.org/hamfests/sedco-w4dxcc-viii-convention>, Pigeon
Forge, Tennessee
- October 12-14 -- ARRL National Convention
<http://www.arrl.org/hamfests/arrl-national-convention-pacificon-2012>,
Santa Clara, California
- October 13 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2012>,
Sergeant Bluff, Iowa
- October 13-14 -- ARRL Florida State Convention

Perseids Should be Fun for Meteor Scatter Enthusiasts and Viewers Alike:

Posted: 09 Aug 2012 08:21 AM PDT
http://www.eham.net/articles/28778

On the night of Saturday, August 11 and well into the next day, Earth
will make its annual passage through the bulk of the debris shed by a
comet known as Swift-Tuttle.
Much of the debris is
composed of dust-sized grains, but when these fragments come plunging
into our atmosphere they can create a dazzling meteor display. Not only
are the meteors fascinating to watch, they also leave short-lived
streams of ionized gas in their wake. As hams have known for years,
these meteor trails are excellent reflectors of radio waves.

//
Mars Rover Curiosity Successfully Lands on Red Planet:

Posted: 09 Aug 2012 08:19 AM PDT
http://www.eham.net/articles/28777

The Jet Propulsion Laboratory (JPL) confirmed that the rover Curiosity,
after a 36 week space flight, landed successfully on Mars at 10:32 PM
PDT on August 5 (0532 UTC August 6). Built by JPL and launched on
November 26, 2011, the 2000 pound machine features something on its
wheels that radio amateurs are sure to appreciate: Morse code.

//
ITU Assigns New Prefix for NIUE: E6A-E6Z:

Posted: 09 Aug 2012 08:20 AM PDT
http://www.eham.net/articles/28776

On August 3, the ITU updated its Table of International Call Sign
Series to
reflect a call sign change for Niue. The island will now have the

entire E6 prefix block. Niue -- an island located approximately 1700 miles northeast of New Zealand -- is a self-governing island nation that has been in free association with New Zealand since 1974.

//
Explore the Upper Reaches in the ARRL 10 GHz and Up Contest:

Posted: 09 Aug 2012 08:17 AM PDT
http://www.eham.net/articles/28775

If you enjoy the technical side of Amateur Radio and being on the cutting edge, you might want to take a look at the microwave bands. The weekends of August 18-19 and September 15-16 give you a perfect chance to explore this portion of the radio spectrum with the 2012 ARRL 10 GHz and Up Contest. The contest period for both weekends starts at 6 AM local time on Saturday and runs until midnight local time on Sunday.

ULTIMATE DX: LISTENING FOR THE MARS RECONNAISSANCE ORBITER AND LANDER

Want to try your hand at some truly out of this world DX listening? With the successful lading of NASA's rover Curiosity on Mars, some hams are thinking of trying to catch signals from the new rover directly or those from the Mars Reconnaissance Orbiter circling the Red Planet. Is it possible? Amateur Radio Newsline's Bruce Tennant, K6PZW takes a look at the communications aspect of the mission:

--

Thanks to some research by the Southgate News, it turns out the Curiosity rover transmits on frequencies around 401 MHz but the transponder on the Mars Reconnaissance Orbiter or MRO has a CCSDS Forward Frequency in the 437 MHz Amateur Satellite Service band. This is because 435 to 438 MHz is shared with the Military and 432 to 438 MHz is also a Space Surveillance Radio Band. In fact, general space usage extends beyond that.

So how does it all work? Well the Mars Reconnaissance Orbiter has a UHF transponder known as MELACOM that operates between 401 to 437 MHz. It also has a pair of patch antennas to communicate with any landed asset on Mars surface supporting the CCSDS Proximity-1 protocol. And with it all working the way it has throughout this mission, signals from the Mars Reconnaissance Orbiter are being received back on Earth.

While NASAs Deep Space Network has no problem in hearing the Mars Reconnaissance Orbiter, the question might be if a ham radio station with its simple equipment might be able to do the same. If you want to give it a try there are two papers from NASA that might be of assistance.

The first describes the operation of the Mars Reconnaissance Orbiter. It can be found at tinyurl.com/mro-operations. The other is titled Mars Express and the NASA landers and rovers on Mars - Sustaining a backup relay in an interplanetary network. Its URL is tinyurl.com/space-communications. Both of these documents are in Adobe .PDF format.

For the Amateur Radio Newsline, I,m Bruce Tennant, K6PZW, in Los Angeles.

--

Oh, if you are successful in hearing either the lander or the orbiter please be sure to record any audio you hear along with the story of how you accomplished it. We will be happy to share it with our listeners, world wide. (Southgate, ARNewsline)

**

RESCUE RADIO: HAMS RESPOND TO MASSIVE INDIA POWER FAILURE

Back here on planet Earth, ham radio was called out after the world's worst blackout in recent times cut power to 700 million people in India on July 31st.

Jayu Bhide VU2JAU is the National Coordinator for Disaster Communication in India. He reports that the North-East grid failed due to a fault in the plant and 20 states were affected by the power failure.

VA2JAU said that hams in and around the affected areas provided emergency communications during the outage. He noted that all voice repeaters in the areas hit by the blackout remained in operation despite the heavy duty back-up power that was required.

Up to 20 of India's 28 states were plunged into darkness as suppliers failed to meet the growing demand caused by heavy demands. The blackout halted hundreds of trains, took out traffic lights were out and caused surgical procedures to be cancelled. Several miners were trapped underground when their elevators failed. The blackout raised concern about India's infrastructure. (VK3PC, VU2JAU)

**

RESCUE RADIO: GAREC 2012 PUTS OUT CALL FOR PAPERS

Delegates representing their amateur radio emergency communications services, national societies or clubs are being invited to submit proposals information papers and reports. This for the 8th Global Amateur Radio Emergency Conference or GAREC which will be held November, 12 to 14th in Port Dickson, Malaysia.

Of primary interest will be information regarding the activities of any given group in regard to any emergency or disaster relief operations that it may have actively participated in from September of 2011

onwards.

The closing deadline of submission to the GAREC Secretariat is this coming September 31st. Documents should be submitted electronically in Microsoft Word format to secretariat (at) mygarec2012 (dot) com. (IARU)

**

RADIO RECOGNITION: UNESCO RECOGNIZES IRESC WITH SPECIAL CONSULTATIVE STATUS

A major coup for a relatively new ham radio emergency communications radio group. This as the United Nations Economic and Social Council known by the acronym UNESCO adopts the recommendation of the Committee on Non-Governmental Organizations to grant Special Consultative Status to the International Radio Emergency Support Coalition. A group better known by its initials of IRESC.

For those who may have never heard of it, the International Radio Emergency Support Coalition bills itself as a global coalition of volunteer communicators, with dedicated members spread around the world providing assistance to those in need at all times of day or night. The main objectives of IRESC are to foster efficient collaboration between radio amateurs, extending friendships across the world and providing international emergency communication in times of need when all else fail.

Currently, IRESC has members in at least 40 countries. Most are also affiliated with national organizations such as the International Red Cross, the Salvation Army, the United Kingdom's RAYNET, the Israel's Magen David Adom, local amateur radio clubs, and many other groups the world over.

The decision to grant the International Radio Emergency Support Coalition this status was made at the recently concluded UNESCO session held in July. More about this important milestone for the IRESC can be found on-line at www.irescintl.com. (9Z4FX)

**

THE BPL WAR: RSGB CONCERNED OVER PUSH TO LEGITIMIZE PLT

Broadband over Powerline called PLT in Europe is once again raising its noise generating head and that's of special concern to ham radio operators in the UK.

Now, the Radio Society of Great Britain has issued a statement expressing grave concern at what it calls the continuing headlong rush to legitimize high levels of emission from various Broadband over Powerline devices. This, in direct contravention of the Essential Requirements of the nations EMC Directive.

You can read the full statement on the RSGB website at www.rsgb.org. Simply click on Update on Draft PLT Standard. (RSGB)

**

RADIO POLITICS: RAC ANNOUNCES NEW STRUCTURE FOR ONTARIO

Radio Amateurs of Canada has announced that as of September 1st that its current Ontario Section will be replaced by four new Sections. These are Ontario North, Ontario East, Ontario South, and the Greater Toronto Area. A map depicting the new section boundries is available for viewing at tinyurl.com/ontario-new.

Meantime, word that the American Radio Relay League has already recognized the four new sections and they will be effective for the ARRL November Sweepstakes contest.

Radio Amateurs of Canada adds that several vendors of logging and contest software have also announced changes to coincide with the new make-up of the Ontario sections. Unfortunately, some of these will not available or effective until January of 2013. (RAC)

**

HAM HAPPENINGS: EUROPE YOUTH ON THE AIR AUGUST 19 To 26

Two European national amateur radio societies are teaming up to give young people a chance to find out what ham radio is all about first hand. Called Youngsters on the Air from Belgium and the Netherlands 2012, many young radio amateurs from nine different European countries will be participating in contesting, direction finding competitions, a Field Day like operation and much more.

Youngsters on the Air will be held the week of August 19th to the 26th at a location in Belgium adjacent to the Dutch border. The sponsors are Belgium's U-B-A Youth Commission and the Dutch national amateur radio socirty society VERON. For more information please contact Tommy Degrande, ON3TD, by e-mail to tommy (at) uba (dot) be or Lisa Leenders, PA2LS, to pa2ls (at) veron (dot) nl (ON5CFG)

**

BREAKING DX NEWS: CY9M ST. PAUL OPERATION SHUTS DOWN EARLY

The long anticipated CY9M St. Paul Island DXpedition was forced to go QRT earlier then expected at the request of their transport ships skipper due to a forecast of poor weather conditions. As a result they departed from St. Paul at about 1900 UTC on July 31st.

The good news is that in the short four and a half days of operating, the team made over 33,000 QSO's. All contacts will be verified electronically via Logbook of the World once the operators return home.

Those in need of paper cards should QSL to Tim Beaumont, M0URX. Meantime their logs are now available for viewing on ClubLog, and we will have more DX related news later on in this weeks Amateur Radio Newsline report. (OPDX)

RADIO TECHNOLOGY: NXDN DIGITAL AUDIO SPEC TO BE MADE PUBLIC

Another Digital protocol will soon be available. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

The Southgate news reports that the technical specification for NXDN which is an FDMA digital voice technology supported by Icom and Kenwood, is being opened to the public domain. According to a press release the chair of the NXDN Forum has announced that the Forum Steering Committee has decided to open the NXDN technical standards to the telecommunications industry.

For the past 5 years both ICOM and Kenwood have been producing VHF/UHF mobiles, handhelds and repeaters to the NXDN standard. The equipment has a transmitted bandwidth of 4.0 kHz and is typically used in 6.25 kHz channel spacing systems. NXDN Digital products are deployed throughout the world in hundreds of thousands of professional radio applications.

The specification is currently available in response to an e-mail request but the NXDN Forum indicates it will be available for direct download later in the year. Interested companies can obtain the information for the NXDN technical standards by following the instructions on the forum web site at www.nxdn-forum.com/instructions

For the amateur Radio Newsline, I'm Jim Davis, W2JKD

--

The NXDN Forum says that it will continue to accept new members after opening the technical specifications and will govern the NXDN specification and related interoperability testing and certification. (Southgate)

**

ENFORCEMENT: FCC AFFIRMS $11000 TOWER VIOLATION FINE

The FCC says Ely Radio, licensee of KWNA - AM of Winnemucca, Nevada must pay an $11,000 fine for various tower violations. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

The case began in 2008 when the San Francisco office of the Enforcement Bureau originally fined Ely Radio $13,000 because its red obstruction lights were out and the licensee had not notified the Federal Aviation Administration of the outage. The commission also found that Ely had apparently and repeatedly failed to notify the FCC about a change in ownership information for the tower.

In its appeal, Ely denied owning the tower and said it wasn't responsible for the structure's upkeep. As a result, the FCC sent a Letter of Inquiry to KWNA's former owner, Sheen Broadcasting Company. In its reply Sheen confirmed it's no longer a commission licensee. Sheen told the commission the company sold all of the equipment used to operate the station, including the tower, to Ely in 2006.

In its appeal, Ely urged the FCC to reverse its decision, arguing that it's really a tenant, not an owner. It is said was because it leases the station building and land from Sheen. But the commission did not find that argument credible, saying in its decision that at best, it appears that Ely and Sheen may have a continuing disagreement about how each of them interprets their sale agreement. That said the FCC says that it has determined that Ely is indeed the tower owner and that it's the only licensee using the structure. It also claims that Ely's personnel actually improperly extinguished the tower lights that resulted in the fine.

Because of Ely's past history of good compliance with commission rules, the agency lowered the original fine by $2,000 bringing the amount to $11,000. But it says Ely Radio must pay the fine.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Ely Radio was given the customary 30 days to pay or to file a further appeal. (RW, FCC)

**

HAM HAPPENINGS: DIGITAL ATV PARTY AUGUST 24 - 25

The World QSO Digital Amateur Television Party takes place on Friday August 24th and Saturday the 25th. This years event will involve California and Arizona in the United States, plus Australia and the British Amateur Television Club website in the U-K.

Here in North America, Bob Minnick W8ARZ and Lee Weitzel K0CCU, both in Arizona, will use the resources of linked ATV repeaters. Also, K0CCU has Skype video of very high quality and tested through the VK3RTV Digital A-T-V repeater.

The first such QSO Party organized by Peter Cossins VK3BFG occurred during the Centenary celebrations of Amateur Radio Victoria last year. (VK3PC)

**

HAM HAPPENINGS: NCDXF RECEIVES $4000 FUNDING BOOST

The Northern California DX Foundation is the recipient of a $4000 donation from the Northern California DX Club. This is said to be the largest donation ever received by the group from a club.

Of late more and more DX oriented clubs are making donations to the Northern California DX Foundation. The organization thoroughly analyzes the financial needs of planned DXpeditions and helps provide critical funding to operations high on the DX'ers Most Wanted List. Its been said that without support many DXpeditions would not be possible. (OPDX)

**

HAM HAPPENINGS: FLORIDA RADIO CLUB SEEKS TO EXPAND MUSEUM EXHIBIT

The Florida-based West Palm Beach Amateur Radio Group Inc. has announced the start of what it calls an ambitious project to expand the WS4FSM exhibit at the South Florida Science Museum. This is an exhibit that it calls "Lasting Moments of First Excitement."

According to the group, the exhinit combines technology available over the Internet with the world wide communications offered by Amateur Radio. This, to lead to a new generation of creativity and scientific advancement.

To help raise funding for the expansion the group has launched a project on KickStarter to take its story to the world. You can more about it on-line at tinyurl.com/palm-beach-kickstarter.

The West Palm Beach Amateur Radio Group bills itself as the largest amateur radio club in Palm Beach County with a history that dates back to the 1930's. More about the group is on the World Wide Web at www.wpbarc.com (AJ4XM)

**

NAMES IN THE NEWS: YU1YU ELECTED PRIME MINISTER OF SEREBIA

Some names in the news. Former Serbian Internal Affairs Minister Ivica Dacic, YU1YU, was elected as that country's newest Prime Minister on July 27.

Dacic is the leader of the Socialist Party of Serbia. From 2008 until his election as Prime Minister he served as First Deputy Prime Minister, as well as Minister of Internal Affairs. In March 2012, Serbia became a candidate for membership in the European Union.

In the world of amateur radio Dacic is a member of the Amateur Radio Union of Serbia which is Serbia's IARU Member Society. He is said to be a member of his local club known by its call letters as YU1AAV.

Dacic succeeds Mirko Cvetkovic who served as Serbia's Prime Minister from 2008 to 2012. (Southgate)

NAMES IN THE NEWS: WB4NWS REPLACES KG4IUM AS ARRL SOUTHEASTERN VICE DIRECTOR

ARRL President Kay Craigie, N3KN, has appointed James Millsap, WB4NWS, of Acworth, Georgia appointed to the position of ARRL Southeastern Division Vice Director, effective August 1st. This after former Vice Director Andrea Hartlage, KG4IUM, resigned because she has accepted a job outside of the Division.

In a message sent to members of the Southeastern Division, KG4IUM stated that while she is incredibly excited about her new career and her future, it has not come without cost. That because her move is to be outside of the division, that she is no longer eligible to serve as Vice Director.

Hartlages replacement, Jim Millsap began his ham radio career at age 12, operating 6 meter AM from Atlanta. Over the years he has served as Assistant Emergency Coordinator for Cherokee County Amateur Radio Emergency Service since 2002, was appointed ARRL Emergency Coordinator in 2010, and has been the District Emergency Coordinator for Metro Atlanta District since 2011. He was selected Georgia's "Ham Operator of The Year" in 2010 for his volunteer work in Georgia ARES. Millsap's appointment runs until noon January 1, 2014.

And for those of you who many not remember, Andrea Hartlage, KG4IUM, was the 2004 Amateur Radio Newsline Young Ham of the Year. (ARRL)

NAMES IN THE NEWS: VE3LC APPOINTED TO CITIG 700

Norm Rashleigh VE3LC, has been appointed by Radio amateur of Canada to serve on the Canadian Interoperability Technology Interest Group or C-I-T-I-G 700 Mhz definition working group. This group will help to define the network architecture and technical interoperability requirements for a Nation wide broadband mobile data network operating in the 700 Mhz band. VE3LC is currently on the RAC Radio Advisory Board of Canada and has just completed a term as Vice President Industrial Liaison. (VO1DTM/VO1DM)

HAM RADIO IN SPACE: ECUADOR TO LAUNCH AN EDUCATIONAL CUBESAT LOADED WITH FIRSTS

An upcoming launch of 17 amateur radio satellites will also carry one with several firsts to orbit. Amateur Radio Newsline's Don Wilbanks, AE5DW, reports:

--

Among the birds to be lofted this November will be an innovative educational satellite built in Ecuador and known as NEE-01 Pegasus. This tiny 1 Unit CubeSat has a large fold-out solar array and carries a 902 MHz, 720 line Progressive Scan High Definition camera and associated TV transmitter. The latter will send video of the Earth to school students in Ecuador.

The NEE-01 Pegasus engineering team was led by Commander Ronnie Nader who was Ecuador's first astronaut. The satellite was featured in the July 15 edition of Ecuador's El Murcurio newspaper. That article in electronically translated English is on-line at tinyurl.com/Ecuador-in-Space

Im Dom Wilbanks, AE5DW.

--

Cubesats are tiny satellites that are economical to both build and carry to orbit making them attractive to institutions of learning as well as to the ham radio community. (ANS)

RADIO HISTORY: MARCONI CHELMSFORD SITE TO BE RE-DEVELOPED

The BBC reports that the Marconi New Street factory in the United Kingdom city of Chelmsford is to be redeveloped after being left derelict for several years.

Marconi New Street was the world's first purpose designed and built wireless factory. It was opened in June 1912 by radio pioneer Guillermo Marconi and where he carried out his research work and built a large electronics and telecommunications business. It also provided housing for many of those who were employed by Marconi.

According the BBC that business dissolved in 2006 and the building has stood empty since 2008. The new owners says that it wants to build homes, offices, shops and community facilities at the site, which covers about 10 acres near Chelmsford city center but also retain and refurbish the main 1912 Marconi building for office space.

You can read the entire story on-line at Read the BBC story at tinyurl.com/marconi-factory. (WIA News)

DX

In DX, the International Telecommunications Union has updated its Table of International Call Sign to reflect a call sign change for the island of Niue which will now have the entire E6 prefix block. Prior to the change the island used ZK2 callsign prefix.

On the air, word that a team of European operators will be active as D64K from the Comoros Islands through August 20th. Their license covers from 160 to 6 meters, so they hope to be active on all bands and modes and were even considering the possibility of working on 60 and 6 meters. They will have four stations on the air using Elecraft transceivers, amplifiers and at least two Spiderbeams and several vertical antennas. The QSL Manager for this operation is IV3DSH.

DJ7RJ will once again be active stroke FR from Reunion Island as between September 26th and October 21st. His operation will be on 160 through 10 meters using, CW and SSB, and he will pay special attention to the low bands for United States and Japan. QSL direct to his home callsign.

DG5LAC will be active stroke P from Amrum Island between August 11th and the 24th. His operation will be holiday style on 80 through 10 meters SSB. Log will be uploaded to Logbook of the World and eQSL when he returns home. QSL via his home callsign, direct or by the Bureau.

A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB between October 5th to the 11th. More details and a Web page will be forthcoming. Meantime you can see their logo on QRZ.com.

Lastly, listen out for an all Y L DXpedition to be active as GB2YLS from Fair Isle between August 16th to the 22nd. Their activity will be on the HF bands using CW and SSB. They also plan to be operational as an entry in the International Lighthouse and Lightship Weekend scheduled for August 18th and 19th from the Fair Isle South Lighthouse. QSL via MM5YLO, either direct or via the bureau.

Above from various DX news sources

THAT FINAL ITEM: JOE WALSH WB6ACU SAYS HE IS THINKING ABOUT RUNNING FOR CONGRESS

And finally this week, famed rock guitarist Joe Walsh, WB6ACU, has joked about running for political office since way back in 1980. That's when he ran a tongue in cheek campaign for the presidency. Now it appears as if Joe has decided to take politics more seriously, and according to a new radio interview, he could run for Congress. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the details:

--

In a recent discussion aired over WASH-FM in Washington DC, famed rock guitarist Joe Walsh, WB6ACU, said, and we quote: "I think I would run seriously, and I think I would run for Congress."

Walsh went on to tell WASH that: "The root of the problem is that Congress is so dysfunctional. We're dead in the water until Congress gets to work and passes some new legislation to change things."

Walsh believes he could represent the concerns of real people better than politicians who live in a different world to the rest of the country. He said that he thinks that if you pay attention to Congress and vote for people from where we're all from, and if we can elect people who are not politicians that are from where we're from, that he thinks we can get something done.

Walsh added - and again we quote: "So I might run for Congress and see if I can stir up the hornets."

Meanwhile, WB6ACU is touring his new solo album "Analog Man" at intimate venues nationwide. And of coarse you can always hear his playing the opening theme at the beginning of each episode of Ham Nation on TWiT.tv.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

For those interested in hearing all of what WB6ACU has to say, take your web browser to ultimateclassicrock.com/joe-walsh-to-run-for-congress. Then scroll down until you see the window containing the actual interview and click the arrow key to make it play.

1st time in its 95 year history Lorain Harbor Light, US0143, will be On The Air!

Posted: 09 Aug 2012 06:41 AM PDT
http://forums.qrz.com/showthread.php?357073-1st-time-in-its-95-year-history-Lorain-Harbor-Light-US0143-will-be-On-The-Air!&goto=newpost

Press Release

For Immediate Release, 5 August 2012

Lorain County Wireless Operators

Will Operate From The

Lorain Harbor Light, US0143

LORAIN COUNTY OHIO ☐ The LCWO is pleased to announce its first group project. LCWO, in conjunction with the Lorain Lighthouse Foundation, Inc. will operate NW8S from the Lorain Harbor Light, US0143, in support of the International Lighthouse Lightship Weekend, 18 & 19 August 2012.

The goal of the event is to ☐Promote public awareness of lighthouses and lightships and their need for preservation and restoration, and at the same time to promote amateur radio and to foster International goodwill. Lighthouses are fast becoming an endangered species with the introduction of Global Positioning Systems and Satellite Navigation and the automation of the light source to solar power which has resulted in the withdrawal of management personnel (Keepers). It is hoped that this event will highlight this situation and help prevent further desecration of these magnificent structures all around the world.☐ (Source: ILLW)

This will mark the first time an amateur radio station has operated from the lighthouse and the first time in decades that the lighthouse will be occupied overnight. There are three light structures in Lorain Harbor. From east to west; Lorain East Detached Breakwater Light, Lorain Middle Breakwater Light & Lorain Harbor Light. The US Army Corps of Engineers completed the lighthouse in 1917 resting it in 30☐ of water in wooden cribs filled with sandstone then later encasing its base in concrete. The original focal plane, at 58☐, was a Forth Order Fresnel Lens which could be seen for approximately 15 miles out on Lake Erie. The USCG manned the lighthouse from 1939 thru 1965. In 1965 it was decommissioned and slated for demolition. After falling into years of disrepair & vandalism, and an

uncertain fate, a group of concerned citizens formed the Port of Lorain Foundation, Inc. saving the lighthouse from the wrecking ball. Currently restoration efforts are underway to return the lighthouse to her status as ☐Jewel of the Port☐

Please visit www.nw8s.com and www.lorainlighthouse.com for more information. Or contact Jeff Evans, KB8ZUN, at kb8zun@gmail.com .

Army MARS expands HQ

Posted: 09 Aug 2012 09:53 PM PDT
http://forums.qrz.com/showthread.php?357169-Army-MARS-expands-HQ&goto=newpost

Fort Huachuca, AZ☐Army MARS headquarters operations will be expanded with recruiting of a fulltime senior MARS Program Officer, it was disclosed Friday (Aug. 10) by Stephen G. Klinefelter, Chief of the Army Military Auxiliary Radio Service.

The Program Officer position is the first fulltime staff expansion at MARS headquarters in at least a decade. ☐This is a significant change of affairs,☐ Klinefelter said. ☐We are going to strengthen processes and communications to meet our future challenges.☐

In another sign of the auxiliary☐s response to growing need for its services, the 10 volunteer Region Directors are being summoned to a three-day planning conference with headquarters staff at Dallas Sept. 11-13.

Defense Department spending on its three ham radio auxiliaries (Army, Air Force and Navy-Marine Corps) had been steadily cut back in recent years as more and more communications switched from HF to satellite and combat operations in the Middle East drained available funds. Army MARS formerly operated three area gateway stations in the continental U.S. all with fulltime administrators and military operators. Only one remains, here at Ft Huachuca, operated by civilian contract employees. The Chief☐s job had been fulltime until 2007.

Lately, however, MARS, with trained communicators distributed throughout the U.S., has been gaining increased attention as defense planners focused on the terrorist threat to conventional communications infrastructure.

The new MARS Program Officer will serve as a full-time aide to Klinefelter, who added the part-time Chief☐s responsibilities to his primary job as an operations officer at the Network Enterprise Technology Command (NETCOM) earlier this year. A retired colonel with 31 years in uniform, Klinefelter will retain the latter position in G-3 (Operations). NETCOM headquarters here oversees the army☐s computer and communications systems worldwide.

He said the new Civil Service position, which is being advertised on the official USAJOBS.GOV site today, will be filled as quickly as possible. A

search for candidates has been underway while final approval of the new position was pending.

The job calls for a civilian with recent senior-level Army and staff experience (civilian or military) plus applicable advanced degree and both General Commercial and Amateur Extra FCC radio licenses. The pay starts at $84,000 not including federal locality allowance.

Ham Radio Club to Celebrate John Clem Day:

Posted: 09 Aug 2012 05:13 PM PDT
http://www.eham.net/articles/28784

NEWARK -- On Saturday, Licking County's COOKEN amateur ham radio club will celebrate John Clem Day at the Licking County Historical Society, Webb House, 303 Granville St., Newark. John Clem, a Newark native, was the youngest Army non-commissioned officer in the Civil War at age 12. He worked his way up to brigadier general and retired as a major general. The club will set up a portable ham radio station at the Webb House and will make contacts starting at 9 a.m. with stations all across the U.S. and around the world. For stations that are contacted, confirmation certificates will be available after the event. The operating frequency will be 7180 kilohertz.

//
Your Cellphone Can't Do This: Ham Radio in the Digital Age:

Posted: 09 Aug 2012 05:13 PM PDT
http://www.eham.net/articles/28783

On a stifling late-June day, a tangle of wires snakes through the open door of the Buncombe County Firefighters' Training Center. Outside, the sun beats down and the roar of big generators fills the air; indoors, the atmosphere is even thicker, dense with a jarring concoction of radio static, Morse code and urgent voices. Formally known as the Amateur Radio Service, ham radio is at least 100 years old. By definition, hams are amateurs, barred from accepting payment for their services under federal law. "Ham" was originally a derogatory term applied to the tinkerers and experimenters who pioneered the hobby, but today's operators carry the moniker proudly, knowing their skill set is anything but amateur. Accompanying this sincere welcoming attitude, though, is the sense that relying on the hobby's primary demographic -- older men with disposable income -- just isn't sustainable, particularly in the shadow of Facebook, smartphones and what old-timers see as young folks' addiction to easy, frivolous communication. Some members even see themselves as the last practitioners of a dying art. That fear may be unfounded: Today's ubiquitous tech appears to be re-energizing the long-standing hobby. Pioneering operators have merged radio (an analog medium) with digital communication, and the Internet gives beginners a broad base of support. "Amateur radio is very much alive and well," says Bill Morine

(N2COP), North Carolina section manager for the Relay League. "An awful lot of young people are coming out and seeing the merger of technologies between computers and wireless applications."

//
Commission Stops Cell Tower Placement with Lack of Vote:

Posted: 09 Aug 2012 05:13 PM PDT
http://www.eham.net/articles/28782

A proposal to put a cell phone tower on Vernon Ferry Road failed after about two months of residents sparring with company representatives over the placement of the tower. Residents in the immediate area of 313 Vernon Ferry Road, where a 105-foot cell phone tower was proposed to be placed for AT and T service, spoke out at against the tower at three public hearings, which they felt would be an eyesore. A group of ham radio operators also spoke up against the tower, which they said could interfere with vital operations. Steve Mobley, who lives near the proposed tower, said the cell phone signal could interfere with his ham radio operations. Mobley's system is linked into weather warning systems and the National Weather Service in Peachtree City and other systems as far as Tennessee, Florida and Savannah. Amateur radio operators in the area are a vital part in helping get information out on severe weather, he said. Former West Point police chief David Kerr, also a ham radio operator, said that the services amateur radio operators provide is vital to public safety. "They devote many many hours on education and practice exercises to step in when necessary," Kerr said. "They maintain individual equipment, and when linked together, assist not only locally, but regionally and statewide."

*
RAC Bulletin 2012-047E - Question bank updates.*
2012-08-07

The Radio Amateurs of Canada along with Industry Canada are
undertaking a review of exam questions in the Basic and Advanced
qualifications. This review will see questions that are not
technically correct updated, older questions that aren't as useful
removed and new questions to better test knowledge of our hobby added.

We welcome suggestions and comments from Amateur Radio Operators as
this review proceeds. Please provide your input on the following items:

1. What questions are not technically correct in the current exams?
2. Which questions are no longer relevant to the Amateur Radio
Service and should be removed?
3. Which topics should be added to the exams to replace older questions?

If you have sample questions you would like included, feel free to
send them. Or, simply provide comments on the areas you feel questions
should be added.

Submissions should be received by the Radio Amateurs of Canada by
August 31st, 2012. Following a review of the submissions, a report
will be submitted to Industry Canada in late September for
implementation. The new question bank will see its first use when
Industry Canada releases new exam generator software in the coming months
.

To submit your comments or questions, please emailregulatory@rac.ca
<mailto:regulatory@rac.ca>.

RAC Bulletin 2012-040E-1 - Clarification of Bulletin no. 2012-040E
published on July 31, 2012
2012-08-10

Over the past several months there have been questions raised
regarding the information available when searching the 'Canadian Call
Sign Quick Search' which is available on the main page of the RAC website
.

The questions raised were regarding Amateur Operator mailing address
information being displayed and incorrect mailing address information
displayed in some instances. When an applicant signs the IC2381 form
requesting their callsign after a successful exam, there is a
disclosure statement indicating that the applicant agrees that
Industry Canada may use, disclose and share the information regarding
their certificate qualifications, name, address and call signs, for
the purpose of establishing a database that will be made public in
order that other amateurs are aware of the frequencies and emissions
that they've been authorized to utilize. This has been the practice
for many years. An operator can request that their mailing address be
removed from the public website if they wish. The call sign, name and
qualifications will remain visible on the public website.

To answer the question regarding incorrect mailing address information
displayed, section 15 of RBR-4 states that the holder of an Amateur
Radio Operator Certificate shall notify the Department within thirty
(30) days with respect to a change of mailing address. It is the
responsibility of the Operator to contact the Department to make the
appropriate changes. You can view RBR-4 at this link:
http:/www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf01226.html

If you need to make changes to your information, you can login to your
Industry Canada Amateur Radio account or create an account if you
don't already have one. The link to the website is:
http://www.ic.gc.ca/eic/site/025.nsf/eng/home. You can also contact
Industry Canada's Amateur Radio Service Centre by telephone at
1-888-780-3333 or via email at spectrum.amateur@ic.gc.ca. RAC
downloads the database displayed the RAC web site from Industry Canada
on a daily basis therefore all changed must be made with Industry Canada.

Hopefully this will clarify the questions being raised regarding
mailing addresses. RAC would appreciate if this clarification could be
included in Club newsletters or other Club correspondence.

Bulletin de RAC 2012-040F-1 - Bulletin de RAC 2012-040F-1 -
Clarification du bulletin no. 2012-040F publi le 31 juillet 2012
2012-08-10

Durant les derniers mois il y a eu des questions soulev es au sujet de
l'information disponible en cherchant par le "Canadian Call Sign Quick
Search" qui est disponible sur la page principale du site web de RAC.

Les questions soulev es taient relatives aux informations affich e
s
sur les adresses postales des radioamateurs ainsi qu'aux informations
erron es sur les adresses postales affich es dans certains cas. Quand

un requ rant signe un formulaire IC2381 pour demander son indicatif
apr s un examen r ussi, il y a une d claration de divulgation
indiquant que le requ rant est d'accord que Industrie Canada peut
utiliser, r v ler et partager l'information au sujet des
qualifications de son certificat, son nom, son adresse et ses
indicatifs, dans le but d' tablir une base de donn es qui sera rendue

publique afin que d'autres radioamateurs sachent les fr quences et les
modes d' mission qu'il est autoris utiliser. Ceci est la pratiqu
e
utilis e depuis plusieurs ann es. Un radioamateur peut demander que
son adresse postale soit enlev e du site web public s'il le d sire.
L'indicatif, le nom et les qualifications demeureront visibles sur le
site web public.

Pour r pondre la question relative aux informations erron es sur
les
adresses postales affich es, la section 15 de IPR-4 nonce que le
d tenteur d'un certificat d'op rateur en radio amateur doit aviser le

Minist re dans un d lai de trente (30) jours au sujet d'un changement

d'adresse postale. Il est de la responsabilit du radioamateur de
contacter le Minist re pour effectuer les changements appropri s. Vou
s
pouvez consulter le IPR-4 ce lien:
http:/www.ic.gc.ca/eic/site/smt-gst.nsf/fra/sf01226.html

Si vous d sirez faire des changements vos informations, vous pouvez

ouvrir une session sur votre compte de radio amateur Industrie
Canada ou cr er un compte si vous n'en avez pas d j un. Le lien au

site web est: http://www.ic.gc.ca/eic/site/025.nsf/fra/accueil. Vous
pouvez galement contacter le centre de service pour la radio amateur
d'Industrie Canada par t l phone 1-888-780-3333 ou par courriel

spectrum.amateur@ic.gc.ca. RAC t l charge la base de donn es affich
e
sur le site web de RAC de Industrie Canada sur une base quotidienne,
alors tous les changements doivent tre faits avec Industrie Canada.

Nous esp rons que ceci clarifiera les questions soulev es au sujet de
s
adresses postales. RAC appr cierait que ces clarifications soient
incluses dans les bulletins de nouvelles des clubs ou autre
correspondance des clubs.

Sky Sat Communications of Montenegro and InnovAntennas

Posted: 09 Aug 2012 10:55 AM PDT
http://forums.qrz.com/showthread.php?357102-Sky-Sat-Communications-of-Montenegro-and-Innov Antennas&goto=newpost

Sky Sat Communications of Montenegro appoints InnovAntennas Exclusive Distributor for its Advanced Contest Solutions Product Line in the North American and United Kingdom Markets

Glade Park, Colorado, Canvey Island, England & Igalo, Montenegro ☐ August 9, 2012: Sky Sat Communications, founded by internationally renown amateur radio contester Ranko Boca, 4O3A, today announced the appointment of InnovAntennas as exclusive distributor of its Advanced Contest Solutions line of ultra high performance Filters, Switches and Automation & Control Devices that ☐no serious shack should be without☐ for the North American and United Kingdom markets with immediate effect.

The Sky Sat 4O3A product line is the result of many years of contest winning experience and development. The pitfalls of underperforming mainstream products have been overcome to provide high-performing products giving serious contesters☐☐and DXers☐☐trouble-free functionality to ensure the points☐☐and new DXCCs☐☐keep racking up! In two short years Sky Sat☐s customer base has expanded to include many of the world☐s leading contesters and contest stations including 4O3A, OH8X, ES5TV, PY5EG, S51A, WX3B, YT3M, DR1A, LZ9W, LX8I, K3WW, UA3AB, S52X, CR2X, II9P, et al.

Sky Sat☐s CEO Ranko Boca, 4O3A said "I have been looking for the right partners to expand Sky Sat☐s reach into North America and the United Kingdom for some time and was delighted to discover that InnovAntennas, with operations on both sides of the Atlantic, could cover both markets. InnovAntennas fully understand the needs of contesters and DXers, the amateur radio world☐s most demanding customers, and are well suited to provide sales and support for our products.☐

InnovAntennas is now stocking and supporting the Sky Sat 4O3A filter products and will be making available the balance of the product line during the second half of 2012. Available immediately are the High Power 5-pole and 3-pole Monoband Band Pass Filters (Series S & Series L) for the HF contest bands: 80m, 40m, 20m, 15m and 10m, and the High Power HF Triplexer/Combiner. Stations using Tribander antennas to cover 20m, 15m and 10m can use the High Power HF Triplexer/Combiner in combination with

Series S filters to operate simultaneously with a high level of isolation on all three bands with multiple transceivers sharing the same antenna - perfect for serious contest efforts from home, Field Day and DXpeditions. All 4O3A filters, including the Triplexer/Combiner, are rated for full legal power at high duty cycle modes such as RTTY.

InnovAntennas America cofounder & executive chairman William Hein said ☐InnovAntennas strives to sell only the absolute best, no compromise antennas and accessories and have found a kindred spirit in Ranko, 4O3A. My new personal contest station in Colorado is being designed around 4O3A-designed products in the shack and of course our own InnovAntennas products in the air. We look forward to a long, productive relationship with Sky Sat and can☐t wait to see what comes next out of Ranko☐s lab!☐

About Sky Sat Communications

Ranko Boca, 4O3A, founded Sky Sat Communications, a producer of digital and analog transmitters for commercial TV and FM broadcasters as well as custom telecom products for a global market, in 1990.

Unsatisfied with the performance and quality of performance products made for hams, Boca and Sky Sat launched a Ham Radio Department in 2010. Boca (ex-YU6AD, YT6AA, YT6A) married his decades of hands on contest experience with the latest technology to create unique, ultra-high performance products designed and manufactured without comprise for the amateur radio world☐s most demanding users: contesters and DXers.

About InnovAntennas

Justin Johnson, G0KSC, launched InnovAntennas, Ltd. in 2011 after his antenna designing hobby led to a flood of requests to ☐please make one for me☐ from amateur radio operators who recognized that Johnson☐s designs outperformed anything they could buy from a store. InnovAntennas America, Inc. was launched in January 2012 by William Hein, AA7XT and is based in Glade Park, Colorado. The company☐s antennas and accessories are available directly via InnovAntennas.us (for North America), InnovAntennas.com (for the rest of the world) and via a worldwide dealer network.

InnovAntennas☐ highly regarded designs include LFA (Loop Fed Array) and OP-DES (Opposing Phase ☐ Driven Element System) Yagis. Performance of InnovAntennas☐ GOKSC designed Yagis routinely top the charts in their boom-length class on the survey of ☐moonbounce☐ antennas ☐ ☐EME-ers☐ are among the ham world☐s most critical operators ☐ compiled by VE7BQH and available online.

2012 Salmon Run (aka WA QSO Party)

Posted: 10 Aug 2012 07:58 PM PDT
http://forums.qrz.com/showthread.php?357282-2012-Salmon-Run-(aka-WA-QSO-Party)&goto=newpost

The Western Washington DX Club has announced that the 2012 Salmon Run (WA State QSO Party) will take place September 15 - 16. Full details and rules for this very popular event can be found on the WWDXC website.

So, what's so special about this QSO Party? Aside from nifty certificates for high scorers, packages of smoked salmon will be awarded to the highest scoring entry in each DXCC entity and each US Call District (0 through 9). To qualify for prizes the minimum number of QSOs is: DX 25 and USA 50. Other salmon prizes, awards and sponsored plaques at the discretion of the awards committee. That's right, if you do well, you can eat your prize! :cool:

This station will be active on 160/80/40/20/15/10m bands, CW & SSB modes.

SARL NEWS - SUNDAY 12 AUGUST 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with deep sadness we have to announce that the key of OM Les Clark, ZS6NV, became silent on the 8th August. Les was 92 years old. He joined the SARL in 1947, and has enjoyed continued membership for the past 65 years. Les was a Honorary Member of the Centurion Radio Amateur Club.

Our sincere condolences to his family and friends.

(PAUSE)

In the news today:

MORSE CODE ON MARS

BOOK BY WEDNESDAY NIGHT FOR THE RTA IN GAUTENG

PERSEIDS SHOULD BE FUN FOR METEOR SCATTER ENTHUSIASTS AND VIEWERS ALIKE

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

MORSE CODE ON MARS

When Curiosity moves around Mars it will leave a series on dots and dashes on the surface. If you look carefully at Curiosity's wheels, you might notice that along with treads, there are square and rectangular holes. According to JPL Rover Mechanical Engineering Team, these holes actually have a purpose: odometer markers. JPL Engineers will be looking at the visual odometer markers that are on the wheels. There are asymmetric patterns, actually holes, inside the wheels of the rover

that will leave an imprint on the surface of Mars. These imprints help to verify that it has traversed the distance it expects to traverse. If it looks like it's not traversing, even though the wheels are going, that is an indication that the vehicle is getting stuck and it will stop and call back home.

So what pattern did JPL choose to put on Curiosity's wheels? The holes are in a pattern of short squares and longer rectangles -- almost like dots and dashes in Morse code. And what does it spell out in Morse code? JPL.

You can follow Curiosity on Facebook at www.facebook.com/MarsCuriosity.

BOOK BY WEDNESDAY NIGHT FOR THE RTA IN GAUTENG

Pre Bookings for the Radio Technology in Action Symposium to be held at the National Amateur Radio Centre on Saturday 18 August 2012, close on Wednesday night. After that you can register and pay (Cash only) at the NARC from 08:15 on Saturday. Full detail of the symposium is available on line at www.sarl.org.za.

By pre-booking you take part in an additional prize draw for the ARRL Book "Basic Antennas". If you like a programme to be sent to your inbox, send an email to rta@sarl.org.za with RTA NARC in the subject line and a PDF copy will be mailed to you.

Get up to date with Propagation and how to do your own predictions, how to control antennas, contest logging, learn about Software Defined Radio and how to build an experimental SDR, have fun with RaDAR and be part of Tony Voorveld's spectacular presentation "Tuning into nature." It is all happening at the SARL RTA on Saturday at 18 August 2012. Doors open at 08:15 and the programme starts at 09:00.

GET YOUR QSL's AT THE RTA

Members and Non Members can collect their QSL cards at the RTA. The QSL Manager, Willem Weideman, ZS6WWJ, will during refreshment breaks, be available to hand out cards to delegates who are attending the SARL's premiere event.

PERSEIDS SHOULD BE FUN FOR METEOR SCATTER ENTHUSIASTS AND VIEWERS ALIKE

The peak of the Perseids meteor shower will coincide with a waning crescent moon. This will produce favourable viewing circumstances for observers expecting to get the full effect of this yearly experience.

For South Africa the best time to watch and operate is 23:00 - 04:30 CAT on 12 and 13 August.

On average, under completely clear skies, and in complete darkness, observers may witness 20 to 80 meteors per hour; but these rates can exceed up to 120 meteors per hour in rural locations. Be aware that local conditions such as light pollution, cloud cover, and precipitation will also play a major role in the number of meteors you

are likely to see.

For the best viewing experience, find an area unobstructed by a structure that is far away from city lights. Using optical devices such as binoculars or telescopes is not recommended, as your field of view will be greatly restricted, thus making the possibility of missing a "shooting star" more likely.

Not coincidentally, the Perseids meteor shower is named after the constellation Perseus for the reason that they appear to originate from the sparkling Greek "hero." Looking directly up at the sky or into the radiant is not recommended since this is just the point in which they appear to come from. You are more likely to see a trail when looking slightly away from this point. Looking half-way up into the sky will lead to the best show in the house.

Amateur Radio and the Perseids

If you own a 6 or 2 metre SSB/CW transceiver, you can get in on the action, bouncing your signals off Perseid meteor trails and making quick meteor scatter contacts over hundreds of kilometres, and possibly even as much as 2 000 km. Meteor scatter operation is particularly easy on 6 metres where 100 W and an Omni directional antenna will do the job. On 2 metres, a directional antenna (such as a multi-element Yagi) usually yields better results.

Some meteor scatter operators prefer to use SSB, making rapid exchanges of signal reports and grid squares. With the free sound-card-based WSJT software suite by Joe Taylor, K1JT, it is possible to make digital meteor scatter contacts almost any time of the day or night, not just during annual showers. Most WSJT scatter operators use a mode known as FSK441 and centre their activities on calling frequencies 50,260 and 144,140 MHz.

CONTEST NEWS

Contest results. For the SARL Winter QRP contest held on the 21st July 16 logs and 1 check log were received:- 1st Gerrit Rautenbach ZS2XD 2436 points 2nd Lukas Holtzhuizen ZS6LH 1560 points 3rd Andre Botes ZS2ACP 1452 points

Congratulations to Gerrit for his achievement. It just goes to show what can be achieved if you go the extra mile.

By Friday evening at 20:30, the contest committee had received 13 logs and 1 contest log for the SARL HF Phone Contest.

The closing date for logs has been extended to midnight on Monday 13 August 2012. The 50th log received will win a SARL Membership for the current financial year. PLEASE read General Rule 5 and 6 before submitting your log.

Next contest.

The next leg of the SARL HF contest, digital, takes place on Sunday the 19th August.

1. Aim The aim of the HF Contests is for participants to contact as many amateurs in Southern Africa (General Rules para 1.b.) as possible on the 20, 40 and 80 m amateur bands. 2. Time >From 13:00 to 16:00 UTC [15:00 to 18:00 CAT] 3. Frequencies 3 580 to 3 600 kHz 7 040 to 7 060 kHz 14 070 to 14 099 kHz PSK31 is preferred at the lower end of the specified frequencies. RTTY is preferred at the upper end of the specified frequencies. Please note that USB must be used at all times, refer to GR 16. 4. Categories a) Single Operator, Single Band b) Single Operator, All Band c) Multi Operator, Single Band d) Multi Operator, All Band Individual competitors and club stations are encouraged to compete. 5. Exchange RS(T) and a consecutive serial number starting at 001. 6. Scoring

Digital contacts count 3 points. Count two points for each area (see below) on each band. Count 2 points for each stations contacted on all three bands.

Area 1: ZS1 Western Cape Area 2: ZS2 Eastern Cape Area 3: ZS3 Northern Cape Area 4: ZS4 Free State Area 5: ZS5 KwaZulu-Natal Area 6: ZS6 Gauteng, Mpumalanga; Limpopo and North West Area 7: 3B8 Mauritius, 3DA Swaziland, 7P Lesotho, 7Q Malawi, C9 Mozambique, Z2 Zimbabwe, 5R Madagascar, FR Reunion Island and FH Mayotte Area 8: 9J Zambia, A2 Botswana, D2 Angola, V5 Namibia, ZD9 Gough and Tristan da Cunha Islands, ZS7 Antarctica and ZS8 Marion Island. Contacts with stations outside these areas are allowed, QSO points may be claimed but no zone or three-bander points may be claimed. 7. Sponsor Send logs to zs4bfn@netactive.co.za or by mail to the Bloemfontein ARC, Box 33211, Fichardt Park, 9317. Closing date for logs is 27 August 2012.

RAE CLASSES

The Bloemfontein ARC will be presenting RAE classes starting on Friday 17 August. These will be weekly classes at 18:00 on Friday evenings. For more information, contact Warren, ZS4W, with email to zs4whiskey@mweb.co.za or mobile 082 777 9094.

CLUB NEWS

At the AGM of the Zululand Amateur Radio Club, held on the 12th July in Richards Bay, the following Committee members were elected to serve the members of the club for the forthcoming year

Chairman: John Kramer, ZS5J Vice Chairman: Andrew Jansen, ZS5AND Treasurer: Willie Axford, ZS5WI Secretary: Dawn Snyders, ZS5ME Members: Jo Snyders ZS5PO (News Editor)

Anne Griffiths ZS5FAB

Warren Snyders ZS5WOZ.

We wish them well for their term of office, and thank the outgoing members for their hard work during their term of office.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the week's expected solar activity will be at low to moderate levels.

There are currently many sunspot regions visible but none are posing a threat for strong solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 82.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the higher solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 13 August - That is tomorrow, new closing date for submission of logs for the SARL HF Phone competition. 15 August - ELECTRONIC COMMUNICATIONS AMENDMENT BILL, last date to send your comments to the SARL by email to secretary@sarl.org.za. 16 August - Last day to submit logs for the YL Sprint to zs4bfn@netactive.co.za or Bloemfontein ARC, Box 33211, Fichardt Park, 9317. 18 August - RTA in GAUTENG, pre-book now to also enter for an additional prize draw. 19 August - SARL HF digital competition. 26 August - SARL HF CW competition. 27 August - Last day to submit logs for SARL HF digital contest to zs4bfn@netactive.co.za or Bloemfontein ARC, Box 33211, Fichardt Park, 9317,

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George Honiball, ZS6NE.

Thank you for listening, 73. /EX

Limerick Radio Club to Go On the Air from Loop Head:

Posted: 10 Aug 2012 05:45 PM PDT
http://www.eham.net/articles/28792

LIMERICK Radio Club is to host a non-stop 48-hour marathon broadcast from Loop Head Lighthouse in Kilbaha. The club, comprising members from Limerick, Clare, Kerry and Tipperary, will broadcast as part of the 15th International Lighthouse/ Lightship Weekend (ILLW) on August 18-19. The Loop Head beacon will be among hundreds of lighthouses and lightships worldwide participating in a unique event aimed at promoting public awareness of lighthouses and their need for preservation and restoration. Simon Kenny, chairperson of Limerick Radio Club, explained that the club, which was founded in 1946, has a "long association" with the Lighthouse Weekend and this year, for the first time, is "privileged to be allowed to operate from Loop Head". "We hope to open long distance communications with regions in Asia, through Europe, North and South America, Australia and New Zealand," he explained. "A special QSL Card [confirmation of communication] has been designed to mark the event. Club membership is open to individuals from all walks of life who are interested in radio communications, electronic construction and antenna design. The club will operate two stations, one of which will be at the entrance to the Lighthouse so members of the public can listen to some of the transmissions," he added.

//
Sunspot Solar Storm Captured on Video:

Posted: 10 Aug 2012 05:41 PM PDT
http://www.eham.net/articles/28791

According to NASA, a sunspot is an area where there are concentrations of magnetic flux, generally within bipolar clusters or groups. They appear as a dark spot on the sun's photosphere because they are cooler than the surrounding photosphere. The classification of sun spots appears as to their group characteristics, known as the Zurich Sunspot Classification, which preceded older sunspot counting schemes, such as the Wolf Sunspot Number classification. The affects of sunspots on Earth, according to NASA, are mainly found in Earth's upper atmosphere, the ionosphere. Solar winds are the effects of increased sunspot activity, which often is the result of increased sunspot activity. The charged particles in solar wind can interact with atoms in the ionosphere, which may interfere with our

communications systems.

//
Sacramento Club Keeps Morse Code Alive in iPhone Era:

Posted: 10 Aug 2012 05:43 PM PDT
http://www.eham.net/articles/28790

SACRAMENTO -- With cell phones, texting and e-mailing, it seems like there would be no room for Morse code. But one Sacramento group says the first digital language is pretty similar to the way we communicate today. Michael Aretsky, one of the leaders of the W6SFM club said it's, "the original texting." But unlike modern day texting, you don't need a phone contract, or cell service. Aretsky says with just one box, a Morse code key and some wire, he can go anywhere in the world and transmit.

//
Radio Ham Wins Appeal for New Mast:

Posted: 10 Aug 2012 05:39 PM PDT
http://www.eham.net/articles/28789

AN amateur radio enthusiast in Cefn Cribwr - who accused the town's community council of racism -- won an appeal to erect a fourth mast in his garden. Radio ham Michael Butler, of Green Meadow, sent a stinging letter to Cefn Cribwr Community Council last month saying their "prejudice" against his mast erection ideas "bordered on racism". In an unprecedented three-pronged attack, he also penned letters accusing the Gazette of being "biased and sarcastic" and calling borough Mayor councillor Marlene Thomas "an idiot". In March, Bridgend County Borough Council planners slammed his bid to erect a 6.5m high mast in his garden to further his amateur radio hobby. Opposers likened the proposed antennae to "a flying bedstead". But last week, Welsh planning inspector Rebecca Phillips upheld Mr Butler's appeal against the BCBC decision. The consent means he can now keep the three masts already in his garden and erect a fourth, on the proviso that it is only at its full height for three hours a day.

//
Propagation Forecast Bulletin #32 de K7RA:

Posted: 10 Aug 2012 08:41 AM PDT
http://www.eham.net/articles/28788

Average daily sunspot numbers rose over 20 points this week, or about twenty-percent, to 119.4. The average daily solar flux was up 3 points to 134.7.

Simon Brown, HB9DRV, comments on new HRD

Posted: 11 Aug 2012 02:01 PM PDT
http://forums.qrz.com/showthread.php?357370-Simon-Brown-HB9DRV-comments-on-new-HRD&goto=newpost

Simon Brown, HB9DRV, the creator of Ham Radio Deluxe, has made public his comments on the new releases of HRD.

He is busy working on his SDR program and the current results can be found at http://sdr-radio.com. Simon is having the time of his life working on this next generation of radio technology.

In comments to the new HRD owners he said, ☐I☐m very pleased with the progress the team has made with HRD. The latest version is more ☐rock solid☐ than any other versions ever released. HRD Software, LLC was the right choice to continue HRD, and I love the work they are doing not only with the program, but with the customers. I☐m very happy the ham community is supporting them in their efforts, as they supported me for those many years.☐

Ham Radio Deluxe is at http://www.ham-radio-deluxe.com.

Prepared in Murfreesboro, TN, and Strongsville, OH

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, N2OO, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4JF, AA5UL, KH6BZF, N6PSE, N7US, K8GI, K8YSE, W8GEX & 60m News, ND9M, W9ILY, AT International, CX3AL, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, OH2YY, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PT7WA, RSGB IOTA Web Site, Sixitalia Weekly, TA1HZ, UT7UT, VA3RJ & ICPO, VE7DP, the VHF-DX-Portal (MMMonVHF) and VK2ARE for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-August, through Sunday, 12th-August there were 216 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3D2/r, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, PA, PJ2, PJ5, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, TA, TF, TG, TI, TK, TN, TT, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9C, VK9N, VP2E, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, VU7, XE, XU, YA, YB, YI, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2C, CONWAY REEF (Press Release). Paul, N6PSE, sent out the following on August 7th: "After many months of careful planning, we are pleased to

announce that our preparations for a large multi-national Dxpedition to Conway Reef are going according to plan.
Conway Reef is located in the South Pacific Ocean and is #35 on Club-Log's most wanted DXCC list.
The Team is meeting in Lami Bay, Suva and departing by ship to Conway Reef on September 24th. The Team expects to arrive at Conway Reef and become active on September 26th. We will complete our Dxpedition on October 5th, 2012.
The main goals of this DXpedition are to work every amateur radio operator who needs Conway Reef for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5 MHz and 50 MHz bands.
We will be active on CW, SSB and RTTY. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.
We plan to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.
Our team consists of these Operators: Hrane-YT1AD-Leader, Aleksej-UA4HOX-Co-Leader-Operations, Paul-N6PSE-Co-Leader-PR & Fundraising, David-WD5COV, Vasily-RW4NW, David-AH6HY, Alan-K6SRZ-Team Physician, Alan-AD6E, Sergej-RZ3FW, Craig-K9CT, Stan-LZ1GC, George-N6NKT, Peter-PY5CC, Mike-K6MKF, Jim-K9JM, Miguel-PY3MM and Luciano-PY5KD.
We wish everyone good propagation and we hope that you enjoy working the 3D2C Team.

At this time, we are seeking additional Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition. Our official website is: http://www.yt1ad.info/3d2c/index.html
3D2C Team"

5T0, MAURITANIA. A group of Polish radio amateurs (SP2EBG, SP3CYY, SP3GEM, SP6EQZ, SP3FXY and SP6IXF) with the special participation of Jean, 5T0JL, will be active as 5T0SP between November 24th and December 10th, from Mauritania. Activity will be on all HF bands, 160-10 meters using CW, SSB an RTTY. There will be a focus on JA and Far East. A Web page is currently under construction at: http://www.5t0sp.dxing.pl

C6, BAHAMAS. Bob, W9XY, will be active as C6AXY between November 4-9th. Activity will be holiday style on 40-10 meters using mostly CW and SSB, with maybe some RTTY or PSK31 thrown in. QSL via W9XY.

CW, URUGUAY (LH Op!). Members of the "RADIO CLUB URUGUAYO" will be active as CW1R (ILLW Special Event Callsign) from Punta del Este Lighthouse (ARLHS URU 008, ILLW UY0005, Grid Locator GF25ma) during the upcoming International Lighthouse/Lightship Weekend (August 17-19th). Activity will be on 80-10 meters using CW, SSB and the Digital modes. QSL by the Bureau or direct to: Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY, SOUTH AMERICA (with SAEand 1 new IRC or 2 green stamps).

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting
their videos on YouTube and other Web services, we decided to list them
(possibly) each week. For this week's listings:
2008 - KL7DX NA-234 Cleveland Volcano DXpedition:
http://www.youtube.com/watch?v6fW4rYcwg
2007 - C6ARI DXpeditions: http://www.youtube.com/watch?v&#65533;TkbywWcdk
2002 - VP6DI Ducie Island DXpedition:
http://www.youtube.com/watch?v&#65533;WSMeeSf7Q (Part 1)
http://www.youtube.com/watch?v&#65533;2K8kcaiA4 (Part 2)

If you have a DXpedition 'video' available on the Web and would like to
have it listed in the OPDX, PLEASE send the URL to use and we will publish
it.

E6, NIUE (New Prefix). On August 3rd, the ITU updated its "Table of
International Callsign Series" to reflect a callsign change for Niue.
The island will now have the entire E6 prefix block (E6A-E6Z). Niue
is an island approximately 1700 miles northeast of New Zealand, and
is a self-governing island nation that has been in free association
with New Zealand since 1974. Prior to the change, the island used ZK2.

EA6, BALEARIC ISLANDS. Adrian, AA5UK, will be operating again from Ibiza,
Balearic Islands (EU-004), between October 20-31st as EA6/AA5UK. Activity
will be holiday style on 80-10 meters using SSB, RTTY and PSK31. He will
also operate in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/
All-Band/Assisted entry. Adrian informs OPDX, "I got back into RTTY big
time last year and found there was a big demand of EA6. I will be con-
centrating heavily on RTTY with some SSB during my non-contest period."
QSL direct via his home callsign, by the Bureau, LoTW or eQSL.

IOTA NEWS.............
AS-008. Takeshi "TAKE", JI3DST, will once again be active as JI3DST/JI1
from
Shikine Island (North Izu Island) between 0500z, September 12th
and 2400z, September 16th. Operations will be on 40/30/20/17/15/
12/10 meters using CW, SSB, FM, RTTY and PSK31. Activity will
also be during the Scandinavian Activity Contest [SAC] (Sep-
tember 15-16th). In case of heavy rain or other conditions,
the operation condition may vary. QSL info for JI3DST/JI1 is
available on QRZ.com. Also, visit his Blog Page at:
http://blog.goo.ne.jp/ji3dst

AS-060. Members of Gwangju DX Club will be active as D7G from Kogum
Island between August 17-19th. Activity will be on 80-6 meters
using CW, SSB and RTTY. QSL via HL4CEL.

EU-136. Vincenzo, IZ2WMW, will be active as 9A/IZ2WMW from Krk Island
(ACIA IC-105, CIA-22, IOCA CI-046, MIA MC-185, WLOTA 1342)
between August 18-25th. Activity will be holiday style on
the HF bands. QSL via hs home callsign, direct or by the
Bureau.

NA-161. Operators Doc/KL7XK/p, Chuck/WL7CSJ/p, Heinz/VA7AQ/NL5 and
Frank/VE7DP/WL9 will activate Pleasant Island between August
17-19/th. Activity will be on 30/20/17/15 meters using CW
and SSB. QSL to operator's home callsign, by the Bureau or
direct.

OC-174. Gil, 4F2KWT, will be active as DX0N from the rare Bongao
Island located in the province of Tawi-Tawi, Philippines,
sometime in September. Look for more details o be forthcoming
at: http://www.qrz.com/db/DX0N

K4, UNITED STATES (LH/IOTA Op!). A team of eight operators, lead by
Rick, K4JTT, from the Atlanta area, will again activate a rare light-
house from Sand Island Lighthouse (ARLHS USA-723), on Dauphin Island
(NA-213), in Alabama, between September 26-30th. The callsign will be
K4D. Sponsors for this year's activation include Yaesu who will supply
the radios, the anchor sponsor Alpha Delta Antenna's who will provide
the antennas and the Kennehoochee Amateur Radio Club, Marietta, Georgia.
This is the group 3rd annual activation. For more details and updates,
visit: http://www.w4bti.org

ADDED NOTE: Lee states, "An estimated 50 meteors per hour may streak
across the Northeast sky on August 12-13th, with the best viewing
between 11 PM local until just before sunrise (BEST VIEWING)."
Also, visit:
http://www.amsmeteors.org/2012/08/viewing-the-2012-perseid-meteor-shower

NH7, HAWAII. Ji, N6TJ, will be active as NH7A from KH6LC's QTH
during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/
All-Band entry. QSL via F5VHJ.

OH0, ALANDS. Normunds, YL3DQ, will be active as OH0/YL3DQ from Eckero,
Aland Island, between August 12-20th. Activity will be holiday style
on 80-10 meters using CW and RTTY. QSL via YL3DQ. The log will be uploaded
to LoTW.

P4, ARUBA. John, W2GD, will be active as P40W from Santa Cruz, Aruba (SA-036, WLOTA 0033), during the CQWW DX SSB Contest (October 27-28th) and the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/ High-Power entry. QSL via LoTW or N2MM (QRZ.com). Look for some 30/17/12 meters and 160 meters operations before the contest as time permits. PLEASE NOTE: 60m operation is NOT authorized on Aruba. Log will be posted to LoTW within two weeks. ALSO, John plans to end responding to P40W QSL card requests by the end of 2013. Confirmations for P40W only via LoTW thereafter.

PT7, BRAZIL (LH Op!). Luciano, PT7ZT/p, will be active from two valid Lighthouses for the Brazilian Lighthouse Award (DFB) and Cear&#65533; State Lighthouse Award (DFCE): Between now and August 14th, Pontal das Almas Lighthouse (BRA-179, CE-03), and August 16-19th, Itapag&#65533; Lighthouse (BRA-057 andd CE-02). Activity will be SSB only. QSL via his home callsign.

PT0S, ST. PETER AND ST. PAUL ROCKS (Update). As mentioned last week, George, AA7JV, was on a recon trip to St. Peter and Paul Rocks for the PT0S operation coming up in November, and has returned home. George used an Elecraft KX3 with a whip on the recon trip to determine the quietest location for the low band receiving antennas: 300 ft. away on another island. You can read about on the PT0S Web page under "News Updates" at: http://pt0s.com/news.html

5R8FL QSL ROUTE CHANGE. Phil, G3SWH , reports: "It is with great regret that I have to announce that Andreas, 5R8FL, has terminated my QSL managership of his station with effect from the end of July 2012. I have his logs up to the end of June 2012 and am awaiting the log for July. I

will be uploading the latest logs to LoTW and to the search facility on my web site in the next few weeks. I have plenty of proper QSL cards left. I have been given no reason for the termination and have no information as to whether Andreas has made any alternative arrangements for confirming his future QSOs."

CY9M LOTW NOTICE. The following note is on M0URX's Web page at: http://m0urx.com/3-M0URX/369-cy9m-lotw-upload.html
"The CY9M log has been uploaded to Logbook of The World, LoTW. It has become clear that one of the laptops used for logging was + one hour out of UTC. If you are missing a match on LoTW please reload your QSO adding ONE HOUR to your log time."

QSL H44USMC via H44RK. Special event station to commemorate 70th anniversary of the U.S. Marines landings on Guadalcanal.

HK0NA LoTW. Bob, N2OO, reports that he has begun to upload QSOs to LoTW. However, he mentions that for some reason some 15,000 QSOs are missing from the HK0NA LoTW upload. He states, "Will work it all out with ARRL next week. PLEASE don't deluge me with emails! ;-) I'm on it."

UT1FG/MM QSL UPDATE. OPDX has been informed with the following updated info concerning the status of QSL requests for contacts made by UT1FG/MM after April, 2012: "Yuri, UT1FG, has been on a well deserved vacation in Russia following his 6 month long voyage as Captain of the M/V Barnacle. Logs for the April-May 2012 timeframe have just now become available to his QSL Manager Eugene, UX0FY. Yuri was only home for a few days, but he managed to write many QSL cards which will be returned by mail (if postage was provided), or by the Bureau (if no postage was enclosed). Eugene will have the bureau cards out in September and said that the Ukraine Bureau is working very well. Direct cards are going out daily. Eugene has all of Yuri's logs now and can answer all requests. Eugene responds to all requests (with sufficient postage) on a direct basis. He encloses an insert that requests that the recipient send an E-mail to him when they receive their card(s). This insures that the process is complete. If no E-mail is received then the card is possibly lost or stolen in the mail. So, let him know if you received your UT1FG/MM cards that you requested or not. If you did not receive the cards, he will work something out with you to get them. This goes for the 6 meter as well as the satellite contacts.

QSL RECEIVED VIA LoTW: 1A0C, 5B4AHK, 5B4AIF, 6D0LM, 9A5K, 9A8ZRS, 9K2MU, 9M6XRO, AK1W, CE2/VE7SV, CN4P,CO2JD, CQ7A, CY9M, DF4WC, DK1BX, DL1IAI, DL1QQ, DL3XM, DL4YBP, DL5FU, DL7URH, DU1IST, DU1JI, EI6HW, EA1XT, F4BKV, FM5CD, FP/VA2WA, G4IIY, G7SSE, GJ6YB, GM2T, GM5X, H2T, HA0HW, HK0NA, HR9/WQ7R, HS0ZIV, IR2M, IW1QN, IZ8GCE, JA3EGY, K4NC, K6MM, K9BTQ, LY200NB, LY2MM, LZ1BJ, MI0AYR, MJ0CFW, MO0FAL, OE7FMH, OG5N, OJ0R, OK2DL, OL2HQ, OK5T, OL2HQ, PA1NHZ, PA1PE, PA3C, PA3GND, PA9JO, PJ4/K5KG, PY1SX, R6AF/P, R7NA, RN4LP, RZ3EC, S57L, SP1MWK, SP5IT, SQ2NNN, SV0XCC/9, SV9AHZ, UA2FL, UA3ON, UA4HBW, UN5J, UR5LCZ, UX0HO, UX2KA, V55V/P, V73NS, VA7PX, VE3XB, VK1DI, VK2DX, VK4AFU,

W0EWD, W4AS, WH7Z, XE1KK, YO9IKW and ZP9MCE

QSLS RECEIVED VIA MAIL: 6V7Z, DP1POL, ES3AX, EY7AD, HH4/W3CMP, HK1MW, J52HF, K5N, N5K, MO0OXO, OD5NH, OM3CAQ, PJ7DX, SV2ASP/A, TO5T, UA9MA, VP2MFF, WE8A/KH0, XV9MA, YB8Y and YT1E

QSLS RECEIVED VIA THE BUREAU: 4JA3USA, 4O/S56C, 5B4AJC, 5X1VJ, 6W/UA0SE, 6W/RZ0SR, 7U1MA, 9M2TO, A65BU, AH0BT, C31MO, DU1IST, ES4X, EA6ES, EA6SK, EA6TS, EA7AAW/EA6, EA8AB, EA8AJO, EA8CBJ, EA8IK, EA8MT, EA8QP, EA8UP, EA8ZS, EC8ADS, EH8RHG, ET3AA, JD1BMH, KB7OBU/KH2, P3N, P33W, P4/RG5A, PP0T, PY0/CT1BWW, R1ANC, T2XG, T6AG, T88NA, TX3T, TX7M, UK/JA0VSH, VK9ANU and VK9HR

TC2, TURKEY (LH Op!). As a part of WEBLOTA (Western Black Sea Lighthouses On The Air Award) scheme, look for TC2ELH to be on the air between August 18-20th. Detailed information about WEBLOTA and the lighthouse is available on <www.qrz.com> and <www.tcswat.org>. Activity will be on all HF bands, and they will also try VHF-UHF. QSL via TCSWAT. (As they also QSL 100% via the Bureau, please do not QSL direct unless you are in a hurry!). Unfortunately, TC6LHW, also planned for the same weekend from the Civaburnu Lighthouse at &#65533;arsamba, Samsun, but it had to be cancelled. It will be activated
in the future.

V4, ST. KITTS AND NEVIS . John, W5JON, will once again be operating as V47JA from his Calypso Bay, St. Kitts, W.I., hillside vacation home (CQZ 8, IOTA NA-104, Grid FK87pg) between October 12th and November 1st. Activity will be on 160-6 meters, including 60m and using SSB. His activity will also include CQWW DX SSB Contest (October 27-28th) as a Single-Op/ All-Band entry. Equipment will be: Kenwood TS-590S and a SB200 Amplifier and a 80-10m Multiband Dipole and S9 Vertical (18' and 31'); 6m will be a 3 element yagi. His XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to his home callsign W5JON. Also via LoTW.

VK9C, COCOS (KEELING) ISLAND. A surprise activation last week by Allen, VK3BF, from here as VK3BF/VK9C will end very quickly (possibly on August 12th. Activity seems to be mainly on 20 meters SSB. QSL via VK3BF.

VK9X, CHRISTMAS ISLANDS. Pekka, OH2YY, reports, "Last November a re-scheduling of flights, caused by bad weather, cut my operation at Christmas Island very short. I have now decided to return to Christmas and re-activate VK9XM in early October this year. The schedule for the operation is from Oct. 6th (ca. 12Z) to Oct. 12th (ca. 24Z). I will be active on frequencies 7-28 MHz. I will QSL 100% either direct or via SRAL QSL bureau. Direct QSL's to my home address: Pekka Ahlqvist OH2YY, Vapaalanpolku 8B, 01650 Vantaa, Finland."

VP9, BERMUDA (NA-005). Paul, W4/VP9KF (G4BKI),will once again be active as VP9KF from Baileys Bay, Hamilton Parish, between November 5-19th. Activity will only be CW on all bands and the JA greyline. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Please, DO NOT send to the VP9 bureau. Visit his Web page for more information, including logs,

propagation and operating times, at: http://vp9kf.com

VQ9, CHAGOS ISLANDS. Jim, VQ9JC/ND9M, informs OPDX, "I'm back on Diego Garcia until mid November. The ham shack was closed for maintenance during my absence from the island, and I don't know yet when it will be re-opened. Hopefully, the closure is only temporary. In the meantime, I'm operating from two different locations on the island, both of which are in recreational parks. All of my operating is currently Field Day style in that I bring all my gear (rig, power supply, antennas, power and coax cables, keyer, laptop, and tools - about 40 pounds) with me in two back-packs. (I wear one and hand carry the other.) Being a tropical island, there's no shortage of trees, but I can only get the antenna up about 25 feet because of the density of the palms. I get the supporting lines into the trees using fishing line and lead weights and throwing them up by hand. (Think David and Goliath.) I'd be able to get the antennas up higher if I could use a slingshot or bow and arrow, but those are considered weapons here and are illegal under BIOT law. Since my two operating spots are outside in public areas, I have to set up the station and then break it down each day, which further limits my operating time to 1230-1615z on most days typically. My HF rig is an FT-897D (barefoot at 100W) and single-band dipoles. Most of my operating will be on CW, but I'll do SSB on occasion. I don't have a Rigblaster with me yet, so digital modes aren't available for the time being. My CW operating is normally with a keyer, but I have a retired shipboard hand key with me at all times and can easily switch to manual keying for SKCC contacts. I also operate through the LEO satellites with an FT-857 (TX) and FT-817 (RX) for duplex comms. The antenna is a 5-element Elk log periodic. All of my HF operating is from the island, so contacts are valid for DXCC and other awards that require that QSOs be made between land-based stations. My satellite operating is from both the island as well as the ship I work on. All QSOs that I make from the ship will be clearly identified as '/MM' or 'maritime mobile', and the QSLs will indicate that as well. QSL via ND9M."

VQ9, CHAGOS ISLANDS. Chuck, W4XP, will be active as VQ9XP from the club station VQ9X from Diego Garcia Atoll (AF-006, WLOTA 1645, LOC MI62) between now and August 25th. His activity will be focused on 6 meters, but he will also be on the HF bands. QSL direct via W4XP and LoTW.

VU7, LAKSHADWEEP ISLAND (Reminder)[IOTA/Lighthouse/WFF Op]. Remember to look for members of the Bangalore Amateur Radio Club (VU2ARC) and a small group of amateur radio volunteers to be active as VU7M from Minicoy Island (AS-106, WFF VU-103, ARLHS LAK009 and also IND017 [to be deleted!!]) between August 13-22nd. Details on QRZ.com state that they will be "setting up humble HF station" and the QSL route is "DIRECT to the QSL Manager VU2JHM or through the Bureau". For more details (plently of URLs to look at) and updates, watch QRZ.com under VU7M.

W4DXCC DX CONVENTION. Mark your activities calendar for September 28-29th, for the Annual W4DXCC DX Convention held in Pigeon Forge, TN, at the Mainstay Conference Center. Ten Tec also sponsors a outdoor Hamfest at their plant in Sevierville, TN, on the same weekend. These two events

are just a couple of miles apart. The Hamfest is during the morning/ afternoon and the W4DXCC Convention is during the evening hours. For additional information about the W4DXCC DX CONVENTION, visit their Web site at: http://www.w4dxcc.com

W9DXCC DX CONVENTION (September 14-15th). Jim, N7US, reports: "This is a reminder of the 60th annual W9DXCC DX Convention which is a little more than a month away. We always have a great time. The presentations are interesting and focused on DXing. The prize drawings are fun. Several vendors and organizations will be exhibitors, and you can operate an FT DX 5000 which Yaesu has furnished for special event station W9D. We'll have QSL card checking for CQ and ARRL awards, including 160M and deleted countries. The CW copying contest will let you compete against the best, especially if our banquet speaker, Fred Laun, K3ZO, participates. The optional Friday afternoon class will get aspiring DXers up to speed (well, maybe not 35 wpm) in four hours. Our master of ceremonies, Jim O'Connell, W9MU, will keep us on track and entertained.
The hotel is conveniently located near major highways and O'Hare, so the convention is easy to get to locally or from anywhere else. But the best part of the convention is seeing old friends and making new ones. The Friday and Saturday night hospitality suites are a good opportunity to do that.
By registering now instead of the last minute or at the door, you save a few bucks and you enable us to plan for the right number of attendees. Registering is easy on our website, http://www.w9dxcc.com , and you can pay using PayPal for your convenience. Everyone attending the convention is expected to register, as the registration fees cover the costs of the convention, so please do the right thing and register.
You may receive an individual mailing as well as one or more from your reflectors, so sorry for any dupes. Please pass on the word to your local club and friends. We look forward to seeing you at W9DXCC....
73, Jim N7US"

ZL9, CAMPBELL ISLAND (Update/Press Release). Ed, VK2ARE, Australian Publicity Officer for the ZL9HR, sent out the following press release [edited]: "The team at the Hellenic Amateur Radio Association of Australia have all permissions including the landing permit to Campbell Island (OC-037) and are in the process of building out three shipping containers in Sydney, Australia, to be used for transport of all equipment and supplies required. The DX'Pedition will be on Campbell Island between the 28th of November and the 9th of December.
An international team of operators has been assembled for this event on the sub-Antartic Campbell Island which is located 650 km or 400 miles south of New Zealand in the Southern Ocean. This is the biggest DX'Pedition by an Australian club in 25 years and the promises to be the most sought after DX'Pedition in 2012 overall. The complete crew of 10 operators is as follows: Tommy/VK2IR, John/VK3YP, Les/W2LK, Gene/K5GS, Don/VE7DS, Istvan/HA5AO, John/9M6XRO, David/K3EL, Jacky/ZL3CW and Tom/KE4KY.
Keen DX-ers who may be looking to get ZL9 on a particular band and mode to move towards a DXCC or other award, should go to the survey on the website at ZL9HR.com and vote for which bands and modes they would like

to hear ZL9HR operating on!
When people think of DX'Peditions, they think of operators sitting under palm trees on exotic islands with the world of amateur radio enthusiasts trying to talk to them. While this is where every DX'Pedition tries to get to, there is a LOT of work that has to happen before this is possible! Months or even years before, the event planning starts and permits are requested, equipment assembled and transport both of equipment and operators arranged. Accommodation organized and all red-tape worked through. All of this requires a lot of work from the organizers and also requires finance in the form of contributions from those taking part in the event and from sponsors. Without sponsors no DX'Pedition can take place and the ZL9HR DX'Pedition is no exception.
This DX'Pedition is rightly being billed as one of the most important DXPeditions in 2012 and the HARAOA is very happy to announce that many of the sponsors that supported earlier DXPeditions are helping again with ZL9HR. There will be additional sponsors 'signing up' over the next few weeks, but we would like to thank those who have already committed to support the DX'Pedition. These are as follows (in alphabetical order);
Commercial sponsors: RF Solutions and Spiderbeam

Club & Organisations: British Colombia & Northwest Washington ORCA DX & Contest club, Clipperton DX Club, Danish DX Group, European DX Foundation, German DX Foundation, Lone Star DX Association, Long Island DX Association, Lynx DX Club, Mediterraneo DX Club, Northern California DX Club, Northern Illinois DX Association, Oklahoma DX Association, Pacific DXers, West Tennessee DX Association and 599 DX Association.

There are also currently 33 individuals who are sponsoring the event.

In addition to these sponsorships, the HARAOA ZL9HR DX'Pedition is delighted to have been granted an award from the prestigious ARRL Colvin foundation. The Colvin Award is conferred in the form of grants in support of Amateur Radio projects that promote international goodwill in the field of DX and the HARAOA are honoured to have received this award.
Please keep monitoring the DX'Pedition's website - ZL9HR.com for all updates as the preparations keep progressing."

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 12th August 2012

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 4th October at 2 p.m. in the ComReg Offices in Dublin. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. The closing date for applications to sit this examination is Thursday, 20th September Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

IRTS Young Operators/SWL's

An IRTS team of young operators/SWL's will represent Ireland at the Youngsters on the Air event to be held over the week of 19 - 26 August in Eeklo, Belgium. Radio related events will be held during the week, including, kit construction, ARDF, dxpeditions, use of datamodes. contesting etc. Each country will also give presentations on youth in amateur radio in their respective countries. 9 teams from different European member associations of IARU R1 will be participating. The following countries are participating: Romania, Slovenia, Sweden, Finland, Estonia, Ireland, Germany, Belgium and The Netherlands.

ON4YOTA will be callsign used for the week and we look forward to working many EI's.

South Eastern Amateur Radio Group

The annual Vintage Valley in Inistioge, Co Kilkenny took place on Sunday last the 5th August. The SEARG display proved very popular with young and old alike. The display of old vintage radio's brought many people back down memory lane. People were also amazed at Mark's (EI7IS) ability of using CW to communicate with a station in France. SEARG

would like to thank Roy and the organisers of the Inistioge Vintage Rally for inviting us to put on the radio display and we look forward to returning in 2013. We also would like to thank Mick (EI7GH) for manufacturing and donating a 40/80 metre trapped dipole to the club. SEARG theory classes continue to run every Wednesday night running up to the next exam in October and our monthly meetings take place in Roanmore Social and Sports Centre, Cleaboy Road, Waterford at 8.30 p.m. on the last Monday of each month. New members are always welcome.

North Cork Radio Group

NCRG will be activating Blackrock Castle as part of Cork Heritage Week on Saturday 18th August from 11am -4pm approximately.

We will also be operating from Roches Point Lighthouse on Sunday 19th August from 11am - 5pm approx as part of the International Lighthouse & Lightship weekend.

Expected frequencies to be used are 7.170 +/- QRM and 14.270 +/- QRM. We will be activating Blackrock Castle as part of Cork Heritage Week on Saturday 18th August from 11am - 4pm approximately.

NCRG are pleased to announce their annual Radio Rally & Electronics Fair to be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn, Blackpool, Cork.

Doors open at 11am and admission is 5 per person (children are free). Raffle tickets will also be available at the door.

The usual traders will be present. Also, due to high demand, anyone wishing to reserve a table, or anyone interested in setting up a stall, should contact Pat Thompson (EI2GHB) on 085 1407715 or Edwin Van Mierlo (EI2HEB) on 086 3885741, or alternatively via email at ei2heb /at/ ei1nc.com, as soon as possible to avoid disappointment

---

Limerick Radio Club

A team of over 15 operators from Limerick Radio Club will activate Loop Head Lighthouse, in Co. Clare, Ireland, for ILLW weekend on 18 & 19 August 2012. 2 stations will be active on all bands on CW & SSB. The call sign is EI0LHL. Loophead Lighthouse is designated IE0009. QSL Via EI4GXB. Logs will be uploaded to Clublog & LOTW.

Cashota Ireland and Cashota

CASOTA- IRELAND and CASHOTA - Castles and Stately Homes on the Air, will be holding its 2nd annual Heritage Month, throughout the last two weeks of August to encompass the Irish heritage Fortnight and the whole of September for the many Uk dates and regions. This award is open to

anyone wishing to take apart either as an activating station or heritage chaser. All details of this event and CASHOTAS many other awards and events can be found at www.cashota.co.uk, with details for contacting the CASHOTA-Ireland Representative also being listed on the contacts page for Irish locations.

DX News

A DXpedition by a group of Indian operators to the Lakshadweep Islands will take place from 13 - 22 August. This separate DXCC entity will be remembered by older members as the Laccadive Islands. The operation will be based on Minicoy Island which counts as AS-106 for the Islands on the Air Award. The callsign to look for is VU7M and QSLs go via VU2JHM.

Ron DL4ME will be on holiday in Tanzania from 14 August to 3 September. While there he will operate as 5H3ME mainly on CW.

Dominic M1KTA will be visiting Senegal from 15 - 22 August where he will sign 6W/M1KTA. This will be followed by a trip to Gambia where the call will be C5/M1KTA from 22 - 29 August. QSLs go via his home call.

On 3 August the ITU updated its Table of International Call Sign Series to reflect a callsign change for Niue Island. In future calls will be issued with the prefix E6 instead of ZK2. Niue Island has a population of about 600 and lies approximately 1700 miles northeast of New Zealand. It is a self-governing island and has been in free association with New Zealand since 1974.

The special callsign M0RSE (M zero RSE) will be activated by Phil G3SWH on 18 - 19 August. Not unexpectedly CW will be used and further details can be found on www.m0rse.org . The log will be uploaded to Logbook of the World.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

In the Era Of Internet, Smartphones Ham Radio is Experiencing a Renaissance

Posted: 11 Aug 2012 05:43 PM PDT
http://www.eham.net/articles/28795

As an experienced meteorologist and storm chaser, Gilbert Sebenste understands how vital reliable communication can be. "If I have a question like 'Does this road go through?' or 'What does this storm look like?', now instead of calling people on a cell phone I can call them on amateur radio," said Sebenste, who got his amateur radio license on May 31. "Many storm chasers have at least a technician class license," he said, referring to the easiest and most cost-effective class of license that the Federal Communications Commission issues to amateur, or "ham," radio operators. Sebenste is among the Americans rediscovering the enjoyment and usefulness of amateur radio and bringing unprecedented levels of popularity to the nearly century-old hobby. The number of licensed ham radio operators is at an all-time high.

GB2RS NEWS

Sunday 12th August 2012

The news headlines:

* AMSAT-UK International Colloquium to visit Surrey Satellite Technology facility

* RSGB Convention Early Bird Bookings

* Castles & Stately Homes on the Air

The AMSAT-UK International Space Colloquium, taking place 15-16 September in Guildford, will provide an opportunity to visit the satellite facilities in the new Surrey Satellite Technology Limited (SSTL) Kepler Building. The full presentation schedule is being finalised and will be published shortly. The Colloquium takes place at the Holiday Inn, Guildford, GU2 7XZ. Booking information is at www.uk.amsat.org/.

The RSGB Convention early bird bookings close on 14 August. Highlights of the programme that includes lectures on the HK0NA DXpedition can be found on the RSGB website. For bookings, visit www.rsgbevents.org.

As part of European Heritage Month, Bobby, MI0RYL will be activating New Grange/Knowth in Drogheda, Ireland on 18 August. Bobby hopes to mainly be on 40m/20m/17m/15m. This activation is part of the Castles and Stately Homes on the Air award scheme. See www.cashota.co.uk/.

We are now in the final week for comments on the Strategy and Governance proposals. Members can make any final comments in the new "Last Call" topics. The Contest Committee is starting a consultation on proposals for next year's General Contest Rules. For access and further information on both, please follow the "We need your Views" link on the RSGB's Home page.

Operations at 2O12L (Two-oscar-one-two-London) the flagship station celebrating the London 2012 Olympic and Paralympic Games have been progressing beyond the expectations of the organisers. In the first 12 days of operation the station had made a remarkable 31,000 contacts with over 20,000 unique stations in 175 different countries. Demand to work the station is very high and pile-ups are fierce at times. The best two bands for world-wide communication have proved to be 20m and 17m, whilst many contacts with UK stations have been completed on 40m and 30m. The station remains open to the public daily from 10am until 4pm until 9 September. Further information about the station can be

found on the website at www.2012L.com.

It is intended that all three levels of the amateur radio exam will be available at the RSGB Convention over the weekend of 13 and 14 October. The Foundation and Intermediate exams will be on the Saturday and the Advanced on the Sunday. Check out www.rsgb.org/rsgbconvention/.

And now for the details of rallies and events for the coming week

Today, 12 August, the Flight Refuelling ARS Hamfest takes place at Cobham Sports and Social Club Ground, Merley, near Wimborne, Dorset, BH21 3DA. Doors open at 0am and there will be trade stands and a car boot area. More details from Mike, M0MJS on 01202 883 479.

th

Copyright © RSGB 2012. Not for public release before Monday 13 August 2012 except as a GB2RS broadcast. The 15th International EME Conference takes place and 17 and 18 August at Churchill College, Cambridge, CB3 0DS. Full details at www.eme2012.com.

On 19 August, the Rugby (Princethorpe) Annual Radio Rally takes place at Princethorpe College, Princethorpe, Rugby CV23 9PX. Doors open from 10am to 4pm, and admission is £2. Contact Tony, G0OLS on 07759 684 411 for more details.

Now for the news of special events The Sandford Mill Museum in Chelmsford will be open to the public today, 12 August, from 2 to 5pm. The museum is home to an extensive collection of historic radio equipment. Many fascinating radio exhibits are displayed there including spark transmitters from the late 1890's and a fully equipped ship's radio room. The Chelmsford Amateur Radio Society will be operating GB1000MWT from the 2MT Marconi hut inside the museum, postcode CM2 6NY. Admittance and parking are free.

Carrickfergus Amateur Radio Group will be operating GN0LIX/P from Chaine Memorial Tower in Larne, County Antrim between 18 and 19 August as part of the International Lighthouse and Lightship Weekend. The station will be active on 20m, 40m and 10m SSB, conditions permitting. All QSL will be via the bureau. For further information, visit the Carrickfergus Club website at www.radioclubs.net/carg/.

Kent Weald Radio Club are operating GB1HA today, 12 August, from the Headcorn airfield, Kent. Operation will be on HF and VHF to demonstrate amateur radio during the military show that is taking place there over the two days. Further details can be obtained from Patrick via e-mail to palybl@btinternet.com.

Telford and District Amateur Radio Society will be operational today, 12 August, using the callsign GB0WPB for William Penny Brookes. The station is celebrating the life of Doctor William Penny Brookes, founder of the Wenlock Olympian Association, who organised the first Annual Wenlock Olympian Games in October 1850. The first Games, held in

October 1850, were a mixture of athletics and also traditional country sports such as quoits, football and cricket. The station will be based at Much Wenlock Scout Hut, Bull Ring, Much Wenlock, TF13 6HS. Three stations will be running, 2m/70cm using a vertical, 40 and 80m using a dipole and 20, 15 and 10m using a tribander. Fellow amateurs who happen to be in the area are welcome to visit and operate.

A pair of twinned Special Event Stations, GB175PO and TM175PO, will be running in Dover and Calais to celebrate 175 years of P&O. Operation starts on 11 August and will be running for 30 days. Both stations will have the opportunity to work /MM from ferries at various times during the operation.

And now the DX news compiled from 425 DX News and other sources A multinational DXpedition to the Comoros in the Indian Ocean will take place until 20 August. The callsign will be D64K. IOTA reference is AF-007 and the QSL info is via IV3DSH.

W4XP is going to the Chagos Archipelago until 25 August. He will activate the callsign VQ9XP. QSLs go via his home callsign.

Chuck, W4XP, plans to be active until 25 August from Diego Garcia Atoll, IOTA reference AF-006 as VQ9XP from the club station VQ9X. The focus of his activity is 6m, he's also on the air on HF. QSL direct via W4XP and Logbook of the World.

Members of the Grantham Amateur Radio Club members will be active as GS0GRC from Bressay Isle, Shetland & Fair Isle (EU-012) from 14 to 19 August. QSL via G0RCI either direct or via the bureau.

th

Copyright © RSGB 2012. Not for public release before Monday 13 August 2012 except as a GB2RS broadcast. Now the contest news

The 5th 70MHz Cumulative Contest takes place today, 12 August, from 1400 to 1600UTC. Using all modes the exchange is signal report, serial number and locator.

The first of this year's Worked All Europe contests finishes at midnight tonight, 12 August. This month it's CW. Work non-European stations only. There are country multipliers and the added dimension of QTCs (reporting the details of previously held QSOs) enables those who choose to send and receive them to boost their score significantly. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

On 14 August the 432MHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes, the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 3rd to Thursday the 9th of August, compiled by Neil Clarke on Friday the 10th August.

Twelve groups were visible on the 3rd, all were small and mostly quiet. However, two new groups rotated into view, one on the 6th and one on the 7th. Until then solar activity was at low levels with only C class solar flares taking place. On the 6th activity increased to moderate levels when the only M class solar flare of the period took place. Numerous C class solar flares took place everyday, most were small and had no effect on propagation. Solar flux levels declined from 140 units on the 3rd to 129 by the 7th. Levels then increased slightly by the end of the period. The average was 134 units. The 90 day solar flux average on the 9th was 128 units, that's one unit up on last week. X-ray flux levels showed little variation and averaged B5.9 units. Geomagnetic activity was quiet but increased to just unsettled levels with an Ap index of 11 units on the 6th and the 8th. The average was 8 units. Solar wind data from the ACE spacecraft saw solar wind speeds vary between 320 and 550 kilometres per second throughout the period. Particle densities were low except for a brief rise to 20 particles per cubic centimetre late on the 8th and for the first hour on the 9th, otherwise densities were low. Bz varied no more than minus and plus 8 nanoTeslas, less than that on the quieter days. Sporadic-E occurred most days up to 70MHz, however, openings are becoming less intense and shorter in duration.

And finally the solar forecast. This week the quiet side of the Sun will be rotating into view. Solar activity is expected to be low at first with a slight chance that activity could increase to moderate levels, though unlikely. However, later in the week activity could decrease to very low levels. Solar flux levels should decline and by next weekend be below the 100 mark. Geomagnetic activity is expected to be mostly quiet but towards next weekend a small coronal hole disturbance could increase activity slightly. MUFs during daylight hours at equal latitudes should be around 22MHz for the south and 19MHz for the north. Darkness hour lows should be about 13MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 20MHz. The optimum working frequency with a 90 per cent success rate will be about 15MHz. The best time to try this path will be between 1600 and 2100 hours. Sporadic-E should take place most days with openings becoming less intense.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known. [Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. Lincoln Short-Wave Club is taking part in the 70MHz Cumulative Contest from 3pm today, Sunday 12 August. On Tuesday it's the 432MHz UK Activity Contest from 8pm, and Wednesday sees G5FZ on the air plus a video night at the BSA Club. The club simplex net is on Thursday from 8pm on 145.375MHz, and the Saturday Surgery takes place in the shack on that day from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356. Wythall Radio Club is holding a club net on 145.225MHz today, Sunday. On Tuesday there's a committee meeting, while Friday sees a social evening in the shack. Next Sunday the club is running a special event station at Wythall Carnival. Details from Chris, G0EYO, on 07710 412 819. On Thursday 16 August Cheltenham Amateur Radio Association is having a natter night & QRP Equipment Display on Thursday. Saturday sees GB5ULA on the air for Lightship on the Air. More information from Derek Thom, G3NKS, on 01242 241 099. Now we return to the traditional listing in date order. On Monday 13 August Derby & District Amateur Radio Society is holding a committee meeting. Contact Richard Buckby, by email to radio@dadars.org.uk. On Monday Gloucester Amateur Radio & Electronics Society is outdoors at Saul Junction with a bring and share supper, so bring those radios and antennas. Contact Anne, 2E1GKY, on 01452 548 478, daytime. On Tuesday Eagle Radio Group is having a talk on the 2011 New Zealand Earthquakes by Tony, G3RKL. Contact John, M6JMS, on 01754 873 926. On Tuesday Loughborough & District Amateur Radio Club is having a kite night or an open forum, subject to the weather. More information from Chris, G1ETZ, on 01509 504 319. On Wednesday Midland Amateur Radio Society is discussing holiday plans and trips. Details from Norman, G8BHE, on 07808 078 003. On Wednesday Telford & District Amateur Radio Society is watching a video on solar storms with G3UKV. Contact Mike, G3JKX, on 01952 299 677. On Thursday Central Radio Amateur Circle is holding a night on the air on 145.300MHz from 8pm. Contact Martin Hallard, G1TYV, by email to radio-circle@live.co.uk. On Friday Coventry Amateur Radio Society has the 3rd round of the G4ZMC Trophy at Parkfield Rd, Newbold on Avon. Contact John, G8SEQ, on 07958 777 363. On Friday South Birmingham Radio Society is doing shack and aerial work. Contact Don, on 01214 581 603. On Saturday 18 August Salop Amateur Radio Society is holding its summer social and treasure hunt. Details on the club website at www.salop-ars.org.uk.

NEWS FOR THE NORTH OF ENGLAND Denby Dale Radio Club is having a club night on Wednesday, then Saturday sees the start of the weekend event running GB2WHL for International Lighthouses weekend. Details from Richard, M0RBG, on 07976 220 126. On Monday 13 August Angel of the North Amateur Radio Club is on the air and continues its Advanced course. Contact Nancy Bone, G7UUR, on 01914 770 036. On Monday 13 August Sheffield Amateur Radio Club is having a talk on Sheffield Northern RAYNET by Dave Briggs, G0JJR. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk. On Monday 13 August Workington and District Radio and IT Group is holding a club meeting and social evening. For more information contact Barry Easdon, G0RZI, on 01946 812 092. On Tuesday 14 August Morecambe Bay Amateur Radio Society is having

a talk on the club website by Russ and Mark. Contact Sheila, on 07867 516 836.

th

Copyright © RSGB 2012. Not for public release before Monday 13 August 2012 except as a GB2RS broadcast. On Wednesday 15 August Hornsea Amateur Radio Club is holding its final fox hunt of the year, with G4YTV. Contact Gordon MacNaught, G3WOV, on 01377 240 573. On Thursday 16 August South Manchester Radio and Computer Club is holding an antenna clinic with Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999. On Friday 17 August Wakefield & District Radio Society commences its three day event on the air from the portable site at Woolley Edge. Contact Ken, G8FSO, on 07900 563 117.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND Aberdeen Amateur Radio Society is having a talk by Tony, GM4HTU on Thursday about a different type of oscillator. Saturday 18 August sees the start of the Lighthouses on the Air weekend event at Walker Park. Contact Fred Gordon, MM0ODL, on 01975 651 365. Wigtownshire Amateur Radio Club is preparing for Lighthouse weekend on Thursday. The operating weekend of GB2LK, Lighthouse Killantringan, commences on Saturday. Details from Ellis Gaston, GM0HPK, on 07979 692 580. On Tuesday 14 August Livingston & District Amateur Radio Society is having an operating evening. Details from Norman, GM1CNH, on 07740 946 192. On Saturday 18 August Ayr Amateur Radio Group commences its Lighthouse weekend event at Turnberry Lighthouse. Details from Tom Ferguson, GM1OST, on 01292 532 088. On Saturday 18 August Cockenzie & Port Seton Amateur Radio Club commences its Lighthouse Weekend operating GB2LBN at Barns Ness. More information from Bob, GM4UYZ, on 01875 811 723.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Chelmsford Amateur Radio Society will be holding Morse Code classes at Danbury starting Thursday 30 August at 7pm. If you are a beginner you will be made very welcome. Instruction is also given on all aspects of CW, which include good manners on the air; how to have that CW chat; DX manners; Contesting and operating skills on the pump key and twin paddle keying. Contact Andy Kersey G0IBN on 01621 868347. We start with clubs that have several events this week. Brede Steam Amateur Radio Society is at the shack on Tuesday. Friday sees the commencement of the Lighthouse Weekend activities at Dungeness. For more information contact Steve, on 01424 720 815. Farnborough & District Radio Society is running a 2m net on Tuesday from 8 to 9pm on 144.675MHz. On Thursday there's an 80m net on 3.570MHz from 1 until 2pm, then a Top Band net on 1.995MHz from 8 to 9pm. Sunday 19 August sees an 80m slow CW net on 3.570MHz. Contact Neville, G3SPD, on 01252 404 816. On Wednesday 15 August Worthing & District Amateur Radio Club is planning for Lighthouse Weekend on Wednesday, then on Saturday commences the weekend special event station at Shoreham Lighthouse. Contact John, G8FMJ, on 01273 593 232. Now we

return to the traditional listing in date order. On Sunday 12 August Newbury & District Amateur Radio Society is attending the to the Flight Refuelling Hamfest and Royal Signals Museum at Blanford. Contact Rob, G4LMW, on 01635 862 737. On Monday Coulsdon Amateur Transmitting Society is holding a barbecue at the QTH of G4RWW. Details from Steve Beal, G3WZK, by email to secretary@catsradio.org. On Monday West Kent Amateur Radio Society is on the air and having a natter night. Details from Keith, G4JED, via email to westkentars@googlemail.com. On Tuesday South Essex Amateur Radio Society is having an operating night. Contact Dave, G4UVJ, on 01268 697 978. On Tuesday Stevenage & District Amateur Radio Society is having an operating evening. Details from Martin Juhe, M0XJP, on 07973 793 770. On Wednesday Chesham & District Amateur Radio Society is having a demonstration by Jeremy of a new Braille terminal. More details from Terry, G0VFW, on 01442 831 491.

th

Copyright © RSGB 2012. Not for public release before Monday 13 August 2012 except as a GB2RS broadcast. On Wednesday Norfolk Amateur Radio Club is having a talk on Commonwealth contesting from the Caribbean by Simon Jude, G7SOZ. Details from Chris Danby, G0DWV, on 01603 898 678. On Thursday Bredhurst Receiving and Transmitting Society is holding a club night, with CW practice from 8.30 to 9pm. Contact Charles, G4VSZ, on 07982 244 788. On Thursday Colchester Radio Amateurs is discussing club activities. More information from Kevan, 2E0WMG, on 07766 543 784. On Thursday Cray Valley Radio Society is having a barbecue from 8pm. Details from Malcolm Bryan, G8MCA, on 07906 433 965. On Thursday Horndean & District Amateur Radio Club showing 'My day in the office', a DVD featuring Peter Finley, who was a Concorde pilot. Contact Stuart, G0FYX, on 02392 472 846. On Thursday Horsham Amateur Radio Club is visiting Electricity Hall at Amberley Working Museum and having a social at The Bridge Inn, Amberley. Details are on the web at www.harc.org.uk. On Thursday 16 August Sutton & Cheam Radio Society is having a talk on DXing for beginners by John Warburton, G4IRN. Details from Darren, M0PRV, on 07525 753 702. On Thursday 16 August Vange ARS is having a talk. Contact Steve, G0KVZ, on 01268 552 606. On Friday 17 August Fort Purbrook Amateur Radio Club is holding its AGM. Details from Mick Ponsford, M0GWD, on 02392 366 699. On Friday 17 August Mid-Sussex Amateur Radio Society is having a radio night and table top sale. Contact Rob, 2E0RJA, on 01444 232 129.

NEWS FOR THE SOUTH WEST Exeter Amateur Radio Society is having a talk on datamodes, including a Fldigi Tutorial, at the Moose Centre from 7pm on Monday. On Tuesday the 2m net is at 19.45 and the 4m net takes place on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756. On Monday 13 August Riviera Amateur Radio Club is having a portable RV. Details from Alan Wyatt G2DXU, by email to rivieraarc@gmail.com. On Monday Weston Super Mare Radio Society is having a natter night and Morse class. Details from Paul, G3SDH, on 01761 221 206. On Tuesday Mid Somerset Amateur Radio Club is having a natter, barbecue and beer along with a table top sale. Contact Nick, 2E0FGQ, on 01749 346 320. On

Tuesday Plymouth Radio Club is having a natter night & is on the air. Details from Rob James, 2E0ONO, via email to Robert-james@virginmedia.com. On Wednesday Thornbury & South Gloucestershire Amateur Radio Club is having a video night. Contact Tony, G0WMB, on 01454 417 048. On Wednesday Trowbridge & District Amateur Radio Club is having a natter night and committee meeting. Details from Ian, G0GRI, on 01225 864 698, evenings and weekends. On Thursday Cornish Radio Amateur Club is having a workshop evening. Details from Steve, G7VOH, on 01209 844 939. On Thursday Yeovil Amateur Radio Club has practical CW training. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk. On Friday Cornish Radio Amateur Club commences its weekend event operating GX4CRC at the South West Steam Rally. Details from Steve, G7VOH, on 01209 844 939. On Friday Torbay Amateur Radio Society is having a natter night and the TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES No news items have been received for Wales this week.

1501. [RAC-Bulletin] RAC Bulletin 2012-048E - RAC Bulletin - New Ontario Section Managersannounced

Newsgroup: rec.radio.amateur.misc
Date: 2012-08-13 13:43:09 UTC
From: rac-bulletins@eton.ca
Message-ID: <502903B5.8080308@rac.ca>
Source record: 2268
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAC Bulletin 2012-048E - RAC Bulletin - New Ontario Section Managers announced
2012-08-12

It is with a great deal of pleasure that I formally announce the four new Ontario Section Managers. These appointments/nominations are effective immediately, and will be merged into the normal nomination/election process at the end of a two year term.

Section Manager Ontario North Allan Boyd VE3AJB
A veteran of the Ontario Section Management team, Allan became a Ham in 1986 and holds advanced status and 15 WPM Morse code. He is a long time President of the Manitoulin Amateur Radio Club and a 31 year veteran of the OPP. Allan has been involved with ARES for many years and has held the position Emergency Coordinator until becoming Section Manager for Ontario in 2005. Allan holds many awards and certificates, and resides with his spouse of 30 years Judy in Little Rapids, Ontario.

Section Manager Ontario East Michael Hickey VE3IPC
Mike is a veteran with ARES in Capital Seaway District and has held positions of Emergency Coordinator, District Emergency Coordinator and most recently as Assistant Section Manager. Mike's passion is the promotion of "Mutual Aid" and he has run numerous sessions with local Hams helping them through the process. Mike's enthusiasm is only matched by his determination, which I have learned to respect since meeting him two years ago.

Section Manager GTA George Duffield VE3WJK
George has been a Ham for more than 20 years, and holds his Advanced and Morse Code endorsements. He has been President of the Peel Amateur Radio Club and is an active ARES supporter and has previous positions as AEC, EC, and ADEC. George was a respected CBC sports broadcaster for more than 25 years and is involved with many not for profit groups as well the Christ Church Anglican Church in Brampton where he has lived for more than 40 years. George is a widower with two children and five grand children.

Section Manager Ontario South Ian Snow VA3QT
Ian has been an Advanced Ham since 1971 and has served on the Executive of the Halifax ARC and as President of the Barrie ARC. Ian entered public service as a member of the Waverly NS Ground Search and Rescue Team as a radio operator and as an ARES DEC in Ontario. Ian is retired from an extensive Military Career serving as Short Service

Aircrew Officer, Radio Officer, Air Navigator and as an instructor at Air Force Headquarters, Winnipeg. Ian is a graduate of the Canadian Forces Command and Staff College and the University of Manitoba Transport Institute. He resides in Barrie Ontario and winters in Yuma, Arizona.

In making this announcement, I congratulate and thank each of you for your past service to the members of the Radio Amateurs of Canada and look forward to working with you as members of the Ontario Section Managers Council.

I am confident that you will each receive enthusiastic support from members of your new Sections, and welcome you each to join me and RAC President Geoff Bawden on a transitional teleconference this coming Wednesday at 7:30pm Eastern.

Doug Mercer VO1DTM/VO1DM CEC
Chief Field Services Officer

Vernon Ikeda - VE2MBS/VE2QQ

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
06 - 12 August 2012

Solar activity was at very low to moderate levels. The summary
period began at moderate levels due to an M1 x-ray event at 06/0438
UTC from Region 1542 (S14, L=030, class/area 190/Dai on 09 August).
Associated with this event were both Type II (estimated shock speed
of 552 km/s) and Type IV radio sweeps and a non-Earth-directed CME.
Activity levels decreased to low from 07 - 10 August with only
low-level C-class solar flares observed. On 11 August, an increase
to moderate levels was observed as Region 1540 (S27, L=087,
class/area 110/Dso on 05 August) produced a long duration M1/2n
flare at 11/1220 UTC. The CME associated with this event was
determined to not be Earth directed. A return to very low levels was
observed on 12 August.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal levels during most of the period.

Geomagnetic field activity was at quiet to active levels.
Predominantly quiet to unsettled levels prevailed from 06 - 09
August as solar winds speeds, as measured by the ACE spacecraft,
varied from 275 - 450 km/s. An isolated active period was observed
during 08/0000 - 0300 UTC in response to slightly elevated solar
wind speeds and extended periods of negative IMF Bz. Field activity
decreased to predominantly quiet levels during 10 - 12 August.

Forecast of Solar and Geomagnetic Activity
13 August - 08 September 2012

Solar activity is expected to be at predominantly low levels from 13
- 21 August. An increase to low to moderate levels is expected from
22 August - 05 September as an active sunspot region complex returns
to the visible disk. A return to low levels is expected from 06 - 08
September.
```

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels through 15 August. An increase to moderate to high flux levels is expected during 16 - 24 August. Normal to moderate flux levels are expected during 25 August - 08 September.

Geomagnetic field activity is expected to be at predominantly quiet levels during 15 - 18 August, 21 - 23 August, and 27 August - 08 September. Quiet to unsettled levels are expected during 13 - 14 August, 19 - 20 August, and 24 - 26 August due to recurrent coronal hole high-speed streams.

http://forums.qrz.com/showthread.php?357451-Floods-in-the-Philippines-hit-Manilla&goto=newpost

Floods in the Philippines hit Manilla

The Philippine Amateur Radio Association activated the Ham Emergency Radio Operations (HERO) on two metres and 40 metres passing essential traffic during the recent widespread flooding in Manilla.

The news media reports that 66 died in the torrential rain and officials estimated 300,000 fled their homes in the capital city of Manila submerging 80 per cent of it.

Eddie Valdez DU1EV, Chief Operating Officer of PARA said that HERO was on air from Monday night the 6th through to Thursday the 7th of August, including one of the ham emergency radio operators who found himself affected by the flood waters and fleeing his home after two days of operations.

Eddie DU1EV said the sun finally, but only partially, showed up on the Thursday, with the floods receding in most parts.

He said tonnes of garbage litters the roads, parks and drains in Manila and surrounding provinces.

A big clean-up is under way. In the worst affected areas like Marikina City, the Metro Manila Development Authority said it would take about a month to clean and clear the drainage canals.

Nearly two weeks of monsoon rains across the Philippines main island of Luzon peaked with a 48-hour deluge that battered Manila and surrounding regions.

This was the worst rains to hit Manila since Tropical Storm Ketsana killed 464 people in 2009.

Eddie DU1EV had, through the PARA website, warned of the pending rains asking everyone to be prepared by monitoring the emergency frequencies of 7.095 MHz and 144.740 MHz.

Jim Linton VK3PC

Chairman IARU Region 3 Disaster Communications Committee

and

Eddie Valdez DU1EV

Chief Operating Officer of PARA

New - Modern Communications Receivers Book from KW7CD - Cornell Drentea

Posted: 12 Aug 2012 05:04 AM PDT
http://forums.qrz.com/showthread.php?357429-New-Modern-Communications-Receivers-Book-from-KW7CD-Cornell-Drentea&goto=newpost

This comprehensive 462 pages textbook and reference on the subject of radio frequency (RF) receiver design presents the concepts, mathematics and design for such systems. Chapters include discussions on superheterodyne receivers, dynamic range, mixers, complex coherent frequency synthesizers, automatic gain control and beat frequency oscillators and additional sections cover advanced topics like digital signal processing (DSP) and software defined radios (SDR) as well as electronic warfare (EW) receivers. Intended for electrical engineering students and engineers, this comprehensive volume contains 360 illustrations including complex block diagrams, photographs and schematics. Drentea is an electrical engineer with fifty years of experience in the field of RF engineering and has worked for the Military Avionics and Corporate divisions of Honeywell and Hughes/Raytheon Systems.

"Modern Communications Receiver Design and Technology is a top pick for any college-level electrical engineering collection, offering a solid sourcebook exploring the state of the art in communications receivers. From mixers, oscillators and system design to forthcoming receiver technology, this comes packed with specific technical engineering discussions perfect for college-level electrical engineering collections. A 'must' for any modern communications collection."

The Midwest Book Review

"This comprehensive and well illustrated text book is a delight to read, unlike my oId college text books. Mind you, the theory is complex, but for anyone wishing to dig deeper into what makes a receiver work and work well, this book will answer all questions the reader is asking. It is quite suitable as a college text book but appropriate for the beginners and old-timers as well.

Though each chapter is very comprehensive, the mathematics used to describe the various concepts gets right to the point and is not overwhelming, as it can be in other text books. Mathematical proofs are for mathematicians, not for me. The lack of proofs leaves more space for more usable information, and this book has plenty of that. With Cornell Drentea's marvelous style of writing, Receiver Design and Technology will educate, excite, and inspire many. This text book should be used on every college campus that offers such a course. There is a great demand for RF engineers today, and this book will undoubtedly inspire students to become engineers. While I can lament the fact that I didn't have a text book such as this one thirty years ago, I am happy to have this text book today."

Review by Bob Allison, WB1GCM, ARRL

Shipping Weight: 2.4 pounds

"It's always a pleasure to review a product or publication from a friend of MT, and Cornell's new book is a shining example."

"Drentea's work is a scholarly, definitive reference for setting the highest standards of receiver design, coupled with methods to accomplish those standards."

Norfolk Amateur Radio Club to Welcome Visitors at Happisburgh Lighthouse:

Posted: 12 Aug 2012 05:15 PM PDT
http://www.eham.net/articles/28811

Norfolk's radio hams will be attempting to communicate from Happisburgh Lighthouse with fellow enthusiasts all over the world during the annual International Lighthouse and Lightship Weekend on August 18 and 19. The Norfolk Amateur Radio Club (NARC) will be running a special event station at the 222 year-old working lighthouse using the call sign GB0HL and visitors are invited in to the to watch them at work. The annual event, which started in Scotland in 1993, now includes more than 450 lighthouses and lightships in at least 55 countries around the world. The club will be running HF and VHF equipment, giving them the ability to contact other radio amateurs using a mixture of telephony and Morse code. In previous years, the club has managed to contact radio hams across the globe, with the height of the lighthouse and its proximity to the sea helping to launch the radio signals into the ionosphere. A special pictorial "QSL card" will also available to hams to commemorate each contact.

CU1-CU9, AZORES (Press Release - Dated August 14t)[edited]:
"ALL NINE AZORES ISLANDS, CU1 THROUGH CU9, ACTIVATED AT ONCE
Are You Ready to Fly to Azores for Free by Making Nine QSOs?

Yes indeed, those of you willing to spend 24 hours or less on the radio are eligible to participate in an Azores lottery for two all-paid packages to the beautiful Azores Islands in the Atlantic, completely free of charge. The project is organized by the Azores-Finland Friendship Consortium in partnership with the Amateur Radio Associations of the Azores Islands and supported by the Azores Promotion Agency (ATA) and Azorean Airlines (SATA). Just look at <www.visitazores.com> and make up your mind.
Not many people know that the Azores consist of nine populated islands, stretching over a distance of 602 km (305mi) from East to West, next to USA and Europe. And it is not widely known that the Azores have their own airline (SATA) flying to each island, in addition to many destinations in Europe and North America. Each island has its own characteristics and its own blend and alone qualifies for your visit there.
While these islands count for a single DXCC entity, they offer three (3) IOTA groupings.
With this unique AZORES 9 ISLANDS HUNT, an invited international group of amateur radio operators together with resident Azores amateurs will be activating the nine islands, offering an opportunity to the world to contact these islands all at once over one weekend.
Activity Weekend - Saturday, September 29th, 1200 UTC to September 30th, 1200 UTC (24 hours). These stations will be active starting Friday, September 28th as soon as they become operational.
Frequency Windows
CW: 7000-7015, 18080-18090 and 14050-14065 kHz
SSB: 7175-7195, 18120-18135 and 14250-14275 kHz

Nine Islands and their Stations - Santa Maria, CU1ARM; San Miguel, CU2ARA; Terceira, CU3URA; Graciosa, CU4ARG; Sao Jorge, CU5AM; Pico, CU6GRP; Faial, CU7CRA; Flores, CU8ARF; and Corvo, CU9AC.
Operators and Island Hosts - Sergio/CU1AAD, Jose/CU2CE, Francisco/CU2DX, Guilherme/CU2IF, Domingois/CU3CS, Guilherme/CU4AB, Jose/CU5AM, Jorge/CU6AB, Manuel/CU7CA, Claudio/CU8AAE, Joao/CU9AC, Franz/DJ9ZB, Richard/DF9TF, Nigel/G3TXF, Michael/G7VJR, Diane/K2DO, Rich/KE3Q, Mike/KI1U, Marius/LB3HC, George/N2GA, Martti/OH2BH, Juha/OH8NC, Ghis/ON5NT, Carine/ON7LX, Claude/ ON7TK, Alex/OZ7AM, Kenneth/OZ1IKY, Yuri/VE3DZ and Ed/VE3FWA.
Two Hunt Awards - Those making a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores (e.g. if you have QSOs with 7 islands, you will get 7 lottery tickets). Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery. The free trips are from the closest airport served by SATA; including flight, accommo- dation and transfers..
During or immediately after the weekend, the logs will be posted on Club Log to display your band/mode slots. The lottery will be drawn on October 15, 2012.
QSL Cards - All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via Jose Melo, CU2CE."

CY0 NEWS RELEASE (Dated August 12th). The following is from the Sable Island Web page at: http://www.cy0dxpedition.com
"We are excited to announce that we have received approvals from 'Parks Canada', 'Canadian Coast Guard', and 'Officer-in-Charge, Sable Island' to operate amateur radio from October 8-17th, 2012.
We should note, however, that our permit to operate includes several new restrictions on antennas (in addition to the traditional restrictions for Sable). The purpose of these restrictions are to minimize the environ- mental impact on the migratory bird population that may be present during the period that we are on Sable Island.
We feel fortunate to have received the trust of 'Parks Canada' for this operation and consider it a privilege to be able to visit Sable Island. We will cooperate fully with these new restrictions to minimize potential environmental impact to the protected bird species.
In the days ahead, we will assess the impact that these additional antenna restrictions may have on our operations and any adjustments that we may need to take relative to antennas that we will take to Sable Island. Further details of our operating plans will be posted to <CY0dxpedition.com>.
This will be our third attempt to get to Sable island (previous attempts, December 2010 and December 2011)......
WA4DAN/CY0 and AA4VK/CY0"

ZL9, CAMPBELL ISLAND (Update/Press Release #5): "Preparations for the HARAOA ZL9HR DX'Pedition to Campbell Island in the Great Southern Ocean (IOTA OC-037) are on schedule for the activation dates of November 28th to December 9th this year.
The team are delighted to announce a new sponsor in the Northern California DX foundation, this is in addition to the other sponsors with Spiderbeam sponsoring ZL9HR and supplying spiderbeam antennas and masts,

21 worldwide DX groups and the prestigious ARRL Colvin foundation award.
Of course we should not forget the 36 individuals who are also sponsoring
the DX'Pedition. Thanks to all of these.
The containers to carry all required equipment are currently being
prepared and loaded, ready to be shipped out of Sydney around the 15th
of September.
Please refer to the Web site <ZL9HR.COM> for the full, up-to-date,
information about this major DX'Pedition.
73 from Ed, VK2ARE, Australian publicity Officer for ZL9HR"

Amateur FM Association Complete System Upgrade:

Posted: 13 Aug 2012 05:53 PM PDT
http://www.eham.net/articles/28815

Chautauqua County Amateur FM Association club members recently completed an upgrade to its emergency communication systems. An antenna was placed on the 150-foot tower and equipment installed that allows packet radio and provides better coverage to southern Chautauqua County and beyond.

//
Why Ham Radio Is Still Handy:

Posted: 13 Aug 2012 05:53 PM PDT
http://www.eham.net/articles/28814

"Ham radio has worked in emergencies where nothing else gets through. ...," said Ham teacher Norm Goodkin. "It's also helping build basic skills -- skills that are no longer taught in school -- improving not only our ability to communicate in disasters, but adding back some of the 'lost tools' that Americans used to be famous for -- the ability to do things ourselves." The tragic events of Sept. 11, 2001, and Hurricane Katrina in 2005 highlighted two phenomena common in disasters: Network communications tower sites were destroyed, and network traffic overwhelmed systems -- two distinct issues causing failure in both public safety, and consumer-oriented communications. Power failures cut off the Internet, and in New York, debris raining down onto ground-based infrastructure, like switching equipment, destroyed much of any communications left. However, in the early stages of both emergencies, a group of individuals stepped in and took over much communication with privately owned radio equipment, at no cost to the taxpayer.

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to

Vanity Call Sign Fee to Increase September 4

Posted: 14 Aug 2012 06:49 PM PDT
http://forums.qrz.com/showthread.php?357780-Vanity-Call-Sign-Fee-to-Increase-September-4&goto=newpost

Vanity Call Sign Fee to Increase September 4

On August 3, the FCC announced via a Final Rule in the Federal Register that the cost of an Amateur Radio vanity call sign will increase 80 cents, from $14.20 to $15. The new fees take effect 30 days after publication, making September 4, 2012, the first day the new fee is in effect. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order (NPRM), seeking to raise the fee for Amateur Radio vanity call signs.

The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new 10 year term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal six years ago.

The FCC is authorized by the Communications Act of 1934, as amended to collect vanity call sign fees to recover the costs associated with that program. According to the FCC, the fees that are collected from vanity call signs are used to offset the cost of monitoring and researching new call sign requests to prevent the issuance of duplicate call signs. When asked why the fee is payable upon renewal, the FCC stated in 2011 that "[m]ore than likely, fees that are collected only on new issues and at the time of changes in call signs will not generate sufficient revenues to offset the cost of managing and monitoring this work at the Commission, the FCC stated in 2011. Therefore, we conclude that the basis upon which the Commission collects fees on Amateur Radio Vanity call signs will not change."

The vanity call sign fee has fluctuated over the 16 years of the current program -- from a low of $11.70 in 2007 to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In Fiscal Year 2012, the FCC expects to grant 14,300 vanity call signs, bringing in $214,500 from the vanity call sign program, and looks to recover a total of $339,844,000 in fees from all the Services that it regulates.

PY, Brazil:
Mor, PT7ZT, activates (16 - 19 August) the Itapaje lighthouse
(ARLHS BRA 057, DFB CE-02, DFCE CE-02, Admiralty G0114, WW Loc.
HI07ac) as PT7ZT/p in SSB only. QSL via PT7ZT.

SP, Poland:
The special station SN17EGS will be QRV from August 15 - September 8 from the 17th European Shooting Brotherhood Meeting in Tuchola.
QSL via SQ2BNM.

During August 17-19 there will be a tournamet at the Liw castle, where all knights brotherhoods from the Polish Kingdom and all other neighbouring kingdoms were invited. Fight will take place both on foot and on horseback until the last drop of blood.
The fights of the knights will be transmitted with the use of modern technologies by brother Mariusz, SQ8JCB brother Pawel, SP5SMY and other brothers with the necessary licenses.
Everything will be heard on short waves marked as SN0LIW.
http://www.sn0liw.pl/

V3, Belize:
Travis, AF6WU (V31WU) and Kjerstin, KJ0VDA (V31DV) are QRV from Caye Caulker (NA-073, WW Loc. EK57xr) August 16 - 20 on the HF bands mostly in SSB.
QSLs via AF6WU.

VQ9, Diego Garcia:
Jim, VQ9JC (ND9M) is back on Diego Garcia (AF-006) until mid November. The club station on the island was closed until further notice, therefore he's currently only QRV in "Field Day style" with monoband dipoles and 100W, daily between approximately 1230z to 1615z. Most operation will take place in CW.
QSL via ND9M.

African Tour (6W & C5):
Dom, M1TKA will tour West Africa as follows:
15 - 22 August 6W/M1KTA
22 - 29 August C5/M1KTA
He'll operate on HF and (if conditions permit) 6m.
QSL via M1TKA.
http://m1kta-qrp.blogspot.com/

Propagation forecast app:
DroidProp is a propagation forecast app for the HF bands, based on VOCAP (Voice of America Coverage Analysis Program).
It calculates the current and future HF propagation conditions on the device, an internet connection is only needed for updating the solar data. It's currently still in beta state but fully functional. Download (free) and information:
https://play.google.com/store/apps/details?id=info.schaeuble.droidprop

HK0NA LoTW:
Bob, N2OO, uploaded the HK0NA QSOs to LoTW. About 15.000 QSOs appear to have been lost in the process, but he's working with the ARRL to resolve this issue.

New RAC Sections for Ontario:
On September 1st, the following new sections will be in effect:

Ontario North (ONN)
Ontario East (ONE)
Ontario South (ONS)
Greater Toronto Area (GTA).
http:///www.rac.ca/en/news/bulletins/2012/Ont_Section_Boundaries._Ver_2.jpg

New Prefix for Niue:
On August 3d, Niue (ZK2) was issued the prefix block E6.

QSL-Status PJ7PT:
QSL manager Wojciech, SP9PT, reportts that all QSOs have been
uploaded to LoTW, all direct requests have been answered and
bureau cards are answered as they arrive. If someone is missing
a card, please get in touch by email: wklosok@rsi.pl

QSL-Info:
Phil, G3SWH, reports that regrettably, Andreas, 5R8FL, does not
use his QSL manager services any more as of August 2012.
http://www.g3swh.org.uk/

175 Jahre P&O-Faehren:
GB175PO and TM175PO are special event callsigns operated from
Dover and Calais to commemorate the 175th jubilee of the
P&O ferries. Operation will take place throughout August,
occasionally from the ferries.

Silent Key:
The well known DXpeditioner Alex, UA9YAB, passed away aged 50
during his DX-Pedition to Los Roques Island (SA-035) on August
11. He suffered from a cardic arrest when he was swimming.

UPCOMING CONTESTS

18.8. SARTG RTTY Contest (part 1)
18.8. SARTG RTTY Contest (part 2)
18./19.8. DARC HF-Fax-Contest
18./19.8. Keymen's Club of Japan Contest
18./19.8. North American QSO Party
19.8. SARTG RTTY Contest (part 3)

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:

General: On the weekend 18/19 August the 15th "International Lighthouse
Lightship Weekend" (ILLW) will take place. More information:
http://www.illw.net
http://www.illw.net/index.php/entrants-list-2012

AS-060; HL4 Chollabuk/Chollanam-Do Province Group: Members of Gwangju
DX Club will be active as D7G from Kogum Island between August
17-19th. Activity will be on 80-6 meters using CW, SSB and RTTY.

QSL via HL4CEL.

AS-171; 4S; Sri Lanka's Coastal Islands: Members of the Radio
Society of Sri Lanka will activate 4S7LGT from LH/Island
Barberyn (ILLW LK0002, ARLHS SLI-002, TWLHD WLH 4S-001, WLOTA 0024)
during the ILLW. QSL via 4S7LGT (direct or bureau).
http://www.rssl.lk/photo-gallery/lighthouse-expedition/

EU-002; OH0; Aland Island: Normunds/YL3DQ will, until August 20th
work from Aland Islands in holiday style as OH0/YL3DQ
on 80-10m in CW and RTTY. QSL via YL3DQ (direct or bureau)

EU-012; GM/MM; Shetland and Fair Isle: A YL expedition by Unni, LA6RHA
Chantal, PA5YL, Ruth, IT9ESZ/HB9LFM, Nicky, MM5YLO, Elaine,
2E1BVS and Denise, MM6ZDW is planning to activate Fair Isle
(IOSA SH-09, WLOTA 1319) between 16 and 22 August. Their call
will be GB2YLS and activity will take place on the HF bands in
SSB and CW. This operation includes a participation in the ILLW.
from Fair Isle South LH (ILLW UK0127, ARLHS SCO-079, BARLS A3750,
TWLHD WLH GM-028, WW Loc. IO99em, WAB NZ16).
QSL via MM5YLO (direct or bureau). http://www.radioclubs.net/gb2yls/

EU-040; CT; Estremadura Province group: Luis/CT1EJB and Armando/CT2JYX
will be active as CR5WFF once again. From August 17 to 20 they are
QRV from "Farol da Berlenga" (WCA CT-01001, DMHP LR-086). The QTH
is on Ilha da Berlenga (DIP ES-001, PIP NT-029, WFF CTFF-015,
WLOTA 1054). They will be QRV in SSB, RTTY and BPSK.
QSL via CT1EJB (direct or bureau).

EU-042; DL; Schleswig-Holstein State North West group: Mike/DL4ABO
will be on the air from Foehr Island (GIA N-017, WLOTA 4067)
August 18 to 25. Using the callsign DL4ABO/p he will work on
the HF bands in holiday style. QSL via Homecall (direct or bureau).

EU-047; DL; Niedersachsen State group: DA0L takes part in the ILLW from
the Borkum Lighthouse (ILLW DE0116).

EU-064; F; Pays De La Loire Region group: The "Radio Club Vendeen"
will activate the Sebastopol Polder Nature Park (FFF-218)
as F6KUF/P on August 20/21. The park is located on Noirmoutier
island (DIFM AT-020, WLOTA 1224). They are active on 80m - 10m
in SSB, CW and maybe PSK/RTTY. QSL via F6KUF (direct or bureau).

EU-101; OH6; Lansi-Suomi (Vaasa) Province group: Timo/OH6FMG
will activate Gashallen Lighthouse (ARLHS FIN-136; ILLW FI0015;
LOC KP02MN) on the ILLW. QSL via OH6FMG (direct or bureau)

EU-115; EI/GI/MI; Ireland (Ireland/Northern Ireland): Members of the
"Carrickfergus Amateur Radio Group" will show up as GN0LIX/p
on the ILLW from Chaine Memorial Tower (ILLW UK0033, BARLS A6031,
ARLHS NTI-004, WLOTA 1439, WW IO74cu) in Larne. Depending on the
condx they will be active on 40m, 20m or 10m in SSB.
QSL via bureau. http://www.radioclubs.net/carg

EU-116; GD/MM; Isle of Man: Members of the "Dundee Amateur Radio Club"
(Paul/GM0BKC, Pete/GM1CMF, Colin/GM4JPZ, Scott/MM0SVK, Mark/2M0LEW
and Ally/MM0DRA) will be QRV as GT4AAF/P from 18 - 25 August
from the Isle of Man (WLOTA 0449, WW IO74sf). They plan to work
on all bands and modes. QSL via GM0BKC (direct or bureau).

EU-136; 9A; Kvarner group: Vincenzo/IZ2WMW will work from Krk island
August 18th to 25th using the callsign 9A/IZ2WMW. He will use
QRP equipment (FT-817 and Dipole) on 14.260 and possibly also
around 18.128 and 21.260 MHz.
QSL via IZ2WMW (direct or bureau).

EU-184; OH8; Oulu Province group: Members of the "University of Oulu
Technical Students Radio Club" will be on the air as OH8T
on August 17-19 from Hailuto Island and Marjaniemi Lighthouse
(ILLW FI0025, ARLHS FIN-028, TWLHD WLH OH-015, WLOTA 0580).
QSL via OH8T (direct or bureau). http://oh8ta.fi/english/

NA-026; W2; New York State group: The "Great South Bay Amateur Radio
Club" activates Fire Island (USi NY013S) and it lighthouse (ILLW
US0019; ARLHS USA-286) on August 18/19. They will sign W2GSB on
80 - 10 m in CW, SSB and PSK31.
QSL direct (see QRZ.COM) and eQSL/LoTW.
http://www.gsbarc.org http://www.fireislandlighthouse.com/

NA-099; KP3/4; Puerto Rico: The Puerto Rico Amateur Radio League,
KP4ES, plans to do island hopping for the ILLW. The following
new USi references will be activated: PR047S - Cayo Afuera/Cayo
Real; PR048S - Cayo de Tierra; PR049S - Isleta Marina
QSL via NP3O (see KP4ES on QRZ.COM).

NA-145; PJ5,6; Sint Eustatius and Saba Islands: Until August 18th
Frank/K3TRM can be worked as PJ5/K3TRM from Sint Eustatius
on the HF bands. QSL via K3TRM (direct or bureau).

NA-161; KL; Alexander Archipelago: From August 17th to 19th,
Michael/KL7XK, Charles/WL7CSJ and Heinz/VA7AQ will be active as
KL7XK/p, WL7CSJ/p and VA7AQ/NL5 from Pleasant Island. They plan
to work from 30m to 15m in CW and SSB.
QSL via Homecalls (direct or bureau).

OC-137; VK4; Queensland State (South Coast) South group: VK4ILH will
be used by Derek, VK4MIA, Paul, VK4FPDW, Brooke, VK4KDX, Graham,
VK4GRA, Ewan, VK4ERM, Catherine, VK4GH, John, VK4IO and Luke,
VK3HJ from August 17th to 19th from Moreton LH (ARLHS AUS-039, ILLW
AU0009, WLOTA 2987, Admiralty K2854.1, WW. Loc. QG62rx). It's
the first activiation of this lighthoise.
QSL via VK4MIA (direct or bureau).
http://www.capemoreton2012.com/
https://www.facebook.com/VKLighthouse
http://youtu.be/29CmOjSC3uI

OC-139; VK5; South Australia State East Centre group: Paul/VK5PAS,
Sasi/VK5SN, Dave/VK3VCE, Mark/VK5VW, David/VK5KC, Hans/VK5YX and

Lesley/VK5LOL will use the callsign VI5CW from August 17th to 20th
from Kangaroo island. For the ILLW they will activate the Cape
Willoughby Lighthouse (ILLW AU-0095, ARLHS AUS-051, TWLHD WLH
VK-017, WLOTA 0869, Admiralty K2112).
QSL via VK5PAS (direct or bureau), eQSL and LoTW.

OC-143; YB4-6; Sumatra Island: Zen/YB0MZI is currently QRV on the
HF bands from Sumatra as YB0MZI/4.
QSL nur direct (siehe QRZ.COM).

OC-233; VK7; Tasmania's Coastal Islands: Mike/VK7FB and Anne/VK7BYL
will be QRV from the weather station and the lighthouse of
Tasmania (ILLW AU0101, ARLHS AUS-160, TWLHD WLH VK-063, WLOTA
0288, Admiralty K3614) from August 18 - 25 (including ILLW).
The lighthouse is in the National Park Tasmania (VKFF-481).
Mike and Anne used to be lighthouse keepers in this LH in 1969.
They will be QRV on the HF bands with an IC7000.
QSL via VK7FB (direct or bureau).

OC-233; VK7; Tasmania's Coastal Islands: Tony/VK3VTH will be active from
Currie Lighthouse (ILLW AU0016; WW Loc. QF10wb) on King Island as
VK3VTH/7 from August 16 to 19. On the first two days he'll be QRV
for a few hours after 0500z, for the ILLW he plans to be on the
air from 0000z to 0700z on 40m and 20m in SSB.
QSL via Homecall (direct or bureau)

SA-036; P4; Aruba Island: Jack/W6NF and his XYL Shelley/K7MKL will
visit P49Y (WLOTA 0033, LOC FK52AL) August 15th to 21st.
They will sign P40NF and P40S. Jack's focus will be on the
highbands (and 6m) in CW, Shelly plans to take part in the
SARTG RTTY Contest.

SA-099; PJ2; Curacao Island: For the ILLW, Louis/PJ2LS activates the
Noordpunt Lighthouse (ILLW AN0002) using the call PJ2L on the
HF bands. QSL via EB7DX (direct).
http://www.pj2ls.com/LighthousePJ2L.htm

Non-IOTA: CR6LH - Cabo da Roca LH: Jose Luis/CT1GZB, Carlos/CT1CSY
and Rafael/CT2JXT plan to be QRV as CR6LH from Cabo da Roca
(ILLW PT0015, DFP FES-01, ARLHS POR 007, Admiralty D2108, LOC
IM58gs) for the ILLW. They plan to operate on HF in SSB, RTTY,
PSK31 and CW.
QSL via CT1GZB (direct or bureau).
http://cq7c.no.sapo.pt/split.html

Leuchtturm-Aktivitaeten

CW1R - Punta del Este: The "Radio Club Uruguayo" will use the callsign
CW1R on August 17 - 19 from Punta del Este Lighthouse (ARLHS URU
008, ILLW UY0005, LOC GF25ma) from 80 - 10 m with at least two
stations in CW, SSB and digi modes. This includes the ILLW.
QSL via CX1AA.

II1PV - Punta Vagno: ARI Genova club (IQ1GE) will take part in the ILLW
from Punta Vagno Lighthouse (ILLW IT0018, WAIL LI-006, ARLHS ITA
151, Admiralty E1230, WW Loc. JN44lj).
QSL via bureau or direct (see QRZ.COM)

PA25SCH - Scheveningen SW Tower: For the ILLW, PA25SCH will be QRV from
"Scheveningen SW Tower" (ILLW NL0025, WW Loc. JO22dc). Activities
are planned in SSB on HF, VHF and UHF.
QSL via PD2RKG (direct or bureau).

PA6FUN - Kaapduinen Range Rear: PA6FUN will be QRV for the ILLW from
Kaapduinen Range Rear high (ILLW NL-0045, ARHLS NET-049) and at
the same time from Kaapduinen Range Rear front (ILLW NL-0044,
ARHLS NET-047, WW Loc. JO11sl).
QSL via PA3HHT (direct or bureau).

PI4WBR/LH - Willemstad LH: PI4WBR/LH will be the call in the ILLW from
Willemstad (ARLHS NET-075). QSL via PA3FTX (direct or bureau).

TC2ELH/TC6LHW - Oeluece & Civaburnu Feneri LH: The TCSWAT team
and the "Giresun Radio Amateurs and Nature Sports Club" will
use the callsign TC2ELH from August 18-20 from Karadeniz Eregli
Oeluece Lighthouse (ARLHS TUR-044) and TC6LHW from Civaburnu
Feneri Lighthouse (ARLHS TUR-002). Both activities count for
the WEBLOTA award. QSL via TA1HZ (direct or bureau).
http:/www.tcswat.org/awards/WEBLOTA/index.html

WFF Activities

YOFF: YP7P and YR7WFF will be QRV from the Parang reservate (YOFF-373,
WW Loc. KN15ti) from August 17 - 19. From an altitude of 2228m
they will be QRV in CW, SSB and digital modes on HF, VHF and UHF.
QSL for YR7WFF via YO7MGG and for YP7P direct via QRZ.COM.

New Research Could Help Predict Solar Storms:

Posted: 14 Aug 2012 05:23 PM PDT
http://www.eham.net/articles/28819

Predicting solar flares still remains a hit-or-miss task for scientists, but new research may shed more light on helping to predict just when the events could occur. Researchers discovered a new method to predict solar flares more than a day before they occur, which could help provide advanced warnings to protect satellites, power grids and astronauts. As the sun transitions into "solar maximum" next year, more solar activity is expected to take place. Some even worry about a massive solar storm that could even lead to wide-scale blackouts. The prediction system works by measuring differences in gamma radiation emitted when atoms in radioactive elements "decay," or lose energy. This decay rate is believed to be constant, but recent findings challenge that theory. The new technique is based on a hypothesis that radioactive decay rates are influenced by solar activity. This influence can wax and wane due to seasonal changes in the Earth's distance from the sun and also during solar flares. The researchers have been examining similar variations in decay rates before solar flares, as well as those resulting from Earth's orbit around the sun and changes in solar rotation and activity. "It's the first time the same isotope has been used in two different experiments at two different labs, and it showed basically the same effect," Ephraim Fischbach, a Purdue University professor of physics, said in a prepared statement.

RSGB: Contest General Rules Proposals:

Posted: 14 Aug 2012 05:23 PM PDT
http://www.eham.net/articles/28818

The RSGB is conducting a "Litmus Test" consultation into Contest General Rules proposals.
The consultation is open to all RSGB members. The consultation commenced on 10 August 2012 and will close at 23.59 BST on 16 September 2012. A similar process to our other Litmus Tests will be adopted whereby the discussion will be facilitated by moderators Ian Pawson, G0FCT and Don Field, G3XTT who additionally have the task of calling the consensus view a week or so before the end of the period.

//
Vanity Call Sign Fee to Increase September 4:

Posted: 14 Aug 2012 02:09 PM PDT
http://www.eham.net/articles/28817

On August 3, the FCC announced via a Final Rule in the Federal Register that the cost of an Amateur Radio vanity call sign will increase 80 cents, from $14.20 to $15. The new fees take effect 30 days after publication, making September 4, 2012, the first day the new fee is in effect. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order (NPRM), seeking to raise the fee for Amateur Radio vanity call signs.

James Millsap, WB4NWS, Appointed Vice Director of Southeastern Division:

Posted: 14 Aug 2012 01:38 PM PDT
http://www.eham.net/articles/28816

ARRL President Kay Craigie, N3KN, has appointed James Millsap, WB4NWS, of Acworth, Georgia to the position of ARRL Southeastern Division Vice Director, effective August 1, 2012. Current Vice Director Andrea Hartlage, KG4IUM, has resigned because she has accepted a job outside of the Division. Millsap's appointment runs until noon January 1, 2014.

** DXCC: SP ; Square: JO84 ; start 2012-08-05 **

LATEST NEWS by DK2ZF, dated 2012-08-05:
Rolf appeared on 144 MS and made several QSO's this morning.
Sometime will appear on 144.377 and running 1st.

Rolf, DK2ZF will be qrv from Holiday Place in JO84TH Holiday style -
most of the time will be fishing.. hopefully succesful ! But will
join the Perseids !!! No internet - its an isolated site - 70.200
with QSX 69.950/990 for DL
SOURCE: tnx to Rolf, DK2ZF, direct to MMMonVHF

** DXCC: GM: Scotland ; square IP90 ; start 2012-08-20 **

GM6VXB/P qrv from IP90NT

Will be in IP90 for four days (work during day)and will try to work MS
or E's (if conditions). Operations will be early mornings and late evenings work
permitting. KST is possible but intermittent so MS calls will be random on 370/QSY.

Only small setup, 120 Watt to 9 el yagi on 144 or 100 Watt to 5 el yagi on 50

SOURCE: tnx to Martin, GM6VXB, direct to MMMonVHf

** DXCC: EA8 ; Canary Isl. Square: IL38 ; start 2012-08-22 **

EA8 (IL38) back on EME
Im heading down to EA8 straight after the Cambridge conference,
I have fixed the 2m preamp/PA and hope to be qrv from IL38 on both 2m and 70cm. Aug 22-29th.
73 Dave G4RGK

SOURCE: tnx to Dave G4RGK direct to MMMonVHF

** DXCC: DL ; Germany ; Square: JO44 ; start 2012-08-25 **

Andy DG3XA will be qrv from the Island of Amrum JO44EP
QRV 144 Mhz with 50 watts @ 3 ele / 6m with Dipol TRXV: IC 7000 very small rig, because i carry my rig by bike on the island.
SOURCE: tnx to Andy, DG3XA, direct to MMMonVHF

** DXCC: ZK2 ; Niue ; Square: AH51 ; start 2012-09-07

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
LATEST NEWS from W7GJ, dated 2012-08-14:
The callsigns for the Niue JT65 EME operation next month will be:
E6M - 6m
E6RS - 2m
I have updated my website to include information on how to update your WSJT program to include these calls as well as include the E6 prefix:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
Please watch for us on EME! GL and VY 73, Lance

SOURCE: Moon-Net

NEWS by W7GJ, dated 2012-09-03:
Hello! Well, I wanted to provide as much advance time as I could so you could mark your calendars and/or get everything in your 6m station optimized by the end of August ;-)
As those of you know who completed JT65A mode contacts with me on 6m EME when I was in E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows - especially during the optimum days of the month for 6m EME.
The callsign is not in hand yet (but assured by email), and the QTH has not been finalized, but all the plane tickets have been purchased (as usual, any contributions are VERY welcome),
and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the works.
As soon as the license is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a takeoff shot
over water on moonrise. However, that is not necessary to work NA stations during their

moonsets (I will be elevating),
so we will get the ground gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2;
Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure
time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

WIANEWS WEEK COMMENCING AUGUST 19 2012.

Are You Ready to Fly to Azores for Free by Making Nine QSOs?

Transmitter thieves strike in North Queensland

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING AUGUST 19 2012.

Azores 9 Islands Hunt

Are You Ready to Fly to Azores for Free by Making Nine QSOs?

Yes indeed, those of you willing to spend 24 hours or less on the radio are
eligible to participate in an Azores lottery for two all-paid packages to the
beautiful Azores Islands in the Atlantic, completely free of charge.

The project is organized by the Azores-Finland Friendship Consortium in
partnership with the Amateur Radio Associations of the Azores Islands and
supported by the Azores Promotion Agency (ATA) and Azorean Airlines (SATA).

Just look at www.visitazores.com and make up your mind.

While these islands count for a single DXCC entity, they offer three (3) IOTA
groupings.

With this unique AZORES 9 ISLANDS HUNT, an invited international group of amateur radio operators together with resident Azores amateurs will be activating the nine islands, offering an opportunity to the world to contact these islands all at once over one weekend.

Activity Weekend

Saturday, September 29, 1200 UTC to September 30, 1200 UTC (24 hours).

These stations will be active starting Friday, September 28 as soon as they become operational.

Frequency Windows
CW: 7000-7015, 18080-18090 and 14050-14065 kHz
SSB: 7175-7195, 18120-18135 and 14250-14275 kHz

Those making a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores (e.g. if you have QSOs with 7 islands, you will get 7 lottery tickets).

Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery.

The free trips are from the closest airport served by SATA; including flight, accommodation and transfers..

(southgate)

Happy Birthday, Ham Radio

The Ham Radio Now show celebrates the 100th anniversary of Amateur Radio.

Bake a big cake - it's got to hold 100 candles, and feed about 700,000 people (and hams can eat). Ham Radio turns 100 this year (today, more or less).

Yes I hear you say are they behind the times?

Definitely!

It actually in the USA the 100th Birthday of the A.R.R.L. NOT HAM RADIO!

Ham Radio Now = http://hamradionow.tv/

With a bit of poking around on wia.org.au we found material, now several years old of OUR 100th Celebrations, when the Wireless Institute of Australia turned 100 back in 2010.

http://www.wia.org.au/newsevents/centenary/about/index.php

The best (Dare I say it) site is on wiaq.com.au where you will see and hear material from both our 100th AND 80th birthday bashes!

http://www.wiaq.org.au/gkemp/enter.htm

Transmitter thieves strike in North Queensland

North Queensland stations Hot FM and 4RFM both had their transmitters stolen last weekend.

Southern Cross Austereo had its 91.3 HOT FM transmitter stolen from Carborough Range.

It is a repeater (pictured on the southgate amateur radio site) of the network's Emerald HOT FM service that covers the Moranbah township and nearby mines.

The local community station 4RFM also had its transmitter stolen at the same time from a nearby site.

The SCA transmitter taken consisted of a Crown Broadcast FM30 Exciter, PA1000 Power Amplifier, and PS1000 Power Supply.

Speaking through the Broadcast Professionals news site radioinfo.com.au Southern Cross Austereo Engineer Matt Paton asked everyone to keep a look out for the stolen equipment.

"As the market for broadcast transmitters isn't massive in Australia, if anybody gets offered a 'black market' deal, could they please let me know via email, or call the Moranbah Police on 07 4941 6200."

Community station 4RFM's transmitter was also stolen, while 2 way radio equipment was untouched, so the thieves seemed to know exactly what they were after.

The SCA service remains off air awaiting repairs.

Retaining New and Young Amateurs

Many clubs and individuals do a wonderful job of training and assisting new or young amateurs to achieve their first amateur radio qualification, this is mostly at the Foundation level.

As one of the WIA's assessment team, I often wonder if we are supporting our new and younger amateurs well enough after they walk out the door and into the wider world of amateur radio?

If the new operator does not have a member of the family or a mentor to assist with getting the gear together for the first station, I wonder if many will ever get or stay on air? This is where the support of a caring ar club can greatly assist the new or young operator.

Just as the initial introduction to ar is greatly enhanced by a welcoming peer, who can relate to and understands the perspective operator. After the assessment process, the need for ongoing friendly support is possibly even more important to ensure that the new or young operator feels welcome and develops their skill in the hobby.

If the interests are found to lie in the digital world, the Foundation Operator can find a lot of fun in receiving and decoding digital signals with a PC (or Mac) and the most elementary connections to the receiver.

Who will introduce then to this exciting simple connection?

Seeing the received text or fuzzy images appear on the screen may be just enough to encourage the new operator to want to improve the antenna or excite then enough to start to study for an upgrade of license. With help and encouragement many more may continue in the hobby well beyond the initial rush of excitement.

This has been Philip - VK3JNI.

HAMS ACROSS AUSTRALIA.

As part of the Ipswich and District Radio Club's 50th year celebrations, the club has secured a special call-sign - VI4WIP50 - Victor India 4 Whiskey India Papa 50.

Club members are currently putting together a roster to work the bands for the licence period from August 25 until September 8.

While the club won't be on air 24/7 during the two weeks approved by ACMA, there will be plenty of opportunities to work this very special call-sign.

At this stage weekends and some week-nights the club house will be open as members attempt to work as many stations as possible.

Listen up for VI4WIP50, from August 25.

DISCUSSION POINT

What use is an f-call?

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

When you've been on air for many years it's easy to forget what it's like for new comers to the hobby. Take for example the simple QSL card. It's been around for a hundred years and its use is simple to the initiated, but to a newbie like me terms like QSL via the bureau or QSL direct are mysterious phrases with little meaning.

I had the opportunity to listen to VK6 QSL manager, Steve VK6IR, who spent an enjoyable half hour walking through the notions of what a QSL card means, how it works and how you participate.

Now I should preface this with any mistakes in this are mine alone. I'm hard of hearing, have a gamy leg and my memory is fading, or some such disclaimer like that.

So, in less than two minutes. A QSL card is like a post-card. It is sent between stations to acknowledge a contact. It generally contains your and their call-sign, the time, mode and frequency on which you spoke and a signal report. It's used as "proof" of a contact.

You can send it to the other
station direct by way of ordinary mail, look-up their call-sign in any number of online databases and include a self-addressed envelope and two US Dollars to pay for postage for a return card. If all goes well, you should receive a reply, that's the direct method.

Via the bureau is a coordinated effort between countries to group QSL cards together in batches. You send your cards in a box to your bureau which receives similar boxes from around the country. The boxes are split up and grouped by country and when a box-full is collected, it's forwarded to that country. At the other end QSL cards are sorted per call area and call-sign and forwarded on. It may take several months or even years for your cards to arrive.

Electronic QSL services are becoming popular, but some DX competitions don't accept electronic QSL cards, so check before you make 1000 contacts for a particular award only to find that your contacts don't count.

There's more to learn, where to get your cards, what they might look like, rare contacts and special routing, but that's a brief overview of the QSL system.

One mystery down, a million more to go.

I'm Onno VK6FLAB.

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

ITU ASSIGNS NEW PREFIX FOR NIUE: E6A-E6Z

On August 3, the ITU updated its Table of International Call Sign Series to reflect a call sign change for Niue. The island will now have the entire E6 prefix block.

Niue, an island located approximately 1700 miles northeast of New Zealand is a self-governing island nation that has been in free association with New Zealand since 1974.

Prior to the change, the island used ZK2.

New Zealand Radio Spectrum Five Year Outlook 2012-2016

The Ministry has released a draft Radio Spectrum Five Year Outlook for stakeholder feedback and comment.

The Outlook assesses the drivers for change in the sector over the next five years, and how these changes might affect the management of the radio spectrum over this period. It also outlines some of the priority work items for the Ministry resulting from these changes.

The Outlook is intended to:

Allow the Ministry to focus on its longer term goals and the challenges to be faced in managing the radio spectrum;

Increase transparency about the Ministry's thinking and about how spectrum users' licence fees are being expended;

And improve stakeholder buy-in into their future work programme.

It has been produced as a general, non-technical document in order to better facilitate engagement with the full range of ZL stakeholders.

Interested stakeholders will until 20 September 2012, to submit their feedback. Any comment on the information in the document, as well as information on issues that may not have been considered in the draft document, would be appreciated. The intention is that the final document will represent a shared understanding of the Ministry's priorities and work programme.

==========

NEWS FROM ARNEWSLINE USA

EUROPEAN UNION ACCEPTS EMC DIRECTIVE THAT PROTECTS HAMS

It appears as if ham radio operators in the
European Union are safe from being treated as
sources of massive radio frequency
interference. On July 10th the Internal Market
and Consumer Protection Committee of the
European Parliament voted on a the new version of
the an Electromagnetic Compatibility directive
containing an amendment fostered by Germany's
Deutscher Amateur Radio Club and the Political
Relations Committee of the International Amateur

Radio Union to protect the rights of radio amateurs. The original draft amendment to the definition of an "electromagnetic disturbance" could in the worst case have led to the signal of an amateur station being treated as an annoyance or intrusion.

THE KH6HME BEACONS ARE WELCOME TO STAY ON MONA LOA

The late Paul Lieb, KH6HME's beacon system located at the 8200 foot of Hawaii's Mona Loa Volcano in Hawaii is welcome by the site manager to continue to operate from that location.

According to Don Mussell, the KH6HME beacons are located in the building that was formerly under the control of KGMB-TV. Over the past few years that site was taken over by Hawaii Public Radio, and put under Mussell's supervision.

Mussell says that Hawaii Public Radio is happy to have the beacons located at the site and will leave the operation and maintenance to a ham radio club that also operates equipment inside the building. It will be up to them to decide if the beacon operation will continue.

NANO COAX CABLES AND THEIR USES

Nano technology is in the news once again. This time as a way to store energy. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

With all the research on nano-technology, perhaps we shouldn't be surprised that one of the latest involves coaxial cables on a nano-scale.

The main interest in the nano-coaxial cable is as an energy storage device due to the very high capacitance between the inner and outer conductor. A study conducted at Rice University found that the capacitance of the nano-cable is at least 10 times greater than would be predicted with classical electrostatics. The capacitance of the new nano-cable is up to 143 microfarads per centimetre-squared.

Study co-author Jun Lou notes that for energy storage, he can envision a large scale energy storage device consisting of millions of tiny nano-cables side by side in large areas. Lou also says that this cable might also be used as a transmission line for radio frequency signals at the nano scale. This could be useful as a fundamental building block in micro and nano sized electromechanical systems like lab-on-a-chip devices.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW.

It appears as if nano technology has come a long way since we began reporting on it only a few short years ago.

IRTS NEWS DESK

IRTS Young Operators/SWLs

An IRTS team of young operators/SWLs will represent Ireland at the Youngsters on the Air event to be held over this week 19 - 26 August in Eeklo, Belgium.

Radio related events will be held during the week, including, kit construction, ARDF, DXpeditions, use of data modes. contesting etc.

Each country will also give presentations on youth in amateur radio in their respective countries. 9 teams from different European member associations of IARU R1 will be participating.

The following countries are participating: Romania, Slovenia, Sweden, Finland, Estonia, Ireland, Germany, Belgium and The Netherlands.

ON4YOTA will be callsign used for the week.

WEIRD AND WONDERFUL

Printable 13.560 MHz transmitters that cost a penny

The BBC have reported on radio transmitters for 13.560 MHz that cost just a penny and can be PRINTED using electronic inks.

The transmitters use Near Field Communication (NFC) technology and are seen as a replacement for Quick Response codes that consists of black modules (square dots) arranged in a square pattern on a white background.

Read the BBC story "Tiny transmitters that cost a penny to print unveiled" http://www.bbc.co.uk/news/technology-19208112

Wiki on 13.560MHz NFC - "Most of the RF energy is concentrated in the allowed
14 kHz bandwidth range, but the full spectral envelope may be as wide as
1.8 MHz when using ASK modulation."

OPERATIONAL NEWS COUPLED WITH A LIL NOSTALGIA THIS WEEK, I'M FELIX VK4FUQ

This weekend see's the International Lighthouse Lightship event
ALARA next weekend, August 25-26
then the WW Oceania Dx Contest SSB October 6
Oceania Dx Contest CW oceaniadxcontest.com Oct 13
VK's Spring VHF / UHF Field Day November 24-25

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Let's check in with Ed VK2ARE for the latest from Campbell Island

Preparations for the HARAOA ZL9HR DXpedition to Campbell Island in the
Great Southern Ocean (IOTA OC-037) are on schedule for the activation
dates of November 28th. to December 9th. this year.

The team are delighted to announce a new sponsor in the Northern
California DX foundation, this is in addition to the other sponsors with
Spiderbeam sponsoring ZL9HR and supplying spiderbeam antennas and masts,
21 worldwide DX groups and the prestigious ARRL Colvin foundation award.
Of course we should not forget the 36 individuals who are also
sponsoring the DXpedition. Thanks to all of these.

The containers to carry all required equipment are currently being
prepared and loaded, ready to be shipped out of Sydney around the 15th.
of September.

Please refer to the web site ZL9HR.COM for the full, up to date,
information about this major DXpedition.

73 from Ed VK2ARE Australian publicity Officer for ZL9HR.

So keep tuned as we bring you news as the Campbell's "are a coming".

New comers to the wonderful world of amateur radio are often surprised at all
the contests and awards the WIA administers on our behalf.

Let's check in today with Bob VK3SX the WIA awards manager.

I took up the position in April 2012 .

I was first licensed in 1979 as a Novice operator and upgraded to Full call in 1981 .
Over the past 33 years I have been chasing DX , and going from the Novice bands to the
Full call HF bands opened the DXing world to me , it was an exciting time during the 80's'.
Quickly I had confirmed 250 DXCC countries with a new one regularly in the log book , the
300 tally came along

but after that the new one got tougher. At present I have worked and confirmed all current 340 DXCC countries, in short
I have worked and confirmed them all.

2012 Has seen changes to the awards programme with it being run from our national headquarters,
all enquiries should be directed there at awards@wia.org.au . A restructure of the awards committee has
seen an important step forward as their collective experience in the DXing and Contesting fields are
world class , it's my privilege to have such people to rely on for decisions relating to our world class
awards programme . Congratulations also to Laurie VK7ZE being appointed the official ARRL cards checkerhere in VK .

2013 Will see changes to the structure of the awards programme making it easier for record keeping
and applicants both new and existing to apply and upgrade their current awards.
Also introducing for the DXCC awards , Wall Plaques for working and confirming 331 countries Honour Roll, and
340 countries Excellence Status ,and a 200 countries DX Certificate and Wall Plaque will be available for DXers who can
work and confirm 200 DXCC countries in a 12 month period as set by the awards committee.

A simple Worked all States VK will be introduced to encourage activity locally in VK amongst Fcall
and first time award chasers.
73's and Good DXing

Bob VK3SX

Thanks Bob and we will be listening out from more from the WIA Awards team
in upcoming broadcasts.

Now our Nostalgia piece, or as we like to call it " REWIND "

>From 6WF Wesfarmers to the ABC

A scrapbook kept by 6WF founding engineer, radio amateur Wally Coxon VK6AG
(XYK in 1914), was the basis for this video best found via abc.net

ABC celebrates 80 years on-air
http://www.abc.net.au/local/stories/2005/04/29/1356554.htm

Perth science-teacher-turned-history-author and founder of the Light and
Sound Discovery Centre, Richard Rennie, tells the story of how Perth's radio
station 6WF became the ABC's first broadcasting outlet in Western Australia.

Much of this is based on the scrapbook kept by the esteemed radio pioneer and
6WF founding engineer, Wally Coxon VK6AG (first licensed as XYK in 1914).

This talk coincided with the 80th anniversary of the ABC, and the Wireless
Hill Centenary Celebrations in 2012.

Richard's presentation featured antique receivers from The Vintage Wireless and Gramophone Club, to illustrate the equipment available during the pioneering era of radio in WA. The talk was given 18th July, 2012 at the monthly meeting of the Australian Museum of Moving Pictures and Television (AMMPT). The same presentation was made at a variety of venues, as part of Richard's role as an educator, particularly using his skills to inspire young people and young teachers alike.

Disaster hits Manila ? radio hams help

The Philippine Amateur Radio Association activated the Ham Emergency Radio Operations (HERO) with it passing essential traffic during the recent widespread flooding which saw 80 per cent of Manila under water.

Claiming 66 lives earlier this month, it was triggered by monsoon rains on the main island of Luzon. The downpour peaked with a 48-hour deluge that battered Manila and surrounding regions.

Eddie Valdez DU1EV, Chief Operating Officer of PARA said that HERO was on air from Monday night the 6th through to Tuesday August the 7th.

It included one of the ham emergency radio operators who found himself affected by the flood waters and fleeing his home after two days of operations.

Eddie DU1EV said the rain stopped the floods receded, with garbage littering the roads, parks and drains in Manila and surrounding provinces.

A big clean-up is under way. In the worst affected areas like Marikina City, the Metro Manila Development Authority would need a month to clean and clear the drainage canals.

(Jim Linton VK3PC, Chairman IARU Region 3 Disaster Communications Committee and Eddie Valdez DU1EV, Chief Operating Officer of PARA)

SPECIAL INTEREST GROUPS --- SUMMITS ON THE AIR
www.sotawatch.org
www.sota.org.uk

2 E 0 EYP and M 1 EYP complete England!

Father and son team Tom M 1 EYP and Jimmy Read 2 E 0 EYP have 'completed England' in Summits on the Air.

Tom and Jimmy can now claim to have activated each of the 176 summits currently in the English (G) SOTA Association, and six more that were

previously valid.

Tom, who had been activating in SOTA since 2002, needed to revisit many
of the completed hills after his son Jimmy became licensed in 2005 and
expressed his ambition to activate all the same hills as his dad!
Since then, the duo have visited all hilly and mountainous areas of England,
and completed all the SOTA regions:

Tom and Jimmy have also activated a further 104 summits in Wales, Scotland
and Northern Ireland over the last seven years, and retain ambitions to visit
many more, including those in the Isle of Man.

For more information about the Summits on the Air programme, please visit
http://www.sota.org.uk

Punta Gorda Lighthouse ILLW Special Event Station

Posted: 16 Aug 2012 01:36 AM PDT
http://forums.qrz.com/showthread.php?357944-Punta-Gorda-Lighthouse-ILLW-Special-Event-Station&goto=newpost

Come join us on the air or in person from Punta Gorda Lighthouse during International Lighthouse/Lightship Weekend.

We will be operating the high bands during the day and low bands through the night starting Friday the 17th 16:00 PST until Sunday the 19th 10:00 PST.

Because of other events and stations participating in amateur radio during this time frame we will have no set frequency for operation; we will be relying more on band conditions and free space...

Hello All.

Region 1537 rotated of the solar disc yesterday which leaves five visible groups. Regions 1542 and 1543 continue to maintain their Beta-Gamma magnetic configuration. No new groups were numbered yesterday.

Four C class solar flares tool place yesterday, The largest was a C2 from region 1543 which peaked at 1240z. It is possible that an Earth directed coronal mass ejection occurred with this solar flare.

Image below from the SDO shows the C2 solar flare.

NZART Headquarters Infoline Issue 257

17 August 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· Appointment of Midlands Councillor

· Table of international Call Sign Series

· FMTAG Notes

· VHF-UHF-SHF-EHF Contest Committee

· ZL9HR DXpedition

· Huntsville Hamfest

Debby says…my sincere apologies, I am seriously out of sync with the calendar that was created by Jamie Pye for HQ Info-line. I appeared to be duplicating HQ Info-line with the Official Broadcast, so have had to realign my dates. For further information on the next due date of HQ Info-line, please refer to housekeeping at the end of this issue.

Debby…ZL2DL

******

Midland Council appointment ZL3PAH

Council is pleased to advise that by due election in accordance with 3.7 (e) of the NZART Constitution, the appointment of ZL3PAH Phil Holliday as Midland Region Councillor was confirmed at their on air meeting on Tuesday 7th August 2012.

Council would like to thank the three nominees whose names were submitted for this position and hope that they will consider being nominated in future elections.

Council would also like to welcome Phil to the Executive of NZART and look forward to working with him.

Table of International Call Sign Series

On August 3, the ITU updated its Table of International Call Sign Series to reflect a call sign change for Niue. The island will now have the entire E6 prefix block, that is Callsigns from E6A to E6Z. Prior to the change, the island used ZK2. According to the CIA World Factbook, Niue is about 1.5 times the size of Washington, DC, and has a population of almost 1300 people! This new allocation for Niue frees up the ZK2 callsign series for use here by AREC.

FMTAG NOTES FOR HQ INFOLINE 257

PROPOSALS

Branch 34 South Canterbury has applied for a 144.575 MHz Digipeater on Mount Studholme, located at TOPO50 CA18 352.25 531.31. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations.

Branch 63 Upper Hutt has applied for a 6-metre Repeater on Mount Climie, located at TOPO50 BP32 798.83 423.94. The repeater transmit frequency will be 53.950 MHz and the receive frequency 52.950 MHz. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations.

FINAL RECOMMENDATIONS TO NZART COUNCIL

At its August 7th on-air meeting, NZART Council approved the following applications, published as Proposals in previous editions of HQ Infoline:

Branch 18 Hutt Valley. Power increase of its 700 repeater at Fitzherbert, located at TOPO50 BQ32 644 351.

Branch 30 Otago. Relocation of its 830 repeater to Halfway Bush Road, located at TOPO50 CE17 010.08 178.44.

Branch 30 Otago. Relocation of its 146.25 MHz link station to Halfway Bush Road, located at TOPO50 CE17 010.08 178.44.

Branch 30 Otago. Power increase of its 665 repeater at Highcliff, located at TOPO50 CE17 132.79 162.56.

ZL2VBO. 144.575 MHz Digipeater on Mount Burnett, located at TOPO50 BN24 696 014.

ZL3ADT. 50.040 MHz Beacon at Rolleston Railway Station, located at TOPO50 BX23 503 737.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above matters, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

ZL9HR DXPedition updates

When people think of DXPeditions, they think of operators sat under palm trees on exotic islands with the world of amateur radio enthusiasts trying to talk to them. While this is where every DXPedition tries to get to, there is a LOT of work that has to happen before this is possible! Months or even years before, the event planning starts and permits are requested, equipment assembled and transport both of equipment and operators arranged. Accommodation organised and all red-tape worked through. All of this requires a lot of work from the organisers and also requires finance in the form of contributions from those taking part in the event and from sponsors. Without sponsors no DXPedition can take place and the ZL9HR DXPedition to Campbell Island on November 28th. to December 9th. this year is no exception.

This DXPedition is rightly being billed as one of the most important DXPeditions in 2012 and the HARAOA is very happy to announce that many of the sponsors that supported earlier DXPeditions are helping again with ZL9HR. It is hoped that there will be additional sponsors “signing up” over the next few weeks, but we would like to thank those who have already committed to support the Dxpedition.

These are as follows (in alphabetical order);
Commercial sponsors:
RF Solutions
Spiderbeam

Club & Organisations;
British Colombia & Northwest Washington – ORCA DX & Contest club
Danish DX Group
German DX Foundation.
Lone Star DX Association.
Long Island DX Association.
Mediterraneo DX Club.
Northern Illinois DX Association.

There are also currently 24 individuals who are sponsoring the event. For the complete up-to-date list please refer to the ZL9HR.COM website.

The survey on the website is also getting a good response with keen DX-ers who are looking to get ZL9 on a particular band and mode to move towards a DXCC or other award voting for their preferences. Please don't miss out if you haven't already placed your vote please do so.

Preparations for the HARAOA ZL9HR DX'Pedition to Campbell Island in the Great Southern Ocean (IOTA OC-037) are on schedule for the activation dates of November 28th. to December 9th. this year.

The team are delighted to announce a new sponsor in the Northern California DX foundation, this is in addition to the other sponsors with Spiderbeam sponsoring ZL9HR and supplying spiderbeam antennas and masts, 21 worldwide DX groups and the prestigious ARRL Colvin foundation award. Of course we should not forget the 36 individuals who are also sponsoring the DX'Pedition. Thanks to all of these.

The containers to carry all required equipment are currently being prepared and loaded, ready to be shipped out of Sydney around the 15th. of September.

The HARAOA ZL9HR DX'Pedition to Campbell Island in the Great Southern Ocean (IOTA OC-037) is delighted to have been granted an award from the prestigious ARRL Colvin foundation.

The Colvin Award is conferred in the form of grants in support of Amateur Radio projects that promote international goodwill in the field of DX and the HARAOA are honoured to have received this award.

Preparations for this major DX'Pedition are on schedule for the activation dates of November 28th. to December 9th. this year.

73 from Ed VK2ARE Australian publicity Officer for ZL9HR.

It's time for the 2012 Huntsville Hamfest!!

Please join us during our live, online broadcast of the Huntsville Hamfest this weekend.

To join the broadcast go to http://W5KUB.com where the fun begins! During the Huntsville Hamfest W5KUB will interview vendors regarding their latest products, and broadcast the announcement of the Young Ham of the Year. Special guests will include Bob Heil (K9EID) of Heil Sound; Martin F. Jue (K5FLU) founder of MFJ Enterprises; Kay Kraigie (N3KN), ARRL President; Charlie Emerson (N4OKL) representing Huntsville Hamfest; etc.

During the live broadcast, you will also have the opportunity to meet and chat with other ham radio operators from all over the world. During the 2012 Dayton Hamvention we had 47,400 viewers!

You could be the winner of one of 19 prizes, total value approximately $3500, which will be awarded during the broadcast! These prizes are made possible because of our relationship with partners; such as, GigaParts, Huntsville Hamfest Prize Committee, Ten-Tec, NCG Company, Kantronics, MP Antenna, ARRL, MFJ, and many hams which have donated individual prizes. In the past year over $10,000 in prizes have been awarded! Of course, no purchase is necessary to win a prize. W5KUB is not affiliated with any products or companies and does not sell any products or services.

Huntsville Hamfest broadcast hours:

a.. Friday, August 17: 1400 UTC (9:00 AM CT) drive from Memphis to Huntsville (4 hrs) and set up
b.. Saturday, August 18: 1500 UTC - 2230 UTC (9:00 AM - 4:30 PM CT) Huntsville Hamfest
c.. Sunday, August 19: 1500 UTC - 2100 UTC (9:00 AM - 3:00 PM CT) Huntsville Hamfest
d.. Sunday, August 19: 2100 UTC (3:00 PM CT) drive from Huntsville to Memphis (4 hrs)
Please join our group on Facebook at

https://www.facebook.com/groups/w5kub/ to keep up with us year-round.

Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you in Huntsville!

73
Tom Medlin, W5KUB

Amateur Radio Newsline(tm) Report 1827 - August 17 2012

Amateur Radio Newsline report number 1827 with a release date of August 17 2012 to follow in 5-4-3-2-1.

The following is a QST. Hams respond as flooding hits the Philippines; e-mail from a net saves a sailors life; a new source of interference to the H-F bands is discovered, WWVB to begin Phase Modulation test broadcasts on August 21st and Morse code is now on Mars. Find out the details are on Amateur Radio Newsline(tm) report number 1827 coming your way right now.

RESCUE RADIO: HAMS RESPOND AS FLOODING HITS THE PHILIPPINES

The Philippine Amateur Radio Association known as PARA activated its Ham Emergency Radio Operations on two meters and 40 meters passing essential traffic during the widespread flooding that recently hit the capital city of Manila and surrounding areas. Amateur Radio Newsline's Norm Seeley, KI7UP, has more:

--

Nearly two weeks of monsoon rains across the Philippines main island of Luzon peaked with a 48 hour deluge that battered Manila and surrounding regions on August 6th and 7th. This was the worst rain to hit Manila since Tropical Storm Ketsana killed 464 people in 2009. .

Eddie Valdez DU1EV, is the Chief Operating Officer of the Philippines Amateur Radio Association. He said that members of the Ham Emergency Radio Operations group were on air from Monday the 6th through Thursday the 9th as the flood waters rose and then receded.

Through the organizations website DU1EV had warned the ham radio community of the pending rains. He asked those radio amateurs involved in emergency communications to be prepared by monitoring the emergency frequencies of 7.095 MHz and 144.740 MHz.

DU1EV said the sun finally, but only partially, showed up on the Thursday, August 9th with the flood waters receding in most areas. He said tones of garbage litter roads, parks and drains in Manila and surrounding provinces.

A big clean-up is under way. In the worst affected areas like Marikina City, the Metro Manila Development Authority said it would take about a month to clean and clear the drainage canals.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to news media reports 66 people died in the torrential rain and officials estimated 300,000 fled their homes in the capital city of Manila. According to DU1EV, during the storm one of the volunteer radio operators had to leave his home after two days because of the intense flooding. (VK3PC, DU1EV)

**

RESCUE RADIO: E-MAIL FROM NET SAVES SAILOR IN DISTRESS

The Coast Guard with the aid of amateur radio coordinated the rescue of a mariner in distress approximately 287 miles northeast of Hilo, Hawaii on Friday, August 10th.

Duty officers at Joint Rescue Coordination Center in Honolulu received an e-mail report from a member of the Amigo Net. It said that a mariner aboard the Australian flagged sailing vessel the Q-Wave was disabled and requesting assistance.

According to news reports, the sailor reportedly had less than one liter of water and no food. The vessel's motor was disabled, it had lost its dingy, its communications equipment was unreliable and it had sustained a tear in its mainsail.

A Coast Guard HC-130 Hercules aircraft from Coast Guard Air Station Barbers Point was launched and located the disabled vessel. The crew dropped emergency supplies, including food, water and a VHF radio to the disabled sailboat. The Good Samaritan vessel Fifth Wife was in the area, overheard communications with the disabled vessel and responded to escort it back to Hilo. (Published news reports)

**

PRO-ACTIVE ENFORCEMENT: CALGARY CANADA FORMS COPPER THEFT UNIT

Anyone thinking of being a copper thief in Calgary Canada may want to think again. Amateur Radio Newsline's Jim Davis, W2JKD, has the reason why:

--

Calgary Canada police have created a special unit to target copper wire thieves. This, as the number of thefts in that nation and world-wide continue to rise.

With the price of this metal on the upswing so are the number of crooks hoping to cash in. Offenders see the crime as extremely high reward as

they can easily steal copper and turn it around for cash. In other words there seems very low risk of getting caught.

But that changed in June after the Canadian Broadcasting Corporation was hit when $50,000 worth of copper wire was stolen from its transmitter site in southwest Calgary. Now police are watching very carefully for any signs that metal thieves may be about to strike.

I'm Jim Davis, W2JKD.

--

Calgary police hope that this new initiative will help deter copper thefts in that area. (WIA)

**

EMERGING TECHNOLOGY: EARLY WARNING QUAKE DETECTION DEMONSTRATED AT CAL TECH

Earthquake prediction may be on the verge of becoming a reality. This, following media reports that a pair of temblors centered near Yorba Linda, California were detected by a new earthquake warning system that's being developed at the California Institute of Technology.

A 4.5-magnitude quake struck one mile northeast from Yorba Linda at 11:23 p.m. Tuesday, August 7th. About ten hours later another a 4.4 magnitude shaker struck two miles from the same location.

News reports quote Douglas Given from the U.S. Geological Survey as saying that in the case of the first event Cal Tech received about nine to ten seconds warning before the strongest shaking was felt at the facility. In regard to the second quake the warning time was in the area of four seconds. Cal Tech is located in Pasadena California which is about 60 air miles from the two quakes epicenter.

Seismologists say that once the technology advances, they should be able to quickly determine a quake's magnitude and send that information out to the public before the strongest shaking waves reaches a given location. In its current incarnation, the early warning system sounds an audible alert, shows a countdown timer and estimates the intensity of an earthquake.

Experiments in quake detection have been going on for well over five decades but experts say that this new prototype system is the first to ever pick up quakes before the ground started shaking at its location. (Published news reports)

**

RADIO INTERFERENCE: NEW RADIO BURST HEARD ON THE HF BANDS

The IARU Monitoring System Region 1 newsletter reports on a new burst radio system that is affecting the amateur radio operations in the 80, 40, 20 and 15 meter bands.

Writing in the newsletter Wolfgang Hadel, DK2OM, says that he discovered a new burst system operating on 3.5, 7, 14 and 21 MHz, daily.

Hadel who is the IARU Region 1 Monitoring System Coordinator says that the system is active every full hour at plus 1, plus 2 and plus 3 minutes with 10.4 sec. bursts of 20 kHz width. Also, the signals appear to come from France.

DK2OM adds that audio frequency analysis seems to pin this as being similar to CODAR signals. Their real purpose is unknown but DK2OM says that perhaps this is a new kind of over the horizon radar or Ionosonde. As we go to air, Germany's Department of Post and Telecommunications has filed a complaint with its French counterpart. (IARU-R1)

**

HAM RADIO IN SPACE: NROL-36 CUBSAT LAUNCH DELAYED AGIN

The launch of the NROL-36 mission carrying several new amateur radio micro-satellites has once again been postponed. According to Spaceflight Now, the United Launch Alliance Atlas 5 rocket, its classified payload and the ham radio cubesats remain poised for liftoff at Vandenberg Air Force Base in California. Now, officials say that the twice delayed launch will likely take place on September 6th.

The flight was scrubbed during the initial countdown on August 2nd due to Range Instrumentation problems at the Vandenberg launch complex. Spaceflight Now says that engineers are on a path to resolution and hope to have corrective actions implemented, tested and certified by late August. The latest developments on this pending launch can be followed at www.spaceflightnow.com.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (Spaceflightnow.com)

RADIO LAW: HAM IN WALES USES UNUSUAL APPROACH TO WIN TOWER FIGHT

A ham in Wales has won a tower dispute with the town he lives in by taking a very different approach. He accused the town's community council of bordering on racism and won an appeal to erect a fourth tower in his garden. We have more in this report:

--

Michael Butler, GW0MNP, had his planning application for a 21 foot antenna mast rejected three times in under a year but he did not give up. In what may best be called an unprecedented three-pronged attack, Butler not only accused the city council of racism but also wrote letters accusing the Gazette newspaper of being "biased and sarcastic" and calling borough Mayor councilor Marlene Thomas "an idiot".

According to Wales dot com, Butler, of Green Meadow, sent a stinging letter to Cefn Cribwr Community Council last month. In it he claimed that their "prejudice" against his antenna mast installation ideas "bordered on racism".

In March, Bridgend County Borough Council planners denied Butler's request to erect the mast in his garden to further his amateur radio hobby. Those opposed to his installation compared the proposed antennae to "a flying bedstead". A bedstead is a British term for the metal framework that holds a mattress, pillows and the rest of the bedding.

But in the end, Butler's interesting approach succeeded. This when Welsh planning inspector Rebecca Phillips upheld his appeal against the council planners initial decision. Her decision means he can now keep the three towers already has and erect a fourth. The only proviso is the new tower is only at its full height for three hours a day.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, mulling this one over here in the newsroom in Los Angeles.

--

You can read the entire story of this fascinating tower appeal, including commentary by some of Butler's neighbors on-line at tinyurl.com/wales-antenna-win. (Wales.com, QRZ.com)

**

RADIO LAW: VANITY FEE GOES TO $15 ON SEPTEMBER 4

Mark September 4th as the day that getting a vanity call sign will go to $15 for a full 10 year term. On August 3, the previously approved increase of 80 cents was printed in the Federal Register. The new charge take effect 30 days after publication making September 4th the first day it is in effect. (FCC)

**

ENFORCEMENT: FCC TELLS SPY SHOP TO STOP SELLING JAMMING DEVICES

A California electronics retailer has been ordered to stop selling products designed to jam radio communications equipment. Amateur Radio Newsline's Jeff Clark, K8JAC, reports:

--

The FCC has issued an official Citation and Order to Spy Shop of Sherman Oaks, California that also does business as IQ Tronics, Inc.,

SpyShopOne.com, and SpyGadgetsShop.com. This, for marketing cell phone, and Global Positioning System and other signal jamming devices in violation of Section 302(b) of the Communications Act, and Sections 2.803 and 15.201(b) of the Commission's rules.

In its July 18th Citation the FCC ordered that the Spy Shop should take immediate steps to come into compliance and to avoid any recurrence of this misconduct, including actions such as removing illegal signal jamming devices from displays and declining to sell signal jamming devices in the United States. The FCC said that if after receipt of the Citation, Spy Shop violates the Communications Act or the FCC Rules by marketing unauthorized radio frequency devices within the United States or its territories the Commission may impose monetary forfeitures of up to $16,000 for each such violation. In the case of a continuing violation, the Commission may impose monetary forfeitures of up to $16,000 for each day of such continuing violation up to a maximum forfeiture of $112,500 for any single act or failure to act. In addition, violations could also can result in seizure of equipment as well as criminal sanctions, including imprisonment.

Im Jeff Clark, K8JAC.

--

As we go to air, a check of the company website shows that all of the gear that the FCC says is illegal to sell has been removed from the company website. (FCC)

**

PUBLIC SERVICE: JIMMY FUND WALK VOLUNTEERS NEEDED

Ham radio volunteers are needed in support of the Sunday, September 9th Jimmy Fund Walk in the greater Boston Massachusetts area. This event is on the Boston Marathon course but most of its activity is on the last half. All communications will be on 2 meter FM with volunteer communicators assigned to buses and first aid Stations along the route from 5 AM to 7 PM. Some half day assignments will also be available. If you wish to volunteer please contact Steve Schwarm by e-mail to w3eve (at) arrl (dot) net and be sure to put Jimmy Fund in the subject line, (W3EVE)

**

RADIO BUSINESS: HAM RADIO DELUXE UPDATED

HRD Software announces an updated release of Ham Radio Deluxe version 5.24.36. This update includes fixes for cross band contacts in Logbook and some PTT issues hams have run into with DM780.

Meanwhile the Ham Radio Deluxe development team continues work on HRD Version 6.0. The specific date release date will be announced in a future press release.

For those who are unfamiliar wit it, Ham Radio Deluxe or HRD is an integrated suite of software products for amateur radio. The five modules provide rig control, logging, digital communications, satellite tracking, and rotator control. More about it is on-line at www.ham-radio-deluxe.com (HRD)

**

NAMES IN THE NEWS: AUTHENTIC RADIO AUDIO NEEDED FOR DOCUMENTARY FILM

Some names in the news. Steve Wystrach who is working on the production of a documentary film about Robert Manry and his 1965 single-handed Atlantic crossing says that he is in seed of two pieces of audio to help complete the project. First he needs an authentic recording of a WWV time signal from that era. It needs to be legible, but it can have a bit of static or hash, just as long as it's clear enough to understand.

Steve also needs a recording of the sound of a Gibson Girl distress transmitter. Manry demonstrates this unit at one point in the film but the actual signal it produced was not receded with a local receiver.

For those not aware, the Gibson Girl was the predecessor of the modern E-L-T or Electronic Location Transmitter but sent out an S-O-S signal on the old International Distress Frequency of 500 KHz. Many of these hit the surplus market in the 1950's and 1960's and were a popular as a parts supply for hams and other radio experimenters of that era.

If you have either of these audio tracks please e-mail Steve Wystrach to info (at) robertmanryproject (dot) com. More information about the documentary film is on line at www.robertmanryproject.com/about-us/. (Steve Wystrach)

**

NAMES IN THE NEWS: NEW RAC ONTARIO SECTION MANAGERS NAMED

With the break-up of Radio Amateurs of Canada's Ontario Section, there are now four newly named Section Managers. Allan Boyd, VE3AJB, has been named as Section Manager Ontario North. Michael Hickey, VE3IPC, takes the reins for Section Manager of Ontario East. The Section Manager for the Greater Toronto Area is George Duffield, VE3WKJ, with Ian Snow, VA3QT, as Section Manager Ontario South. These appointments are effective immediately, and will be merged into the normal election process at the end of a two year term. (RAC)

**

HAM HAPPENINGS: W9DXCC DX CONVENTION SEPT 14 - 25 IN ELK GROVE IL.

On the social scene, a reminder that the 60th annual W9DXCC DX Convention will be held September 14th to the 15th at the Holiday Inn in the Chicago suburb of Elk Grove, Illinois. W9DXCC is very much a fun gathering with presentations focused on DXing. Also available will be on site QSL card checking for CQ and ARRL awards. An optional Friday

afternoon class will help get aspiring DX'ers up to speed. For more information and on-line registration for this gathering please take your web browser to www.w9dxcc.com. (N7US, W9DXCC)

**

HAM HAPPENINGS: WESTERN STATES VHF - UHF WEAK SIGNAL 75M NET

The Western States VHF/UHF Weak Signal 75 meter net meets every Sunday night from 5:30 to 6:30 pm Pacific time. This net is an informal opportunity to discuss recent operating activity, future plans for contests, rovers, and a wide variety of topics for the non repeater folks who inhabit the world above 50 MHz. The frequencies used are 3.920 MHz Lower Sideband region wide and 144.200 MHz Upper Sideband in Southern California. Anyone with an interest in weak signal communications is invited to take part. (VHF Reflector)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: WWVB PHASE MOD TEST STARTS AUGUST 21

The National Institute of Stands and Technology radio Station WWVB will be conducting a test of a phase-modulated broadcast format beginning at 1800 UTC on Tuesday, August 21st and ending at 1800 UTC on Friday, August 24th. During the test period the broadcast will be randomly switching between the normal WWVB broadcast and the new phase-modulated broadcast format.

According to WWVB Radio-controlled clocks and watches will not be affected by the test. However phase-locking 60 kHz timing and frequency standard receivers may lose lock during this period. However, they will restore during the normal broadcast period.

For more information, e-mail WWVB broadcast manager John Lowe at john.lowe (at) nist (dot) gov (CGC, John Lowe)

**

EMERGING TECHNOLOGY: PRINTABLE HF TRANSMITTER DEVELOPED

The British Broadcasting Corporation reports that a new science has been developed to permit high frequency radio transmitters for 13.560 MHz to be printed using electronic inks at a cost of that cost just a penny each.

The transmitters use Near Field Communication technology and are seen as a replacement for Quick Response Codes. The latter consists of black square dots arranged in a square pattern on a white background. The story of this new technology is on-line at tinyurl.com/printed-transmitter. (BBC, Southgate)

**

WORLDBEAT: CHRISTIAN VISION LEAVING SOUTH AMERICA TARGETED SHORTWAVE

Yet another shortwave broadcaster is cutting back on over the air operations. This time it's the U-K based Christian Vision that has announced that it will cease its shortwave service to Latin America, likely by the time this newscast has gone to air.

According to its announcement, the main reason for abandoning this targeted shortwave operation is the shifting emphasis to media that reach younger listeners. It says it has about 413 affiliates in 23 countries and is using Internet, mobile and social platforms to increase consumption by those in the important 18 to 35 year-old demographic many of whom are not shortwave listeners.

In 2010 the Christian Vision closed two other shortwave sites. One was in Darwin, Australia, and had served audiences in Asia. The other was sited in Juelich, Germany, that aired Russian, Arabic and English programs.

Christian Vision is not completely abandoning the shortwave bands. It says that it will continue to use shortwave in India and parts of Africa, where audiences continue to be significant. RW

**

WORLDBEAT: TWO RADIO STATIONS LOOSE TRANSMITTERS DOWN UNDER

North Queensland, Australia radio stations Hot FM and 4RFM have both had their transmitters stolen. Southern Cross Austereo had its 91.3 MHz HOT FM transmitter stolen from its site at the Carborough Range. The 91.3 MHz transmitter taken consisted of a Crown Broadcast FM30 Exciter, PA1000 Power Amplifier, and PS1000 Power Supply.

The local community station 4RFM also had its transmitter stolen at the same time from a nearby site. Its gear was not described.

The thieves used a crow bar to get through the door of the 91.3 MHz site and an angle grinder through the door of the community radio location. Both thefts seem targeted as none of the two-way radio equipment was taken from either location

Matt Paton is a Southern Cross Austereo Engineer. He has asked that those involved in radio to keep a look out for the stolen equipment. Paton notes that the market for broadcast transmitters isn't massive in Australia. As such, if anybody gets offered a black market deal for such equipment could they please call the Moranbah Australia Police at 07 4941 6200. (WIA News)

**

WORLDBEAT: LONDON OLYMPIC OVER BUT COMMEMORATIVE STATION SETTING RECORDS

The summer 2012 Olympics may be over but operations at 2o12L, the flagship station celebrating the Olympic and Paralympic Games continues. Further information about the station can be found on the website at www.2o12L.com. (RSGB)

**

HAM RADIO IN SPACE: 2012 OLYMPICS ON THE HAM-SATS

Meantime, another Olympic Special Event Station, 2o12W has been active on the amateur radio satellites working stations in the USA and across Europe. The 2o12W satellite station is being operated by Ken Eaton, GW1FKY, using a Kenwood TS-2000 feeding a 5-element dual-band Elk antenna mounted on a rotator on the portable cabin. For details of his operation please check out www.rsgb.org/operating/ and click on London Olympics 2012. (RSGB)

**

RADIO IN SPACE: RUSSIA LAUNCHES NON-HAM RS-40

A Russian research satellite called RS-40 carrying experiments built by students and research staff of the Siberian State Aerospace University was launched on July 28. Signals from the new bird have been heard on 435.365 MHz and were first reported by Maik Hermenau on the AMSAT-DL mailing list.

While the new satellite uses amateur 70 cm band downlinks it does not appear to include an amateur radio mission. In fact, as we go to air details of the downlink signaling protocol have not been made available. About the only thing certain is that systems aboard this 65 kilogram satellite includes testing advanced technological solutions to be incorporated into future missions. More about RS-40 is on-line at tinyurl.com/99ryrw8 (PE0SAT, ANS)

**

DX

In DX, preparations for the ZL9HR DXpedition to Campbell Island are on schedule for activation from November 28th to December 9th. The containers to carry all required equipment are currently being prepared and loaded, ready to be shipped out of Sydney around September 15th. More information is on-line at ZL9HR dot com.

IZ2WMW will be on the air stroke 9Afrom Krk Island between August 18th to the 25th. Activity will be holiday style on the HF bands. QSL via hs home callsign, direct or by the bureau.

W9XY will be active from the Bahamas as C6AXY between November 4th to the 9th. His operation will be holiday style on 40 through 10 meters

using mostly CW and SSB,with maybe some RTTY or PSK31. QSL via W9XY.

AA5UK will be operating stroke EA6 froma in the Balearic Islands between October 20th and the 31st. Activity will be holiday style on 80 though 6 meters using SSB, RTTY and PSK31. QSL direct via his home callsign, by the bureau or electronically using Logbook of the World or eQSL.

4F2KWT will be active as DX0N from the rare Bongao Island located in the province of Tawi-Tawi, Philippines, sometime in September. Look for more details o be forthcoming at www.qrz.com/db/DX0N

Lastly, a group of Polish radio amateurs will be operational as from Mauritania as 5T0SP between November 24th and December 10th, from Mauritania. Activity will be on all HF bands, 160-10 meters using CW, SSB an RTTY. There will be a focus on Japan and the Far East.

(Above from various DX news sources)

**

THAT FINAL ITEM: MORSE CODE ON MARS

And finally this week, the story of Morse code on Mars. When the Mars rover Curiosity moves around the red planet it leaves a series on dots and dashes on the surface. These dots and dashes are a part of Curiosity's wheels and are made by square and rectangular imprints on the rovers treads.

According to Jet Propulsion Laboratory's Mars Rover Mechanical Engineering Team, these holes or imprints actually have a purpose as odometer markers. JPL Engineers are looking at the tread marks to verify that Curiosity has traversed the distance it expects.

So what pattern did JPL choose to put on Curiosity's wheels? The holes are in a pattern of short squares and longer rectangles as in the ancient and honorable Morse code. And what does it spell out in C-W? Simply the three letters JPL.

The full story of this Morse code on Mars is on-line at tinyurl.com/cw-on-mars. And less we forget, you can follow Curiosity on Facebook at www.facebook.com/MarsCuriosity. (Various sources)

http://forums.qrz.com/showthread.php?358043-100-Years-of-Brazilian-Air-force-Special-Cal-ZW100AF-during-CVA-contest&goto=newpost

This weekent, saturday 18/19 from 21 to 21 UTC starts the first phase of the Brazilian CVA contest in CW Mode and the next weekend, 25/26 from 21 to 21 UTC occurs the Phone phase.

This brazilian contest mobilize brazilian hams from all brazilian states and islands, like PY0F and PY0T stations.

The "Casa do Radioamador e PX Clube de Nilópolis" (Nilópolis Ham's and CB's home) will be active in CW and Phone phases transmiting from the "Afonsos's Field", the beginning, the cradle, of brazilian military aviation using the special callsign ZW100AF and we will be active from 28 to 3,5 MHZ.

QSL's to all contacts will be sent through Bureau, LOTW (soon) or Direct if you send a Direct card with SASE or IRC.

The CVA is a traditionary brazilian contest in commemoration to soldier's day and the rules must be find in: http://www.cvadx.org/

We are waiting for you in QRG.

N6L @ Lassen Volcanic National Park KFF-049 WVA-09 is QRT. Thanks! Video up.

Posted: 16 Aug 2012 05:39 PM PDT
http://forums.qrz.com/showthread.php?358028-N6L-Lassen-Volcanic-National-Park-KFF-049-WVA-09-is-QRT-Thanks!-Video-up&goto=newpost

The event was logistically challenging this year due to a fire within and around the park. We eventually got some good runs in the evenings and were greeted with some fun qso's and pileups. We are working on adding photos and Video to the website and some video is up now.

This is a great example of how awesome a Special Event Station can be and hopefully will inspire those of you considering organizing one.

If you had a qso w/ N6L please check the qsl info here on qrz and make note of it asap as we will be releasing the n6l call soon.

If we missed your call, darn it, next year I guess. Better yet, come join us.

We wanted to thank all the operators who contacted us and also QRZ.COM, Buddipole, and Lassen Volcanic National Park Staff.

Nashob Valley Radio Club to Make Contact at Lighthouse Event:

Posted: 16 Aug 2012 05:04 PM PDT
http://www.eham.net/articles/28834

PEPPERELL -- The members of the Nashoba Valley Amateur Radio Club will head down to the Cape this weekend to operate out of the Cape Cod Highland Lighthouse for the 15th annual International Lighthouse Lightship Weekend. Amateur radio operators from around the world will be operating from lighthouse and lightship locations over the weekend. Last year, 469 lighthouses and lightships participated, representing 55 countries. About four or five members of the Nashoba Valley Amateur Radio Club participated in the event last year, said Roland Guilmet, public information officer for the club. This year, interest has grown and about double the members will participate. While most amateur radio events are contests in which radio operators try to make the most contacts in 48 hours, this event is more relaxed, said Guilmet. "The feel of it isn't contest-oriented," said Guilmet. "You chat with other lighthouses and it's very informal and not as structured as some of the typical contesting events."

//
Radio Enthusiasts Aim to Light Up a Moray Landmark:

Posted: 16 Aug 2012 05:04 PM PDT
http://www.eham.net/articles/28833

A famous Moray landmark will be featured on a world-wide stage this weekend thanks to the work of the local amateur radio community. Moray Firth Amateur Radio Society (MFARS) members are manning a temporary broadcast station at the Covesea Café near Lossiemouth to mark 'International Lighthouse Day'. Radio enthusiasts from around the world use the special day to acknowledge the continuing importance of their hobby as well as drawing attention to some of the most iconic landmarks along every coastline on the planet. MFARS President, Bill Cecil, says that while the Society would have liked to broadcast directly from the iconic Covesea light that is not possible at present as the building is currently closed and subject to sale by the Northern Lighthouse Board. However, the Moray enthusiasts will 'set up shop' alongside the light and welcome anyone with an interest or just plain curious about the hobby to come along for a chat.

Come see Riley Hollingsworth, K4ZDH, at South Jersey's Biggest Hamfest -
Sept 16

Posted: 16 Aug 2012 07:58 PM PDT
http://forums.qrz.com/showthread.php?358041-Come-see-Riley-Hollingsworth-K4ZDH-at-South-Jersey-s-Biggest-Hamfest-Sept-16&goto=newpost

Sunday Sept 16

Slight change of plans! South Jersey's biggest hamfest will now star Riley Hollingsworth, K4ZDH, the former FCC rules enforcer for amateur radio!

Riley will visit, mingle, chat, answer questions, and take pictures with the attendees. Bring your cameras!

Gloucester County Amateur Radio Club in Mullica Hill, NJ (W2MMD). South Jersey's biggest hamfest!

$6 admission - non-ham wives and kids under 16 are free

$10 tables (yours or ours) or table space up to 8ft under covered pavilions (does not include price of admission)

$5 tailgating per vehicle space up to 10ft in open grassy areas only (does not include price of admission). Tailgating under covered pavilions falls under "Table Rules" rates.

22 miles from Philadelphia

28 from Wilmington, DE

67 miles from Dover, DE

77 miles from Reading, PA

81 miles from Allentown, PA

91 miles from Baltimore

107 miles from NYC

125 miles from Harrisburg, PA

4-H Fairgrounds, 240 Bridgeton Pike (Route 77 South), Mullica Hill, NJ. Off of exit 2 on NJ Turnpike.

Map: http://maps.google.com/maps?q=240+Br...93.076172&z=16

Website and hamfest flyer: www.w2mmd.org

If you like a beautiful scenic drive, full of farmland, this is the place. Trust me. I grew up in Carteret, NJ and worked in the NYC/ northern NJ area til 2002.

Youngsters On The Air

Belgium-The Netherlands 2012

During the summer of 2012 a youth radio camp will be held in Belgium, organized

by UBA youth commission and VERON. Location will be close to the Dutch border.

In this week many young radio amateurs from 9 different

European countries will be participating during different activities: contesting,

ARDF, presentations, fieldday, visiting radio stations etc

This week will be organized by members of the VERON and UBA.

It will be a great experience for the young HAM□s which they will never forget,

during the event we are several times active with the call: ON4YOTA

When:

19-26 August 2012

Participants:

9 teams from different European member associations of IARU R1. A

team consist of 1 team leader, this could be an older person, and 4 team members

with the age between 18-25 years.

73's de Florian PD0MP 16 years old.

ILLW #US0114 Special Event Station- Port Washington, WI USA

Posted: 17 Aug 2012 10:44 AM PDT
http://forums.qrz.com/showthread.php?358105-ILLW-US0114-Special-Event-Station-Port-Washington-WI-USA&goto=newpost

The Ozaukee Radio Club and LeFrog club will be operating

a Special Event Station for the International Lighthouse Lightship Weekend.

This is Saturday August 18th, and Sunday August 19th, 2012, during

the Port Washington's Maritime Heritage Festival.

We will be at the 1860 Light Station and Museum in Port Washington, WI.

Local Ozaukee county radio club members hope to contact members

of the Luxembourg Amateur Radio Society on the 10th anniversary of

the dedication of the 1860 Light Station tower and lantern. The

tower and lantern restoration was made possible by the country of

Luxembourg as a gift to the people of the Port Washington area of

Luxembourg descent, and as a memorial to those American service

men that liberated their country from German occupation in 1944.

We will have a tri-band beam for 20-15-10m, but will

concentrate on 20m, depending on band conditions.

We will also operate a D-STAR station.

We created a Special Event QSL card as well.

Sat 18th 7am - 5pm Central (1200 - 2200 UTC)

Sun 19th 7am - 3pm Central (1200 - 2000 UTC)

Band: 20m

D-STAR: Repeater KC9LKZ C and Reflector 019C

Club callsign: W9CQO

SARL NEWS - SUNDAY 19 AUGUST 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

In the news today:

INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 2012

CLUBS INVITED TO AFFILIATE TO THE SARL

SARL HF DIGITAL CONTEST TODAY

SARL RTA COMES TO PORT ELIZABETH NEXT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

INTERNATIONAL LIGHTHOUSE/LIGHTSHIP WEEKEND 2012

More than 400 lighthouses in almost 50 countries and territories - from Argentina to Wales - will be on the air for 2012 International Lighthouse/Lightship Weekend (ILLW), organized by Scotland's Ayr Amateur Radio Group (AARG). The event, held for the 15th year in a row, takes place Saturday, August 18th 00:01 UTC through Sunday, August 19 23:59 UTC. While not a contest, the ILLW is more of a QSO Party and Amateur Radio demonstration. The ILLW aims to raise public awareness of lighthouses and lightships and the need for their preservation and restoration, promote Amateur Radio and foster international goodwill. Stations at more than 50 US lights are expected to be on the air for the event, and several stations will identify with special event call signs. Participating lighthouse/lightship stations do not have to be inside the structure or on the vessel itself; a Field Day-type setup at or adjacent to the light is sufficient.

There are still a few hours left to talk to one of the many lighthouses and ships on the air.

CLUBS INVITED TO AFFILIATE TO THE SARL

Radio Clubs in South Africa are invited to affiliate to the SARL and enjoy the benefit of having their activities published on the web, in SARLNEWS and in Radio ZS. Affiliated clubs are also assisted with special call sign applications and qualify to manage an RAE examination centre as well as having their web URL and email address linked from www.sarl.org.za.

To affiliate to the SARL a club should complete an application form and summit the form together with a copy of their constitution, and a list and contact details of the committee. If a list of current club members is supplied to the SARL we will be able to update the call book data base which shows a member's club affiliation. Send all the details to secretary@sarl.org.za. There is no charge to affiliate.

SARL RTA COMES TO PORT ELIZABETH NEXT

1 September may be officially Spring Day in South Africa, but for Port Elizabeth and surrounding areas there is an added attraction: "the SARL Radio Technology in Action Symposium". It will be held on 1 September at the Nelson Mandela Metropolitan University. This year's hands-on programme has seen wide support in KwaZulu-Natal and Gauteng. It is now up to the Eastern Cape to set a new attendance record. Pre-booking opens on Monday. Visit www.sarl.org.za for details. Watch the home page for more details.

JOIN THE RYRY ROOKIES THIS EVENING

On Sunday, August 19, the digital modes return to the Rookie Roundup. Created to give the budding operator a place to learn about contesting at an easier pace, the Rookie Roundup is a six hour contest open for all amateurs who have been licensed for three years or less; if you were licensed in 2010, 2011 or 2012, you qualify as a Rookie.

By popular request, a multi-operator category has been created for the Rookie Roundup. Several Rookies can operate from one location as a group. You use the same call and name in the exchange, regardless of which operator is at the keyboard. This category is perfect for clubs wanting to help their newer members get more active.

A team competition has also been created: Up to five single operator Rookies -- each operating from their own location -- can band together as a team and combine their scores. Team members are also recognized for their individual efforts. Multi-operator entries and non-Rookies are not permitted to be on a team.

Old Timers have a place in the Rookie Roundup, as well. Elmering is a critical component of the Rookie Roundup, and Old Timers are encouraged to not only get on and work the Rookies, but to host a Rookie and assist them with learning how to participate. Rookies can work anybody,

but non-Rookies can only work Rookies. The contest exchange is easy: just send both call signs, your first name and your location (this is either your US state, Canadian province, Mexican call area or "DX" if you're not in the US, Canada or Mexico).

All official entries must use this form: www.b4h.net/arrlrr/index.php. But don't dally -- you only have three days to submit your score summary. All score summaries must be received by 23:59 UTC Wednesday, August 22, 2012.

The 2012 ARRL RTTY Rookie Roundup runs from 18:00 UTC through 23:59 UTC Sunday, August 19, 2012. Complete rules and score submission information can be found at www.arrl.org/rookie-roundup. A great idea for a club to arrange a local Rookie activity in South Africa! May be PEARS would buy into the idea as they already run a beginners event.

NEW INFORMATION ABOUT QSL BUREAU ON THE WEB PAGE

Please take note of the changes to the QSL bureau information on the SARL web page. Please read this and keep it in mind. Pleasant DX-ing to you.

CONTEST NEWS

The SARL HF Digital Contest is on the air this afternoon from 13:00 to 16:00 UTC. The rules were published in SARL News last Sunday and can be found in the 2012 SARL Contest Manual. This afternoon you can operate PSK31 and RTTY on 20, 40 and 80 metres.

For the SARL HF Phone Contest the Contest Committee has received 26 single operator logs, 1 multi-operator log and 2 check logs. The number of logs received is lower than the past few years and a number of logs were received in the wrong format. Please read General Rule 5 and 6. The results will be made known early in the coming week.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is declining again. There are currently few sunspot regions visible and none are posing a threat for strong solar flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 35.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. 10 m openings will be less frequent due to the lower solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 19 August - SARL HF digital competition from 13:00 to 16:00 UTC. 19 August - ARRL RTTY Rookie Roundup from 18:00 UTC to 23:59 UTC. 26 August - SARL HF CW competition. 27 August - Last day to submit logs for SARL HF digital contest to zs4bfn@netactive.co.za or

Bloemfontein ARC, Box 33211, Fichardt Park, 9317, 1 September - RTA in Port Elizabeth at the Nelson Mandela Metropolitan University, pre-booking starts tomorrow, visit www.sarl.org.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George Honiball, ZS6NE.

Thank you for listening, 73. /EX

Beaming Out Greetings to World from Newport Lighthouse:

Posted: 17 Aug 2012 05:12 PM PDT
http://www.eham.net/articles/28840

NEWPORT Amateur Radio Society will be taking part in a worldwide event this weekend, when they man the East Usk Lighthouse. The society will be taking part in the annual International Lighthouse and Lightship weekend, which will see more than 660 lighthouses and lightships across the world on the air using amateur radio. Visitors will be able to listen to information and greetings being transmitted and received from lighthouses and lightships from all parts of the world. The society will be at the East Usk Lighthouse from 9am until 6pm on Saturday. The station will use the special callsign GB4EUL. Visitors are welcome and there will be someone there to answer any questions.

The Sun's Strange Shape Revealed:

Posted: 17 Aug 2012 05:12 PM PDT
http://www.eham.net/articles/28838

(SPACE.com) In a strange twist of solar physics, the shape of our sun is rounder than previously thought, yet at the same time, it is also flatter -- or squashed -- more often, making the star wider at the middle than at its poles, scientists say. The findings, announced today (Aug. 16), raise new mysteries about activity in the interior ofthe sun, researchers added. The sun goes through rhythmic changes in activity. During these approximately 11-year-long solar cycles, the number of sunspots on the surface of the sun can rise and fall dramatically.

//
Propagation Forecast Bulletin #33 de K7RA:

Posted: 17 Aug 2012 04:07 PM PDT
http://www.eham.net/articles/28837

There was a big drop in solar activity over the past week, with the
average daily sunspot numbers declining nearly 42 points to 77.6,
and average daily solar flux down 20 points to 114.7.

A little something for W9IMS in the spirit of the MotoGP event today

Posted: 18 Aug 2012 06:38 PM PDT
http://forums.qrz.com/showthread.php?358270-A-little-something-for-W9IMS-in-the-spirit-of-the-MotoGP-event-today&goto=newpost

Great contact earlier this evening on 40m. I found the event on accident while operating QRP from West Branch State Park in NE Ohio. Some friends were camping and I rode out for the day. The pic below was the mode of transportation. Definitely appropriate for the event ;)

Wish I could have gotten a picture at the park but the batteries in my phone were shot by then. The shoulder bag over the handlebar has my FT-817 and a battery. The satchel bungee'd on the back has a dipole, feed line, stakes and whatnot.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, WA2HMM, NG3K & ADXO, W3BTX, W3UR & The Daily DX, K4ELV, N4AA & QRZ DX, N4JF, KH6BZF, W7XA, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, CT1FJZ, CX3AL, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, LZ1ZF, OZ6OM & 50 MHz DX News, OK6DJ, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SM1TDE, SM3CXS, SP5UAF, UR7UD, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF), YB Land DX Club and YF1AR for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 12th-August, through Sunday, 19th-August there were 220 countries active. Countries available: 1S, 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4W, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PY, PZ, R1FJ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, VU7, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5T0, MAURITANIA (Update). A group of Polish radio amateurs will be active as 5T0SP between November 24th and December 10th, from Mauritania. They've already got their license which was possible thanks to the great kindness

of the l'Autorit&#65533; de R&#65533;gulation of Mauretania and with a great help from Jean, 5T0JL. Activity will be on all HF bands, 160-10 meters using CW, SSB and the Digital modes. Their license does not allow for 6 meters operations - perhaps it will change but it is not sure now. There will be a focus on JA and Far East. Operators mentioned are Bob/SP2EBG, Jan/SP3CYY, Jurek/SP3GEM, Wlodek/SP6EQZ, Ryszard/SP6FXY, Janusz/SP6IXF and Jean/5T0JL. They have not yet decided who will be the QSL Manager. It is not sure if they will have Internet access at their QTH. If they have access to the Internet, the logs will be uploaded daily to the ClubLog. Otherwise, logs will be uploaded to the ClubLog after the DXpedition.
The DXpedition's Web site is at: http://5t0sp.dxing.pl
You can find there the latest news and also take part in their survey for bands/modes most needed. Any other questions or suggestions can be sent to: 5t0sp@dxing.pl

5Z, KENYA. Eric, SM1TDE, will be active as 5Z4/SM1TDE from Diani Beach, Mombasa, between November 5-22nd. This will be a family vacation and activity will be limited to how much his XYL and kids allow. Activity will be on 40-10 meters on CW. QSL via his home callsign, by the Bureau, direct or LoTW. He thanks Ted, 5Z4NU, for getting his license application through the system. For more details, visit his HAM Blog at: http://www.sm1tde.bloggspace.se

8Q, MALDIVES. Juergen, OE4JHW, will be active as 8Q7OE from the Maldives between September 3-14th. Activity will be holiday style on 40-10 meters using SSB and BPSK (mode at night). He will focus on stations from DL, HB0, HB9 and OE, as well as on North and South America. QSL via his home callsign, direct or by the Bureau. Also, LoTW and eQSL.

9/11 SPECIAL EVENT STATIONS.....
* Members of the Symbol Technologies Amateur Radio Club (STARC), will be operational as N1Y, September 8th and 9th. Activity is commemorating the September 11th, 2001, terrorist attacks. They will be operating on 40/20/15 meters using CW and SSB, in the "General" portions of the bands. A special QSL may be had by sending a SASE to the QRZ.com address of W2SBL.

* Look for special event station N3U/Flt93 (N3U/United Flight 93) to be activated once again between September 8-13th, to remind "Amateur Radio Operators World-Wide" of the tragic events that happened near "Shanksville (Pa), New York City and Washington DC, on September 11, 2001." Operators mentioned are Bob/W3BTX and Roy/W3TEF. QSL N3U/Flt 93 via W3PN, by the Bureau or direct (Please include SASE and enough return postage. If additional postage is needed...your QSL will be returned via the BUREAU). For more details, QRZ.com.

* Look for Bob/W3BTX and Roy/W3TEF to be active as P49T (P49Towers) from Aruba between September 14-21st. QSL via W3BTX, by the W3 Bureau or direct. Don't QSL via the P4 Bureau or eQSL.

D2, ANGOLA. Paulo "Paul", CT1FJZ, informs OPDX that he is now in Angola and is expected to be there for one year working in Benguela and Huambo.

Look for him to be active as D2FJZ, mainly on the weekends and limited during the weekdays. Activity will be on 80-10 meters SSB using a TS-480S with 100 watts into a EZwire (160-10m) and CT-V5a vertical antenna (20/17/15/12/10m). QSL via his home callsign, by the Bureau or direct.

DU1, PHILIPPINES. Alan, W7XA, will be active as DU1/W7XA near Tagaytay Ridge which is about 40 miles south of Manila between now and August 27th. Activity will be on 20/17/15 meters using mostly CW and some SSB depending on conditions. Alan informs OPDX that he will use 100 watts and a dipole only. QSL via his home callsign (QRZ.com).

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2012 - N6G Golden Gate Bridge 75th Anniversary:
http://www.youtube.com/watch?v`gWOJ0T5Xo#!
2011 - FP Cambridge University Wireless Society DXpedition:
http://www.youtube.com/watch?vKfnO4TEPU
http://www.youtube.com/watch?vPmGdoc-6Q
http://www.youtube.com/watch?vQV62WvYIU
http://www.youtube.com/watch?vjdRPAIT-Q
http://www.youtube.com/watch?vFC7c4ABig
2011 - TP50CE Short DXpedition (Russian Op):
http://www.youtube.com/watch?vkjDXL4wzY

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.

EM0, UKRAINE (Special Event/WFF Op). Members of the Belotserkovsky Radio Club (BCRC) plan to be active as EM0UBC between August 24-26th. Activity is to celebrate the Ukraine's Independence Day, and the BCRC will operate from the territory of the National Park "Alexandria", National Academy of Sciences of Ukraine (WFF Ukraine - URFF-91, Ukrainian Flora Fauna - UYFF-33). QSO also counts towards the "Ukrainian Rivers Award" (URA-034-Ros'River). QSL via UR4UXD. For more details, see: http://bcrc.at.ua

FT5W & FT5X, CROZET AND KERGUELEN. Gildas, TU5KG, will once again be active a TU5KG/MM in the vicinity of Crozet (FT5W?) and Kerguelen (FT5X?) during November and December. QSL via F4DXW.

HS, THAILAND. Dennis, K7BV, having recovered from a serious medical condition, is returning to Asia for a short visit between August 25th and September 2nd. He will be using his HS0ZKS callsign on HF bands from the home of John, HS1CHB, and hopes to QSO friends from around the world. Dennis may also get on the air from Japan as well using his call JF1XJR. QSL via K7BV's new QTH, 290 West Road, Turkey, NC 28393.

IOTA NEWS.....
AS-149. Operators Gennady/R3BY, Max/RU5D and Oleg/R7LP will be active as RI0FM from Moneron Island (RR-16-01, RDA SL-16) sometime between late August/early September. Activity will be on the

HF bands. QSL via R3BY, by the Bureau or direct:
Gennady Arkhipov, p.Kommunarka, 102-4, Moskovskaya obl, 142770,
RUSSIA.

EU-008. (Update) Members of the Black Country DX & Contest Group will
be active as MS0OXE from the Isle of Tiree (IOSA NH04, SCOTIA
DI10, IO66ML, WAB NL94), in the Inner Hebrides Islands between
September 13-21st. Operators mentioned are Simon/M0VKY, James/
M0YOM, Drew/G7DMO, Brian/G0JKY and Terry/G4MKP. Activity will
be on 80-10 meters using CW, SSB and RTTY. QSL via M0URX OQRS.
Logs will be uploaded to ClubLog, LoTW and eQSL. Visit their
Web site at: http://ms0oxe.webs.com
They would like to thank Anthony, MW0JZE, for the loan of one
of the hex beams they will be using:
http://www.g3txq-hexbeam.com

EU-064. Marc, F6HQP, will be active as F6HQP/p from Yeu Island (DIFM
AT21) between August 19-21st. QSL via the Bureau.

EU-176. Jorgen, SM3CXS, will once again be active as SG3U from Grimskar
Island between August 23-26th. Activity will be on CW and SSB,
probably on the IOTA frequencies. QSL via his home callsign,
by the Bureau or direct and also LoTW.

EU-183. A group of Romanian operators will be active as YP1S from
Sacalinu Mare Island between August 23-29th. QSL via YO9FNP.

NA-039. Operators Etahn/K8GU, Kevin/KJ4OAP and Nathaniel/W2NAF will
be active as KL7/homecall from Adak Island between August 23rd
and September 12th. Activity will be on 40-6 meters, including
the 30/17/12 meter bands, using CW and SSB. QSL via their home
callsigns or LoTW.

SA-037. (Update) Member of the Grupo DX Caracas have rescheduled their
YW5B DXpedition to La Blanquilla Island between August 21-27th.
Activity will be on 160-2 meters using CW, SSB, FM, Satellites
and the Digital modes. QSL Manager is DM4TI.

KH8, AMERICAN SAMOA. Bill, N6MW, and possibly 1-2 other operators (TBA) will be active as KH8/N6MW from a hotel in Tutuila, south of the Pago Pago harbor area (to avoid mountain low angle cut off) between November 8-19th. Activity will be on 160-10 meters using mainly CW, but some SSB and RTTY when things slow down. They will have 2 stations with one on the air 24/7. Focus is to work as many stations as possible, 160 meters and looking for EU. 15 meters is the anticipated prime band. QSL via LoTW. For direct and bureau QSL - TBA. For more details and updates, visit: http://n6mw.jimdo.com

LX, LUXEMBOURG. Anne, OH2YL, will be active as LX/OH2YL from Luxembourg between August 24-31st. Activity will be on 80-10 meters using CW. QSL via her home callsign.

PB100, NETHERLANDS (Special Event). To commemorate 100th anniversary of the ITU Prefixes, look for special event station PB100PREFIX to be active between October 4-31st. QSL via PB0P. After the tragic loss of the Titanic (Callsign MGY, the, "M", is from the Marconi company) in April 1912, there was an acknowledgement that there should be international standards for radio communications. Therefore, the leading colonial countries planned several meetings in the aftermath of the loss of the Titanic. For more details, visit: http://www.PB100PREFIX.nl

7O6T QSL STATUS. Bernie, W3UR, reports that the 7O6T QSL cards are expected to begin going out in September. For those who donated they have already sent the LoTW confirmations.

9M4SLL ON LOTW. Tim, M0URX, reports: "9M4SLL log has been uploaded to LoTW, there is currently a LONG delay on the LoTW system please wait for LoTW to process the file. Log has now been uploaded to Club Log online log search. Expeditions page."

QSL HOUSE CLEANING. Henryk, SM0JHF, reports, "I am retired now and can no longer afford sending all QSL cards automatically. I have in the past 50 years personally filled in and shipped more than 100k QSL cards for my activities using the following callsigns: SP5AHL (1960-1966), 3Z0L (1969), SP5PWK (1969-1974), SM0JHF (since 1978), SK0MT, SK0UX, K6JHF, C56JHF, S92JHF, D44CF, 9H3HF, F0HWF, VK2EHK, SV8/SM0JHF, TA0/SM0JHF, SM0JHF/HI3, SM0JHF/HI9, TK/SM0JHF, IS0/SM0JHF, 5B/SM0JHF, 6W/SM0JHF, VU3HKE and others." He will "clean house" and dispose of blank cards by the end of this year. If you need a card for any of the above call-signs, you need to contact him by E-mail: sm0jhf@gmail.com
He states, "Please do not send any QSL cards to me either direct or via any QSL bureau. I don't collect QSL cards and cards via bureau are destroyed at arrival. Send only a list, do not send any QSL cards, please."

The YB Land DX Club announces that the callsigns YB67RI and YB26SEAG are now available on Clublog's OQRS and LoTW.

QSL RECEIVED VIA LoTW: 1A0C, 5C13KD, 9K2VO, 9M4SLL, A92IO, AA4NC, AY8A, CR6K, CT1HFS, CY9M, EA1EYG, F4BKV/P, FP/VA2WA, G5O, HG6N, HK0NA, II9P, JA1QOW, KH7Y, LU8ADX, ND3R, NK7U, NT8Z, OH2XX, PY1NB, PY4HO, PY5FB, RT0Q, RT5A, SM4OTI, SP1DMD, SP8VJV, ST0R, SV1NJA, UR3IFD, VE2OJ, VE6MBX and YR0HQ

QSLS RECEIVED VIA MAIL: 2O12L, 6O0CW, 6Y5WJ, 9M6XRO, AO5ANT, CO8LY, CX7CO, EA1BLX, ES9C, H44UD, HB9SVT, HC1MD, HL1IWD, HV0A, J52HF, JX5O, LU6EF, NH0Z, NN3W, RI1ANA, RI1ANA/MM, RI1ANR, UA1PBA/MM, UA6JCC, T32TX, T32XX, V73AX, VP2ETE, VP2MSN, VY0HL and YR0HQ

QSLS RECEIVED VIA THE BUREAU: 1B1AB, 3B8/F6HMJ, 3D2OU, 4L8A, 5W0OU, 8P5A, 9M2/JE1SCJ, A25SL, AH2R, AO6CHI, C56E, CN8PV, E51MAN, E51NOU, EA6BH, EA6SK, EB6VP, EA8AB, EA8AZ, EA8ADL, EA8AGF, EA8BED, EA8MT, EA8URL, EF8HQ, J25DXA, J28RO, J39A, J6/N7UN, J68UN, K6VVA/KL7, WJ2B/KP2, KP4ED, OG0Z, OH0Z, P40A, P4/W1HEO, PJ4/K5WE, T30UA, T30YA, T31A, TJ3IC, TO1BT, TO5T, TZ6EI, V25WY, V48M, V73BL, VK9XXY, VP2MSC, VP2MWG, VP9/K1XM, VQ9LA, WP4NYZ, WP4U, YI9PSE, Z2/K0YY, ZA/F4DTO, ZD8O, ZD8W, ZF2AH and ZF2EZ

R1000, EUROPEAN RUSSIA (Special Event). Look for special event station R1000M to be active between now and September 30th. Activity is to celebrate 1000th anniversary of the "Unity of the Mordovian People with Peoples of Russia State". Operators menitoned are Alexey/RA4UDC (RDA: MD-05), Dmitry/RA4UVK (RDA: MD-03), Andrey/RW4UW (RDA: MD-05) and Sergey/RZ4UZ (RDA: MD-04). QSL via the Bureau to QSL Manager RA4UVK. A free electronic "Mordovia-1000" award is available. Details about the award are available at: http://r4u.ucoz.net>r4u.ucoz.net
Details about the special event:
http://mineco.e-mordovia.ru/en/index.php?option=com_content&view=article

&idf1&ItemidG6

SPECIAL OPDX BULLETIN. If you missed OPDX.1074.1, containing press releases on the upcoming CY0 Sable Island DXpedition, ZL9HR Campbell Island DXpedition and how to become eligible to participate in an Azores lottery to win a two all-paid packages to the beautiful Azores Islands in the Atlantic, completely free of charge, go to the OPDX's Home page at: http://www.papays.com/opdx1074.1.html

SU30, EGYPT (Special Event). Members of the Egyptian Radio Amateurs Society (ERASD) will activate special event station SU30ASR from Abu Quear, Alexandria, to be on the air between August 24th and September 2nd. Activity is to celebrate the 30th anniversary of "Arab Scouts Radio Camp." Operations will be on the HF bands using CW, SSB and the Digital modes. Operators mentioned are Said/SU1SK, Atef/SU1AO and Ayman/SU1AR. QSL via SM5AQD. Visit the Egyptian Radio Amateurs Society Facebook page to learn of upcoming activities and all news about ERASD at: https://www.facebook.com/pages/The-Egyptian-Radio-Amateurs-Society-For-Development-ERASD/118552214859517

T6, AFGHANISTAN. Ilian, LZ1CNN (ex-YI9LZ), will be active as T6LG from Kandahar between September and February 2013. Activity will be on 80-6 meters using CW and SSB. QSL Manager is LZ1ZF. Postal address since September 1st, 2012, for LZ1ZF is: G. Vodenicharov, P.O. Box 25, 3600 Lom, BULGARIA. All QSOs will be uploaded to LoTW.

T8, PALAU. Ulf, DL5AXX, will once again go to Palau as a combined dive-radio-holiday. Operation will take place from the Palau rental shack <http://palau.rental-shack.com/english> between September 14-28th. Activity will be on 160-10 meters using the callsign T8XX (CW) and T88UE (RTTY). The preferred QSL route is via the OQRS at: http://www.dl5axx.de/dxlog
By the Bureau and direct to the QRZ.com address is also "ok", but no LoTW or eQSL.

VK0H, HEARD ISLAND (Update). The 2014 Heard DXpedition Web page has posted the following:
"15 August 2012 PROJECT DESCRIPTION and TEAM UPDATES
We have posted updates of the Project Description (version 4.3) <http://www.cordell.org/HD/HD_pages/HD_Documents.html>
and the TEAM <http://www.cordell.org/HD/HD_pages/HD_Team.html>.
You will see in the Project Description that we have developed a wide-ranging scientific program, including radio operations (the DXpedition), real-time communications, mountain science, biological science, atmospheric science, astronomical science, documentatioin, and educational outreach.
We are proposing that the AAD collaborate on some of the research.
We have confirmation of the vessel Marion-Dufresne for the expedition, the same vessel we used for VK0IR in 1997. We will now be working with the AAD concerning the permit. We are interested in establishing a collaboration with any person or group that can fit into the research program (or extend it). The next NEWS update will be on Sept. 15. The next round of team members will be announced on October 15, but if you are interested

in joining the team (on the island or offsite), we invite you to contact us anytime."

VP2M, MONTSERRAT. Operators (YL) Babs/DL7AFS and Lot/DJ7ZG will once again be on another DXpedition. This time they will be active as VP2MYL and VP2MGZ, respectively, from Montserrat (NA-103, WLOTA 1475) between November 5-19th. Activity will be on 80-10 meters using RTTY, PSK31, PSK63 and SSB, on the usual DX frequencies. QSL via DL7AFS, by the Bureau or direct to: Baerbel Linge, Eichwaldstr. 86, D-34123 Kassel, Germany. For more information and updates, visit their Web site at: http://www.qsl.net/dl7afs/Index_VP2M.html

VQ9, CHAGOS ISLANDS (Cancelled). Chuck, W4XP, who was expected to be active now as VQ9XP from the club station VQ9X on Diego Garcia Atoll (AF-006, WLOTA 1645, LOC MI62), reports: "I am sorry to report that the station has been placed off-limits by the installation Commander; therefore, I will not be operating from Diego Garcia on this trip."

YB, INDONESIA (IIHG Award). The Indonesia Islands Hunter Groups (IIHG) consists of DXers who are interested in making contacts with amateur radio operators in different islands of Indonesia. Membership of IIHG is free and is open to all interested amateur radio operators and SWL worldwide. There is no special requirements. IIHG sponsors several special and attractive operating awards. The main award is the Nusantara Award. The main goal of this award is to encourage amateur radio activities from as many different islands as possible in the vast archipelago of Indonesia. For complete details and rules on the Nusantara Award, visit the following Web pages: http://www.nusantaraaward.com http://www.ybdxc.net/2012/08/nusantara-award.html

ZA, ALBANIA. Operators Petr/OK1FCJ, Pavel/OK1DX and David/OK6DJ will be active as ZA/homecall between September 27th and October 3rd. Activity will be on all HF bands, 160-10 meters, including 30/17/12 meters, using CW, SSB and RTTY. The team will also be active in the CQWW DX RTTY Contest (September 29-30th) as ZA/OL8R. The equipment will be an Elecraft K3 and Kenwood TS850 into a SpiderBeam (20/15/10m), 40-10m vertical, 80m dipole and 160 meter LW. QSL ZA/OL8R and ZA/OK1FCJ via OK1DRQ, ZA/OK1DX via OK1DX, and ZA/OK6DJ to LoTW, eQSL, by the Bureau or direct to home callsign.

ZD9, GOUGH ISLAND. Look for Paul, ZD9KN, to be active from Gough Island (AF-030) until September 31st. He is there working as a radio/electronics technician. Activity will be on 160-10 meters using only SSB. His equipment is a Yaesu FT-2000 into a directive Multiband and Inverted V dipole. For now the QSL is only via LoTW. All information to receive a QSL card will be published very soon on QRZ.com. The log is also uploaded to ClubLog. LAST MINUTE UPDATE (Per QRZ.com): Paul states, "ZD9KN log will be uploaded in its entirety to LoTW within 1 year from the end of the DXpedition. The information for the QSL will be published after the end of the DXpedition. The QSL card is via my QSL Manager IZ0UIM or LoTW. The internet connection is not very good unfortunately, so there may be delays in response." Paul recommends that you check his log before sending

a QSL card because there are PIRATES using his callsign. There was a
report of a PIRATE on Sunday morning, August 19th, at 0955z.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 19th August 2012

Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 4th October at 2 p.m. in the ComReg Offices in Dublin. Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis. The closing date for applications to sit this examination is Thursday, 20th September Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

South Eastern Amateur Radio Group

SEARG theory classes continue to run every Wednesday night running up to the next exam in October and our monthly meetings take place in Roanmore Social and Sports Centre, Cleaboy Road, Waterford at 8.30 p.m. on the last Monday of each month. New members are always welcome.

North Cork Radio Group

NCRG are pleased to announce their annual Radio Rally & Electronics Fair to be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn, Blackpool, Cork.

Doors open at 11am and admission is 5 per person (children are free). Raffle tickets will also be available at the door.

The usual traders will be present. Also, due to high demand, anyone wishing to reserve a table, or anyone interested in setting up a stall, should contact Pat Thompson (EI2GHB) on 085 1407715 or Edwin Van Mierlo (EI2HEB) on 086 3885741, or alternatively via email at ei2heb /at/ ei1nc.com, as soon as possible to avoid disappointment.

Cashota Ireland and Cashota

CASOTA- Ireland and CASHOTA - Castles and Stately Homes on the Air, will be holding its 2nd annual Heritage Month, throughout the last two weeks of August to encompass the Irish heritage Fortnight and the whole of September for the many Uk dates and regions. This award is open to anyone wishing to take apart either as an activating station or heritage chaser. All details of this event and CASHOTAS many other awards and events can be found at www.cashota.co.uk, with details for contacting the CASHOTA-Ireland Representative also being listed on the contacts page for Irish locations.

South Dublin Radio Club

South Dublin Radio Club meetings resume on Tuesday next, 21st August. SDR meets on a Tuesday from 8.00 pm to 10.00 pm in the Ballyroan Community Centre, Marian Road, Rathfarnham. New members and visitors are always welcome.

Later this month, Ballyroan Community Centre is holding an Open Day, to enable users of the community centre to showcase their activities. SDR, along with IRTS, will have a stand at this event, which starts at 7.30 pm. on Tuesday 28th August.

Mayo Radio Experimenters Network

The Mayo Radio Experimenters will be taking part in the ILLW weekend activities.We will activate Blacksod Lighthouse, Belmullet, Co. Mayo.We will use the callsign EI0M /P . The Blacksod Lighthouse number isIE0008.Qsl cards through the Buro please.

Activities will commence at Blacksod from 1600 UTC Saturday 18th to 1600 UTC Sunday 19th approx times. Further information is available from www.illw.net and the clubs website ei7mre.org.

Vintage Radio Museum Howth

There will be a talk in the Hurdy Gurdy Museum of Vintage Radio in Howth on Tuesday 21st of August, at 11 AM, to launch the Martello Heritage Trail, given by Pat Herbert. Admission is free. Follow the link for more details. Click on the link :- http://bit.ly/RWO2TO , for more information.

Radio pollution caused by Powerline Technology (PLT)

G0NIG has released a video showing the radio pollution that is generated by existing PLT devices. The link to the video is :-http://bit.ly/Po5xLD

DX News

A special event station with the callsign SU30ASR will be QRV from Alexandria in Egypt from 24 August until 2 September. QSLs go via SM5AQD.

DXers who recently worked Alex UA9YAB as YV7 and YV5/UA9YAB will be saddened to hear of his death while still in Venezuela. It is thought that his death occurred as a result of a bite from a poisonous jellyfish. Our sympathy goes to his XYL Natalia and his two young children.

Last week we mentioned the prefix change for Niue Island in the Pacific. The former ZK2 prefix has been changed to E6. Two stations are due to activate Niue Island from 7 - 21 September. They are W7GJ and ZL1RS who will use the callsigns E6M and E6RS respectively.

Vlad UA4WHX continues with his travels and most recently has been active as EY8/UA4WHX. The length of stay in Tajikistan is unknown and QSLs go via the home call.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

School Notes: Students to Have Radio Contact with Space Station:

Posted: 18 Aug 2012 05:13 PM PDT
http://www.eham.net/articles/28845

Indian Trails Middle School is preparing for an event that will allow students to contact an astronaut aboard the International Space Station via amateur radio. The event, scheduled for the week of Nov. 12, is being made possible through Amateur Radio on the International Space Station, NASA, international space agencies and worldwide amateur radio groups that coordinate scheduled radio contacts between astronauts aboard the space station and schools. The 10-minute live forum will bounce between students and astronauts as the astronauts orbit 250 miles above Earth.

//
Amateur Event Continues to Pack 'Em In:

Posted: 18 Aug 2012 05:13 PM PDT
http://www.eham.net/articles/28844

No motel rooms available for miles, packed restaurants, slow and heavy traffic -- all typical occurrences for a particular early May weekend here in Dayton. It's the annual "Hamvention," regarded as the hamfest of hamfests, attracting radio amateurs from virtually every state in the nation and many foreign countries -- more than 20,000 people most years. This is its 60th anniversary, and despite the poor economy, high cost of gasoline and the growing popularity of wireless Internet communication around the world, the three-day, in-person event shows no signs of slowing down.
And while this year's show was a little less dramatic than the last -- in 2011, someone out on the parking lot accidentally hacked into a sewer main while driving a tent stake -- there was still plenty of action and excitement throughout its three-day run.

//
Into the Airwaves; Amateur Radio Hosts Broadcast from Lighthouse:

Posted: 18 Aug 2012 05:12 PM PDT
http://www.eham.net/articles/28843

LORAIN -- Four amateur radio operators will spend the weekend broadcasting from the Lorain Lighthouse in a global event designed to promote the preservation of beacons of light. With global positioning systems and cell

phones, both lighthouses and amateur radio have become mostly forgotten, said Jeff Evans, founder of Lorain County Wireless Operators. However, when those advanced technologies fail, it is the older systems that people turn to, either for information or safe passage for boats. "When you look at something like amateur radio or the lighthouses, in both instances you have technology that has been around for decades and decades," he said. "We've seen many technologies come and go, but these continue to survive."

//
QSO Radio Show Broadcasting Live on International Shortwave:

Posted: 18 Aug 2012 04:37 PM PDT
http://www.eham.net/articles/28841

The QSO Radio Show is broadcasting Live today from the Huntsville Hamfest on International Shortwave stations WTWW 9480 KHz, WBCQ 9330 KHz, 7490 KHz from 11am - 3pm CDT

1551. [RAC-Bulletin] RAQI Communiqu 2012-03 - 2012-08-19 Amendment to the Ban of Cellular Telephone Use While Driving

Newsgroup: rec.radio.amateur.misc
Date: 2012-08-20 03:46:54 UTC
From: rac-bulletins@eton.ca
Message-ID: <5031B2BD.7030708@rac.ca>
Source record: 2218
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

RAQI Communiqu 2012-03 - 2012-08-19
Amendment to the Ban of Cellular Telephone Use While Driving

The ban on the use of cellular telephones while driving came into force in April 2008. Since that time different police departments have issued tickets for the use of various types of devices which could be construed as telephone systems. Those who have received these tickets have vigorously contested them. The courts which have heard these cases have expanded considerably on the meaning of the law to include a multitude of communications equipment far from being cellular telephones.

RAQI has periodically made representations to various government authorities with a view to excluding amateur radio equipment from the ban on the use of cellular telephones while driving. On different occasions such as the RAQI nets or when meeting with club members RAQI has explained that the SAAQ and the Ministry of Transport were waiting to see in which direction the courts would interpret the cellular telephone law.

RAQI has also pointed out that radio amateurs are not the only group affected by the wider interpretation of the courts. For example, among others, the Ministry of Transport itself, Hydro Qu bec and many others cannot use their radio communications equipment in their own vehicles.

After four years of uncertainty the situation has now been clarified by amendments to the Highway Safety Code which came into effect this past June 6. The new article 439.1 of the code reads as follows:

439.1. No person may, while driving a road vehicle, use a hand-held device that includes a telephone function.

For the purposes of this section, a driver who is holding a hand-held device that includes a telephone function is presumed to be using the device.
This prohibition does not apply to drivers of emergency vehicles in the performance of their duties.

The first paragraph does not apply to a two-way radio, that is to say a cordless voice communication device which does not allow the parties to speak simultaneously.

The Minister may, by order, determine other situations or types of devices to which the prohibition set out in the first paragraph does

not apply.

 The underlined text is the two paragraphs added on June 6, 2012.

The legislature has retained the spirit of the 2008 law to prevent the use of cellular telephones by the general public while driving without restricting those using radio communications systems which were already in use before the arrival of cellular telephones, such as amateur radio.

RAQI is proud to have contributed, by its representations to the authorities concerned, to the clarification of the text of the law banning the use of cellular telephones while driving and permitting ALL QUEBEC RADIOAMATEURS and not just members of RAQI to continue to use their mobile communications equipment in their vehicles as they always have.

RAQI hopes that the radio amateur community recognizes the importance of a strong provincial association and the support it provides.

GB2RS NEWS

Sunday 19th August 2012

The news headlines:

* Deadlines for consultations at RSGB

* Final days of 2012 International lighthouse and lightship operations

* Changes to GB3RS news readings

The deadline for comments on the Strategy and Governance proposals is tomorrow, Monday 20 August. Members can make any final comments in the new "Last Call" topics. The Contest Committee has started a consultation on proposals for next year's General Contest Rules. For access and further information on both, please follow the "We need your Views" link on the RSGB's Home page.

More than 400 lighthouses in almost 50 countries and territories from Argentina to Wales will be on the air again today, 19 August, for 2012 International Lighthouse/Lightship Weekend. Organised by the Ayr Amateur Radio Group, the event is in its 15th year. Stations will be on the air until 2359UTC on the 19th.

Some changes are being made to the GB2RS news readings on 80m affecting listeners in the South of England and Wales. Currently the news is broadcast at 9am on both 3640 and 3650kHz. Effective in two weeks time the 3640kHz reading at 9am will be discontinued and a bulletin comprising of National news, plus regional items for East Anglia, the South East, South West and Wales will go out at 9am only on 3650kHz. The 1800hours National reading on 3650kHz will be discontinued, because there are adequate national readings on 7MHz, 5MHz and 1.99MHz. The RSGB Members' website Broadcast Schedule is being updated. Incorporating all the regional news in the 30-minute time slot may put pressure on the news readers, so please show them some forbearance. If there are some propagation weaknesses in some areas, the VHF and UHF news schedules remain unchanged. Co-incident with these changes, Martyn, G3RFX has stood down as a GB2RS news reader, and he is thanked for his 17-years of dedication to the news service.

The RSGB Convention early bird bookings have been extended to close on 3rd September. Highlights of the programme that includes lectures on the HK0NA DXpedition can be found on the RSGB website. For bookings, visit www.rsgbevents.org.

The IARU Monitoring System Region 1 newsletter reports on a new burst radio system that is affecting the amateur radio operations in the 80, 40, 20 and 15m bands. The IARU Region 1 Monitoring System Coordinator says that the system is active every full hour at plus 1, plus 2 and plus 3 minutes with 10.4 second bursts of 20kHz width. Also, the signals appear to come from France. Audio frequency analysis seems to pin this as being similar to CODAR signals. Germany's Department of Post and Telecommunications has filed a complaint with its French counterpart.

On 3 August the ITU updated its Table of International Callsign Series to reflect a callsign change for Niue Island. In future, callsigns will be issued with the prefix E6 instead of ZK2. Niue Island has a population of about 600 and lies approximately 1700 miles northeast of New Zealand. It is a self-governing island and has been in free association with New Zealand since 1974.

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Today, 19 August, the Rugby (Princethorpe) Annual Radio Rally takes place at Princethorpe College, Princethorpe, Rugby CV23 9PX. Doors open from 10am to 4pm, and admission is £2. Contact Tony, G0OLS on 07759 684 411 for more details.

On Sunday 26 August the Milton Keynes ARS rally takes place at Bletchley Park, Sherwood Drive, Bletchley, Milton Keynes MK3 6EB. Doors open at 9.30am and admission is £2. Parking is available on Sherwood Drive or at the railway station. There will be trade stands and special interest groups.

On bank holiday Monday, 27 August, Huntingdonshire ARS rally will take place at St Neots Community College, Barford Rd, St Neots PE19 2SH. Doors open at 10am and admission is £2. There will be trade stands, car boot area and a Bring & Buy. Contact Clive, G3NKQ on 01480 810 473.

Now for the news of special events

South Tyneside Amateur Radio Society will be operating as GB2SJ from Souter Lighthouse, Coast Road, Whitburn, Sunderland, SR6 7NH today, 19th August.

Carrickfergus Amateur Radio Group will be operating GN0LIX/P from Chaine Memorial Tower in Larne, County Antrim today, 19 August, as part of the International Lighthouse and Lightship Weekend. The station will be active on 20m, 40m and 10m SSB, conditions permitting. All QSL will be via the bureau.

A pair of twinned Special Event Stations, GB175PO and TM175PO, will be running in Dover and Calais to celebrate 175 years of P&O. Operation starts on 11 August and will be running for 30 days. Both stations will have the opportunity to work /MM from ferries at various times during the operation.

Kent Weald Radio Club is operating GB1HA from Friday 24 August until Sunday 2 September. The event is part of sponsored activities being held at the Headcorn Aerodrome, Kent, in aid of the air ambulance and other local charities, and to demonstrate amateur radio to any visitors. Operations will be on HF and VHF and is open to visits from the public through to 2 September.

And now the DX news compiled from 425 DX News and other sources

IZ2WMW will be on the air stroke 9A from Krk Island until 25 August. Activity will be holiday style on the HF bands. QSL via his home callsign, direct or by the bureau.

Ron, DL4ME will be on holiday in Tanzania until 3 September. While there he will operate as 5H3ME mainly on CW.

A YL expedition by Unni, LA6RHA, Chantal, PA5YL, Ruth, IT9ESZ/HB9LFM, Nicky, MM5YLO, Elaine, 2E1BVS and Denise, MM6ZDW is operating from Fair Isle until 22 August. GB2YLS will be on the HF bands using SSB and CW. QSL via MM5YLO either direct or via the bureau.

Mike,DL4ABO will be on the air from Foehr Island until 25 August. Using the callsign DL4ABO/P he will work on the HF bands in holiday style. QSL via his home callsign either direct or via the bureau.

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast. Mike, VK7FB and Anne, VK7BYL will be on the air from the weather station and the lighthouse of Tasmania until 25 August. The lighthouse is in the National Park Tasmania. They will be on the HF bands with an IC- 7000.QSL via VK7FB either direct or via the bureau.

Now the contest news

On 21 August the 1.3GHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

August is the first month of the new 80m Club Sprint series, which continues until November. The SSB leg takes place on Thursday 23 August. The whole series is limited to 100 watts output. Running from 1900 to 2000UTC, the exchange is both callsigns, serial number and name.

The UK©G's Cumulative Contest on Sunday 26th takes place on 5.7GHz, 10GHz and 24GHz. It's the fourth in the series, with the final taking place next month. Running from 1000 to 1600UTC the exchange is signal report, serial number and locator.

The IRTS 2m Counties Contest takes place the same day, with awards for the leading non-EI station in each of the six sections of this 2-hour event. These awards often go to stations in GI, but if you have a good takeoff across the sea to Ireland it's definitely worth a try. Also, if you're a VHF `square basher' and have missing squares in Ireland, it

could be a good afternoon to work some of them. Running from 1300 to 1500UTC using SSB and FM, the exchange is signal report and serial number. EI and GI stations also give their county.

And now the solar factual data for the period from Friday the 10th to Thursday the 16th of August, compiled by Neil Clarke on Friday the 17th August.

At the start of the period seven sunspot groups were visible, however, some decayed and disappeared and others rotated out of view but by the 15th only two groups were still visible. Solar activity was moderate on the 11th when the only M class solar flare of the period took place. In contrast, solar activity was very low on the 12th and the 15th and the remaining days activity was low. Solar flux levels declined from 125 units on the 10th to 98 by the 16th. The average was 110 units. The 90 day solar flux average on the 16th was 126, that's two units down on last week. X-ray flux levels declined from B3.6 units on the 10th to B1.7 by the 15th. The average was B2.7 units. Geomagnetic activity was quiet everyday except for the 13th with an Ap index of 10 units due to a coronal hole disturbance and on the 16th when the Ap index was 12 units due to a small coronal mass ejection in association with the M1 solar flare from the 11th. The average was Ap 7 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from a slow 280 kilometres per second on the 10th to a fast 570 kilometres per second by the 14th. Particle densities were low everyday except for a brief increase to 30 particles per cubic centimetre during the afternoon of the 12th. On the quiet days Bz varied between minus 3 and plus 4 nanoTeslas and between minus a minus 6 and plus 8 nanoTeslas on the most disturbed day. A few station at high latitudes reported a weak aurora on the 13th, 14th and the 16th on 50 and 144MHz. Occasional and patchy sporadic-E took place on 50 and 70MHz.

And finally the solar forecast. This week solar activity is expected to be low at first but could increase to moderate levels later in the week as previous active regions rotate back into view. Solar flux levels should increase and by next weekend be in the 120's or the 130's. Geomagnetic activity could be unsettled today due to a small recurring coronal hole. Activity should then return to quiet levels for the remainder of the week. MUFs during daylight hours at equal latitudes should be about 23MHz for the south and 20MHz for the north. Darkness hour lows should be around 13MHz. Paths this week to the Middle East should have a maximum usable frequency with a 50 per cent success rate of about 22MHz. The optimum working frequency with a 90

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast. per cent success rate will be around 18MHz. The best time to try this path will be between 1100 and 1600 hours. Sporadic-E should take place on some days on the lower VHF bands.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS On Sunday 19 August Wythall Radio Club will be running a Special Event Station at Wythall Carnival. On Tuesday 21st there's a Free 'n' Easy evening at the club. Details from Chris, G0EYO, on 07710 412 819.

On Monday 20 August Aldridge & Barr Beacon Amateur Radio Club is holding a general discussion. Information from Albert, G0KFS on 01922 614 169

On Monday 20 August Friskney and East Lincolnshire Communications Club will hold an SSB club net on 144.165 USB, vertical polarisation. On the 22nd there's a M3+M6 club net on GB3FR repeater and on Friday 24th there's an HF Club net on 3.748MHz. Contact the FELCC Information Line on 07554 362 020.

On Monday 20 August Gloucester Amateur Radio & Electronics Society is having a slide show by Andy Hawkins K4GKK, G4GKK, KI4EIO and VP8QI entitled An Amateur working in Antarctica 1977 thru to 1982. Contact Anne, 2E1GKY, on 01452 548 478, daytime for more information.

On Monday 20 August Lincoln Short-Wave Club LSWC is holding a committee meeting in the Shack at 7.30pm. On the 21st the club will take part in the 1.3GHz UK Activity Contest. The 23rd is a formal meeting until 9pm then operating until 10.30pm and on Friday there's a simplex club net on 145.375MHz from 8pm. Finally, for this week, on 25 August the Saturday Surgery will be in the shack from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 20 August South Birmingham Radio Society is holding a committee meeting and on the 24th it's shack and aerial work. Contact Don on 01214 581 603.

On Monday 20 August Welland Valley Amateur Radio Society is having an open evening and junk sale at Great Bowden Village Hall. On the 24th and 25th GB4GBF will be on the air for Great Bowden Festival. For more information contact Peter D Rivers, G4XEX on 01858 432 105.

On Tuesday 21 August Derby & District Amateur Radio Society will be enjoying a video show. Details from Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 21 August Loughborough & District Amateur Radio Club will be looking at vintage transistor portables, visitors are invited to bring something along. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 22 August Midland Amateur Radio Society has a general meeting when the shack will be open. Details from Norman, G8BHE on 07808 078 003.

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast. On Wednesday 22 August South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Wednesday 22 August Telford & District Amateur Radio Society will be preparing for Hamfest. Contact Mike, G3JKX, on 01952 299 677.

On Thursday 23 August Central Radio Amateur Circle will be enjoying a night on the air on 145.300MHz from 8pm. Details from Martin Hallard, G1TYV, by e-mail to radio-circle@live.co.uk.

On Thursday 23 August Salop Amateur Radio Society is holding a fox hunt. Details on the club website at www.salop- ars.org.uk.

On Friday 24 August Coventry Amateur Radio Society has a visit to Coventry model railway society. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND

On Monday 20 August Angel of the North Amateur Radio Club invites members and visitors to come along and prepare to take part in the contest taking place in two weeks on 1 and 2 September. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 20 August Bolton Wireless Club has a talk on A Visit to Friedrichshafen with Richard, G4HGI. For details, send an email to boltonwireless@gmail.com.

On Monday 20 August Sheffield Amateur Radio Club is holding the final SSB Field Day preparations as well as watching a video. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday 20 August South Manchester Radio and Computer Club will have the monthly technical forum and on the 23rd is watching the Secret War DVD. Details from Ron, G3SVW, on 01619 693 999.

On Tuesday 21 August Morecambe Bay Amateur Radio Society is holding committee meeting No 3. Contact Sheila, on 07867 516 836.

On Wednesday 22 August Denby Dale Radio Club is having a night on the air from 7.30pm on 145.575MHz. Details from Richard, M0RBG, on 07976 220 126.

On Wednesday 22 August Goole Radio and Electronics Society is holding an antenna test session. Contact Ken, G6YYN, on 01757 638 539.

On Wednesday 22 August Hornsea Amateur Radio Club is having a talk on High Performance Receivers by M0HCN and is taking part in the 80m Club Sprint SSB on the 23rd Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Thursday 23 August Northumbria ARC are having a surplus equipment sale starting at 7pm. Visitors are invited to bring any of their own items for sale too. Contact Roy McCluskey by e-mail roymccluskey@hotmail.co.uk.

On Thursday 23 August Wakefield & District Radio Society will be taking part in a debrief regarding Woolley Edge. More details from Ken, G8FSO on 07900 563 117.

On Friday 24 August East Cleveland Amateur Radio Club is having a night on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast. On Saturday 25 August Tynemouth Amateur Radio Club is holding a weekend Olympic Field Day. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Tuesday 21 August Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 22 August Lothians Radio Society is holding an informal pub night. Contact Alan J. Masson, GM3PSP, 0131 623 4580.

On Thursday 23 August Aberdeen Amateur Radio Society is having a rag chew evening. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA Advance notice now of the next Advanced revision course run by the Chelmsford Amateur Radio Society that starts Thursday, 25 October. This short revision course is aimed at those who have already studied at home or elsewhere. For more details speak to Clive, G1EUC on 01245 224 577.

On Sunday 19 August Farnborough & District Radio Society is holding a slow CW net on 3.570MHz, a 2m net on 144.675MHz, starting at 8pm on the 21st and, on the 24th, an 80m CW net on 3.570MHz starting at 1pm and a Top Band net on 1.995MHz starting at 8pm. All are welcome to join in. Neville, G3SPD, 01252 404816.

On Monday 20 August Braintree & District Amateur Radio Society has an aerial clinic. For more information contact John, M5AJB, on 01787 460 947.

On Monday 20 August Burnham Beeches Radio Club is on the air and has a Natter Nite. Contact Dave, G4XDU, on 01628 625 720.

On Monday 20 August East Kent Radio Society has no meeting. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 20 August Surrey Radio Contact Club is having a Natter and Fix it night. Contact John, G3MCX, on 02086 883 322.

On Tuesday 21 August Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday 21 August Bromley & District Amateur Radio Society is holding a BBQ event organised by G8ITB. Details from Andy, G4WGZ, on 01689 878 089.

On Tuesday 21 August Stevenage & District Amateur Radio Society has a QSL Night, members and visitors are asked to bring along their favourite cards. Information from Martin, M0XJP on 07973 793770.

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast. On Tuesday 21 August Verulam Amateur Radio Club has a show and tell of homebrew and other items. Contact Ralph, G1BSZ, on 01923 265 572.

On Tuesday 21 August Wey Valley Amateur Radio Group is hearing about the DX University from Roger Western, G3SXW. Details on the web at www.weyvalleyarg.org.uk.

On Wednesday 22 August Chesham & District Amateur Radio Society is on the air & has a Club Net on 2m via GB3VA & GB3AL. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday 22 August Darenth Valley Radio Society is preparing for HF Field Day. The club is looking for licensed operators who would like to help them. Details from Bob, M0RAW, 01322 663804 by e-mail to m0raw-bob@talktalk.net

On Wednesday 22 August Hastings Electronics and Radio Club has an away-day to the British Vintage Wireless Society's Museum in Dulwich. Details from Gordon, on 01424 431 909.

On Wednesday 22 August Newbury & District Amateur Radio Society will be visited by Dr. Colin Forsyth who will give a presentation on the Sun and its effects on radio propagation. On Saturday 25th the club will be operating GB4CBE from Crofton Beam Engines. Contact Rob, G4LMW, on 01635 862 737.

On Wednesday 22 August Norfolk Amateur Radio Club is watching T32C and 3B7C - The stories in video. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 22 August Worthing & District Amateur Radio Club is holding the club barbeque evening and on the 23rd is taking part in the 80m SSB Sprint contest. Contact John, G8FMJ, on 01273 593 232.

On Thursday 23 August Bredhurst Receiving and Transmitting Society is having a talk by the Chairman on How is the year going so far? Details from Charles G4VSZ on 0798 2244788.

On Thursday 23 August Edgware & District Radio Society is having a natter night. More information from Mike, G4RNW, on 02089 500 658.

On Thursday 23 August Huntingdonshire Amateur Radio Society is preparing for the annual rally. Information from David Leech, G7DIU on 01480 431 333.

On Thursday 23 August Vange Amateur Radio Society is having a natter night. Details from Steve, G0KVZ on 01268 552606.

On Friday 24 August Cambridge & District Amateur Radio Club is having a talk on a 400 watt single valve homebrew 2m linear by Dave, G6KWA. Contact Ron, G3KBR, on 01223 501 712.

On Friday 24 August Loughton & Epping Forest Amateur Radio Society is holding an HF night on the air. Contact Marc Litchman, G0TOC, on 02085 021 645.

On Friday 24 August Mid-Sussex Amateur Radio Society is having a radio night. Details from Rob, 2E0RJA on 01444 232129.

Copyright © RSGB 2012. Not for public release before Monday 20 August 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH WEST

On Monday 20 August Appledore & District Amateur Radio Club is having a natter night and operating club station. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Monday 20 August Exeter Amateur Radio Society is holding an HF net on 3,675kHz at 7.45pm, then on the 21st a 2m net on 145.575MHz at 7.45pm. Contact Nick, 2E0NRJ, on 01363 775 756.

On Monday 20 August Riviera Amateur Radio Club is having a club night. Details from Alan Wyatt G2DXU, by e-mail to rivieraarc@gmail.com.

On Monday 20 August Weston Super Mare Radio Society is having a talk on juke box restoration. Details from Paul, G3SDH, on 01761 221 206.

On Wednesday 22 August Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 23 August Cornish Radio Amateur Club is setting up the antennas at for the Volkswagen Jamboree at Stithians, then on Friday 24th GB2VWJ will be on the air over the weekend at the Jamboree. Details from Steve, G7VOH, on 01209 844 939.

On Thursday 23 August the Swindon & District Amateur Radio clubroom is closed. Contact Den, M0ACM, on 07810 317 750.

On Thursday 23 August Yeovil Amateur Radio Club is holding a portable VHF evening in car park 6, 4 & 2. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 24 August North Bristol Amateur Radio Club is having a talk on beverage antennas by Dick G0XAY. Details from Dick, G0XAY on 01454 218362.

On Friday 24 August Torbay Amateur Radio Society is having a natter night with a TARS 80m Net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Monday 20 August Dragon Amateur Radio Club is holding an SSB Field Day planning session. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 21 August Carmarthen Amateur Radio Society has an open night. Information from Lloyd, 2W0LLT on 01239 711 297.

On Tuesday 21 August Wrexham Amateur Radio Society is planning a night out to a pub playing radio on route. Details from Mike Bryant, GW6NLP by e-mail to gw6nlp@gmail.com

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
13 - 19 August 2012

Solar activity has been at very low to high levels. Two active
sunspot regions dominated the summary period. Region 1543 (N21,
L=21, class/area Hhx/360 on 16 August) was the most active region
from 13-16 August, producing multiple C-class solar flares. Many of
these events were associated with discrete radio frequency bursts,
Type II and Type IV radio sweeps, suggesting CME liftoff. Due to the
location of Region 1543, many of the CME&rsquo;s were Earth-directed
but very little effects were forecast upon arrival at Earth. Region
1543 decayed from a beta-gamma to a simple beta group during the
summary period. On 17 August, from around the east limb, multiple
M-class solar flares were observed, including an M2.4 x-ray event at
17/1319 UTC as well as an M1 x-ray event at 17/1720 UTC. On18
August, five more M-class solar flares were observed, the largest
being an M5/Sf x-ray flare at 18/0102 UTC with an associated 120 sfu
Tenflare. As the day progressed, Region 1548 (N20, L=232, class/area
Cso/120 on 18 August) was numbered and determined to be the active
region responsible for all of the M-class events. From 16-18 August,
multiple CME&rsquo;s were observed in LASCO C2 imagery, all appeared
to originate from Region 1548. Due to the location around the east
limb, none of these CME&rsquo;s were forecast to arrive at Earth.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
normal to moderate levels during the period

Geomagnetic field activity was at predominantly quiet to active
levels throughout the summary period. Quiet to unsettled levels
prevailed from 13-16 August as solar wind speeds, as measured by the
ACE spacecraft, remained at nominal background levels. An increase
to quiet to unsettled levels with isolated active periods were
observed from 17-19 August. Weak CME effects were observed on 17
August and late on 18 August, measurements from the ACE spacecraft
```

indicated a solar sector boundary (SSB) crossing. Following the SSB, coronal hole effects were observed on 19 August with solar wind speeds, increasing from below 400 km/s to almost 600 km/s

Forecast of Solar and Geomagnetic Activity
20 August - 15 September 2012

Solar activity is expected to be at low levels with a slight chance for more M-class events from 20-31 August as Region 1548 continues to evolve and rotate across the disk. A return to predominantly low levels is expected to prevail from 01-15 September.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be normal levels from 20-21 August. An increase to high flux levels is expected from 22-26 August. A return to normal - background levels is expected to prevail for the remainder of the period.

Geomagnetic field activity is expected to be at mostly quiet levels with a few brief periods of quiet to unsettled levels due to recurrent coronal hole high speed stream effects. From 20 - 22 August, 25-25 August, 08-09 September, and 15 September quiet to unsettled levels are expected. For the remainder of the forecast period, mostly quiet levels are expected to prevail.

Joel Kleinman, N1BKE - QST Managing Editor, SK

Posted: 19 Aug 2012 06:51 PM PDT
http://forums.qrz.com/showthread.php?358393-Joel-Kleinman-N1BKE-QST-Managing-Editor-SK&goto=newpost

I don't know if I've seen Joel active here, but I know he has many friends across the country so I thought I'd pass the news along (it has already been published in our local newspapers).

Joel was a kind man and willing to share his work with anyone who asked questions. He just spoke at our local club (where he was a member) about the migrations the ARRL is making with digital versions to QST. Great presentation and he had a lot of enthusiasm for QST's future merging print and technology.

It appears there was a fire and people nearby were able to extricate his wife from the house, but not Joel. I won't repeat the entire article, but here is the link:

http://www.myrecordjournal.com/merid...a4bcf887a.html

The address in the article matches his call address on record.

Rest in peace OM.....

Jonathan

//
The World Wide Repeater Directory now support ircDDB Dstar Nodes and also MotoTurbo

Posted: 19 Aug 2012 08:04 AM PDT
http://forums.qrz.com/showthread.php?358309-The-World-Wide-Repeater-Directory-now-support-ircDDB-Dstar-Nodes-and-also-MotoTurbo&goto=newpost

For immediate release

8/19/2012

From the shack of W2CYK

In our constant pursuit of supporting all repeaters worldwide, no matter what technology used for repeating, we have added a weekly feed of new ircDDB Dstar nodes and MotoTurbo nodes. They are designated as (ircDDB)

and (TRBO) respectively in the World Wide Repeater Directory. Information about those nodes can now be viewed in the RFinder family of repeater locators on Android, iPhone/iPad/iPod, Web and GPS POI's as well as our third party developers RT Systems and CHIRP.

Bring a Friend to The World Wide Repeater Directory (WWRD) Promo still running for details click here

RFinder runs on iPhone/iPad/iPod and Android and http://web.rfinder.net.
The World Wide Repeater Directory is also accessible from RTSystems radio programmers and via CHIRP on Windows, Linux and Macintosh with the same user/password you use on handheld devices. Our goal is to have the WWRD accessible from most pervasive platforms. To that end Windows Phone and Symbian versions are in development and slated for release this fall. The web version has been tested and works on Blackberry. RFinder web has downloads for POI□s for TPE and most major GPS□s, including AvMap G5/G6, the GPS for Amateur Radio Operators.

Android Pad format is now in development, look for it in September!

Get Ready To WOTA !

Posted: 19 Aug 2012 02:31 PM PDT
http://forums.qrz.com/showthread.php?358364-Get-Ready-To-WOTA-!&goto=newpost

With August Bank Holiday almost upon is, it is time to get ready for the WOTA (Wainwrights On The Air) Activity Week. Yes - you have read that correctly ..... one whole week.

Following on from the very successful launch of WOTA Activity Weekend last year, which despite the adverse weather conditions that greeted some of our Activators across the Lake District over that weekend, during which a total of 29 summit activations and 459 QSO's were logged, we are running the event again this year.

Patterdale It will now become a permanent annual event for WOTA.

Taking into account the Olympics and Paralympics, school holidays, this years poor weather and the fact that we want even more people to be able to come and take part this year, the decision has been made to extend this special event to just over a week long.

This will give members, and non-members wanting to try out WOTA for the first time, a far great opportunity to participate at a pace to suit themselves and their commitments during the holiday period, the weather and give greater flexibilty to those that wish to book accomodation during this period.

WOTA Activity week will run from Saturday 25th August throught until Sunday 2nd September inclusive.

Orrest Head

All we need now if for Summer to finally arrive !

We look forward to working eveyone during the event

Some Lesser-Known Heroes: American Radio League Holds State Convention:

Posted: 19 Aug 2012 05:15 PM PDT
http://www.eham.net/articles/28848

The ARRL, better knows as the American Radio Relay League, held their state convention Saturday evening at Jackson's Mill in Weston. We all know organizations like 911 centers and The American Red Cross, are who we turn to in emergencies. But there's also some lesser-known heroes, who don't get as much praise. Volunteers for the Amateur Radio Emergency Services are who we turn to when all other forms of communications fail during power outages. Volunteers must have a license from the FCC. They operate on other frequencies, so you wouldn't be able to hear them on your regular radio stations. They also know Morse Code. Some situations they've helped out with in the past include blackouts,Hurricane Katrina, and locally-the huge storms that hit us back in June. Organizers told us what they do when emergency situations hit. Anne Rinehart, the ARRL WV Section Manager says,"We're usually notified by the Office of Emergency within the county, or by 911, asking us to activate. At that time, we would try to get up NET, which is a gathering of the amateurs together to get the info they would need, what was going on in the area. We need to know about the different weather types of things going on, whether somebody needed some medicine-that type of thing."

//
Cool Twitter Project Sends Morse Code Using Tweets:

Posted: 19 Aug 2012 05:14 PM PDT
http://www.eham.net/articles/28847

Trying to think up a unique way to incorporate Twitter into your next college project? Well, Ana Catharina Marques, Kostantinos Frantzis and Markus Schmeiduch came up with a pretty cool idea: Morse code through Twitter.

FCC Report on CCR's and AR role in Emergency Response is Released

Posted: 21 Aug 2012 06:24 AM PDT
http://forums.qrz.com/showthread.php?358571-FCC-Report-on-CCR-s-and-AR-role-in-Emergency-Response-is-Released&goto=newpost

Several months ago, the FCC was charged by Congress to conduct a study into the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief, and into the existence of impediments thereto, including the the effects of unreasonable or unnecessary private land use restrictions on residential antenna installations.

The FCC has released its report:
http://transition.fcc.gov/Daily_Rele...-12-1342A1.pdf

The conclusion of the report reads:

Quote:

3. Recommendations

39. Private land use restrictions. Some commenters recommend that CC&Rs be preempted if they prohibit antennas that are within certain limits. Others suggest that private land use restrictions on amateur antennas should be permitted only for safety considerations, and not for aesthetic reasons. As noted above, however, other commenters believe that it is not necessary to preempt private land use restrictions in order to promote amateur emergency communications, given the ways that even amateurs subject to CC&Rs can communicate effectively and the nature of amateur emergency communications. MMoreover, while commenters suggest that private land use restrictions have become more common, our review of the record does not indicate that amateur operators are unable to find homes that are not subject to such restrictions. Therefore, at this time, we do not see a compelling reason for the Commission to revisit its previous determinations that preemption should not be expanded to CC&Rs.

40. Other impediments. As noted above, the Commission has already preempted state and local regulations that do not reasonably accommodate amateur radio communications and do not represent the minimum practicable regulations to accomplish the local authority□s legitimate purpose. The Commission has also addressed regulations regarding possession and operation of amateur radio equipment while driving. Commission rules that may be an impediment to enhanced amateur service emergency communications

can, as the ARRL notes, be considered through the Commission□s rulemaking process. Consequently, we do not believe that Congressional action is necessary to address any of these issues.

IV. CONCLUSION

41. The amateur radio community and the emergency response and disaster communications communities all agree that amateur radio can be of great value in emergency response situations. Amateur radio carries with it a wide range of advantages that allow it to supplement other emergency communications activities during disasters. This has been demonstrated time and again in a wide variety of emergency and disaster situations. Amateur radio emergency communications require not only stations in a position to originate the emergency message, but also an alternative to the commercial communications infrastructure impacted by the emergency. This alternative infrastructure is the network of amateur radio operators and their stations that relay messages, build and maintain repeater stations and repeater networks, operate HF message networks to send messages greater distances than are practical with mobile or transportable transmitters, and develop new technologies to improve the reliability of these networks.

42. That value could potentially be increased, however, through cooperation among DHS, public safety, emergency management, and amateur radio emergency communications associations and groups to develop future training protocols. We also recommend that DHS work with state, local, and tribal authorities to develop disaster area access policies and qualifications for trained amateur operators who provide emergency communications support.

Backers Raise Cash for Tesla Museum Honoring 'Cult Hero':

Posted: 21 Aug 2012 03:16 AM PDT
http://www.eham.net/articles/28854

(CNN) -- At the dawn of the 20th century, Nicola Tesla wanted to save the world from fuel dependency. Now, an Internet cartoonist wants to save Tesla's last remaining laboratory as a tribute to the futurist inventor. The structure, a 94-by-94-foot building, was the location where Tesla hoped to develop wireless communications and clean, free energy for everyone in the early 1900s. He moved his operation to the Wardenclyffe Tower in Shoreham, New York, in 1902 -- so named because of a 187-foot tower rising from the ground (as well as being sunk 120 feet below it) that was to be one of the great transmitters for his wireless energy dream. The facility was lost a few years later due to debts Tesla racked up, and the huge tower was demolished in 1917. The site would ultimately become a Superfund location because of silver and cadmium toxicity in the ground after a photographic film company used it for nearly 48 years. It has now been cleaned up and is no longer harmful.

*** Welcome to rec.radio.info! ***

Welcome to rec.radio.info, a group that aims to provide a noise-free
source of information and news for the entire rec.radio hierarchy.

Two introductory articles about rec.radio.info are posted to the group
every month. You are now reading the first article, which explains what
rec.radio.info is, and answers some Frequently Asked Questions. The
second article is titled Posting Guidelines, and you only need to read
it if you want to submit an article to rec.radio.info.

You can skip to the next section of this article by searching for the
next
" -- " string. The sections available are:
- What is the purpose of rec.radio.info?
- Why are messages almost always cross posted to rec.radio.info?
- What is a 'follow-up', and what does 'moderated' mean?
- OK, so now I know what 'moderated' means. Tell me more.
- What type of material is considered inappropriate?
- I do not have access to news, how can I get the information posted to
rec.radio.info?
- Will the material appearing in rec.radio.info be archived somewhere?
- I have a regular posting with timely information, is there a way to
speed up it's delivery, or automate for more convenience?

-- What is the purpose of rec.radio.info?

The purpose or charter of rec.radio.info is to provide the Usenet
community with a resource for information, news, and facts about any and
all things radio.

All the other rec.radio groups are intended for discussions and general
chit chat about radio. Rec.radio.info will contain informational,
factual articles only. Follow-ups are redirected to an appropriate other
group, and further discussion (if any) will not take place in
rec.radio.info.
```

In order to ensure that rec.radio.info contains only appropriate articles, it was decided to create the group as a moderated newsgroup.

-- Why are messages almost always cross posted to rec.radio.info?

It provides a "tag" for each article to be assembled into a filtered presentation in rec.radio.info (even with cross-posting, only one message, with a unique Message-ID, is propagated across the net). This tag also facilitates a pre-existing method of dropping or canceling the articles locally within the discussion groups if you don't want to see them. This accommodates individuals who want to separate the bulletins from the discussions, discussions from the bulletins, as well as those who are adamant about not reading another newsgroup and wanted to see everything all in one basket.

With the total size of Usenet (in number of newsgroups and total traffic) doubling every year or so, this is no insignificant contribution to reducing information noise and chaos. Making the discussion groups a catch-all, and making extra newsgroups filters on that catch-all, is also the most realistic way to implement such a scheme (It's not intuitively obvious what the charter, contents, and general appropriate topics for each and every newsgroup are. Seeing FAQ's and charter/intro postings in the home newsgroup is beneficial for new readers).

By cross-posting one only is adding a few tens of bytes to each bulletin (to specify the extra group on the Newsgroups line), but are adding the capability for very powerful filtering features available on most news servers, listservers and readers. Your local news guru could probably explain these features in more detail.

In rn, for example, according to Leanne Phillips in her rn kill-file FAQ, add a line of the form:

/Newsgroups:.*[,]rec\.radio\.info/h:j

either in ~/News/KILL (if you don't want to see rec.radio.info articles anywhere) or ~/News/rec/radio/amateur/misc/KILL (if you don't want to see them just in rec.radio.amateur.misc). The latter method means your kill file will only be consulted during rec.radio.amateur.misc (and hence runs more efficiently), and will probably work for most people.

In nn, according to Bill Wohler in his nn FAQ, add a line of the form:

rec.radio.info:!s/:^

in ~/.nn/kill (if you don't want to see rec.radio.info articles anywhere), or put the following lines:

sequence
rec.radio.info
rec.radio.

at the end of ~/.nn/init in order to see all the rec.radio.info bulletins first, then read the remaining rec.radio.* without the

bulletins.

In slrn, according to the srln FAQ, the following scoring rule will | allow you to see rec.radio.info-crossposted bulletins, while still | filtering out most SPAM or "Velveeta" crossposted to more than 2 | newsgroups (as such articles usually do not contain a 'Followup-To:' | header): |

Score: -9999 |
Newsgroups: ,.*, |
~Followup-To: . |

More information about kill files may be obtained from Dave Fawthrop's Killfile FAQ at:

http://www.hyphenologist.co.uk/killfile/

-- What is a 'follow-up', and what does 'moderated' mean?

If you are new to Usenet and are not familiar with the terminology, you might want to read the general introductory articles found in the newsgroup news.announce.newusers. Doing so will make your life on the net much easier, and will probably save you from making silly beginner's mistakes.

If you think that at this moment you are reading an echo, a conference, or a bulletin board, I'd also strongly suggest a trip over to news.announce.newusers.

For the rest of this article, we will assume you have a basic knowledge of Usenet terminology and mechanics.

A moderated group means that any article that needs to be posted to the group has to be accepted by the moderator of the group. Since we need to ensure that followups to an article (discussion) do not show up in the rec.radio.info newsgroup, the `Followup-To:' header line contains a newsgroup that is appropriate for discussions about the specific article.

-- OK, so now I know what 'moderated' means. Tell me more.

Rec.radio.info is a moderated newsgroup, which means that all articles submitted to the group will have to be approved by the moderator first.

The current moderator of the group is the rec.radio.amateur.moderated Moderation Team. Submissions to rec.radio.info can be posted, or e-mailed to:

rec-radio-info@panix.com

Comments, criticisms, suggestions or questions about the group can be e-mailed to:

rec-radio-info-request@panix.com

But before you do so, please be sure to check out the "Posting Guidelines" article.

The influence of the moderator should be minimal and of an administrative nature, consisting chiefly of weeding out obviously inappropriate articles, while making sure correct headers etc. are used for the appropriate ones.

-- What type of material is considered inappropriate?

There are three broad categories of articles which will be rejected by the moderator:

1) Requests for information: rec.radio.info is strictly a one-way street. We receive information in our mailbox; we then post it to rec.radio.info. Requests for specific information belong in the normal discussion newsgroups. If your request gets answered, you might consider passing the answer on to rec.radio.info, though. Especially if you can edit it into a informational, rather than a discussion, format.

2) Obvious discussion articles, or articles that appear unsubstantiated.

3) Commercial stuff: a relatively unbiased test of a radio product would be accepted, but any hint of for-profit might be reason for rejection. For three reasons: This is not the purpose of the list, for-profit is a controversial topic, and this list may be passed onto Amateur Packet Radio (where for-profit is prohibited except under certain provisos).

rec.radio.swap may be more deserving of the posting in any matter.

Similarly, copyrighted material generally cannot be used. If it's TRULY worthwhile to the net, We would recommend obtaining permission from the copyright holder. Please note the source, and if permission was given. We reserve the right to make the final decision concerning appropriateness in all situations. In most cases, a brief summary of, or pointer to, the copyrighted information may be all we can allow.

-- I do not have access to news, how can I get the information posted to rec.radio.info?

Google has an excellent web interface to Usenet newsgroups. It is available at:

http://groups.google.com

It supports both reading and posting.

Another excellent web interface to at least the radio-related Usenet newsgroups is the RadioBanter site:

http://www.radiobanter.com

sponsored by the NewsgroupBanter project:

http://www.newsgroupbanter.com

It, too, supports both reading and posting.

-- Will the material appearing in rec.radio.info be archived somewhere?

Yes. See Google Groups and RadioBanter above.

Effectively this means that anything you post to rec.radio.info will be permanently stored, so your work will not be lost.

-- I have a regular posting with timely information, is there a way to speed up it's delivery, or automate for more convenience?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as time critical.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires co-operation and goodwill to be beneficial to the community in the rec.radio hierarchy.

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

*** rec.radio.info - Posting Guidelines and Etiquette ***

Two introductory articles about rec.radio.info are posted to this group
and to rec.answers/news.answers every month. You are now reading the
second article, which explains how to submit something to
rec.radio.info, and which answers some Frequently Asked Questions about
the submission process. The first article is titled "Welcome to
rec.radio.info", and it might be a good idea to check it out as well.

-- How do I submit something to rec.radio.info?

Two possibilities. You can use your newsreading software to just post
the article to rec.radio.info, as you would do with any other
newsgroup. The difference is that the software recognizes the special
status of rec.radio.info as a moderated group, and will e-mail your
article to us, the moderation team, instead of posting it to the group.

Alternatively, you can mail your article directly to us at the following
address:

rec-radio-info@panix.com

Mailing us directly is probably (a wee bit) faster, but using the
transparency offered by the newsreading software is probably more
convenient.

If you have any questions, or wish to deal with some administrivia with
the moderation team, we suggest mailing to the following address:

rec-radio-info-request@panix.com

-- How soon will I see my article appear?

It depends on how busy we are. Your article reaches us as mail, we have
to read it first, give it the stamp of approval, and finally send it on
to the group. We will attempt to read and decide on all submissions
within 72 hours at the very least, though we will probably be able to
process submissions much faster in actual practice.
```

The site from which we moderate this newsgroup, "Public Access Internet and Unix, NYC" (Panix), is directly connected to the Internet, and articles posted at that site should appear at most major news sites, including Google Groups, the same day. The principal delay, therefore, will be the wait in the moderator's submission queue.

If you post a periodic article, and have shown to be trustworthy, we may allow you to post directly if the article is of a timely nature. See the section below on direct posting.

-- Should my article be in a specific format?

No. If it is not totally illegible, we will accept it, and if it does not have a correct subject-line we will correct it with your permission -- that's what a moderator is for.

However.

You could do us a big favor by making sure your article conforms to these simple requirements:

1) The article must present information, not discussion or requests, We will reject the article or require you to change the wording if it is worth it.
2) A good, descriptive Subject line.
3) Always mention what source you got the information from.
4) Don't forget to include a Followup-To header, at least if you don't want further discussion to automatically be forwarded to you, the poster, which is the default if the article is only posted to rec.radio.info.

As we said: if your article is appropriate we will post it even if you don't follow these guidelines, but then don't blame us for not processing it immediately. 'Perfect' articles we can send on with a couple of keystrokes. Stuff that needs minor editing is going to have to wait until we have time to do so.

Please do not waste both our and your time by posting requests, as this is an information only news group.

-- What about crossposting?

If you send something to rec.radio.info, just name any group you'd like to cross-post to in the Newsgroups field. Then, when we approve the article for rec.radio.info it will get automatically cross-posted to any other groups mentioned. This will also override the default Followup-To: poster, replacing it with the groups you cross posted to.

We would prefer if the group be cross-posted to the various discussion groups in the rec.radio.* hierarchy that are appropriate:

rec.radio.amateur.misc Amateur (ham) radio and related matters
rec.radio.amateur.packet Amateur Packet Radio discussions
rec.radio.amateur.policy Amateur Radio practices, rules, etc.
rec.radio.noncomm Non commercial radio discussions

rec.radio.shortwave International broadcasting on the 'HF' bands
rec.radio.cb Citizens Band (27 MHz) discussion
rec.radio.scanner Scanner discussions (unsupported group)

or in one of the moderated groups:

rec.radio.amateur.moderated Amateur radio practices, rules, etc.
rec.radio.broadcasting Discussion of *domestic* radio broadcasting

We will leave it up to the poster to decide which group(s) are appropriate, but reserve the right to add groups if we feel it has broader interest. We will consult with the poster first.

Notes on crossposting:

- rec.radio.broadcasting is also a moderated group. The rec.radio.broadcasting moderator prefers to review all articles himself before posting. Placing rec.radio.broadcasting before rec.radio.info on the Newsgroups line should accomplish this. We will typically abide by the rec.radio.broadcasting moderator's decision whether the article is appropriate for rec.radio.info.

- rec.radio.amateur.moderated is also a moderated group. As the rec.radio.amateur.moderated Moderation Team manages both rec.radio.amateur.moderated and rec.radio.info, we can manage crossposting and approvals for both newsgroups. The rec.radio.amateur.moderated group does not allow crossposting to other discussion newsgroups, whether moderated or unmoderated. However, we would like to manage rec.radio.info as consistently as possible with how it was done by previous moderators, including the grandfathering of existing regular postings. Therefore, the submitter can choose rec.radio.amateur.moderated or the other unmoderated rec.radio.amateur.* discussion newsgroups for crossposting, but not both.

- Any FAQ or informational posting approved by the rec.answers/news.answers moderation team that is also crossposted to any rec.radio.* newsgroup (besides just rec.radio.info) is also automatically pre-approved for rec.radio.info. See below for more information.

If you post to another moderated group, it may be better to make special arrangements with both moderators before posting by contacting us at our administrivia addresses.

In addition, cross-posts do not take up extra space; modern newsreaders can be configured to show you cross-posted articles only once anyway; not everybody reads rec.radio.info; and rec.radio.info was never meant to reduce the volume of the regular discussion newsgroups. But keep in mind that some of the mail gateways may filter out the informational postings (at request of the subscribers) to keep the load down.

You decide.

-- I have a regular posting with timely information, can I make arrangements to help speed up delivery by posting directly from my site?

Yes, there is! It may take a bit of chatter with the moderator, but we are willing to take responsible people and provide them the means of posting the articles directly from their site. We will try everything we can as we fully realize that DX (distant signal) and astronomical data can be somewhat transitory. We are also willing to allow regular posters of information the same courtesy, even if the information is not as timely.

We refer to this as self-moderation, which is partly based on the model for rec.answers/news.answers. This requires cooperation and good will to be beneficial to the community in the rec.radio.* hierarchy.

If you are currently maintaining (or plan to maintain) a radio-related periodic information posting, you may wish to consider crossposting it to rec.answers/news.answers. Postings that are approved by the rec.answers/news.answers moderators for this treatment are automatically pre-approved for crossposting to rec.radio.info (as the news.answers requirements are far more rigorous than the requirements this newsgroup ever plans to use). For more information about this option, consult the appropriate information articles and posting guidelines in rec.answers/news.answers.

Realize also, that even if your post is not approved for rec.answers/news.answers, it can still be approved for rec.radio.info. The intention is not so much to get every last bit of radio-related information on rec.answers/news.answers, but rather to provide an alternative avenue of approval (as well as grandfather existing maintainers of radio-related information and spare them additional bureaucratic hurdles). Again, crossposting to either rec.radio.info or rec.answers/news.answers, both, or neither, is at the discretion of the poster (subject to the approval of the moderators). You decide what is most appropriate for your article.

Please remember that as an information maintainer, you are not alone. There are many others on the net who maintain and post periodic information postings, using various intermediate-to-advanced features of Usenet (usually via automated tools). Various degrees of technical support and general hand-holding are available from many Usenet veterans. Send us some E-mail describing your needs to our administrative address below, and we'll try to help, or at least refer you to the right knowledgeable individual(s).

-- And Follow-ups?

If the only newsgroup you have specified is rec.radio.info, then the Followup-To: field will always be set to poster. If you do not want this, you must supply a Followup-To line of your own, and we will honor that one, as long as it is a subset of the original Newsgroups line.

If you specify newsgroups to cross-post to, then the Followup-To field will be set to include all the cross-posted groups, excepting rec.radio.info itself. Again, if you do not wish this behavior, supply your own Followup-To line.

We maintain other standards on the various RFC-1036 (news transport) header lines. For example, if the article is appropriate for passing into the Packet Radio Information Network, we encapsulate the Packet Bulletin Identifier (BID) in the Message-ID: news header line indicating the machine of origin as the ampr.org domain:

Message-ID: <$opa.55.1994@ampr.org> |

where the Packet Radio BID, in this example, is `$OPA.55', and it was posted in the year 1994, because some of the Bid numbers are cycled yearly. Hopefully, this can be used as a key to re-introduce the articles for the Packet Radio network. Also, if the article is a repost of an already existing information article in the rec.radio heirarchy, we ensure that the References: header line is linked to that previously posted article. This also helps to tag articles, and may be used for additional filtering if needed.

Since the articles are archived, please use the Summary and Keywords header lines to help one search for your article.

-- Why have I received no reply from you?

We never reject anything in silence, and we make a point of it to answer all our mail. However, E-mail, like a brain cell, can and does get lost, every now and again.

So, if you send us something, and you don't see it appear it rec.radio.info, and you still have not heard from us in reply after say, five days, you can be pretty sure that either your mail never reached us, or that our answer has never reached you. In that case, please try again (We will filter out duplicates).

Please direct any comments, questions, or criticisms about this article to rec-radio-info-request@panix.com.

Posting-Frequency: posted twice monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

SB DX @ WW < KB8NW $OPDX.1075.1
Ohio/Penn DX Special Bulletin No. 1075.1

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1075.1
BID: $OPDX.1075.1
August 21, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Craig/K9CT, Joe/W8GEX and ZL9HR team for the following DX information.

NH8, SWAINS ISLAND (Press Release). The following press release was sent out on August 22ndt [edited]:" Swains press release # 3 Aug. 22 2012 -- The leaders are happy to report that the DXpedition cargo has arrived in American Samoa. The international team of 20 operators are excited about this tent and generator operation. The island ranks number 31 in the DX Magazine most wanted list. Swains is about one mile in circumference has only five permanent residents and no infrastructure.
The team will be running seven stations from 6 to 160 including 60m. They will be on CW, SSB and RTTY around the clock for 14 days. Great emphasis will be in working European stations. Plans are to update logs on a daily basis by satellite phone. Because there is no regular internet service, the team will have two pilot stations. Valerie, NV9L, will be the North American pilot while Col, MM0NDX, will do the honors for Europe. They and John/K6MM, the webmaster, will be the only contact to the team for their 14 day stay.
Due to changes in airline flights, they are now scheduled to depart American Samoa on Sept. 4th, for the 23 hour boat ride to Swains. Every-thing will then be off loaded and taken ashore by a small boat. Along with the radio equipment, antennas, food, and tents, are 19 drums of gasoline for the seven generators.
The team of highly experienced DXers, contesters and Dxpeditioners are 9V1FJ, AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, N2TU, N4HH, N6HC, N6HD, NA6M, ND2T, SM5AQD, W6KK, W8GEX, W8HC, W8TN and WB9Z. There have been several requests to listen into the general band, so please listen to the operator's instructions.
We are most grateful to NCDXF, INDEXA, and all clubs and individuals who have supported us. Like all major DXpeditions today, this is a very expensive trip. Total costs are estimated to be 200,000 USDs. Each member has paid 8000 USDs, plus his cost to get to American Samoa. Anyone who

wants to help, can go to our website, <www.nh8s.org> and click on the donations link. We are most appreciative to any and all DXers that contribute to help defray the cost of the trip.
OQSL is available on the website for your convenience. QSL manager for cards is Joe Blackwell, AA4NN, and requests should be sent to him at:
Swains Island DXpedition
P.O. Box 5005
Lake Wylie, SC 29710
USA

LoTW will be posted six months following the DXpedition.

We would like to give special thanks to our support crew who has worked very hard for us. They include DL9RCF, I8NHJ, K6MM, MM0NDX, N1DG, N4XP, N7CQQ, NV9L, W6XA, W8AEF, W8CAA and Margarett Blackwell XYL of AA4NN.

The website <www.nh8s.org> provides more details.

Craig, K9CT
Joe, W8GEX
Co-Leaders"

ZL9, CAMPBELL ISLAND (Update/Press Release)[edited]. The following was release on Tuesday, August 21st, on the ZL9HR DXpedition Web page at: http://www.campbell2012.com

---
"Thanks for your interest in the upcoming ZL9HR DX-pedition to Campbell Island.

At this writing we are on schedule and the project planning is well underway. The team is busily working on all aspects of the DX-pedition. As you may know, we have the landing permit in-hand and also the radio license / call sign.

Some examples of what's happening behind the curtain at the moment include:
- Station location (as defined by the permit)
- Antenna placement planning (as defined by the permit)
- Discussions on propagation behavior and how we will adjust for conditions
- Operator mode preference
- Equipment testing and preparation for sea shipment
- Contract finalization with the boat that will take us to Campbell Island
- Generator testing (state-of-the-art Yamaha machines) and their preparation for shipment
- Petrol estimates (for generators), procurement, and planning for sea transit
- Preparation and submission of the required DX Team Safety and Communications plans to the New Zealand Department of Conservation (DoC)
- Coordination of team arrival in NZ, hotels and local transportation to

and from boat at Bluff, NZ
- A DoC requirement for landing on Campbell Island is each team member must have emergency medical evacuation insurance (purchased by the individual team members)
- Up-front payments and deposits
- Scheduled the quarantine inspection (All of our gear must be unpacked (then repacked) for inspection before departing NZ)
- We're beginning to receive donations from the major DX Foundations, DX Clubs and individuals from around the world.

With the individual operators funding the up-front cost of the DX-pedition and their personal travel / living and while in NZ we will continue to seek assistance from the global DX-community.

We appreciate the interest and support from the global amateur community and especially from the:
• Northern California DX Foundation;
• The American Radio Relay League's Colvin Award Committee;
• The German DX Foundation, and
• The Lone Star (Texas) DX Association

Each who have made significant contributions, and the other clubs and individuals who provided financial support.

Our major corporate sponsor, to date, is Spiderbeam.

Of course, the overall sponsor of this DX-pedition is the Hellenic Amateur Radio Association of Australia who is providing nearly all of the equipment that will be used on Campbell Island.

We'd be remiss if we didn't recognize the New Zealand Department of Conservation for their support of this DX-pedition. The DoC is permitting us to use several of the existing buildings which will provide shelter from the weather which we expect to be cool, windy and wet.

Our QSL policy, as described on the QSL Page, should satisfy the DX community:
• On-line uploads via satellite phone to ClubLog
• LoTW upload shortly after the DX-pedition
• LoTW confirmations at no charge for all contacts, no restrictions
• OQRS will be available at a reasonable donation to cover mailing expenses
• Direct QSLs with envelope $2USD, (1 IRC + 1 USD) or 1 Euro for all destinations
• Buro cards to EB7DX at no charge

QSLing doesn't get any better than this!

Our goal is to give out as many All Time New Ones as humanly possible and to fill as many band slots as we can.

Thanks again for your interest and support. We'll update you again next month.

73, ZL9HR team"

All nine azores islands, cu1 through cu9, activated at once

Posted: 22 Aug 2012 12:14 AM PDT
http://forums.qrz.com/showthread.php?358675-All-nine-azores-islands-cu1-through-cu9-activated-at-once&goto=newpost

ALL NINE AZORES ISLANDS, CU1 THROUGH CU9, ACTIVATED AT ONCE

http://azores-islands-hunt.com/

Are You Ready to Fly to Azores for Free by Making Nine QSOs?

Yes indeed, those of you willing to spend 24 hours or less on the radio
are eligible to participate in an Azores lottery for two all-paid packages
to the beautiful Azores Islands in the Atlantic, completely free of charge.
The project is organized by the Azores-Finland Friendship Consortium in
partnership with the Amateur Radio Associations of the Azores Islands and
supported by the Azores Promotion Agency (ATA) and Azorean Airlines (SATA).
Just look at www.visitazores.com> and make up your mind.

Not many people know that the Azores consist of nine populated islands,
stretching over a distance of 602 km (305mi) from East to West, next to USA
and Europe. And it is not widely known that the Azores have their own
airline (SATA) flying to each island, in addition to many destinations in
Europe and North America. Each island has its own characteristics and its
own blend and alone qualifies for your visit there. While these islands
count for a single DXCC entity, they offer three (3) IOTA groupings.

With this unique AZORES 9 ISLANDS HUNT, an invited international group
of amateur radio operators together with resident Azores amateurs will be
activating the nine islands, offering an opportunity to the world to
contact these islands all at once over one weekend.

Activity Weekend

Saturday, September 29, 1200 UTC to September 30, 1200 UTC (24 hours).
These stations will be active starting Friday, September 28 as soon as they
become operational.

Frequency Windows

CW: 7000-7015, 18080-18090 and 14050-14065 kHz

SSB: 7175-7195, 18120-18135 and 14250-14275 kHz

Nine Islands and their Stations

Santa Maria, CU1ARM; San Miguel, CU2ARA; Terceira, CU3URA; Graciosa, CU4ARG; Sao Jorge, CU5AM; Pico, CU6GRP; Faial, CU7CRA; Flores, CU8ARF; Corvo, CU9AC.

Operators and Island Hosts

Sergio, CU1AAD; Jose, CU2CE; Francisco, CU2DX; Guilherme, CU2IF; Domingois, CU3CS; Guilherme, CU4AB; Jose, CU5AM; Jorge, CU6AB; Manuel, CU7CA; Claudio, CU8AAE; Joao, CU9AC; Franz, DJ9ZB; Richard, DF9TF; Nigel, G3TXF; Michael, G7VJR; Diane, K2DO; Rich, KE3Q; Mike, KI1U; Marius, LB3HC; George, N2GA; Martti, OH2BH; Juha, OH8NC; Ghis, ON5NT; Carine, ON7LX; Claude, ON7TK; Alex, OZ7AM; Kenneth, OZ1IKY; Yuri, VE3DZ and Ed, VE3FWA.

Two Hunt Awards

Those making a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores (e.g. if you have QSOs with 7 islands, you will get 7 lottery tickets). Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery. The free trips are from the closest airport served by SATA; including flight, accommodation and transfers..

During or immediately after the weekend, the logs will be posted on Club Log to display your band/mode slots. The lottery will be drawn on October 15, 2012.

[FONT=Times ; FONT-SIZE: 12pt][/FONT]

QSL Cards

All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via Jose Melo, CU2CE.

MMMonVHF Newsletter No. 1/ WEEK 34 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-08-22
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

****
Latest NEWS and INFO for the NEWSLETTER
MMMonVHF The VHF-DX-Portal
****

Last week there a sad comment on KST: G4DEZ (Bryn) is Silent Key.
According to Dave, G4DHF, he died due to a heart attack on August 17th.
Bryn was in his late 60's. The news was announced on the UK Contest reflector.
R.I.P. Bryn!

MMMonVHF Team

HOT 144 MHz MS & EME DX-PEDITION NEWS - Pse do use:
http://www.mmmonvhf.de/latest.php
and use the FILTER for your personal wishes!
****

** DXCC: 4O: Montenegro ; square JN92 ; start 2012-08-19 **

Gigi IV3GTH qrv from 4O in QTH JN92HK

HI all,
I'm holiday in Kumbor(MNE), condition 120w and 9 el F9FT.
My take off is bad, only open direction NW but I will try to give DXCC/square
with some patience hi. If you want to check take off see here

SOURCE: tnx to Gigi IV3GTH/E77GS direct to MMMonVHF

** DXCC: GM: Scotland ; square IP90 ; start 2012-08-20 **

GM6VXB/P qrv from IP90NT

Will be in IP90 for four days (work during day)and will try to work MS
or E's (if conditions). Operations will be early mornings and late evenings work
permitting. KST is possible but intermittent so MS calls will be random on 370/QSY.
Only small setup, 120 Watt to 9 el yagi on 144 or 100 Watt to 5 el yagi on 50

SOURCE: tnx to Martin, GM6VXB, direct to MMMonVHf

** DXCC: EA8 ; Canary Isl. Square: IL38 ; start 2012-08-22 **

EA8 (IL38) back on EME
Im heading down to EA8 straight after the Cambridge conference,
I have fixed the 2m preamp/PA and hope to be qrv from IL38 on both 2m and 70cm. Aug
22-29th.
73 Dave G4RGK

SOURCE: tnx to Dave G4RGK direct to MMMonVHF

** DXCC: ZK2 ; Niue ; Square: AH51 ; start 2012-09-07

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
LATEST NEWS from W7GJ, dated 2012-08-14:
The callsigns for the Niue JT65 EME operation next month will be:
E6M - 6m
E6RS - 2m
I have updated my website to include information on how to update your WSJT program
to include these calls as well as include the E6 prefix:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
Please watch for us on EME! GL and VY 73, Lance

SOURCE: Moon-Net

NEWS by W7GJ, dated 2012-09-03:
Hello! Well, I wanted to provide as much advance time as I could so you could mark your
calendars and/or get everything in your 6m station optimized by the end of August ;-)
As those of you know who completed JT65A mode contacts with me on 6m EME when I was in
E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows -
especially during the optimum days of the month for 6m EME.
The callsign is not in hand yet (but assured by email), and the QTH has not been finalized,
but all the plane tickets have been purchased (as usual, any contributions are VERY
welcome),
and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the
works.
As soon as the license is in hand, the information will also be available under the
callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a
takeoff shot
over water on moonrise. However, that is not necessary to work NA stations during their
moonsets (I will be elevating),
so we will get the ground gain on YOUR end for that ;-) And if a QTH with a good moonrise
shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset over
the water for the EU moonrise.

Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2;
Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure
time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2012-10-01

Bodo, DF8DX, qrv from SV9 on HF and 23cm EME

Equipment will be like on my previous DXpeditions IC7000 with transverter (100W) and 59ele yagi.
call: SV9/DF8DX
Grid: KM25 (exact locator will be given later)
IOTA: EU-015
Activity on 23cm EME:
October 2, 2000-2130z (for EU)
October 3, 0400-0600z (for NA)
with backup dates:
October 3, 2030-2200z (for EU)
October 4, 0430-0600z (for NA)
Frequency: TX first on 1296.090MHz / RX on my own echo frequency (just like in CW)

I am one week on SV9 but I would prefer you work me on the suggested times because i want to spend some time with my wife on this vacation and also enjoy some HF (CW only) activity as well
as maybe activity from EU-187. Further skeds on request (if necesary). Check www.mmmonvhf.de for updates.

73 de Bodo, DF8DX

(e-mail: dl7voa@darc.de)

D2, ANGOLA
Paulo "Paul",CT1FJZ, is expected to be in Angola for one year working in Benguela and Huambo. Look for him to be active as D2FJZ, mainly on the weekends and limited during weekdays. Activity will be on 80m-10m SSB. QSL via homecall.

DU1, PHILIPPINES, OC-042
Alan,DU1/W7XA, is working near Tagaytay Ridge (about 65 km south of Manila) until Aug 27. Activity will be in CW and some SSB on 20/17/15m running 100 watts into a dipole. QSL via homecall.

HS, THAILAND
After recovering from an illness Dennis,K7BV, returns to Asia for a short visit between Aug 25 and Sep 2 and wants to become active again as HS0ZKS from the shack of John,HS1CHB. Dennis may also show up from from Japan as JF1XJR. QSL via homecall.

JA, JAPAN
The special event station 8J1A is currently active in all modes on HF from the 2012 Amateur Radio Festival until Aug 26. QSL via bureau.

The special event station 8J2YDU is active until Nov 3 to celebrate the 50th anniversary of Shizuoka Higashi High School (JA2YDU) in Shimizu (Shizuoka prefecture, Honshu, AS-007, WLOTA 2376). QSL via bureau.

The special callsign 8J4HAM is working from the Ham Festa Kasaoka 2012 in all modes on all HF bands until Oct 21. Kasaoka is located in Okayama prefecture on Honshu (AS-007, WLOTA 2376). QSL via bureau.

The special event station 8J4MANGA draws attention to the 13th International Comic Artist Conference till Nov 10. QSL via bureau.

The special callsign 8J4SINWA is active during the "Japan Myth Expo" in Shimane until Nov 11. QSL via bureau.

The "Ehime Prefectural Government Amateur Radio Club" (JA5YAX) marks its Golden Jubilee (50th anniversary) by activating the special event station 8J50YAX until Dec 31. Ehime is located on northwestern Shikoku island (AS-076). The QSL will be sent via bureau automatically.

The special event station 8J8APRC will be aired in all modes on HF until Sep 16 for the FIA Asia-Pacific Rally Championship Round 5 and the JAF Japanese Rally Championship Round 7 "Rally Hokkaido" (AS-078, WLOTA 2967). QSL via bureau.

LX, LUXEMBURG
Anne,LX/OH2YL, is working in in CW on 10m-80m from Aug 24-31.
OSL via homecall.

PA, THE NETHERLANDS
On 30 August the Netherlands will celebrate the official return of the Dutch astronaut Andre Kuipers,PI9ISS, from the ISS. The station PA6ISS will be active from the location of PG6N at Noordwijk Lighthouse (Netherlands 1324, Admiralty B0760, ARLHS NET-019) from Aug 28 until Sep 2. QSL via PA7DA. See also: http://pg6n.jouwweb.nl/pa6iss

PJ2, CURACAO, SA-099
Anja,PJ2/DH2AK, and Torsten,PJ2/DL1THM, are going to Curacao (SA-099) again and plan to work in holiday style from the clubstation PJ2A mainly in SSB on 15m and 20m from Aug 26 until Sep 1.
QSL via bureau to their homecalls, direct route on QRZ.com.

PY, BRAZIL
ZX7MIL (OPs: PS7NN, PS7GL, PS7KC, PS7HD) will join the CVA DX Contest (Aug 25/26, 2100 UTC-2100 UTC). QSL via PS7NN. See http://www.craec.org

SU, EGYPT
Members of the Egyptian Radio Amateurs Society (ERASD) will activate the special event station SU30ASR from Abu Quear near Alexandria on the occasion of the 30th anniversary of "Arab Scouts Radio Camp" between Aug 24 and Sep 2. Activities will be in CW/SSB/digital modes on HF by Said,SU1SK, Atef,SU1AO, and Ayman,SU1AR. QSL via SM5AQD.
See also: https://www.facebook.com/pages/The-Egyptian-Radio-Amateurs-Society-For-Development-ERASD/118552214859517

UA1, EUROPEAN RUSSIA
The special event station R1000M celebrates the 1.000th anniversary of the "Unity of the Mordovian People with Peoples of Russian State" until Sep 30. OPs are Alexey,RA4UDC (RDA MD-05), Dmitry,RA4UVK (RDA MD-03), Andrey,RW4UW (RDA MD-05), and Sergey,RZ4UZ (RDA MD-04). QSL via RA4UVK.
They have also a free award "Mordovia 1000" issued as PDF.
See also: http://mineco.e-mordovia.ru/en/index.php?Itemid=476

UT, UKRAINE
Members of the Belotserkovsky Radio Club (BCRC) plan to be active as
EM0UBC from Aug 24-26 to celebrate the Ukrainian Independence Day.
The BCRC will operate from the national park Alexandria (WFF Ukraine-
URFF-91, Ukrainian Flora Fauna: UYFF-33). QSOs also count for the
Ukrainian Rivers Award (URA-034-Ros'River). QSL via UR4UXD.
See also: http://bcrc.at.ua

VQ9, Diego Garcia CANCELLED: The activity announced in last DXNL has been
cancelled unfortunately.

Honeymoon to Africa: Alessandro,IW5ELA, will be active as 3B8/IW5ELA and
ZS/IW5ELA with FT-857 and vertical on 20m/17m/15m/12m from Aug 28 until
Sep 12. He will be on his honeymoon, but he will devote some time to
radio activity as well. See: http://honeymoonafrica2012.jimdo.com and
http://www.clublog.org/logsearch/3b8/iw5ela

IIHG Award: The "Indonesia Islands Hunter Groups" (IIHG) connects DXers who
like to contact the many islands of Indonesia. Membership is free.

UPCOMING CONTESTS

Aug 25/26 YO DX Contest
Aug 25/26 SCC RTTY Championship

The "Russian RDA Contest" is sponsored by the "Tambov Award Group" and will
take place on the third weekend of August. See: http://rdaward.org/rdac1.htm

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-004, EA8, Canary Islands: Stan,EA8/EI6DX, plans to activate two national
parks on Fuerteventura (EAFF-063, EAFF-065 or EAFF-195) from Aug 16-30.
QSL only via RX3RC (bureau/direct).

AF-030, ZD9, Gough Island: Paul,ZD9KN, will be QRV only in SSB on 160m-10m
from Gough Island using a FT2000 and dipoles between Aug 18 and Sep 31.
The log will be uploades to the LoTW within one year.
QSL direct via IZ0UIM.

EU-015, SV9, Crete Island: Luc,SV9/ON6DSL/p, will spend his holidays on
Crete (GIOTA KRS-005, MIA MGC-005, WLOTA 1400) and works only in SSB

from Aug 27 until Sep 3. He als plans some SOTA activities.
QSL via ON6DSL (bureau/direct).

EU-045, I*0, Lazio Region group: IB0E will be active with two stations in
SSB and digital modes on 80m-10m from Isola di Ventotene (IIA LT-011,
MIA MI-118, WFF IFF-110, WLOTA 1403) from Aug 25-31.
QSL via operator's instructions.

EU-120, G/M, English Coastal Islands: Russell,G5XW, will be QRV as G5XW/p
from the Isle of Wight on Aug 26/27. QSL only direct via QRZ.com.

EU-174, SV, Makedonia/Thraki Region group: Membes of the White Tower DX Team
plan to hit the airwaves as J48SV from Samothraki Island (MIA MG-100,
WLOTA 4166, GIOTA NAS-032) from Aug 24-27. QSL via SV2FPU.

EU-176, SM3, Gavleborg County group: Jorgen,SM3CXS, will be QRV as SG3U from
Grimskar Island working in SSB/CW on the HF bands from Aug 23-26.
QSL via SG3U (bureau/direct/LoTW).

EU-183, YO, Romania group: A group of Romanian operators will be active
as YP1S from Sacalinu Mare Island (Loc KN34bk) from Aug 23-29.
QSL via YO9FNP.

NA-039, KL7, Andreanof Islands: Kevin,KL7/KJ4OAP, Nathaniel,KL7/W2NAF, and
Ethan,KL7/K8GU, plan to become active on 40m-6m from Adak Island (USi
AK008S, WLOTA 1258, Loc AO11) between Aug 23 and Sep 12.
QSLs via homecalls (d/L).

SA-037, YV, Blanquilla group: Members of the "Grupo DX Caracas" are planning
a DXpedition to Isla la Blanquilla (DIV-039, Loc FK71qt) and the local
lighthouse (ARLHS VEN-023/TWLHD WLH YV-001/WLOTA 0894/Admiralty J6426).
Listen for YW5B in all modes on 160m-6m from Aug 22-27. QSL via DM4TI.

News of the DARC Band Monitoring System

Following the news of the DARC Bandwatch (similar to IARU Monitoring System)
compiled by its director Ulrich Bihlmayer, DJ9KR:
Radio Bangladesh is transmitting on 7105 kHz since Aug 13. Harald,DL5HAQ,
and Wolf,DF5SX, reported this as a "new intruder" in the 7 MHz band. The
radio station has been spotted with a maximum of S9+40dB from 1820-1940 UTC.

Their homepage says their frequency is 7250 kHz. So please observe also this QRG in the evening and night hours and inform the bandwatch if you hear it!
Wolf,DK2OM, has found an unknown burst system from France on 3500, 7000, 14000 and 21000 kHz which is active every day at the full hour. The signals are coming from France but the purpose is unknown. An international appeal has been issued by the Germany agency. Another unknown CLOVER 2000-mailbox has been spotted in the 21 MHz band during night and day. This commercial mailbox sent idle tones on 21138.5 kHz and its location is supposed to be in the Sultanate of Oman in the Middle East (reported by Wolf,DK2OM).
In July, the 15m band was again disturbed by the emissions of OTH radars from Turkey and from the UK Royal Air Force on Cyprus. Mario,DG0JBJ, sent 27 reports of radars in this band. Due to poor conditions on 28 MHz the radars avoided the 10m band in July. Also for July Georg,DJ7KG, sent 203 reports of illegal driftnet buoys in the 28000-28540 kHz range using CW IDs with one, two or three letters.
If you discover a pirate radio within exclusive radio bands please report it online to the "Intruder Logger" directly.
Take advantage of this opportunity: http://peditio.net/intruder/bluechat.cgi

Radio Enthusiasts Transmit from Harwich Lighthouse:

Posted: 21 Aug 2012 05:00 PM PDT
http://www.eham.net/articles/28859

LIGHTHOUSE and radio enthusiasts were treated to two days of international transmitting from lighthouses and a lightship. The High Lighthouse, the Low Lighthouse and LV18 Lightship in Harwich welcomed amateur radio enthusiasts to make global broadcasts as part of the International Lighthouse and Lightship Weekend. Enthusiasts could set up transmitters to send a receive signals from around the world.

//
Amateur Radio Flea Market Brings in a Crowd:

Posted: 21 Aug 2012 05:00 PM PDT
http://www.eham.net/articles/28858

Even though Westminster's Ed Kriston has been a licensed amateur radio operator since the mid-90s, he's still a newbie. Kriston set up his table at Hamfest, the amateur radio flea market where amateur radio enthusiasts, also known as hams, sell and buy each other's goods, bright and early on Sunday morning. Kriston was looking to sell items, and said he sold a fair amount of his ham operated radios. Amateur radio is a long-standing hobby from the early 1900s, in which those with a ham radio can interact with one another. Hams can do any number of tasks with their radios, from speaking with other hams from around the world, to lending an open line of communication in emergency situations, said Andy Leeds, the president of the Carroll County Amateur Radio Club.

//
Ham Convention to Explore Important MA, New England Interop Issues:

Posted: 21 Aug 2012 05:00 PM PDT
http://www.eham.net/articles/28857

Every other year for the last half-century or so, the New England Division of the American Radio Relay League has come together in its convention where: Friendships are renewed Informational sessions are held New equipment is displayed A keynote address is given by someone of note (this year by the chief meteorologist of a CT TV station, who also happens to be a ham Trends are discussed Flea Market is held This is all pretty standard fare for the NE Convention, scheduled from Aug. 24-26 at the Boxboro

Convention Center, just off Route 495 in Boxboro, MA. This year, though, there are other key issues that affect the whole Ham Radio establishment in New England and, ultimately, across the nation to be discussed at several of the session to be held. Interoperability The word interoperability raises its head again as the Ham Radio world tries to figure out where exactly it fits in the rapidly changing world of emergency and disaster communications. At one time, it was easy, you called on the RACES (Radio Amateur Civil Emergency Service) to help out and its virtual auxiliary the Amateur Radio Emergency Service (ARES) to help out. Hams turned out from all over New England to help out.

Creating a Worldwide Radio Community:

Posted: 21 Aug 2012 05:00 PM PDT
http://www.eham.net/articles/28856

The International Radio Union (IARU) has expressed public support for the European Broadcasting Union's (EBU's) application to the Internet Corporation for Assigned Names and Numbers (ICANN) to manage the top level domain name .radio to create a worldwide radio community. Under the proposal, registration will be available via the EBU to all eligible radio representative organisations and broadcasters, Internet radios, radio amateurs, radio professionals and their respective representative organizations, as well as companies providing radio-specific products and services. In a letter ICANN board chairman Steve Crocker, IARU president Timothy Ellam comments: "The IARU believes that the .radio proposal submitted by the EBU provides a unique opportunity to standardise radio domain names on the Internet. The use of a specific global online name such as .radio can help create a unique space worldwide, a place where the global radio community can gather. "In my capacity as the IARU President, I recommend that the .radio Top Level Domain (TLD) proposal of the EBU be approved by ICANN." The IARU has been the watchdog and voice of the world Amateur Radio community since 1925 with a 160 strong membership from many different countries and territories.

RAC Bulletin 2012-049E - Non-Amateur Use of Frequency in BC
2012-08-22

>From August 5th to 12th, the Canadian Paragliding National Championships were held in Pemberton, BC. The Radio Amateurs of Canada became extremely concerned about the organizers assertion that all participants must use a VHF radio tuned to 146.415 Mhz. This frequency is inside the two meter amateur allocation. Amateur operators are the primary user of this band and incursion by non-authorized users is of great concern.

RAC has been in contact with representatives from the Paragliding community and has also requested enforcement action to be taken by Industry Canada. The Radio Amateurs of Canada does not generally discuss enforcement while an investigation in ongoing. However, given the scope of concern over this matter it is appropriate to release details of actions to date.

Industry Canada has advised this morning that their British Columbia office has notified the group that use of Amateur Radio Frequencies by persons who are not in possession of a valid Amateur Radio Operator's Certificate is not permitted. The group has assured Industry Canada that all participants who used the channel were indeed holders of a certificate. A notice indicating the requirement to hold an operators certificate has been added to the website of the group.

Additionally, Industry Canada has advised the group of a VHF frequency inside the Aeronautical Radio Frequency Band that has been allocated for their use on a Canada Wide basis.

The Radio Amateurs of Canada has prioritized protection of Amateur Radio Frequencies from incursion. If you suspect incursion on an Amateur Band or are aware of the illegal operation of Amateur Radio products by individuals or companies that do not hold operators certificates, contact the Radio Amateurs of Canada to report your concerns.

The Radio Amateurs of Canada is the national voice of Amateur Radio Operators in Canada. Our members enjoy numerous benefits including access to The Canadian Amateur publication. We extend frequency protection work to members and non-members alike to ensure the future of our hobby and emergency service work.

Bill Gade, VE4WO
Regulatory Affairs Officer

Vernon Ikeda - VE2MBS/VE2QQ

Hurricane Watch Net to listen as Isaac approaches

Posted: 22 Aug 2012 05:18 AM PDT
http://forums.qrz.com/showthread.php?358692-Hurricane-Watch-Net-to-listen-as-Isaac-approaches&goto=newpost

There is little question where tropical storm Isaac is headed - all the models show the storm heading across the islands and into Southern Florida. The question is: how intense will the storm get? Anticipating growth of this storm as it tracks across the Atlantic Basin, the Hurricane Watch Net will launch with an informal listening status beginning Thursday, August 23, 2012, around 3 PM EDT (1900z). HWN operators will be listening on our primary frequency, 14.325 MHz, for stations in the affected area who may have questions or need information on the storm. We will also of course be ready to receive observed conditions as the storm approaches. When Isaac grows into Hurricane status, HWN will move to a more formal net.

The latest NHC bulletins and graphics are available on the Hurricane Watch Net website, http://www.hwn.org along with a large array of tools, calculators, conversions and other useful features for understanding storm information. As always, we sincerely appreciate your courtesy in allowing a clear frequency for the Hurricane Watch Net!

Hams In Space to Appear at the Joplin Hamfest

Posted: 23 Aug 2012 06:32 AM PDT
http://forums.qrz.com/showthread.php?358813-Hams-In-Space-to-Appear-at-the-Joplin-Hamfest&goto=newpost

The Hams In Space Team of KD0HKD ☐ Randy Schulze, KY0F- Eddy Paul, and Jeremy Widner ☐ K0PDX will be providing their presentation on working Amateur Radio Satellites at the Joplin Hamfest in Joplin, Missouri. The Joplin Hamfest, one of the largest hamfests in the region, will be held at the Holiday Inn and Convention Center, just off Exit 8-B along I-44, will be held August 24th and 25th. The Hams In Space Team is scheduled to give their presentation at 9:00 AM CDT on Saturday, the 24th, but will be providing hands-on demonstrations, (weather permitting,) during passes of SO-50 and AO-27. If you☐re a satellite enthusiast, but you☐ll not be able to attend the hamfest, please listen up on SO-50 and AO-27 this Friday and Saturday as we place radios and antennas in the hands of licensed amateur radio operators who☐ve never experienced the excitement working satellites before.

We look forward to hearing you on the birds!

For more information on the Joplin Hamfest, go to: http://www.joplin-arc.org

For more information on the Hams In Space Team, go to:

Amateur Radio Newsline(tm) Report 1828 - August 24 2012

Attention bulletin stations. Please note that this is an extended newscast and contains three breaks. Thank you.

Amateur Radio Newsline report number 1828 with a release date of August 24 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC releases the text of its report to Congress on the role of amateur radio in emergency communications but provides no relief for hams living with deed restrictions or CC&R's. Also, hams in Quebec Canada get an implied exemption to that Provinces restrictive cellphone law and we take you to the Huntsville Hamfest where Erin King, AK4JG, receives the 2012 Young Ham of the Year Award. Please join with us on an extended Amateur Radio Newsline(tm) report number 1828 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: FCC RELEASES TEXT OF ITS R&O IN IMPEDIMENTS TO HAM RADIO

The FCC has released its long awaited report to Congress into the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief operations. It also delves into the existence of impediments to this aspect of personal communications. Amateur Radio Newsline's Don Carlson, KQ6FM, has the details:

--

Don't look for Congressional action to override private land use restrictions more commonly known as Conditions Covenants and Restrictions or CC&R's even if hams believe that these restrictions hamper them in times of emergencies. This is because in its report to the legislative body, the FCC says that, in its view, such restrictions do not constitute a significant impediment to ham radio or those in the United States amateur radio service.

In its report, the FCC noted that some of what it calls "commenters" recommend that CC&Rs be preempted if they prohibit antennas that are within certain limits. Others suggest that private land use restrictions on amateur antennas should be permitted only for safety considerations, and not for aesthetic reasons.

However, another group believes that it is not necessary to preempt private land use restrictions in order to promote amateur emergency

communications. This, given the ways that even amateurs subject to CC&Rs can communicate effectively and the nature of amateur emergency communications.

Moreover, while commenters suggest that private land use restrictions have become more common, the FCC's says that its own review of the record does not indicate that amateur operators are unable to find homes that are not subject to such restrictions. Therefore, at this time, the Commission does not see a compelling reason for it to revisit its previous determinations that preemption should not be expanded to CC&Rs.

In relation to other impediments, the Commission says that it has already preempted state and local regulations that do not reasonably accommodate amateur radio communications and do not represent the minimum practicable regulations to accomplish the local authority's legitimate purpose. The Commission says that it has also addressed regulations regarding possession and operation of amateur radio equipment while driving. These are state and local laws that prohibit cellular telephone and texting devices and are many times very broadly written as to catch hams, CB operators and even commercial radio users into a confusing maze of legal webs.

And as to any FCC rules that may be an impediment to the various technical aspects of enhanced - read that as digital amateur service emergency communications, the FCC believes that these matters can be considered through the Commission's rulemaking process. Consequently, it does not believe that Congressional action is necessary to address that issue either.

On the other side of the coin, the FCC notes that the ham radio community and the emergency response and disaster communications communities all agree that amateur radio can be of great value in emergency response situations. The regulatory agency notes that amateur radio carries with it a wide range of advantages that allow it to supplement other emergency communications activities during disasters. This says the FCC, has been demonstrated time and again in a wide variety of emergency and disaster situations including Hurricane Katrina.

But at this point the regulatory agency sort of contradicts itself regarding CC&R's, albeit it may not have noticed its own mistake.

Here, the FCC notes that amateur radio emergency communications require not only stations in a position to originate the emergency message, but also as an alternative to the commercial communications infrastructure impacted by the emergency. This alternative infrastructure is the network of amateur radio operators and their stations that relay messages, build and maintain repeater stations and repeater networks, operate High Frequency message networks to send messages greater distances than are practical with mobile or transportable transmitters, and develop new technologies to improve the reliability of these

networks. As such, the FCC contends that this value could potentially be increased, through cooperation among Department of Homeland Security, public safety, emergency management, and amateur radio emergency communications associations and groups to develop future training protocols.

But what the FCC fails or refuses to address is how radio amateurs living with CC&R's that restrict or outright forbid antennas can possibly pass along emergency traffic using the High Frequency bands. It's not likely that a long wire or dipole hidden in a hams attic is going to break through to any emergency net or pass traffic under adverse conditions. Operating effectively on the High Frequency bands requires decent outdoor antennas hung in the clear and this is something that the FCC fails to address in this section of its report.

Finally, the FCC recommends that the Department of Homeland Security work with state, local, and tribal authorities to develop disaster area access policies and qualifications for trained amateur operators who provide emergency communications support. The only question here is how you get the attention of these agencies, many of whom consider themselves autonomous are not interested in assistance from the public at large.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM in Reno.

--

You can download and read the entire 15 page FCC accounting to Congress at tinyurl.com/FCC-To-Congress-Report. It's written pretty much in plain language and might well make an excellent program for radio clubs and on-air discussion nets. This is because it could easily set precedent in regulation of the United States Amateur Service for decades to come. (FCC)

**

THE BPL WAR: EU VS RSGB OVER BPL STANDARD

A battle appears to be brewing between the Radio Society of Great Britain and the chairman of the European Union Committee. This after the latter attacked the RSGB's call to arms in the battle against Powerline Transmission radio pollution. A technology better known as Broadband Over Powerline here in the United States. Amateur Radio Newsline's Norm Seeley, KI7UP,has more:

--

The chairman of the European Union committee on Powerline Networking has responded to the Radio Society of Great Britain's call to arms, claiming that every minute of filibustering pollutes the radio spectrum more.

According to the UK newspaper the Register, the Radio Society of Great Britain says that the new standard for broadband powerline

transmission, will water down existing requirements. This it says will open the way to greater spectrum pollution. As such, the RSGB has asked members to lobby their local representatives.

But Ronald Storrs, Chair of the committee defining the standard refutes that. He claims that it is the RSGB that is risking the airwaves with - and we quote" "their pointless protests and inflexible attitude."

The problem is that sending data signals over unshielded mains wiring, as Broadband Over Powerline transmissions does generates radio interference. And as the manufacturers push to increase speeds that interference is spreading into the frequencies used by other radio services. That, says the RSGB, is unacceptable.

But BPL or PLT equipment manufacturers have a totally different view. They say that the devices don't generate significant interference. Rather it's the mains wiring is the culprit. The manufacturers also contend that in many homes the wiring is sufficiently shielded that no interference is generated. As such they will continue to sell their devices legally.

Meantime UK telecommunications regulator Ofcom has taken a back seat in this matter. It says that it can't do anything as the devices themselves aren't radio transmitters so fall outside their purview. Ofcom says it's waiting for the new standard to be enacted which will give it some authority to regulate Broadband over Powerline technology.

So it appears that a proverbial line has been drawn in the sand between the UK ham radio community represented by the Radio Society of Great Britain and those who want to sell Broadband Over Powerline or PLT gear. And while the European Union's Storrs agrees that BPL is generating unacceptable interference, he says that every day there isn't an applicable standard in place more unrestricted gear is getting into the marketplace. He adds that the intransigence of United Kingdom's ham radio community isn't helping.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to Storrs, the manufacturers of this equipment are dead set against the proposed new standard. He also notes that the new standard already has the support of the International Amateur Radio Union and that this leaves the UK hams standing alone against the European Union. You can read the entire Register article on-line at tinyurl.com/UK-PLT-Fight (Southgate, The Register)

CHANGING OF THE GUARD: JOEL KLEINMAN, N1BKE, S-K

Ham radio has lost one of its most ardent supporters with the untimely passing of QST Managing Editor Joel Kleinman, N1BKE, who died in a house fire on Saturday, August 18th. Amateur Radio Newslines Mark Abramowicz, NT3V, has the details on this truly sad moment for all of us:

--

Neighbors of the Kleinman family were first to discover the fire that claimed the life of Joel Kleinman and left his widow, Jayne, hospitalized.

According to several news accounts, the fire inside Kleinman's Meriden, Connecticut home was pushing out heavy smoke when neighbors discovered it and some of them raced into the burning dwelling. Reports say they first pulled out Kleinman's wife, Jayne, who was already unconscious and is hospitalized at MidState Medical Center. Investigators say the rescuers saved her life.

But news accounts quote the neighbors who were involved in the daring and dangerous action as saying the heavy smoke prevented them from reaching the second floor where Joel Kleinman was found by firefighters. The medical examiner says the 64-year-old Kleinman died of smoke inhalation and he ruled the death accidental.

Joel Kleinman had been the managing editor for the American Radio Relay League's QST magazine since 2001. But his history with the ARRL goes all the way back to 1976 when he was hired by the organization to target young people with science, and amateur satellites.

A graduate of the University of Montana with a journalism degree, Kleinman - who didn't have a ham license at the time - embraced the role.

It didn't take long for his ARRL bosses to recognize his skills and he quickly moved into the operations of QST where among the jobs he held was editorial assistant and features editor. By 1988, Kleinman was promoted to book team supervisor for ARRL's publications and other media. His return to QST as the top boss a few years later, clearly was a recognition by the ARRL management of his value to the monthly publication that reaches thousands of amateurs every month.

QST Editor Steve Ford, WB8IMY called Kleinman: "...the quiet man behind the scenes, shouldering much of the burden that comes with creating 164 pages of new content every month. Joel set a high standard for all who may follow him." _ ARRL President Kay Craigie, N3KN issued a statement:

"With the passing of Joel Kleinman, N1BKE, we have lost not only a respected professional colleague, but also a friend." _ Kleinman was the former president of the Newington Amateur Radio League and was a member of the Quarter Century Wireless Association.

Funeral arrangements for Joel Kleinman were still pending as we were going to air.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Our hearts and prays go out to the Kleinman family on this very tragic loss.

(ARNewsline(tm), ARRL, Meriden Patch, Meriden Record-Journal)

**

ENFORCEMENT: FCC LOWERS FINE ISSUED TO FORT MEYERS UNLICENSED STATION

The FCC has lowered a fine imposed on an unlicensed broadcaster. This after he provided proof that the initial amount would prove a hardship that he could not afford to pay.

As previously reported, this past June 5th the Enforcement Bureau's Tampa Florida Office issued a $15,000 Notice of Apparent Liability for Forfeiture to Albert R. Knighten, Jr. of Fort Meyers. This for his alleged operation of an unlicensed radio station.

In response to the proposed fine Knighten admitted to, and apologized for, the violation. He also urged cancellation or reduction of the proposed $15,000 forfeiture, asserting that his financial situation could not the permit payment of the fine that the FCC had levied against him.

After examining the financial documents provided by Knighten, the FCC found sufficient basis to reduce the forfeiture to $1,200. However, it also cautioned Knighten that a party's inability to pay is only one factor in its forfeiture calculation analysis. It told him that it had previously rejected inability to pay claims in cases of repeated or otherwise egregious violations. In closing it warned Knighten that future violations of this kind could result in significantly higher forfeitures that may not be reduced due to financial circumstances.

Knighten was given the customary 30 days from the August 21st date of the order to pay the reduced forfeiture. If he fails to do so the matter could be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: LACK OF EAS GEAR BRINGS $10000 FINE

The license holder of a low-power FM in Mission, Texas will likely have to pay a $10,000 fine. This, for its admitted failure to install and maintain working Emergency Alert System or EAS equipment. Amateur Radio Newsline welcomes George Bowen, W2XBS, who has this report:

--

Intercity Christian Youth Program, Inc. is the licensee for low power station KCYP. Responding to a complaint, agents from the Enforcement Bureau's Houston Texas office inspected the station this past March. At that time the manager admitted to the agents the station had operated without EAS gear since the facility went on the air in 2007. KCYP also had no EAS logs to document that the facility had ever had such gear installed or that it had ever conducted the required weekly or monthly EAS tests.

The base fine for not having operational EAS gear is $8,000. The commission tacked on another $2,000 because it appears the station has not had working EAS gear for the better part of five years.

The station was 30 days to pay the fine or to file an appeal. KCYP must provide a sworn statement to the Houston office of the Enforcement Bureau certifying that it now has had E-A-S equipment installed.

For the Amateur Radio Newsline, Im George Bowen, W2XBS, in Albany, New York.

--

According to the FCC, every broadcast station is part of the nationwide Emergency Alert System network and is categorized as a participating national EAS source. This in turn means that all stations must ensure their EAS encoders and decoders are installed and working properly. (FCC, RW)

**

ENFORCEMENT: UNLICENSED BROADCASTER BUSTED UNDER FLORIDA LAW

Romayne Davis, who local Florida police say operated an unlicensed radio station, is now free on bond. Police say Davis operated an illegal station out of a warehouse since March using a laptop running iTunes.

The investigation began in July when a listener to American Public Media's Classical South Florida WKCP FM in Miami complained that rap music was interfering with the legitimate signal on 89.7 MHz. Police recovered a computer, transmitter and other gear which they said was used to broadcast the unauthorized station on an adjacent frequency of 89.5 MHz.

Unlike the FCC which normally issues fines for unlicensed operations, under Florida's strict state law regarding unauthorized transmissions, Davis, who had turned himself into authorities, could face up to five years in prison for his unlicensed station operation. (RW, WPEC)

**

RADIO LAW: FCC SEEKS COMMENT ON REGULATORY FEES FOR INDUSTRIES IT OVERSEES

Public comments to the FCC about the best way to collect regulatory fees from the industries that the agency oversees are due in mid-September.

The agency notes a lot has changed in the telecommunications marketplace since its current system for assessing and collecting regulatory fees was enacted in 1994. Back then, commission regulation centered mostly on wired local and long distance. Since then the wireless industry exploded, shifting agency resources to that industry.

Complicating things further, telephone companies have entered the video market, cable operators are winning voice customers, satellite operators offer competitive radio, television and broadband services and wireless services abound.

Comments to MD Docket 12-201 are due September 12th. Payment of the existing fees for this year are due by September 13th. This commentary period does not apply to amateur radio or other personal radio services. (FCC, RW)

**

RADIO LAW: FCC SAYS YES TO TOWER IN WILDLIFE VS. TOWER CHALLENGE

In a case involving the possibility of bird collisions with towers, the FCC has decided in favor of both the tower and its owner American Tower Corporation. Amateur Radio Newsline's Skeeter Nash, reports:

--

RADIO LAW: FCC SAYS YES TO TOWER IN WILDLIFE VS. TOWER CHALLENGE

In a case involving the possibility of bird collisions with towers, the FCC has decided in favor of both the tower and its owner, American Tower Corporation

Last April Michael Pearson of Marshall, Arkansas, raised several issues before the Commission related to a 314 foot structure registered to American Tower that was under construction in the area. American Tower suspended construction while the "Emergency Petition to Compel Compliance" order was reviewed.

In his petition to the FCC Pearson said that because the tower would be in wooded and pasture land area, and also within 4,000 feet of a wildlife management area, that the tower would negatively affect migratory birds and endangered species. This included mountain lions, bobcats and even skunks.

But in giving American Tower the green light to resume construction, the FCC said his complaint did not meet the standard for requesting environmental review. It said that Pearson didn't identify endangered

species that could be specifically affected by the tower. Rather he had listed non endangered species in the area.

Possibly more important, the FCC also stated that the proximity of a tower to a wildlife management area does not, by itself, mean that a structure may have a significant effect on the environment.

As previously reported, environmental assessments are now required for proposed new towers over 450 feet above ground level, for replacement or modification of existing structures over 450 feet that involve a major size increase or for certain lighting changes to towers over 450 feet tall. This decision is very significant as it gives insight as to how the agency will likely handle these cases in the future.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH.

--

As we go to air its unknown if Peasrson will accept the FCC's decision or if he will appeal it up the Administrative Procedures chain. FCC, RW

RADIO BUSINESS: NEW CHINA BUILT DUAL BAND MOBILE FOR UNDER $225

Get ready for the first 2 meter and 70 centimeter dual band mobile selling for under $225 including shipping. At least that's the price

being quoted in an on-line advertisement from the Hong Kong-based 409 Shop for the new Baojie model BJ-UV55 dual band mobile radio.

Like its Japan built counterparts, the BJ-UV55 has most of the features one expects from a basic dual band mobile. The radio features a large blue back lit LCD display that shows both frequencies programmed in at the same time. The transmitter runs 35 watts out on 70 centimeters and 45 watts on 2 meters. The manufacturer claims a receiver sensitivity of between .18 to .22 microvolts depending on selected bandwidth, 128 memory channels, both CTCSS and Digital CTCSS tone encoding, a DTMF microphone and even a built-in FM broadcast band receiver.

The negative on this radio is that nowhere in the advertisement is there any mention of the Baojie BJ-UV55 being FCC certified either under Part 15 or Part 90 making it illegal to import to the United States. Nor is there any service or repair station in the United States. That means returning a radio to the China-based manufacturer should it require maintenance. And as with any product purchased from a non-United States dealer, this can be more expensive than the price of the radio itself.

You can see this new dual bander on-line at tinyurl.com/Baojie-dual-band-mobile. And as we say with anything purchased from an overseas dealer, be certain that its legal to import and use here in the United States. Even more important are two words Caveat Emptor, which means buyer beware. (ARNewsline)

NAMES IN THE NEWS: NZ4O MF/HF/6M PROPAGATIONS FORECASTS GO DAILY

Thomas Giella has announced that his NZ4O Medium Frequency, High Frequency and 6 Meter Radio Wave Propagation Forecast is now published on a 'daily' basis. It can be found on line at www.solarcycle24.org and www.wcflunatall.com/propagation.htm. Thomas notes that each new edition will be available at around 1300 UTC, but that there will be no daily e-mail notice about its being posted. Just check the websites for the daily updates. (NZ4O)

**

HAM HAPPENINGS: AMATEUR RADIO AND POLITICS MEAN LOTS OF PEOPLE

North Carolina's Charlotte Observer reports that the 1,500 hotel rooms in Gaston County are solidly booked because of the Democrat Party's National Convention and a rather famous amateur radio Hamfest.

The newspaper says that the Shelby Hamfest takes place Labor Day weekend September 1st and 2nd. Meantime the 2012 Democratic National Convention is being held in the city of Charlotte from September 3rd to the 6th. And while no delegates to the convention are staying in Gaston County there are support people such as FBI agents, U.S. and foreign media and peripheral groups such as lobbyists who need places

to stay.

The annual Shelby Hamfest is one of the nations best attended amateur radio events. It is held at Biggerstaff Park in Dallas, North Carolina. The paper says that in 2011 about 12,800 ham radio enthusiasts from 30 states showed up. Many camped in RVs, but lots more stayed in local hotels. More on the hamfest is on-line at shelbyhamfest.com. (Charlotte Observer, Southgate)

**

ON THE AIR: N1Y TO COMMEMORATE THE 9/11 2001 TERRORIST ATTACKS

Members of the Symbol Technologies Amateur Radio Club will once again be operational as N1Y on September 8th and 9th. This in commemoration of those who lost their lives in the September 11th, 2001, al Quida lead terrorist attacks that felled the twin towers of the World Trade Center in New York City.

N1Y will be operating on 40, 20 and 15 meters using CW and SSB, in the General portions of those bands. A special QSL may be had by sending a SASE to W2SBL at the address found on QRZ.com. (Southgate)

**

WORLDBEAT: HAM ROAD RALLEYER REACHES MONGOLIA Despite a small war in Tajikistan, a pair of road rally enthusiasts have reached Mongolia. Neil Melville, PA9N, and Helen Woolnough, driving their 9 year old 1.1 liter Fiat Panda are taking part in the Mongol Rally where participants drive, in no more than six weeks, from the United Kingdom to Ulaanbaatar in Mongolia, using a thoroughly unsuitable car of 1.2 liters or less.

Woolnough and Meloville's entry is called The Uncertainty Principle and they started on their epic journey from the UK on July 14th. On Sunday, August 19th their location was given as 46.37 North and 96.25 East placing them near their goal.

The pair are driving the race to raise money for the Lotus Children's Centre Charitable Trust and UNICEF. By the time the event ends, they will have covered more than 10,000 miles through 19 countries, with no outside support.

Over the years PA9N has given many presentations to the AMSAT-UK International Space Colloquium in Guildford, England. His first spacecraft project was the eXpress-OSCAR 53 satellite better known as XO-53. Here on Earth you can follow their route and blog at theuncertaintyprinciple.co.uk. (Southgate)

**
WORLDBEAT: THE BBC TO TEST TURNING OFF MEDIUM WAVE TRANSMISSIONS

The British Broadcasting Corporation is undertaking a five week trial of switching off existing Medium Wave services for four BBC local radio

stations. The experiment runs from the 17th of August to the 24th of September and affects BBC Radio Kent, BBC Radio Lincolnshire, BBC Radio Merseyside and BBC Radio Nottingham.

The BBC say one way to make savings and preserve value to licensee fee payers is to switch off Medium Wave services except where listeners depend upon Medium Wave as an alternative to FM or Digital Audio Broadcasting. Medium Wave services in the UK mainly duplicate what is already available on FM and DAB, and most listeners will be able to hear their local stations on FM. Medium Wave is a European term that describes what we call the AM broadcast band here in the United States.

The BBC notes that the aim of the trial is to get a better understanding of the impact of the loss of Medium Wave would have on its core listeners and also enable the broadcaster to ensure adequate coverage is available on other platforms in these regions. (BBC)

RADIO LAW: QUEBEC ANTI CELLPHONE WHILE DRIVING LAW NOW EXCLUDES TWO WAY RADIO

Some good news for hams living in the Canadian Province of Quebec. A four year old law banning the use of cellular phones while driving now has an implied exemption for those using two-way radio gear including radio amateurs. Amateur Radio Newsline's Heather Butera-Howell, KB3TZD, is here with the latest:

--

According to a news release from Radio Amateurs of Quebec, the ban on the use of cellular telephones while driving came into force in April of 2008. Since that time different police departments have issued tickets for the use of various types of devices which in each departments view could be construed as a mobile telephone system.

Those who have received these tickets have vigorously contested them. But over the years the various courts hearing these cases have expanded considerably on what they believed the meaning of the law was to include a multitude of communications equipment far from cellular telephones.

Now, after four years of uncertainty the situation has now been clarified by amendments to the Highway Safety Code which came into effect this past June 6th. A new article of the code simply says that no person may, while driving a road vehicle, may use a hand-held device that includes a telephone function. More important, the first paragraph does not apply to a two-way radio or any cordless voice communication device which does not allow the parties to speak simultaneously.

For the Amateur Radio Newsline, I'm Heather Butera_Howell, KB3TZD, near Berwick, Pennsylvania.

--

According to the new version of the law, for the purposes of enforcement, a driver in Quebec who is holding a hand-held device that includes a telephone function is presumed to be using the device. This prohibition does not apply to drivers of emergency vehicles in the performance of their duties. (VE2LGL, RAQI)

RADIO THROUGH SPACE: MARS ROVER GETS SOFTWARE UPDATE

NASA's Mars Science Laboratory at JPL team has sent a software update to the Curiosity Rover on Mars, more than 160 million miles away. According to Venturebeat dot com, the software had to be updated because Curiosity needed different directions to drive around on Mars than it did to land on the planet's surface.

The computer hardware in the Curiosity Rover is powered by a pair of computers built by BAE Systems. These RAD750 computers use a 10-year-old IBM PowerPC microprocessor running at a relatively slow 132 megahertz. These machines also have only 120 megabytes of random access memory, but are built to withstand wild temperature swings, radiation, and physical shaking.

The drawback is that the computers on the robot vehicle did not have enough memory for both the landing and its surface missions. So NASA had to swap out the software over four days of communication through the void of space. It took so long because it takes about 14 minutes to send the signal to the rover and another 14 minutes to get a response back. (Venturebeat.com)

**

DX

In DX, K7BV, having recovered from a serious medical condition, is returning to Asia for a short visit between August 25th and September 2nd. He will be using his HS0ZKS callsign on HF bands from the home of HS1CHB, and hopes to QSO friends from around the world. He may also get on the air from Japan as well using his call JF1XJR. QSL via K7BV's new address at 290 West Road, Turkey, North Carolina 28393.

W7XA will be active stroke DU1 through August 27th from near Tagaytay Ridge which is about 40 miles south of Manila in the Philippines. His operation is on 20, 17 and 15 meters using mostly CW and some SSB. QSL via his home callsign as found on QRZ.com.

OE4JHW will be operational as 8Q7OE from the Maldives between September 3rd and the 14th. Activity will be holiday style on 40 through 10 meters using SSB and BPSK. He will focus on stations from DL, HB0, HB9 and OE, as well as on North and South America. QSL via his home callsign, direct or by the bureau. Also electronically using either Logbook of the World or eQSL.

Lastly, CT1FJZ says that he is now in Angola and is expected to be there for one year working in Benguela and Huambo. Look for him to be active as D2FJZ, mainly on the weekends and limited times during the weekdays. Activity will be on 80 through 10 meters SSB. QSL to his home callsign, by the bureau or direct.

(Above from various DX news sources)

THAT FINAL ITEM: HONORING ERIN KING, AK4JG - THE ARNEWSLINE 2012 YOUNG HAM OF THE YEAR

And finally this week, we want to take a moment to congratulate 18 year old Erin King, AK4JG, and receiving her award as the 2012 Amateur Radio Newsline Young Ham of the Year. The ceremony was held at the Huntsville Hamfest where I had the honor of being the award presentation emcee, but it was truly AK4JG's moment to shine:

--

AE5DW: "Ladies and gentlemen it is my pleasure to introduce to you a very impressive young lady. This is Erin King. She is your 2012 Amateur Radio Newsline Young Ham of the Year. Erin, the floor is yours. (Applause)

AK4JG: "Thank you. Thank you. Thanks Don. Thanks to everyone who has helped to make this possible.

"When I did my project with the tube and with all the ham radio stuff that I've been doing so far, I had no idea that it going to bring me this far. I had no idea that I was going to have the opportunity to earn this award or that any of this would be possible.

"Its been a lot of fun. I've been a ham for about four years now and I have learned so much and have met a ton of great people and ham radio has become an integral part of my life and its one of the primary reasons that I'm making the decisions for the future that I'm going to have.

"So it's all very exciting. I'm very excited to be here to earn this award, so thank you very much (applause).

--

The Amateur Radio Newsline Young Ham of the Year Award is jointly underwritten by Yaesu USA Corporation, CQ Publishing and Heil Sound. Yaesu has been with the award since its inception some 27 years ago. This year the company was represented by its Executive Vice President of Amateur Radio Sales and Marketing Dennis Motschenbacher, K7BV:

--

K7BV: "Hi Erin and congratulations from Yaesu. We don't want you to go off the air while you are traveling around with all of your schooling, We want you to have a radio that you get on the air with no matter where you go and that would be our portable FT-817ND. We hope that you will pack it in your bag and take it with you all the way to your CEO position with a Fortune 500 company sometime soon. So congratulations."

AK4JG: "Thank you. (applause)"

--

Part of the award is an expense paid trip to Spacecamp Huntsville courtesy of CQ Publishing. CQ Magazine Editor Rich Moseson, W2VU, took a bit of time to comment on quality of those nominated:

--

W2VU: We've had a tremendous time being involved with the Young Ham of the Year Award and I've been honored to be one of the judges since we became involved and the quality of the young people who have been nominated has been just wonderful and it makes me very optimistic for the future of our hobby. And this is year after year."

--

Last but by no means least the awards newest corporate sponsor Heil Sound. Not only did founder Bob Heil, K9EID, present Erin with a pair of the company's new headphones, but he also gave her a very special invitation to appear with him on his TWiT TV program Ham Nation:

--

K9EID: "Well we are so happy for you and we want to stay in touch with you as you get through all the wonderful things that happen in ham radio. Come and visit us on Ham Nation and I really hope that we can have you as a guest real soon."

--

And there you have it for yet another year. The 27th consecutive year that this award has been presented and the 19th consecutive year that the presentation has been made at the Huntsville Hamfest. And in that regard we want to express our thank you to Charlie Emerson, N4OKL, and his team that puts on this annual event and to Dave Bell, W6AQ, who sponsors the Young Ham of the Year plaque. And also to Tom Medlin,

W5KUB, who live streamed the presentation over the Internet for all to see on W5KUB.com and to Gary Pearce, KN4AQ, of Amateur Radio Video News who video recorded it for posterity. We thank you all. (ARNewsline(tm))

WIANEWS WEEK COMMENCING AUGUST 26 2012.

HAMS KILLED IN TRAGIC ACCIDENTS

A LOOK AT THE WIA BOOKSHOP WITH VK3FDSL

DOES VK1 HAVE AUSTRALIA'S TOP CLUB?

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING AUG 26 2012.

QST Managing Editor Joel Kleinman, N1BKE - SK

N1BKE died from injuries received during a house fire. He was 64.

Kleinman was responsible for the coordination, organization, control and
completion of all aspects of QST's editorial content each month. Kleinman's
wife Jayne survived the fire, but is currently in the intensive care unit
of a local hospital.

According to the Meriden Record-Journal, David Chester, who lives across the
street from the Kalimna's -- and about 20 others who were in his backyard at
the time of the fire were the first responders to the blaze. "It was crazy,"
Chester told the newspaper. "Somebody smelled smoke, and most everyone went
over there immediately."

Others immediately ran into the house to save Jayne Kleinman. "Steve [one of Chester's friends] said he saw her legs and pulled on them," Chester said. "The other two grabbed her from her back, and together they brought her out onto the front lawn."

Fire-fighters located Joel Kleinman in a bedroom on the second floor and paramedics treated him at the scene, but he died later at a local hospital.

The ARRL is collecting condolence messages to forward on to Joel's family. If you would like send a message, please email it to, news@arrl.org

ABC Local Radio stations throughout Australia did a great job publicising The ILLW.

Adelaide's Ashley Walsh from 891 interviewed the group at Cape Wolloughby then Sunday morning local ABC Hobart 936 with Chris Wisbey contacted four lighthouse stations around Tasmania.

Chris spent 23 minutes talking with:

Ray VK7VKV operating VK7LH from Low Head lighthouse on the mouth of the Tamar;

Andrew VK7AW operating from the Iron Pot Lighthouse at the mouth of the Derwent;

Erica from the Friends of Tasman Island as Mike VK7FB and Anne VK7BYL were setting up their amateur radio stations on Tasman Island;

Tony VK3VTH/7 and Dale VK7YR at the Currie lighthouse on King Island in Bass Strait.

A recording of the Tassie conversation can be found at:

https://dl.dropbox.com/u/59004910/LightHouseWeekend_Wisbey_20120819.mp3

A fantastic promotion of the event and amateur radio.

Adelaide Hills Amateur Radio Society have on their web site the audio from their ABC Local Radio.

(David Clegg President AHARS & Justin, VK7TW)

IARU welcomes dot-radio

The International Amateur Radio Union (IARU) has embraced the European Broadcasting Union (EBU) proposal that dot-radio be used to help to create a global radio community.

IARU President Tim Ellam VE6SH said the IARU believes that the proposal, to be submitted by the EBU, could provide a unique opportunity to standardise Radio domain names on the Internet.

In a letter Tim VE6SH said, "I recommend that the dot-radio Top Level Domain proposal of the EBU be approved by ICANN (Internet Corporation for Assigned

Names and Numbers)."

The IARU has been the voice of the world Amateur Radio community since 1925 with a 160 strong membership.

EBU Director General, Ingrid Deltenre said the IARU comments are an expression of confidence.

(Jim Linton VK3PC)

AUG 26 VK2 Blue Mountains Amateur Radio Club WinterFest CANCELLED.

Julian VK2YJS, Publicity Officer, WICEN NSW says that
each year WICEN NSW assists in the running of Trek for Timor, a
significant fund-raising walk, by providing communications on a range
of VHF and UHF Amateur and non-Amateur frequencies.

This year, the event, which raises funds for community development in
Timor Leste (said Lest-Ay), including the provision of vocational training,
will be held in the spectacular Blue Mountains to the west of Sydney, on
Saturday 15 September. WICEN is seeking further operators, current
members or otherwise, for the event. Any new operators would be
paired with an experienced member. F-calls are most welcome.

WICEN ACT also have a number of events over the next few months, and
would appreciate participation by Amateurs in the Territory, and from
south-eastern New South Wales.

You can find your local WICEN by visiting wicen.org.au and selecting
the relevant state.

VK1

Many times WIA National News and the various state run local news services
cry out for input from clubs as to what they are doing and we are met with
"Very Little, nothing of interest to other hams."

Well Glenn Taylor, vk1nut C.R.A.R.C. President has issued a "State of the
Nation" summary report of CRARC's Services, this is much like the late great
Chris Jones of the WIA delivered in the first year of the WIA becoming a true
national body.

I'd suggest all clubs read this and do up their own versions, you may very
well be surprised at your result!

Glenn addressed the MANY services that CRARC provides.

Membership:
CRARC has the highest number of members on record for the year 2011/2012
A credit to the greater variety of interests in amateur radio than there
have been for years and your continuing interest in supporting your club.
You should be proud of your association with CRARC and to make you feel
extra special, please consider getting a CRARC Membership Certificate
to hang on your shack wall.

VK1-News:
CRARC run the VK1-News email news by free subscription, generally individual
emails are in the form of a bulletin as news comes to light to keep you up
to date with the latest information, then a summary of the months happenings
at the end of the month.

VK1-Reflector:
If you wish to discuss anything with your fellow amateurs, there is an email based "VK1-Reflector" for the benefit of all that wish to subscribe to it.

Monthly General Meetings:
CRARC brings to their members one topic each month in the form of a presentation. Trash and Treasure nights at least twice a year.

Tech Nights:
Every second Wednesday is a Tech night at Mt Mugga starting at 7.30 pm , with helpful advice and hands on help with that special project. They have test equipment and repair equipment that can make your project easier to be completed.

VK1ACA Club House Radio Shack:
They are getting closer to completing the brand new Mt Mugga CRARC radio shack with 6m, 2m, 70cm, HF and DSTAR operating between two consoles all on modern radios available for members use.

Fifth Wednesday of the Month "On Air at Home" Night:
Some months have a bonus extra 5th Wednesday, so it is always fun to work from home and try out a different mode or test out that piece of gear you now have.

Web Site:
CRARC runs a comprehensive web site with tons of details to either get you started in something new, or just find out what is happening around the traps.

Education Services:
CRARC regularly schedules a Foundation course every two months, a team of dedicated volunteers and assessments for all levels of Amateur Licences.

QSL Inwards and Outwards Bureau service:
Let us do your QSL'ing for you.

VK1 Awards:
CRARC have the long running VK1 Award to encourage contact with the elusive VK1's by using a variety of bands. It is a great Award just for making contact with you, and it looks great too!

WICEN:
WICEN (ACT) is very active with a typical number of events per year can be as high as eight in the Canberra district including bicycle events, car rallies, horse endurance and carriage events, and walking events.

Repeaters: Mt Ginini , Isaacs Ridge
All repeaters owned and operated by CRARC in early 2013 will have the standard Wireless Institute of Australia Repeater sub tone of 91.5 Hz CTCSS added to their programming.

VK1 Technical Group:
CRARC have a small but dedicated team that maintains theses UHF, VHF and DSTAR repeaters.

Interference:
If you need help with eliminating interference from your equipment to services like television, radio or even your HiFi, just contact CRARC.

Nets:
The VK1 local D-STAR Net is held each Tuesday night at 2000 hrs. on VK1RWN G to help anyone become familiar with DSTAR or just to have a chat in this mode.

All are welcome to check in.

So there it is .. a MOST impressive club, how about it the rest of VK, can your club match that of Canberra? Put pen to paper and voice to mp3 and drop national news and your local state news services your report and "show the world."

Ipswich & District Radio Club
P.O. Box 250
Ipswich Qld 4305
Web - www.vk4wip.com
Email - vk4wip@wia.org.au
Main 2 meter repeater - 146.900, linked to 438.375 and 439.300

As part of the Ipswich and District Radio Club's 50th year celebrations, they have secured special callsign VI4WIP50 Victor India 4 Whiskey India Papa 50.

Club members have put together a roster to work the bands for the licence period from August 25 until September 8.

While the club won't be on air 24/7 during the two weeks approved by ACMA, there will be plenty of opportunities to work this very special call-sign.

At this stage weekends and some week-nights the club house will be open as members attempt to work as many stations as possible.

Listen up for VI4WIP50, from August 25.

DISCUSSION POINT

What use is an f-call

A recent lunchtime conversation between Hams revealed that the perception that you need to upgrade your license is still alive and well.

Now, I should start by saying that I'm all for upgrading your skill level and learning. Getting a higher grade license is an excellent way to formalise the process of training and encouraging yourself to learn specific skills, but that notion is not related in any way to your ability to participate as an active amateur.

I know that I keep saying that Power is not the Answer, it's what you do with what you have that makes all the difference.

The more I come across other amateurs, the more I realise that if I look at my Foundation License as a QRP, or low-power license, the more I can find challenges to tackle and investigate. I'm actively investigating new antenna types and ways to get my signal out to the world.

Last weekend I spent several hours looking for new take-off points around my QTH, my home-town, and have found several promising locations that need investigating.

The thing I like about Amateur Radio is that it's as much about being self-driven and motivated as it is about joining forces with other Amateurs who are either trying to achieve something that runs in parallel to your goals, or who have achieved what you're aiming for.

My personal goal, for no other reason that I'd like to prove to myself that it can be done is to achieve the DXCC, an amateur radio award, earned by making contact with 100 or more geographic entities around the world, using just my Foundation License. I don't know if it has been done or not and while I could spend an enjoyable Sunday finding out, it's more about showing myself that it can be done. I don't know if I am going to take a month, a year or a decade to do this, but that's my aim. One thing I know is that I'll be talking to lots of people around the world to get there - hi hi.

So, my question to you is, what motivates you to use your License, Foundation or otherwise?

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

DON'T MENTION THE WAR!

A MILITARY radio found in a bunker on Iwo Jima was probably the one used by the Japanese army to send its final message before the island was overrun by US soldiers, a news.com.au report says.

The transmitter was found in an underground bunker, near the remains of a Japanese soldier, an official said.

The bunker, in the north of the volcanic island, is believed to have functioned as the Japanese Imperial Army's communications centre, the Tokyo Shimbun said.

The message, which is widely known in Japan for its poetic expressions of self-sacrifice, redolent of the era of the samurai, says "arrows and bullets are exhausted" and "sorrow comes as I fall".

About 22,000 Japanese and 7,000 US soldiers died during the month-long battle in early 1945, which is seen as a key moment in the conflict.

www.news.com.au/breaking-news/world/iwo-jima-final-transmission-radio-found/story-e6frfkui-1226454449185#ixzz245LHaIed

IT'S ALL DONE BY MIRRORS

Several projects around the world seek to harvest solar radiation as the push continues for the sun become a major source of renewable energy.

VK3PC says a Solar Concentrator Power Station, using curved reflecting mirrors to track the sun, is proposed for Carwarp near Mildura in Victoria, delivering local jobs in its construction and ultimately power.

Four smaller solar power stations already built in central Australia.

Near Las Vegas in the USA one of the largest solar thermal farms is to be switched on in 2013 using 170,000 mirrors to concentrate sunlight to three towers.

In Paris the iconic Eiffel Tower will start making its own electricity and hot water by the end of 2013, although it will not change the tower's famous silhouette.

For the Olympics Games in Rio 2016 a solar tower and urban waterfall has been suggested to help provide the city with power.

UK PANDA ARRIVES IN MONGOLIA

Despite a small war in Tajikistan Neil Melville PA9N and Helen Woolnough driving their 9 year old 1.1 litre Fiat Panda, have now made it to Mongolia.

They are taking part in the Mongol Rally where participants drive, in no more than six weeks, from the UK to Ulaanbaatar in Mongolia, using a thoroughly unsuitable car of 1.2 litres or less.

Over the years Neil PA9N has given many presentations to the AMSAT-UK International Space Colloquium so on the underside of the bonnet they have an AMSAT-UK logo with the caption "You can have even more FUN in space".

No doubt with this seen each and every time they raise the bonnet LOT'S have seen the AMSAT logo.

This summer, in the USA, the ARRL offered teachers the opportunity to learn about ways to incorporate wireless technology into their classroom through its Teachers Institute on Wireless Technology (TI).

Since 2004, the ARRL has sponsored TI sessions as part of its educational outreach to schools.

This professional development training is offered at no cost to the teachers, but is funded through grants and donations to the ARRL's Education & Technology Program.

The Teachers Institute has provided teachers from elementary school to the university level with tools and strategies to introduce basic electronics, the science of radio, space technology and satellite communications, as well as weather science, introduction to micro-controllers and basic robotics in their classrooms.

The curriculum is designed for motivated teachers and other school staff who want to learn more about wireless technology and bring that knowledge to their students.

UK Regulator Ofcom is seeking views on the potential uses of newly available spectrum in the VHF frequency band.

Around 6 MHz of spectrum between 143 MHz and 156 MHz is becoming available for civil use. Spectrum in this band is used mainly by Private Mobile Radio, however Ofcom will consider all potential uses and users that can be accommodated.

In much of the world the amateur radio 2m band extends from 144-148 MHz instead of the 144-146 MHz allocated in the UK.

This spectrum release could open the way for a great many more civil users to operate close to the amateur radio 2m band.

Information on the consultation and details of how to respond online are at http://stakeholders.ofcom.org.uk/consultations/call-for-input/

VHF Spectrum Release in the range 143 MHz to 156 MHz Call for Input - http://stakeholders.ofcom.org.uk/binaries/consultations/call-for-input/summary/main.pdf

The consultation closes 5 p.m., Friday 12 October 2012.

BETTER THAN SEX

Henry Lundell VK2ZHE points us all to the Monday 20th of August edition of The Sydney Morning Herald where he spotted a report on the 15th International EME Conference held in Cambridge in the UK. This Conference was hosted by the UK Microwave Group and as well as EME-specific lectures there were presentations on radio astronomy and deep space communications.

You will be looking for the article "Big bounce better than Olympics and Sex!"

NEWS FROM ARNEWSLINE USA

HAM IN WALES USES UNUSUAL APPROACH TO WIN TOWER FIGHT

A ham in Wales has won a tower dispute with the town he lives in by taking a very different approach. He accused the town's community council of bordering on racism and won an appeal to erect a fourth tower in his garden.

We have more in this report:

Michael Butler, GW0MNP, had his planning application for a 21 foot antenna mast rejected three times in under a year but he did not give up. In what may best be called an unprecedented

three-pronged attack, Butler not only accused the city council of racism but also wrote letters accusing the Gazette newspaper of being "biased and sarcastic" and calling borough Mayor councillor Marlene Thomas "an idiot".

According to Wales dot com, Butler, of Green Meadow, sent a stinging letter to Cefn Cribwr Community Council last month. In it he claimed that their "prejudice" against his antenna mast installation ideas "bordered on racism".

In March, Bridgend County Borough Council planners denied Butler's request to erect the mast in his garden to further his amateur radio hobby. Those opposed to his installation compared the proposed antennae to "a flying bedstead".

But in the end, Butler's interesting approach succeeded. This when Welsh planning inspector Rebecca Phillips upheld his appeal against the council planners initial decision. Her decision means he can now keep the three towers already has and erect a fourth. The only proviso is the new tower is only at its full height for three hours a day.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, mulling this one over here in the newsroom in Los Angeles.

You can read the entire story of this fascinating tower appeal, including commentary by some of Butler's neighbours on-line at tinyurl.com/wales-antenna-win

NEW RADIO BURST HEARD ON THE HF BANDS

The IARU Monitoring System Region 1 newsletter reports on a new burst radio system that is affecting the amateur radio operations in the 80, 40, 20 and 15 meter bands.

Writing in the newsletter Wolfgang Hadel, DK2OM, says that he discovered a new burst system operating on 3.5, 7, 14 and 21 MHz, daily.

Hadel who is the IARU Region 1 Monitoring System Coordinator says that the system is active every full hour at plus 1, plus 2 and plus 3 minutes with 10.4 sec. bursts of 20 kHz width. Also, the signals appear to come from France.

DK2OM adds that audio frequency analysis seems to pin this as being similar to CODAR signals.

Their real purpose is unknown but DK2OM says that
perhaps this is a new kind of over the horizon radar or Ionosonde.

As we go to air, Germany's Department of Post and Telecommunications has
filed a complaint with its French counterpart.

DXers who recently worked Alex UA9YAB as YV7 and YV5/UA9YAB will be saddened
to hear of his death while still in Venezuela.

It is thought that his death occurred as a result of a bite from a poisonous
jellyfish. Our sympathy goes to his XYL Natalia and his two young children.

Unfortunately, Alex did not take out insurance cover for his time away. Thus,
his family urgently need assistance in raising funds to have his body
returned to Russia from Venezuela, and for funeral arrangements.

DX World.net has set aside a dedicated page for donations to be sent to the
family of Alex. Listed is every operator who has helped so far in these
hours of need.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

The IARU Region 1 site reports that Radio Bangladesh is broadcasting in the amateur radio 40m band

Dear fellow intruder busters, since 13 August 2012 Radio "Bangladesh Betar" has been transmitting every day programs in English and Bengali language on the exclusive Amateur Radio frequency 7105 kHz.

Time (UTC) Program
------------- ---------
1745-1800 carrier
1800-1900 English (General Overseas Service)
1900-1915 carrier and/or measuring tone
1915-2000 Bengali Service
2000-2015 carrier with white noise, 10 kHz spread

The signal is very strong, S9+35dB at the 40-m-dipole of DJ9KR in southern Germany, the modulation is clear.

The homepage of R.Bangladesh Betar gives 7250 kHz as transmission frequency.

Will you please listen on the frequency and inform your national telecom authorities. Ask them to send an International Complaint to the telecom authority of Bangladesh.

Thank you for your good work!

The radio amateurs of the world have the right to use their exclusive 40-m-band without the harmful interference of Radio "Bangladesh Betar".

qdg.org.au

ATV QSO PARTY Friday night August 24 till Saturday morning/afternoon AEST.

Working Australia Pedestrian Mobile.

A video showing radio amateur David Roper M 0 DAD using his pedestrian mobile station to work Paul Simmonds VK 5 PAS in South Australia on 20m is available on the web, Google M 0 PAS.

The purpose of this video was to show ham radio operator VK5PAS how he was being received at the other end of a long path QSO from Australia to UK. The receiving location is Blyth beach, North-East UK.

The equipment in use was a pedestrian portable station with everything mounted on a small shopping trolley.

The audio quality is masked in places due to the crashing noise of the wind and waves.

(SouthGate)

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

The amateur radio satellite Tethersat is a 3U CubeSat that splits into two joined by a 1 km tether to test electrodynamic tether propulsion.

Both spacecraft will use 9600 bps AX25 GFSK packet downlinks on UHF.

A launch is planned on ORS-3 in July 2013 from the Wallops Flight Facility on Wallops Island, Va.

Electrodynamic tether propulsion propulsion has the potential to make space travel significantly cheaper. It is a simplified, very low-budget magnetic sail. It can be used either to accelerate or brake an orbiting spacecraft. When direct current is pumped through the tether, it exerts a Lorentz force against the magnetic field, and the tether accelerates the spacecraft.

Potentially this technique could be used to raise the orbit of a satellite from 600 to 1000 km using a Ward Spiral manoeuvre.

See the 2009 paper Tethered Satellite Dynamics, Mission Design and Applications by Chadwick Healy

(icqpodcast.com)

WW SPECIAL INTEREST GROUPS --- ILLW

Good result for the ILLW

Many thanks to the record number of registered stations for the 15th annual International Lighthouse and Lightship Weekend.

In the lead on registrations was Australia very closely followed by the US, Germany, England and the Netherlands. The next five were Sweden, South Africa, Argentina, Scotland and Canada.

There were 472 registrations just ahead of last year, a very good result despite having eight fewer countries participating, with financial and political change thought to be contributing factors.

In some places, judging by the increased public visits, there was interest in the ancient form of maritime navigation. The news media also helped by running numerous stories about the weekend.

It met its intentions of raising awareness of the need to restore and preserve the structures, promote amateur radio and spread goodwill.

Visit the website ILLW.NET for full details, reports from the many activations, and online registration for the next fun event to be held on August 17-18 August 2013.

[IARU-R2-News 211] Dominican Republic Emergency Network activated,
given the proximity of tropical storm Isaac
Reply-To: xe1r@iaru-r2.org

Day-time operation frequency 7065 kHz
Coordination station HI8COE , Emergency Operations Committee
Evening operation frequency 3780 kHz

Emergency frequencies to be used by Cuba

7110 kHz day-time, PRIMARY NATIONAL
7120 kHz day-time, SECONDARY NATIONAL

7045 kHz day-time, EASTERN REGION

3740 kHz evening, PRIMARY NATIONAL
3720 kHz evening, SECONDARY NATIONAL
3715 KHz alternate evening

Other frequencies in the range from 7030 to 7125 kilohertz would be used
by province networks as necessary

Other frequencies in the range from 3700 to 3770 kilohertz would be used
by province networks as necessary

Thanks in advance to all amateur radio stations of Region 2 for offering
the greatest possible protection to the frequencies used for emergency
operations

NOTE: Jamaica traditionally does NOT use shortwave bands for emergencies
since they handle these in the 2-metre band, using their repeaters
located in the mountain ranges.

Sincerely
Prof. Arnaldo Coro Antich
CO2KK
IARU Region II Area C Emergency Coordinator

Propagation Forecast Bulletin #34 de K7RA:

Posted: 24 Aug 2012 08:07 AM PDT
http://www.eham.net/articles/28879

Weak solar activity continues. Average daily sunspot numbers for
the seven days of August 16-22 were down 23 points, or 30 percent,
to 54.6. Average daily solar flux dropped a little over 16 percent,
or 18.7 points, to 96. These figures offer a comparison between
August 9-15 and the latest reporting period, August 16-22.

//
2012 RD Contest -- A Huge Success:

Posted: 23 Aug 2012 05:15 PM PDT
http://www.eham.net/articles/28875

On all accounts the RD was a huge success under the new rules format. Most
appreciated was the amount of improved activity across the bands.
Propagation was extremely kind with a low noise level on all bands. Great
to see eastern /QRP stations making VK6 on a regular basis.
The new 3 hour rule did as expected and stations moved from one band to
another keeping things alive.

//
All Nine Azores Islands, CU1 Through CU9, Activated At Once:

Posted: 23 Aug 2012 05:15 PM PDT
http://www.eham.net/articles/28874

Are You Ready to Fly to Azores for Free by Making Nine QSOs? Yes indeed,
those of you willing to spend 24 hours or less on the radio are eligible to
participate in an Azores lottery for two all-paid packages to the beautiful
Azores Islands in the Atlantic, completely free of charge. The project is
organized by the Azores-Finland Friendship Consortium in partnership with
the Amateur Radio Associations of the Azores Islands and supported by the
Azores Promotion Agency (ATA) and Azorean Airlines (SATA). Just look at the
following Link and make up your mind. Not many people know that the Azores
consist of nine populated islands, stretching over a distance of 602 km
(305mi) from East to West, next to USA and Europe. And it is not widely
known that the Azores have their own airline (SATA) flying to each island,
in addition to many destinations in Europe and North America. Each island
has its own characteristics and its own blend and alone qualifies for your

visit there. While these islands count for a single DXCC entity, they offer three (3) IOTA groupings. With this unique AZORES 9 ISLANDS HUNT, an invited international group of amateur radio operators together with resident Azores amateurs will be activating the nine islands, offering an opportunity to the world to contact these islands all at once over one weekend.

http://www.eham.net/articles/28869

QST Managing Editor Joel P. Kleinman, N1BKE, of Meriden, Connecticut, died from injuries received during a house fire on August 18. He was 64. Kleinman was responsible for the coordination, organization, control and completion of all aspects of QST's editorial content each month. Kleinman's wife Jayne survived the fire, but is currently in the intensive care unit of a local hospital.

HWN in Listening Mode for Isaac:

Posted: 23 Aug 2012 01:16 PM PDT
http://www.eham.net/articles/28861

There is little question where tropical storm Isaac is headed - all the models show the storm heading across the islands and into Southern Florida. The question is: how intense will the storm get? Anticipating growth of this storm as it tracks across the Atlantic Basin, the Hurricane Watch Net will launch with an informal listening status beginning Thursday, August 23, 2012, around 3 PM EDT (1900z). HWN operators will be listening on our primary frequency, 14.325 MHz, for stations in the affected area who may have questions or need information on the storm. We will also of course be ready to receive observed conditions as the storm approaches. When Isaac grows into Hurricane status, HWN will move to a more formal net.

Ohio QSO Party 2012 -- 1600z Sat, Aug 25 to 0400z Sun, Aug 26

Posted: 24 Aug 2012 09:50 AM PDT
http://forums.qrz.com/showthread.php?358936-Ohio-QSO-Party-2012-1600z-Sat-Aug-25-to-0400z-Sun-Aug-26&goto=newpost

Hi Folks,

The 2012 Ohio QSO Party is less than 12 hours away. If you've got some time Saturday [and Sunday, depending upon where you are], please do consider jumping on and making a few contacts with the participating Ohio stations.

What: Ohio QSO Party 2012

When: 1600Z, Saturday Aug 25 to 0400Z, Sunday Aug 26 (Saturday, noon til midnight EDT)

Website: http://www.ohqp.org

Rules: http://www.ohqp.org/adminRules.htm

In-state, out-of-state and DX contacts are all welcome and encouraged. Those who plan on operating inside Ohio are encouraged to submit their planned operation at the following URL:

http://www.ohqp.org/plannedOpsEntryOhQP.html

If you're outside of Ohio and are in need of a particular rare Ohio county, this is your chance to make the contact. There will be quite a few mobiles operating in Ohio for the event, so if you're into the challenge of chasing the mobiles you'll have some fun!

Mike / AA8IA

SARL NEWS - SUNDAY 26 AUGUST 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEYS

It is with regret we advise that the keys of two radio amateurs stopped operation on the same day last week.

That of Chris Willigenburg, ZS6VB, went silent after a short period of fighting a battle with Leukemia. Chris was very involved with Hamnet and was Provincial Director for Gauteng South for a period a few years back. He leaves Linda, his wife and 2 daughters.

That of Rodney James, ZR6NTN, went silent at the age of 58 after a short illness.

Rodney was licenced in 2009, and was a member of the Sandton ARC. He leaves his wife Delilah and adopted son Ryan.

We offer our condolences to their families and friends.

In the news today:

RADIO TECHNOLOGY IN ACTION ON 1 SEPTEMBER IN PE

MTN TO SPONSOR RADIO AMATEUR AWARDS - NOMINATIONS ARE INVITED

BPL WAR: EU VS RSGB OVER BPL STANDARD

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

RADIO TECHNOLOGY IN ACTION ON 1 SEPTEMBER IN PE

Register now for the SARL Radio Technology in Action Symposium to be held at the Nelson Mandela Metropolitan University in Port Elizabeth on 1 September 2012. The event features an exciting keynote address by Jason Manly of SKA South Africa.

He will discuss the road to the world's largest science instrument, the Square Kilometre Array. There'll be a specific focus on South Africa's part in this project, both from technical and human capital development viewpoints. South Africa's own KAT-7 and 64-dish MeerKAT arrays that are currently being deployed in the Karoo will be described in some detail along with how these are leading towards the SKA. The SKA itself will consist of three separate array types built in two phases over multiple continents. What does the right to host this premier international instrument mean for South Africa and Africa in general?

Jason told SARL NEWS: "With my background in signal processing, there'll probably be a bit of a bias towards SDR, but I'll keep it interesting describing everything from antenna feeds and reflector design to signal transport and data post processing, with a few slides about the science goals thrown in for good measure!"

We promised that the Port Elizabeth RTA would have a very special keynote. We are able to deliver on that promise with a very special hour.

The rest of the programme will follow the programme presented at the Durban and Gauteng RTA with plenty of hands-on type presentation.

Pre-booking is recommended to ensure that enough 80 metre experimental SDR kits and CD's are available. It also assists with the catering. A registration form can be downloaded from www.sarl.org.za as well as a detailed programme. Pre-booking closes on Thursday evening. So do not delay. All persons who pre-book will take part in an additional draw for the ARRL Basic Antenna book.

You can register at the venue on Saturday morning but pre-booking is preferred.

MTN TO SPONSOR RADIO AMATEUR AWARDS - NOMINATIONS ARE INVITED

MTN is the new sponsor for the South African Amateur Radio Development Trust Radio Amateurs awards. Nominations are invited for the three categories in which awards are made:

GARTH MILNE TECHNICAL INNOVATION AWARD The award is made for the support, development and application of Technological Innovation in Amateur Radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or a tertiary education institution.

MTN RADIO AMATEUR OF THE YEAR AWARD The award is made for the support and development of the Amateur Radio Service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her

expertise and time to the promotion of Amateur Radio in South Africa.

MTN AMATEUR RADIO COMMUNITY SERVICE AWARD Annually the South African Amateur Radio Development Trust is recognising a radio amateur or a group of radio amateurs for service to the community.

Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Nomination forms are available on www.amateurradio.org.za or by sending a mail request to saardt@intekom.co.za. The closing date for nominations is 30 September.

BPL WAR: EU VS RSGB OVER BPL STANDARD

A battle appears to be brewing between the Radio Society of Great Britain and the chairman of the European Union Committee. This after the latter attacked the RSGB's call to arms in the battle against Powerline Transmission radio pollution according to a report on Newsline.

The chairman of the European Union committee on Powerline Networking has responded to the Radio Society of Great Britain's call to arms, claiming that every minute of filibustering pollutes the radio spectrum more.

According to the UK newspaper the Register, the Radio Society of Great Britain says that the new standard for broadband powerline transmission, will water down existing requirements. This it says will open the way to greater spectrum pollution. As such, the RSGB has asked members to lobby their local representatives.

But Ronald Storrs, Chair of the committee defining the standard, refutes that. He claims that it is the RSGB that is risking the airwaves with - and we quote" "their pointless protests and inflexible attitude."

The problem is that sending data signals over unshielded mains wiring, as Broadband Over Powerline transmissions does, generates radio interference. And as the manufacturers push to increase speeds that interference is spreading into the frequencies used by other radio services. That, says the RSGB, is unacceptable.

But BPL or PLT equipment manufacturers have a totally different view. They say that the devices don't generate significant interference. Rather it's the mains wiring thats the culprit. The manufacturers also contend that in many homes the wiring is sufficiently shielded that no interference is generated. As such they will continue to sell their devices legally.

Meantime UK telecommunications regulator Ofcom has taken a back seat in this matter. It says that it can't do anything as the devices themselves aren't radio transmitters so fall outside their purview. Ofcom says it's waiting for the new standard to be enacted which will give it some authority to regulate Broadband over Powerline technology.

So it appears that a proverbial line has been drawn in the sand between the UK amateur radio community represented by the Radio Society of Great Britain and those who want to sell Broadband Over Powerline or PLT gear. And while the European Union's Storrs agrees that BPL is generating unacceptable interference, he says that every day there isn't an applicable standard in place more unrestricted gear is getting into the marketplace. He adds that the intransigence of United Kingdom's amateur radio community isn't helping.

CPUT CUBESAT TO LAUNCH END NOVEMBER

The CubeSat designed and built by students at the Cape Peninsular University of Technology in Bellville will be launched towards the end of November. Still known by its engineering name ZACube-1, the satellite will be shipped in the next few weeks to Holland where it will be integrated with two other CubeSats in the launch carrier before being shipped for integrating with the rocket. ZACube-1 carries a HF transmitter operating on 14 099 kHz, a small camera and a telemetry transmitter. Listen to Amateur Radio Today this morning for an interview with Francois Visser, of CPUT who is leading the project.

NEW WEB FEATURES ON THE SARL WEB

>From this week, two new regular news features have been added on the home page of the SARL Web. Dennis Green, ZS4BS, will weekly update HF and DX information while Geoff Levey, ZS6GRL, will keep you up to date with contesting. Visit www.sarl.org.za, another membership service form the SARL.

ANNUAL SUBSCRIPTION

Subscriptions to the SARL were due on 1 June 2012. If you have not yet paid yours please do so without delay. The cutoff date is 31 August. If you have mislaid your invoice, call Mariska on Monday on 011 675 2393 to get the information.

CONTEST NEWS

The SARL HF CW Contest is on the air this afternoon from 13:00 to 16:00 UTC with activity on 20, 40 and 80 metres. The exchange is a RST report and a consecutive serial number. Find the rules in the 2012 SARL Contest Manual.

Contest results.

SARL YL Sprint. The Contest Committee received seven contest logs and two check logs for the SARL YL Sprint held on Thursday 9 August.

Judy Pretorius, ZS6JDY, takes first place with her 142 points, followed closely by Pam Momberg, ZS6APT, with 137 points. Third place went to Celeste Searle, ZS6CNS, with 132 points and Jenni Warren, ZS4J, on 131 points, a worthy challenger.

The winner of the lucky draw for a bouquet of flowers is Celeste Searle, ZS6CNS.

SARL HF Phone Contest. The contest committee received twenty-six single operator logs, one multi-operator log and two check logs for the contest held on Sunday 5 August.

Hans Kappetijn, ZS6KR, takes top honours in the Single Operator class with 175 points, followed by Theunis Potgieter, ZS2EC, in second place with 163 points. Sharing the third position is Brendan Muller, ZS4BM, and Pierre van Deventer, ZS6A, with 151 points each. Pierre also scored the highest points on a single band with his 151 points on 40 metres.

Hendrik Rudman, ZS6RHL, and Ivan Pleho, ZS6IVP, teamed up with Francois Reyneke, ZS6FDX, to operate as ZS6FDX in the multi-operator class and they made 148 points.

In the Club Competition, the East Rand Branch has challenged the West Rand ARC! Taking first place is the East Rand Branch with 551 points, followed by the West Rand ARC with 246 points and the Pretoria ARC in third place with 223 points.

Congratulations to Hans, Pierre and the East Rand Branch. The full results of both contests have been published in HF Happenings 519.

ZS6PTA SPRING FLEA MARKET AND BOOT SALE IN PRETORIA

The Pretoria Amateur Radio Club will be hosting their spring flea market and boot sale on Saturday 1 September. The fleamarket will be held at Pretoria Motor Club in Keuning street in Silverton. The starting time is 08:00.

Everyone is welcome to attend. Come and visit the Mega Fleamarket in Pretoria. Phone Almero, ZS6LDP, on 083 938 8955, if you want to book a table or if you need more details about the flea market.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at low levels. There are currently a few sunspot regions visible but fortunately some more are in the process of being formed.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 41.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. 10 m openings will be less frequent due to the lower solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 26 August - SARL HF CW competition from 13:00 to 16:00 UTC on 20, 40 and 80 metres only. 27 August - Last day to submit logs for SARL HF digital contest to zs4bfn@netactive.co.za or Bloemfontein ARC, Box 33211, Fichardt Park, 9317, 1 September - RTA in Port Elizabeth at the Nelson Mandela Metropolitan University, pre-booking starts tomorrow, visit www.sarl.org.za. 1 September - Pretoria ARC spring flea market starting 08:00. 30 September - Nominations for MTN sponsored SAARDT awards to be in to saardt@intekom.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and shortwave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by George Honiball, ZS6NE.

Thank you for listening, 73. /EX

Exclusive new product launch at AMSAT-UK Colloquium

Posted: 25 Aug 2012 03:41 AM PDT
http://forums.qrz.com/showthread.php?359005-Exclusive-new-product-launch-at-AMSAT-UK-Colloquium&goto=newpost

amsatuk.gifExclusive new product launch at AMSAT-UK Colloquium

AMSAT-UK are delighted to announce that Howard Long, G6LVB, will
be present at the Colloquium this year and will be launching a new 'FUNcube
Dongle PRO-PLUS' during his presentation.

Full technical details have been embargoed until his talk and we are not
permitted to steal his thunder by releasing further details of this new
product in advance. Attendees at the Colloquium will therefore be the
first to learn about Howard□s latest development which will further
advance the applications for SDR devices.

The FUNcube SDR Dongle was originally developed for
educational outreach as part of the ground segment for the FUNcube
satellite.A proportion of the sales of the FUNcube SDR Dongle goes to
support AMSAT-UK's FUNcube satellite.

The AMSAT-UK Colloquium, which is open to all, is a truly international
event and will include:

Exclusive access to inspect the new SSTL clean room and
integration facilities at the recently opened Kepler Building. If you have
visited their previous facilities at the university campus, during
previous Colloquia, you will be amazed by what is happening now.

Presentations by experts from AMSAT-SA, AMSAT-NA and AMSAT-DL
on their current spacecraft projects.

CubeSat presentations on UKube-1, STRaND-1, STRaND-2 and, of
course the FUNcube-1 project.

We will be including an exclusive roundup of a number of new
live and potential spacecraft projects that are under investigation and/or
development.

Additionally a number of presentations are planned covering
new communications techniques and similar futuristic topics.

Plus all the usual networking opportunities, the gala dinner
and auction/raffle, plus the opportunity to operate the sophisticated
groundstation in the GB4FUN mobile demonstration module.

The Colloquium takes place at the Holiday Inn, Guildford, GU2
7XZ, United Kingdom, September 15-16. Rooms and Saturday□s Gala Dinner
must be booked in advance here .

Information sheet here. Travel information here.

Amateur Radio Newsline report number 1828 with a release date of August 24 2012 to follow in 5-4-3-2-1.

The following is a QST. The FCC releases the text of its report to Congress on the role of amateur radio in emergency communications but provides no relief for hams living with deed restrictions or CC&R☐s. Also, hams in QuebecCanada get an implied exemption to that Provinces restrictive cellphone law and we take you to the Huntsville Hamfest where Erin King, AK4JG, receives the 2012 Young Ham of the Year Award. Please join with us on an extended Amateur Radio Newsline☐ report number 1828 coming your way right now.

RADIO LAW: FCC RELEASES TEXT OF ITS R&O IN IMPEDIMENTS TO HAM RADIO

The FCC has released its long awaited report to Congress into the uses and capabilities of Amateur Radio Service communications in emergencies and disaster relief operations. It also delves into the existence of impediments to this aspect of personal communications. Amateur Radio Newsline☐s Don Carlson, KQ6FM, has the details:

--

Don☐t look for Congressional action to override private land use restrictions more commonly known as Conditions Covenants and Restrictions or CC&R☐s even if hams believe that these restrictions hamper them in times of emergencies. This is because in its report to the legislative body, the FCC says that, in its view, such restrictions do not constitute a significant impediment to ham radio or those in the United States amateur radio service.

In its report, the FCC noted that some of what it calls ☐commenters☐ recommend that CC&Rs be preempted if they prohibit antennas that are within certain limits. Others suggest that private land use restrictions on amateur antennas should be permitted only for safety considerations, and not for aesthetic reasons.

However, another group believes that it is not necessary to preempt private land use restrictions in order to promote amateur emergency communications. This, given the ways that even amateurs subject to CC&Rs can communicate effectively and the nature of amateur emergency communications.

Moreover, while commenters suggest that private land use restrictions have become more common, the FCC□s says that its own review of the record does not indicate that amateur operators are unable to find homes that are not subject to such restrictions. Therefore, at this time, the Commission does not see a compelling reason for it to revisit its previous determinations that preemption should not be expanded to CC&Rs.

In relation to other impediments, the Commission says that it has already preempted state and local regulations that do not reasonably accommodate amateur radio communications and do not represent the minimum practicable regulations to accomplish the local authority□s legitimate purpose. The Commission says that it has also addressed regulations regarding possession and operation of amateur radio equipment while driving. These are state and local laws that prohibit cellular telephone and texting devices and are many times very broadly written as to catch hams, CB operators and even commercial radio users into a confusing maze of legal webs.

And as to any FCC rules that may be an impediment to the various technical aspects of enhanced □ read that as digital amateur service emergency communications, the FCC believes that these matters can be considered through the Commission□s rulemaking process. Consequently, it does not believe that Congressional action is necessary to address that issue either.

On the other side of the coin, the FCC notes that the ham radio community and the emergency response and disaster communications communities all agree that amateur radio can be of great value in emergency response situations. The regulatory agency notes that amateur radio carries with it a wide range of advantages that allow it to supplement other emergency communications activities during disasters. This says the FCC, has been demonstrated time and again in a wide variety of emergency and disaster situations including Hurricane Katrina.

But at this point the regulatory agency sort of contradicts itself regarding CC&R□s, albeit it may not have noticed its own mistake.

Here, the FCC notes that amateur radio emergency communications require not only stations in a position to originate the emergency message, but also as an alternative to the commercial communications infrastructure impacted by the emergency. This alternative infrastructure is the network of amateur radio operators and their stations that relay messages, build and maintain repeater stations and repeater networks, operate High Frequency message networks to send messages greater distances than are practical with mobile or transportable transmitters, and develop new technologies to improve the reliability of these networks. As such, the FCC contends that this value could potentially be increased, through cooperation among Department of Homeland Security, public safety, emergency management, and amateur radio emergency communications associations and groups to develop future training protocols.

But what the FCC fails or refuses to address is how radio amateurs living with CC&R□s that restrict or outright forbid antennas can possibly pass

along emergency traffic using the High Frequency bands. It☐s not likely that a long wire or dipole hidden in a hams attic is going to break through to any emergency net or pass traffic under adverse conditions. Operating effectively on the High Frequency bands requires decent outdoor antennas hung in the clear and this is something that the FCC fails to address in this section of its report.

Finally, the FCC recommends that the Department of Homeland Security work with state, local, and tribal authorities to develop disaster area access policies and qualifications for trained amateur operators who provide emergency communications support. The only question here is how you get the attention of these agencies, many of whom consider themselves autonomous are not interested in assistance from the public at large.

For the Amateur Radio Newsline, I☐m Don Carlson, KQ6FM in Reno.

--

You can download and read the entire 15 page FCC accounting to Congress at tinyurl.com/FCC-To-Congress-Report. It☐s written pretty much in plain language and might well make an excellent program for radio clubs and on-air discussion nets. This is because it could easily set precedent in regulation of the United States Amateur Service for decades to come. (FCC)

**

THE BPL WAR: EU VS RSGB OVER BPL STANDARD

A battle appears to be brewing between the Radio Society of Great Britain and the chairman of the European Union Committee. This after the latter attacked the RSGB☐s call to arms in the battle against Powerline Transmission radio pollution. A technology better known as Broadband Over Powerline here in the United States. Amateur Radio Newsline☐s Norm Seeley, KI7UP,has more:

--

The chairman of the European Union committee on Powerline Networking has responded to the Radio Society of Great Britain's call to arms, claiming that every minute of filibustering pollutes the radio spectrum more.

According to the UK newspaper the Register, the Radio Society of Great Britain says that the new standard for broadband powerline transmission, will water down existing requirements. This it says will open the way to greater spectrum pollution. As such, the RSGB has asked members to lobby their local representatives.

But Ronald Storrs, Chair of the committee defining the standard refutes that. He claims that it is the RSGB that is risking the airwaves with ☐ and we quote☐ ☐their pointless protests and inflexible attitude.☐

The problem is that sending data signals over unshielded mains wiring, as Broadband Over Powerline transmissions does generates radio interference.

And as the manufacturers push to increase speeds that interference is spreading into the frequencies used by other radio services. That, says the RSGB, is unacceptable.

But BPL or PLT equipment manufacturers have a totally different view. They say that the devices don't generate significant interference. Rather it□s the mains wiring is the culprit. The manufacturers also contend that in many homes the wiring is sufficiently shielded that no interference is generated. As such they will continue to sell their devices legally.

Meantime UK telecommunications regulator Ofcom has taken a back seat in this matter. It says that it can't do anything as the devices themselves aren't radio transmitters so fall outside their purview. Ofcom says it's waiting for the new standard to be enacted which will give it some authority to regulate Broadband over Powerline technology.

So it appears that a proverbial line has been drawn in the sand between the UK ham radio community represented by the Radio Society of Great Britain and those who want to sell Broadband Over Powerline or PLT gear. And while the European Union□s Storrs agrees that BPL is generating unacceptable interference, he says that every day there isn't an applicable standard in place more unrestricted gear is getting into the marketplace. He adds that the intransigence of United Kingdom□s ham radio community isn't helping.

For the Amateur Radio Newsline, I□m Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

According to Storrs, the manufacturers of this equipment are dead set against the proposed new standard. He also notes that the new standard already has the support of the International Amateur Radio Union and that this leaves the UK hams standing alone against the European Union. You can read the entire Register article on-line at tinyurl.com/UK-PLT-Fight (Southgate, The Register)

CHANGING OF THE GUARD: JOEL KLEINMAN, N1BKE, S-K

Ham radio has lost one of its most ardent supporters with the untimely passing of QST Managing Editor Joel Kleinman, N1BKE, who died in a house fire on Saturday, August 18th. Amateur Radio Newslines Mark Abramowicz,

NT3V, has the details on this truly sad moment for all of us:

--

Neighbors of the Kleinman family were first to discover the fire that claimed the life of Joel Kleinman and left his widow, Jayne, hospitalized.

According to several news accounts, the fire inside Kleinman's Meriden, Connecticut home was pushing out heavy smoke when neighbors discovered it and some of them raced into the burning dwelling. Reports say they first pulled out Kleinman's wife, Jayne, who was already unconscious and is hospitalized at MidStateMedicalCenter. Investigators say the rescuers saved her life.

But news accounts quote the neighbors who were involved in the daring and dangerous action as saying the heavy smoke prevented them from reaching the second floor where Joel Kleinman was found by firefighters. The medical examiner says the 64-year-old Kleinman died of smoke inhalation and he ruled the death accidental.

Joel Kleinman had been the managing editor for the American Radio Relay League's QST magazine since 2001. But his history with the ARRL goes all the way back to 1976 when he was hired by the organization to target young people with science, and amateur satellites.

A graduate of the University of Montana with a journalism degree, Kleinman - who didn't have a ham license at the time - embraced the role.

It didn't take long for his ARRL bosses to recognize his skills and he quickly moved into the operations of QST where among the jobs he held was editorial assistant and features editor. By 1988, Kleinman was promoted to book team supervisor for ARRL's publications and other media. His return to QST as the top boss a few years later, clearly was a recognition by the ARRL management of his value to the monthly publication that reaches thousands of amateurs every month.

QST Editor Steve Ford, WB8IMY called Kleinman: ☐...the quiet man behind the scenes, shouldering much of the burden that comes with creating 164 pages of new content every month. Joel set a high standard for all who may follow him.☐

☐

ARRL President Kay Craigie, N3KN issued a statement: ☐With the passing of Joel Kleinman, N1BKE, we have lost not only a respected professional colleague, but also a friend.☐

☐

Kleinman was the former president of the Newington Amateur Radio League and was a member of the Quarter Century Wireless Association.

Funeral arrangements for Joel Kleinman were still pending as we were going to air.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Our hearts and prays go out to the Kleinman family on this very tragic loss.

(ARNewsline□, ARRL, Meriden Patch, Meriden Record-Journal)

ENFORCEMENT: FCC LOWERS FINE ISSUED TO FORTMEYERS UNLICENSED STATION

The FCC has lowered a fine imposed on an unlicensed broadcaster. This after he provided proof that the initial amount would prove a hardship that he could not afford to pay.

As previously reported, this past June 5th the Enforcement Bureau□s Tampa Florida Office issued a $15,000 Notice of Apparent Liability for Forfeiture to Albert R. Knighten, Jr. of FortMeyers. This for his alleged operation of an unlicensed radio station.

In response to the proposed fine Knighten admitted to, and apologized for, the violation. He also urged cancellation or reduction of the proposed $15,000 forfeiture, asserting that his financial situation could not the permit payment of the fine that the FCC had levied against him.

After examining the financial documents provided by Knighten, the FCC found sufficient basis to reduce the forfeiture to $1,200. However, it also cautioned Knighten that a party□s inability to pay is only one factor in its forfeiture calculation analysis. It told him that it had previously rejected inability to pay claims in cases of repeated or otherwise egregious violations. In closing it warned Knighten that future violations of this kind could result in significantly higher forfeitures that may not be reduced due to financial circumstances.

Knighten was given the customary 30 days from the August 21st date of the order to pay the reduced forfeiture. If he fails to do so the matter could be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: LACK OF EAS GEAR BRINGS $10000 FINE

The license holder of a low-power FM in Mission, Texas will likely have to pay a $10,000 fine. This, for its admitted failure to install and maintain working Emergency Alert System or EAS equipment. Amateur Radio Newsline welcomes George Bowen, W2XBS, who has this report:

--

Intercity Christian Youth Program, Inc. is the licensee for low power station KCYP. Responding to a complaint, agents from the Enforcement Bureau□s HoustonTexas office inspected the station this past March. At that time the manager admitted to the agents the station had operated

without EAS gear since the facility went on the air in 2007. KCYP also had no EAS logs to document that the facility had ever had such gear installed or that it had ever conducted the required weekly or monthly EAS tests.

The base fine for not having operational EAS gear is $8,000. The commission tacked on another $2,000 because it appears the station has not had working EAS gear for the better part of five years.

The station was 30 days to pay the fine or to file an appeal. KCYP must provide a sworn statement to the Houston office of the Enforcement Bureau certifying that it now has had E-A-S equipment installed.

For the Amateur Radio Newsline, Im George Bowen, W2XBS, in Albany, New York.

--

According to the FCC, every broadcast station is part of the nationwide Emergency Alert System network and is categorized as a participating national EAS source. This in turn means that all stations must ensure their EAS encoders and decoders are installed and working properly. (FCC, RW)

**

ENFORCEMENT: UNLICENSED BROADCASTER BUSTED UNDER FLORIDA LAW

Romayne Davis, who local Florida police say operated an unlicensed radio station, is now free on bond. Police say Davis operated an illegal station out of a warehouse since March using a laptop running iTunes.

The investigation began in July when a listener to American Public Media□s Classical South Florida WKCP FM in Miami complained that rap music was interfering with the legitimate signal on 89.7 MHz. Police recovered a computer, transmitter and other gear which they said was used to broadcast the unauthorized station on an adjacent frequency of 89.5 MHz.

Unlike the FCC which normally issues fines for unlicensed operations, under Florida□s strict state law regarding unauthorized transmissions, Davis, who had turned himself into authorities, could face up to five years in prison for his unlicensed station operation. (RW, WPEC)

**

RADIO LAW: FCC SEEKS COMMENT ON REGULATORY FEES FOR INDUSTRIES IT OVERSEES

Public comments to the FCC about the best way to collect regulatory fees from the industries that the agency oversees are due in mid-September.

The agency notes a lot has changed in the telecommunications marketplace since its current system for assessing and collecting regulatory fees was enacted in 1994. Back then, commission regulation centered mostly on wired local and long distance. Since then the wireless industry exploded,

shifting agency resources to that industry.

Complicating things further, telephone companies have entered the video market, cable operators are winning voice customers, satellite operators offer competitive radio, television and broadband services and wireless services abound.

Comments to MD Docket 12-201 are due September 12th. Payment of the existing fees for this year are due by September 13th. This commentary period does not apply to amateur radio or other personal radio services. (FCC, RW)

**

RADIO LAW: FCC SAYS YES TO TOWER IN WILDLIFE VS. TOWER CHALLENGE

In a case involving the possibility of bird collisions with towers, the FCC has decided in favor of both the tower and its owner American Tower Corporation. Amateur Radio Newsline□s Skeeter Nash, reports:

--

RADIO LAW: FCC SAYS YES TO TOWER IN WILDLIFE VS. TOWER CHALLENGE

In a case involving the possibility of bird collisions with towers, the FCC has decided in favor of both the tower and its owner, American Tower Corporation

Last April Michael Pearson of Marshall, Arkansas, raised several issues before the Commission related to a 314 foot structure registered to AmericanTower that was under construction in the area. AmericanTower suspended construction while the □Emergency Petition to Compel Compliance□ order was reviewed.

In his petition to the FCC Pearson said that because the tower would be in wooded and pasture land area, and also within 4,000 feet of a wildlife management area, that the tower would negatively affect migratory birds and endangered species. This included mountain lions, bobcats and even skunks.

But in giving AmericanTower the green light to resume construction, the FCC said his complaint did not meet the standard for requesting environmental review. It said that Pearson didn□t identify endangered species that could be specifically affected by the tower. Rather he had listed non endangered species in the area.

Possibly more important, the FCC also stated that the proximity of a tower to a wildlife management area does not, by itself, mean that a structure may have a significant effect on the environment.

As previously reported, environmental assessments are now required for proposed new towers over 450 feet above ground level, for replacement or modification of existing structures over 450 feet that involve a major size increase or for certain lighting changes to towers over 450 feet tall. This decision is very significant as it gives insight as to how the agency

will likely handle these cases in the future.

For the Amateur Radio Newsline, I□m Skeeter Nash, N5ASH.

--

As we go to air its unknown if Peasrson will accept the FCC□s decision or if he will appeal it up the Administrative Procedures chain. FCC, RW

WITH NEWSLINE: WHO IS STILL USING PHONE LINE ACCESS SURVEY

This note to those of you who still receive these newscasts over our 661-296-2407 dial in line rater than downloading the MP3 file from our website. Of late we have noticed a major decline in the number of those calling into it and as such we are giving consideration to discontinuing it by years end. But before we do, we want to know how many people are actually using it. If you are one of those who call in each week on the phone, please send us a note telling us who you are and the reason you are using telephone access rather than simply downloading the newscast from the Internet. Our address is the Amateur Radio Newsline, 28197 Robin Avenue, SaugusCalifornia, 91350. Or you can e-mail us at newsline (at) arnewsline (dot) org. We look forward to hearing from you. (ARNewsline)

**

RADIO BUSINESS: NEW CHINA BUILT DUAL BAND MOBILE FOR UNDER $225

Get ready for the first 2 meter and 70 centimeter dual band mobile selling for under $225 including shipping. At least that□s the price being quoted in an on-line advertisement from the Hong Kong-based 409 Shop for the new Baojie model BJ-UV55 dual band mobile radio.

Like its Japan built counterparts, the BJ-UV55 has most of the features one expects from a basic dual band mobile. The radio features a large blue back lit LCD display that shows both frequencies programmed in at the same time. The transmitter runs 35 watts out on 70 centimeters and 45 watts on 2 meters. The manufacturer claims a receiver sensitivity of between .18 to .22 microvolts depending on selected bandwidth, 128 memory channels, both CTCSS and Digital CTCSS tone encoding, a DTMF microphone and even a built-in FM broadcast band receiver.

The negative on this radio is that nowhere in the advertisement is there any mention of the Baojie BJ-UV55 being FCC certified either under Part 15 or Part 90 making it illegal to import to the United States. Nor is there any service or repair station in the United States. That means returning a radio to the China-based manufacturer should it require maintenance. And as with any product purchased from a non-United States dealer, this can be more expensive than the price of the radio itself.

You can see this new dual bander on-line at tinyurl.com/Baojie-dual-band-mobile. And as we say with anything purchased from an overseas dealer, be certain that its legal to import and use here in the United States. Even more important are two words Caveat Emptor, which means buyer beware. (ARNewsline)

**

NAMES IN THE NEWS: NZ4O MF/HF/6M PROPAGATIONS FORECASTS GO DAILY

Thomas Giella has announced that his NZ4O Medium Frequency, High Frequency and 6 Meter Radio Wave Propagation Forecast is now published on a 'daily' basis. It can be found on line at www.solarcycle24.org and www.wcflunatall.com/propagation.htm. Thomas notes that each new edition will be available at around 1300 UTC, but that there will be no daily e-mail notice about its being posted. Just check the websites for the daily updates. (NZ4O)

**

HAM HAPPENINGS: AMATEUR RADIO AND POLITICS MEAN LOTS OF PEOPLE

North Carolina□s Charlotte Observer reports that the 1,500 hotel rooms in GastonCounty are solidly booked because of the Democrat Party's National Convention and a rather famous amateur radio Hamfest.

The newspaper says that the Shelby Hamfest takes place Labor Day weekend September 1st and 2nd. Meantime the 2012 Democratic National Convention is being held in the city of Charlotte from September 3rd to the 6th. And while no delegates to the convention are staying in GastonCounty there are support people such as FBI agents, U.S. and foreign media and peripheral groups such as lobbyists who need places to stay.

The annual Shelby Hamfest is one of the nations best attended amateur radio events. It is held at BiggerstaffPark in Dallas, North Carolina. The paper says that in 2011 about 12,800 ham radio enthusiasts from 30 states showed up. Many camped in RVs, but lots more stayed in local hotels. More on the hamfest is on-line at shelbyhamfest.com. (Charlotte Observer, Southgate)

**

ON THE AIR: N1Y TO COMMEMORATE THE 9/11 2001 TERRORIST ATTACKS

Members of the Symbol Technologies Amateur Radio Club will once again be operational as N1Y on September 8th and 9th. This in commemoration of those who lost their lives in the September 11th, 2001, al Quida lead

terrorist attacks that felled the twin towers of the WorldTradeCenter in New York City.

N1Y will be operating on 40, 20 and 15 meters using CW and SSB, in the General portions of those bands. A special QSL may be had by sending a SASE to W2SBL at the address found on QRZ.com. (Southgate)

**

WORLDBEAT: HAM ROAD RALLEYER REACHES MONGOLIA

Despite a small war in Tajikistan, a pair of road rally enthusiasts have reached Mongolia. Neil Melville, PA9N, and Helen Woolnough, driving their 9 year old 1.1 liter Fiat Panda are taking part in the Mongol Rally where participants drive, in no more than six weeks, from the United Kingdom to Ulaanbaatar in Mongolia, using a thoroughly unsuitable car of 1.2 liters or less.

Woolnough and Meloville□s entry is called The Uncertainty Principle and they started on their epic journey from the UK on July 14th. On Sunday, August 19th their location was given as 46.37 North and 96.25 East placing them near their goal.

The pair are driving the race to raise money for the Lotus Children□s Centre Charitable Trust and UNICEF. By the time the event ends, they will have covered more than 10,000 miles through 19 countries, with no outside support.

Over the years PA9N has given many presentations to the AMSAT-UK International Space Colloquium in Guildford, England. His first spacecraft project was the eXpress-OSCAR 53 satellite better known as XO-53. Here on Earth you can follow their route and blog at theuncertaintyprinciple.co.uk. (Southgate)

**

WORLDBEAT: THE BBC TO TEST TURNING OFF MEDIUM WAVE TRANSMISSIONS

The British Broadcasting Corporation is undertaking a five week trial of switching off existing Medium Wave services for four BBC local radio stations. The experiment runs from the 17th of August to the 24th of September and affects BBC Radio Kent, BBC Radio Lincolnshire, BBC Radio Merseyside and BBC Radio Nottingham.

The BBC say one way to make savings and preserve value to licensee fee payers is to switch off Medium Wave services except where listeners depend upon Medium Wave as an alternative to FM or Digital Audio Broadcasting. Medium Wave services in the UK mainly duplicate what is already available on FM and DAB, and most listeners will be able to hear their local stations on FM. Medium Wave is a European term that describes what we call the AM broadcast band here in the United States.

The BBC notes that the aim of the trial is to get a better understanding of the impact of the loss of Medium Wave would have on its core listeners

and also enable the broadcaster to ensure adequate coverage is available on other platforms in these regions. (BBC)

RADIO LAW: QUEBEC ANTI CELLPHONE WHILE DRIVING LAW NOW EXCLUDES TWO WAY RADIO

Some good news for hams living in the CanadianProvince of Quebec. A four year old law banning the use of cellular phones while driving now has an implied exemption for those using two-way radio gear including radio amateurs. Amateur Radio Newsline□s Heather Butera-Howell, KB3TZD, is here with the latest:

--

According to a news release from Radio Amateurs of Quebec, the ban on the use of cellular telephones while driving came into force in April of 2008. Since that time different police departments have issued tickets for the use of various types of devices which in each departments view could be construed as a mobile telephone system.

Those who have received these tickets have vigorously contested them. But over the years the various courts hearing these cases have expanded considerably on what they believed the meaning of the law was to include a multitude of communications equipment far from cellular telephones.

Now, after four years of uncertainty the situation has now been clarified by amendments to the Highway Safety Code which came into effect this past June 6th. A new article of the code simply says that no person may, while driving a road vehicle, may use a hand-held device that includes a telephone function. More important, the first paragraph does not apply to a two-way radio or any cordless voice communication device which does not allow the parties to speak simultaneously.

For the Amateur Radio Newsline, I□m Heather Butera_Howell, KB3TZD, near Berwick, Pennsylvania.

--

According to the new version of the law, for the purposes of enforcement, a driver in Quebec who is holding a hand-held device that includes a telephone function is presumed to be using the device. This prohibition

does not apply to drivers of emergency vehicles in the performance of their duties. (VE2LGL, RAQI)

**

RADIO THROUGH SPACE: MARS ROVER GETS SOFTWARE UPDATE

NASA□s Mars Science Laboratory at JPL team has sent a software update to the Curiosity Rover on Mars, more than 160 million miles away. According to Venturebeat dot com, the software had to be updated because Curiosity needed different directions to drive around on Mars than it did to land on the planet□s surface.

The computer hardware in the Curiosity Rover is powered by a pair of computers built by BAE Systems. These RAD750 computers use a 10-year-old IBM PowerPC microprocessor running at a relatively slow 132 megahertz. These machines also have only 120 megabytes of random access memory, but are built to withstand wild temperature swings, radiation, and physical shaking.

The drawback is that the computers on the robot vehicle did not have enough memory for both the landing and its surface missions. So NASA had to swap out the software over four days of communication through the void of space. It took so long because it takes about 14 minutes to send the signal to the rover and another 14 minutes to get a response back. (Venturebeat.com)

**

DX

In DX, K7BV, having recovered from a serious medical condition, is returning to Asia for a short visit between August 25th and September 2nd. He will be using his HS0ZKS callsign on HF bands from the home of HS1CHB, and hopes to QSO friends from around the world. He may also get on the air from Japan as well using his call JF1XJR. QSL via K7BV's new address at 290 West Road, Turkey, North Carolina 28393.

W7XA will be active stroke DU1 through August 27th from near Tagaytay Ridge which is about 40 miles south of Manila in the Philippines. His operation is on 20, 17 and 15 meters using mostly CW and some SSB. QSL via his home callsign as found on QRZ.com.

OE4JHW will be operational as 8Q7OE from the Maldives between September 3rd and the 14th. Activity will be holiday style on 40 through 10 meters using SSB and BPSK. He will focus on stations from DL, HB0, HB9 and OE, as well as on North and South America. QSL via his home callsign, direct or by the bureau. Also electronically using either Logbook of the World or eQSL.

Lastly, CT1FJZ says that he is now in Angola and is expected to be there for one year working in Benguela and Huambo. Look for him to be active as D2FJZ, mainly on the weekends and limited times during the weekdays. Activity will be on 80 through 10 meters SSB. QSL to his home callsign, by the bureau or direct.

(Above from various DX news sources)

**

THAT FINAL ITEM: HONORING ERIN KING, AK4JG ☐ THE ARNEWSLINE 2012 YOUNG HAM OF THE YEAR

And finally this week, we want to take a moment to congratulate 18 year old Erin King, AK4JG, and receiving her award as the 2012 Amateur Radio Newsline Young Ham of the Year. The ceremony was held at the Huntsville Hamfest where I had the honor of being the award presentation emcee, but it was truly AK4JG☐s moment to shine:

--

AE5DW: ☐Ladies and gentlemen it is my pleasure to introduce to you a very impressive young lady. This is Erin King. She is your 2012 Amateur Radio Newsline Young Ham of the Year. Erin, the floor is yours. (Applause)

AK4JG: ☐Thank you. Thank you. Thanks Don. Thanks to everyone who has helped to make this possible.

☐When I did my project with the tube and with all the ham radio stuff that I☐ve been doing so far, I had no idea that it going to bring me this far. I had no idea that I was going to have the opportunity to earn this award or that any of this would be possible.

☐Its been a lot of fun. I☐ve been a ham for about four years now and I have learned so much and have met a ton of great people and ham radio has become an integral part of my life and its one of the primary reasons that I☐m making the decisions for the future that I☐m going to have.

☐So it☐s all very exciting. I☐m very excited to be here to earn this award, so thank you very much (applause).

--

The Amateur Radio Newsline Young Ham of the Year Award is jointly underwritten by Yaesu USA Corporation, CQ Publishing and Heil Sound. Yaesu has been with the award since its inception some 27 years ago. This year the company was represented by its Executive Vice President of Amateur Radio Sales and Marketing Dennis Motschenbacher, K7BV:

--

K7BV: ☐Hi Erin and congratulations from Yaesu. We don☐t want you to go off the air while you are traveling around with all of your schooling, We want you to have a radio that you get on the air with no matter where you go and that would be our portable FT-817ND. We hope that you will pack it in your bag and take it with you all the way to your CEO position with a Fortune 500 company sometime soon. So congratulations.☐

AK4JG: ☐Thank you. (applause)☐

--

Part of the award is an expense paid trip to Spacecamp Huntsville courtesy of CQ Publishing. CQ Magazine Editor Rich Moseson, W2VU, took a bit of time to comment on quality of those nominated:

--

W2VU: We□ve had a tremendous time being involved with the Young Ham of the Year Award and I□ve been honored to be one of the judges since we became involved and the quality of the young people who have been nominated has been just wonderful and it makes me very optimistic for the future of our hobby. And this is year after year.□

--

Last but by no means least the awards newest corporate sponsor Heil Sound. Not only did founder Bob Heil, K9EID, present Erin with a pair of the company□s new headphones, but he also gave her a very special invitation to appear with him on his TWiT TV program Ham Nation:

--

K9EID: □Well we are so happy for you and we want to stay in touch with you as you get through all the wonderful things that happen in ham radio. Come and visit us on Ham Nation and I really hope that we can have you as a guest real soon.□

--

And there you have it for yet another year. The 27th consecutive year that this award has been presented and the 19th consecutive year that the presentation has been made at the Huntsville Hamfest. And in that regard we want to express our thank you to Charlie Emerson, N4OKL, and his team that puts on this annual event and to Dave Bell, W6AQ, who sponsors the Young Ham of the Year plaque. And also to Tom Medlin, W5KUB, who live streamed the presentation over the Internet for all to see on W5KUB.com and to Gary Pearce, KN4AQ, of Amateur Radio Video News who video recorded it for posterity. We thank you all. (ARNewsline□)

Amateur Radio Operators Keeping Ear on Isaac:

Posted: 24 Aug 2012 05:14 PM PDT
http://www.eham.net/articles/28880

Old-fashioned equipment ready to do job: WEST PALM BEACH, Fla. -- South Florida amateur radio operators are monitoring Tropical Storm Isaac. Tom Loughney, president of the West Palm Beach Amateur Radio Group, said ham radio is a reliable means of communications in emergencies when other systems failed or were overloaded. "When everything else fails, ham radio still works," said Loughney. The old-fashioned equipment may seem outdated, but Loughney said the National Hurricane Center relies on ham radios to receive reports in affected areas. "We're prepared to provide additional initial emergency communications for the public during those times," said Loughney.

Grounding for Lightning Protection - HamRadioNow Episode 15

Posted: 25 Aug 2012 03:12 PM PDT
http://forums.qrz.com/showthread.php?359079-Grounding-for-Lightning-Protection-HamRadioNow-Episode-15&goto=newpost

HAMRADIONOW.tv

Episode 15: Grounding for Lightning Protection

Tom Lewis N4TL gave this presentation on grounding techniques at the

August 2012 meeting of the Raleigh Amateur Radio Society, and agreed to let

us make it a HamRadioNow program. Thanks, Tom!

Keep in mind that while this is good advice and the principles are well researched,

we can't guarantee that this will keep you, your house or equipment safe! Lightning

protection is complicated science. You are responsible for your own installation.

Coming soon: a bunch of interviews from the Huntsville Hamfest... stay tuned

Watch this episode at our web site, www.HamRadioNow.tv.

Japan Ham Fair 2012

Posted: 25 Aug 2012 08:59 AM PDT
http://forums.qrz.com/showthread.php?359036-Japan-Ham-Fair-2012&goto=newpost

The annual JARL Ham Fair is being held at Tokyo Big Sight this weekend. I've attended many of them over the past 20+ years, and am pleased how strong attendance has remained. In addition to the usual old timers, there are booths from university clubs and some school age hams roaming the halls. This year the number of foreign attendees seems up.

The "big three" all have new transceivers on display. Other commercial booths supply everything from US imports, to every antenna part or piece of mounting hardware you might need, to keys for operating and collecting. And the club booths continue to be their mix of specific (often, VERY specific) operating interests, nets, award chasers, hill-toppers, and junk sales.

I've started updating my photo collection with a few photos from the first day: http://onjapan.net/2012/hamfair/

//
The Worldwide Repeater Directory Invites Frequency Coordinators Worlwide...

Posted: 24 Aug 2012 07:41 PM PDT
http://forums.qrz.com/showthread.php?358986-The-Worldwide-Repeater-Directory-Invites-Frequency-Coordinators-Worlwide&goto=newpost

We are inviting FC's worldwide to use the WWRD through RFinder/Web to help them do their job as frequency coordinators. RFinder/Web already shows repeaters on a map and we've been told by several FC's that being able to see the repeaters across borders is very helpful also. We are looking for a wishlist from FC's to build a special portal for FC's to have the tools they need to make frequency coordination easier. We already have FC's from several countries using RFinder/Web as a tool in their coordination activities.

To that end, Frequency Coordinators of planet Earth, here is your invite...go to http://www.rfinder.net/adminreg.html and request an ID. We will create your id and send you an email when done. You will be able to use RFinder/Web free of charge to maintain your list and use the mapping features. Again, please send your wishlist of features to w2cyk@rfinder.net

If you purchase the app for Android and/or iPhone, please use the same email/password as we will be adding features to RFinder that will be unlocked to your ID. We cannot give those out for free due to the licensing issues and upgrade issues on the App Store and Google Play. Your FC subscription will follow your app though.

If you prefer to give us your current repeater data in a spreadsheet instead of editing them on the web, please download this one and put them in there...http://www.rfinder.net/rfindersheet.xls. Email your list to w2cyk@rfinder.net.

Jesse will load them asap and email you when done. When your registration is complete, we will send you the spreadsheet preloaded with your region's data as we have it currently. Please edit it and send it back to us.

Thank you all for your overwhelming support. This has been an exciting year. 73's Bob W2CYK

RFinder runs on iPhone/iPad/iPod and Android and http://web.rfinder.net.
The World Wide Repeater Directory is also accessible from RTSystems radio programmers and via CHIRP on Windows, Linux and Macintosh with the same user/password you use on handheld devices. Our goal is to have the WWRD

accessible from most pervasive platforms. To that end Windows Phone and Symbian versions are in development and slated for release this fall. The web version has been tested and works on Blackberry. RFinder web has downloads for POI□s for TPE and most major GPS□s, including AvMap G5/G6, the GPS for Amateur Radio Operators.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, WK3N, N4AA & QRZ DX, N4JF, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3RWF, G3SXW, I1JQJ/IK1ADH & 425 DX News, JH0MGJ, OZ6OM & 50 MHz DX News, PA0ABM, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and ZS6AYU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 19th-August, through Sunday, 26th-August there were 221 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T8, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP8, VP8/h, VP9, VQ9, VR, VU, VU7, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO. Nobby, G0VJG, will be active as 3A/G0VJG between October 1-5th. Activity will be on the HF bands using 100 watts and SSB only. QSL via G0VJG.

5X, UGANDA (Update). Nick, G3RWF, informs OPDX that he is returning to Uganda on October 16th, and expects to be on the air probably the next day as 5X1NH. He mentions that he will return to the UK on December 12th, and states, "Same set-up as usual - mixture of bands and modes". This probably means 80-10 meters, and he prefers to operate CW, but will also be on the Digital modes with some SSB. There will be no 160m (no room for an antenna) and 6 meters is not licensed. Operations will be limited because Nick does voluntary work at the "Mountains of the Moon University" in Fort Portal, so activity will be during his off hours. He adds that he is carrying all of his gear there (rig is K3). Nick has put over 100k QSOs in the log from Uganda and is looking for more! If you hear Nick's callsign before the 16th of October it is a PIRATE!. ADDED NOTE FROM NICK: He will be active as 5B/G3RWF during the month of September while on holiday.

9G, GHANA. Emil, ZS6EGB, is back in Ghana as of July 20th, under a new assignment with the Mining Group operating in the Central Province. He states, "We are setting up a new Clinic and will only be operational after my vacation." Please look for 9G5ZS on most bands. His usual setup will be an Icom 706mkIIG and a HyGain Vertical plus Dipoles for the low bands. QSL via ZS6EGB (see QRZ.com).

AH0, MARIANA ISLANDS. Look for 19 year old university students Seiya "Sam"/JE1XUZ (KH0XH) and Yuzo/JQ2WTT (KH0XW) to be active as AH0BT from the Saipan BBQ Contest Club on Northern Mariana Islands, Saipan Island (OC-086) between August 29th and September 2nd. Activity will be focused on the All Asian DX SSB Contest (September 1-2nd) as a Multi-Single entry. QSL via 7L1FPU.

AH0, MARIANA ISLANDS. Kuroi, JH0MGJ/AL5A, will be active as AL5A/AH0 from Saipan Island (OC-086) between September 7-9th. He states that he will be looking "for many friends who will be in the Europe". QSL via LoTW. If you want a paper QSL (if it is necessary), his QSL Manager is JA7JEC.

C2, NAURU ISLAND. Yoosuke "Yuki", JH1NBN, will be active as C21BN (and possibly a special callsign) from Nauru between September 3-10th. Activity will be on 40-10 meters using simple antennas with 100 watts. QSL via his home callsign.

C6, BAHAMAS. Robert, AK4BM, will be active as C6AGT from Green Turtle Cay (NA-080) between December 2012 and January 2013 (Specific dates were not provided). He plans to have a beacon (most likely on 10 meters) active during the day and will be operating SSB, and possibly the Digitial modes (PSK31 and JT65) during the evenings on various bands between 40-10 meters, as conditions permit. He may also operate from other uninhabited islands around Green Turtle Cay using a low power transmitter (Yaesu 817nd) using wire antennas, and probably on the 20 meter band. All QSL cards will be returned with a photo QSL from the island upon his return. Please send them direct to his home callsign AK4BM (w/SASE/Green Stamps appreciated, but not required).

E5, NORTH COOK ISLANDS. After trying to head back to South Cook Islands, the sail boat developed some problems and the skipper decided to take

Andy/AB7FS (E51AND) and his XYL Kathy back to Palmerston Atoll (OC-124), North Cook Islands. The couple will now stay until the middle of September. Look for Andy to be active mainly on CW around 14048 kHz. He often checks into the ANZA Net on 14183 kHz after 0500z. QSL via AB7FS.

EA8, CANARY ISLANDS. Luis, EA8AY, from the Island of Tenerife (DIE S-012, WLOTA 1276), announced that he will be in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (??) entry. This will be his first SSB contest. QSL via W2GR or LoTW. Visit his Web site at: http://www.ea8ay.com/ef8x

EL, LIBERIA. Look for the VooDoo Contest Group to once again be active from here between November 21-27th. This is their 24th straight year. Operations will be from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQWW DX CW Contest (November 24-25th) as a Multi-Multi category using the callsign EL2A. Outside of the contest the operators will use their own personal call-signs. Operators mentioned are Ned/AA7A (EL2NS), Roger/G3SXW (EL2A), Fred/G4BWP (EL2WP), John/G4IRN (EL2RN), Mike/KC7V (EL2MF), Lee/KY7M (EL2LF) and Bud/N7CW (EL2CW). QSL via their home callsign. Logs will be uploaded to LoTW.

DXPEDITION STORIES AVAILABLE ON THE WEB. The DXItalia Web page provides interesting DXpedition stories with pictures at: http://www.dxitalia.it
Presently, there are stories about:
* The CY9M 2012 Story:
http://www.dxitalia.it/web/2012/08/the-cy9m-2012-story
* HK0NA MALPELO 2012: http://www.dxitalia.it/web/2012/05/hk0na-malpelo-2012
* 3D2R – From problems to success (2011):
http://www.dxitalia.it/web/2012/05/3d2r-from-problems-to-success

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2011 - Buddies in the Caribbean 2011 Mini-DXpedition to Dominica:
http://www.youtube.com/watch?v=beHhtYS0o (Part 1)
http://www.youtube.com/watch?v=hibaIckGU (Part 2)
2010 - CQ7OA Berlenga Island (EU-040) DXpedition:
http://www.youtube.com/watch?v=FvuCCunE0
2009 - Buddies in the Caribbean (FS/PJ6 & PJ7) Suitcase DXpedition:
http://www.youtube.com/watch?v=I8fdgGkHA

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.

HK, COLOMBIA. Members of the DX Colombia Amateur Radio Club (DXARC) and some Argentine operators will activate the "Jumanji Contest Station" as HK1NA during the CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry. Operators mentioned are Jorge/HK1R, Sal/HK1T, Pedro/HK1X, Sandra/HK3JJB, Mario/HK3O, Camilo/HK3TU, Faber/HK6F, Luis/HK6P, Daniel/LU3CT, Victor/LU3JVO, Toribio/LW1DTZ and Tim/LW9EOC. QSL via K6IPM. Visit the

DXARC Web page at: http://dxarc.org

IOTA NEWS.............
EU-025. Members of the Arcibessi DX & Contest Group will be active as II9P from Sicily Island during the All Asian DX SSB Contest (September 1-2nd) and CQWW DX SSB Contest (October 27-28th) as a Multi-Op entry. QSL via IT9CHU or LoTW. Operators mentioned for the CQWW DX SSB Contest are Antonello/IT9EQO, Carmelo/IT9AUG, Fabio/IT9GSF, Marcello/IT9CJC, Gianni/IT9BUN, Gene/IT9NJE, Marc/IT9ACN, Frederic/ON4LG and Romeo/S52RU. Visit the II9P Web page at: http://ii9p.com

EU-045. Look for IB0E to be active from Isola di Ventotene (IIA LT-011, MIA MI-118, WFF IFF-110, WLOTA 1403) by the time you read this. Activity will last until August 31st. Activity will be on 80-10 meters using SSB and the Digital modes with two stations on the air. QSL via operator's instructions.

EU-165. Riccardo, IZ5JMX, will be active as IM0/IZ5JMX from San Pietro Island between September 2-14th. Activity will be on 40-10 meters using SSB only. QSL via the Bureau to his home callsign.

EU-171. Members of the Dutch Contest Group (Zeeuws-Vlaanderen [PI4DX]) will be active as OV2T from Jutland Island, Denmark, between August 29th and September 4th. Activity will be holiday style using SSB and CW, and perhaps some RTTY. During the weekend of September 1st, they will join the local OZ5GX group from Saeby, Denmark, during IARU region One Field Day as OZ5GX/P. QSL Manager for OV2T is PA0ABM, direct or by the Bureau. QSL via OZ5GX via info on QRZ.com.

EU-172. Operators Harry/PA1H and Nico/PA7PA will be active once again as OZ/homecall from Lang&#65533; Island (FY-025) between October 4-12th. Lang&#65533; Island belongs to Langeland Island, but it'?s off Langeland. Actually it's a very small island with only one house. The operators were active from here in 2009 and 2010. Activity will be on 80-10 meters, especially 30 meters and using more Digital modes. When possible 160 meters too. There will be special attention this time for stations outside Europe. QSL via their home callsigns, direct or by the Bureau.

EU-174. Members of the "White Tower DX Team" will be active as J48SV from Samothraki Island (MIA MG-100, WLOTA 4166, GIOTA NAS-032) between August 24-27th. QSL via SV2FPU.

OC-170. Operators Reinhard/DF4TD, Steve/VK2SJK, Nigel/VK6NI and Wally/VK6YS will be active as VK6DWI from Woody Island between November 9-13th. They will run fairly simple stations with a pair of Icom IC7000s, verticals and a Spiderbeam. The team plans to have two stations on air whenever they have propagation. More details are forthcoming, and updates can be found at: http://www.westozdx.net/IOTAS/OC170/OC170.html

J2, DJIBOUTI. Christian, F5MBF, has been in Djibouti since July and has
been awaiting a callsign. He finally received the callsign J28NC. He is
expected to stay in Djibouti for at least two years. Activity will be
mainly CW with some SSB using a 80-10m vertical. He is expecting a beam
to be shipped to him. QSL route has not been provided.

NH8, SWAINS ISLANDS. Another press release was posted on the Swains Island
Web page <http://nh8s.org/pages/news.html> with pictures on August 25th,
this time from Alex Jennings. In short, David Jennings and his advance
crew departed Pago harbor on the "MV Sili" for Swains Island on August
24th. They took with them all the materials and supplies to set up two
operating stations, as well as sleeping quarters, a kitchen and restroom
facilities. They were also able to take all of the radio equipment that
was shipped in from California from the operators. Read the complete press
release at the above Web link. Remember, we should hear NH8S possibly
September 5th.

QSL RECEIVED VIA LoTW: 5B4AIF, 9A2YM, 9A205AN, CU3AC, DC3CD, DC1NSK, DJ1XT, DL1IAI, EA1DAX, EA2KV, EA7SG, EI3KG, HA1AG, HC2A, II4K, JA0FVU, JA1QOW, JF1JTQ, K4JPD, KP2JS, LA1J, OE1A, OK1AU, P40A, PA4N, PY5FB, RK2T, SM2ODB, TI2HAS, TF4X, UA6BRD, UR3IFD, UR5GDX/P, VK4BUI, VK6GX, W1WBB, XE1GRR, YB8Y, YL0Y and YO9FNP

QSLS RECEIVED VIA MAIL: 6V7S, A41MX, A5A, EW6DX, FM5WD, G4RCG, NP3CW, S9DX, TY2BP, VE2/F8BMG, VR2KF, YL2AG and ZD7FT

QSLS RECEIVED VIA THE BUREAU: 8J1RL, A35AY, A71DLH, AM1KR, BO0M, BU2AW, BV0EXPO, BV3FG, BW0S, BW1/VR2RR, BW2000, DR1A, DX2DP, EN20UARL, EO20IGN, EO20UU, FJ/OS1T, GB5RST, GR0RPM, H55MX, HD2M, IE9Z, JX/G3SXW, LY25QT, OH0I, OX3XR, PG540BUFFALO, PP0T, V5/DL2SL, V63X and XW0ZJZ

SILENT KEY. Eric, SM1TDE, informs OPDX that Lars Rooth, SM1BOE (he was an operator at HV3SJ), became a Silent Key (SK) on July 21st, at the age of 90 years old. He served in the British Army during WW2, acted as teacher for Pope Johannes Paulus and worked for the Swedish language program of Vatican Radio among other things. For more info on Lars Rooth, SM1BOE, see: http://www.news.va/en/news/jesuit-father-lars-rooth-passes-away

http://archive.catholicherald.co.uk/article/3rd-may-1994/6/rare-sort-of-priest-in-sweden

OTHER SILENT KEYS MENTIONED:
George Varvitsiotes, K6SV (ex-WB6DSV), Ham Radio Outlet (HRO) Vice President, became a Silent Key on August 21st.

Joel P. Kleinman, N1BKE, of Meriden, Connecticut, and QST Managing Editor, became a Silent Key on August 18th.

Victor (Vic) Poor, W5SMM, of Melbourne, Florida, a recipient the "ARRL President's Award" became a Silent Key on August 17th.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

PJ2, CURACAO ISLAND. The German team of Anja/DH2AK and Wilf/DL1HTM will be active as PJ2/homecall from Curacao Island between August 26th and September 1st. They plan to operate from the PJ2A club station, mainly on 20 and 15 meters SSB. QSL via their home callsigns.

SPECIAL OPDX BULLETIN. If you missed OPDX.1075.1, containing press releases/updates on the upcoming NH8S Swains Island and ZL9HR Campbell Island DXpedition, go to the OPDX's Home page at:
http://www.papays.com/opdx1075.1.html

SV9, CRETE. Operators Alberto/EA1SA and YL Silvia/EA1AP will be active as SV9/homecall from Crete (EU-015) between September 9-15th. Activity will be on 80-6 meters using CW, SSB and RTTY. They will use a vertical dipole arrays and other wire antennas. QSL via their home callsigns.

SW9, CRETE. Uli, DJ9XB, will be active as SW9XB from Crete Island during the month of September. He will be active in the CQWW DX RTTY Contest (September 29-30th) as a Single-Op entry. QSL via his home callsign or LoTW.

TI, COSTA RICA. Alan, K0AV, will once again be active as TI5A during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. QSL via TI5KD or LoTW.

V6, MICRONESIA. As this was been written, Yoshi, JJ8DEN, is expected to once again be active as V63PR from Micronesia, but this time from Falalop Island, Ulithi Atoll, Yap State (OC-078), until September 3rd. It was mentioned on QRZ.com: "This schedule might change or cancel without previous notice due to flight to/from Falalop Island." Activity will be on 160-10 meters using CW, RTTY, PSK31 and JT65A if possible. QSL via JJ8DEN, direct (w/SASE: Please send European type envelope with 2 USDs or 1IRC) or by the Bureau (Do NOT send QSL to V63 Bureau).

Z2, ZIMBABWE (Also 9J). Gerard (Gert), ZS6AYU, will be active as Z21GF from Victoria Falls between October 22-25th. Activity will be holiday style on 40-10 meters using CW only. He informs OPDX that he will use a Cushcraft R7000 vertical running 400 watts. QSL via ZS6AYU, direct or by the Bureau. ADDED NOTE: Gert also mentions that he intends to visit Zambia (Waiting for the license) between October 19th and October 22nd.

ZD9, GOUGH ISLAND (Bad and Good News). Its seems the DX community has been duped on the Paul, ZD9KN, operation from Gough Island (AF-030). ZD9KN is a PIRATE! Several sources report that Johan, ZS1A, has confirmed that the callsign ZD9KN has never been issued. So, do not waste time working this station if you hear him.
The good news is that Gerard ZS6KX/ZS7KX will be going to Gough Island sometime September for one year. He is hoping to be issued the callsign ZD9KX and is awaiting for the approval/license. QSL route TBA. Look for

more details to be forthcoming.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 26th August 2012

Licence Examination

There is now just under four weeks left to Thursday 20 September which is the closing date for the next Amateur Station Licence Examination which will be held on Thursday 4th October at 2 p.m.in the ComReg Offices in Dublin.

Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis.

Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

IRTS Shop update

Following discussion with our friends at RSGB the Society has agreed to give a 10% discount to IRTS members on purchases from the RSGB Shop. IRTS members should select the "Non members Price" before placing the order and then enter the special IRTS Discount Code during the checkout process. At this point the 10% discount will be calculated. IRTS members, who are also RSGB members, should continue to select the "RSGB Member's Price" to get the RSGB Member's discount and not use the IRTS Discount Code. It is not possible to obtain both discounts! The IRTS Discount Code will change from time to time and will be published for members in Echo Ireland. Just follow the 'Book Sales' link on the IRTS website.

Echo Ireland

The August edition of Echo Ireland will be mailed to members during the week. Anyone whose enjoyment of radio is affected by local electrical noise - and that includes most of us - will be very interested in the article by Ciaran EI7GSB, who tells of his search for sources of noise and the various solutions he has used to deal with these noise

problems.

One way of getting away from RF noise is perhaps to travel to an offshore island; this month's Echo Ireland includes two reports of island activities - Ger EI5KF on Bere Island and the Shannon Basin Radio Club EJ3Z on Inisbofin - both of these activations taking place during the recent Islands On The Air contest.

In the regular HF Happenings column, Anthony EI2KC reports on recent and forthcoming DXpeditions and also includes some snippets about their DXing activities from John EI7BA, Ark EI9KC and Don EI6IL. Meanwhile, in the latest excerpt from the HX files, Pat EI2HX recounts how he brought an old 10 Gigahertz transmitter back to life.

Two reports from AREN (Amateur Radio Emergency Network) groups are included: the new group operating in the North-East reports on their training activities and their involvement in the Clogherhead 10k run. The long-established Galway VHF Group reports on the assistance they provided for the Connemara Marathon; their report also includes an explanation of why HF is generally used in the Connemara area, in preference to VHF.

Two recent events showcasing amateur radio are covered: the Galway Radio Experimenters Club ran a demonstration station as part of the Volvo Ocean Race celebrations and a full report of their activities is in Echo Ireland. Also in the latest Echo Ireland is a report on the contact between the participants of the European Space Agency's summer camp in Dublin and Joe KE5DAR, who is currently on the International Space Station -this contact was facilitated by members of IRTS.

Counties Contest

A brief reminder that the 2 Metres counties contest takes place today (Sunday 26th August) from 2.00 pm to 4.00 pm local time. FM and SSB modes can be used in the contest, and a station may be worked on both modes. After any QSO in which you are called by another station, you must QSY to another channel (FM), or by at least 3 kHz (SSB), before soliciting another QSO. There are both Fixed and Portable sections in the contest, so expect to hear some of the rarer counties on the air. See www.irts.ie/contests for the full rules.

Information Evening

The Ballyroan Community & Youth Centre - which is the QTH of South Dublin Radio Club - is holding an Information Evening on Tuesday next (28th August) from 7pm to 9pm. The Information Evening is designed to allow users of the Youth Centre to highlight their activities and recruit new members. SDR along with IRTS will have a stand at this event.

Limerick Radio Club

The Limerick Radio Club participated in the ILLW weekend from Loop Head Lighthouse. It was the first time that the lighthouse was activated by the Limerick Radio Club for the ILLW event and it proved to be very successful and enjoyable. The clubs newly acquired telescopic mast got it's first formal outing. Two stations were operated one from the base of the lighthouse and the second from the lightkeepers lookout room. Antennae consisted of an A4S, an A3WS and two G5RVs along with the club ICOM 756PRO, Kenwood TS-940S, SCAM telescopic mast and the club tilt up mast. Contacts were logged using the Win-EQF software.

Altogether, twelve LRC members participated at various times over the weekend. Activity started at midnight on Friday with several QSOs into North and South America and continuing through Saturday into Sunday evening. The log showed 1440 unique call signs with a total of 1532 QSOs worked to 64 countries - a good weekends work. Thanks to all who participated.

The club is on the road again this weekend from the Shannon AirVenture event which will be located at the entrance to Shannon Town. Activation will be from 11:00 to 17:00 local times.

The Shannon Basin Radio Club

The Shannon Basin Radio Club will once again be hosting the ssb field day in the grounds of Garbally College in Ballinasloe, Co Galway and would like to invite clubs or individual operators to come and take part or just to visit and see a portable contest station. The contest takes place over the first weekend of September. The famous barbeque will take place on saturday evening for all participating or visiting ops. For further information contact brian ei8iu on 0862514822.

DX News

Following a successful trip to Crete in 2011 Luc ON6DSL returns there again from 27 August until 3 August. His callsign will be SV9/ON6DSL/P. He will be running low power to a dipole. QSLs go via his home call.

Moise F4EZG who also operates from Madagascar as 5R8VE will be active from Nosy Alanana off the coast of Madagascar from 1 - 3 September. This small island counts as separate from Madagascar and has the Islands on the Air reference of AF-090. He will be active mainly on 15 and 20m.

Michael DF8AN is a well-travelled amateur operator and has been QRV from over 140 countries. He travels to Reunion Island in the Indian Ocean from 2 - 10 September where he will operate as FR/DF8AN. Look for him on SSB on 40, 20, 15 and 10m.

Paul CT1FJZ will be working in Angola for the next year or so. Look out for him on 80 - 10m SSB using the callsign D2FJZ. Activity will be

mainly at the weekends but he will try to get on the air when possible during weekdays.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Joplin Hamfest:

Posted: 26 Aug 2012 05:24 AM PDT
http://www.eham.net/articles/28884

The Joplin Amateur Radio club held their 23rd annual Ham-fest Saturday at the Holiday Inn Convention Center. It is the largest ham radio festival in Missouri. People came from as far away as California to attend. Club president Jim Scott says it's a great way to catch up with old friends.

//
Hurricane Watch Net on 20, Adds 7.268 MHz:

Posted: 26 Aug 2012 05:26 AM PDT
http://www.eham.net/articles/28883

The Hurricane Watch Net
will continue operating today on our primary
frequency of 14.325 MHZ as tropical storm Isaac
moves toward the gulf. To take advantage of
good propagation into the area, HWN will also
be operating on 7.268 MHz this afternoon.
Stations in the affected area are encouraged to
report your weather conditions and monitor for
updates.

//
Teens to Make Contact with Space Station:

Posted: 25 Aug 2012 05:04 PM PDT
http://www.eham.net/articles/28882

The radio crackled with interference, but still no answer. The student leaned forward, she repeated the call sign, "Kilo Three November Echo Mike." Nothing. She sighed, and handed over the transmitter. Then the words came spilling out from 900 miles away. "We got some sunshine here in Iowa," said the voice. "Seventy-seven degrees, it's a beautiful day." Kseniya Zubilova, a sophomore at Mount Hebron High School west of Baltimore, smiled and replied. The next voice she hears over the amateur radio will likely be from space. Zubilova and about nine other area students are planning to communicate by radio with the International Space Station next week. Each student studied to earn a federal license to operate an amateur radio through a free program supported by NASA. As part of the Amateur Radio and

the International Space Station program, students will make contact on the morning of Sept. 1, when the station is directly above the National Electronics Museum in Linthicum. Amateur radios, also known as Ham radios, operate by bouncing short radio waves between the Earth and its atmosphere. They're capable of reaching anywhere in the world, said museum volunteer Dan Zeitlin.

JOPLIN, MO. -- Ray Brown is a fellow broadcaster with his own call letters. "K-Bostn" He's been a ham operator for nearly 20 years and says there's nothing quite like it. "It's a fun hobby. It's appeals to us nerds that are electronically minded," states Brown. He and a few hundred other ham operators are holding "Ham Fest" at the Holiday Inn Convention Center in Joplin. In order to be a ham operator, you have to get a license from the FCC and when you broadcast, there are several rules. "No swearing, no outright broadcasting, except for absolute emergencies, no music," states Brown. At the Ham Fest the operators have a chance to meet their friends in person. They'll buy new parts, microphones, and tubes to fine tune their hobby. Their broadcast signals can reach around the world.

GB2RS NEWS

Sunday 26th August 2012

The news headlines:

RSGB sticks to its views on EMC Directive

Has 2O12L broken a world record?

RSGB Convention bookings and programme details

Members may have seen recent press commentary about the RSGB's position on the proposed European powerline telecommunications standard. Whilst protecting to a large extent the amateur HF bands, this standard, if approved, would legalise high levels of wideband emissions elsewhere in the HF spectrum, in direct contravention of the European EMC Directive. The European Commission's own EM Consultant supports the RSGB view that the Standard would not comply with European Law.

Sadly the International Amateur Radio Union has taken the view that support for the standard represents protection for the amateur bands The RSGB has concerns that this is a narrow view, and that setting aside the requirements of the EMC Directive is not only improper, but bodes ill for the future protection of the Spectrum and for the integrity of the standardisation process.

The RSGB position is now being challenged by the Chair of the CENELEC Committee charged with developing the standard, who argues that there is no current standard. This is simply not the case, as the Commission itself has confirmed that the exiting CISPR22 standard applies to PLA devices. That it fails to allow the high emission levels which PLT manufacturers say they need is the real issue. You can read more at www.rsgb.org/pla

The team at 2O12L, the special event station for the London Olympic and Paralympic Games, believe that they have now broken the world record for the number of contacts by a Special Event Station. It is believed the record was made by DQ2006X during the 2006 World Cup, their total made between 13 May and 16 July 2006 was 47,790 contacts. At 2142UTC on 21 August, 2O12L made contact number 47,791. The team would like to thank the thousands who have joined the pile-ups to contact 2O12L and now they look forward to hitting their overall target of 60,000 QSOs. 2O12L goes QRT on 9 September after the Paralympic Games' closing ceremony so there is plenty of time to work the station or get more band-slots.

The RSGB Convention early bird bookings have been extended to close on 3rd September. Highlights of the programme includes lectures on the HK0NA DXpedition, T32C on Christmas island, Peter Hart, G3SJX on HF transceivers and Ian White, GM3SEK on ways to make your station better amongst many more. Details can be found on the RSGB website. For bookings, visit www.rsgbevents.org.

Following the success of the Worked All Britain's Follow The Torch event, the group would like to remind potential claimants that claims for the award must be received by the Awards Manager, Darran Chappell, G0BWB by 31 August. Claims may be made via the post, or via email and payment made via PayPal. Full details are on the website www.worked-all-britain.co.uk.

Further to our announcement last week concerning those who listen to GB2RS at 0900 hours on 80 metres. This is to confirm that the reading on 3640kHz is being discontinued after today. Next Sunday, 2 September, and thereafter, there will be one 0900 hours reading for listeners in the South of England covering East Anglia across to the South West and also Wales. The 1800 hours National bulletin on 3650kHz will also be discontinued. An update of the GB2RS Broadcast schedule can now be found in the Members' Area of the RSGB website.

Sad news now as we learned that QST Managing Editor Joel Kleinman, N1BKE, died in a house fire on Saturday, 18 August. Our thoughts are with his family, friends and many colleagues at the ARRL during this difficult time.

Finally, next weekend, 1 and 2 September is the ever-popular RSGB SSB Field Day. Participants have 24 hours in which to make as many QSOs as possible, taking in as many countries as they can. There are Open and Restricted categories, with antenna arrangements for the latter now the same as they are for CW NFD. Good luck to all participants.

And now for the details of rallies and events for the coming week

Today, Sunday 26 August, the Milton Keynes ARS rally takes place at Bletchley Park, Sherwood Drive, Bletchley, Milton Keynes MK3 6EB. Doors open at 9.30am and admission is ?2. Parking is available on Sherwood Drive or at the railway station. There will be trade stands and special interest groups.

Tomorrow, on 27 August, Huntingdonshire ARS rally will take place at St Neots Community College, Barford Rd, St Neots PE19 2SH. Doors open at 10am and admission is ?2. There will be trade stands, car boot area and a Bring & Buy. Contact Clive, G3NKQ on 01480 810 473.

Telford & District ARS will be holding their Amateur Radio Hamfest at Enginuity, Coalbrookdale, Telford, next Sunday, 2 September. Doors open at 10.30am and admission is ?3 with accompanied children free. There will be new and second hand radio equipment, antennas and parts as well as a Bring and Buy. Refreshments will be available on site and there are two pubs nearby. Rally goers can obtain reduced admission to the Enginuity Museum for a real hands-on experience. There will be a special

illustrated talk at 11.30am on Light Communications, be seated early as space is limited. For more information, speak to Martyn on 01952 255 416.

Now for the news of special events

Kent Weald Radio Club is operating GB1HA until Sunday 2 September. The event is part of sponsored activities being held at the Headcorn Aerodrome, Kent, in aid of the air ambulance and other local charities, and to demonstrate amateur radio to any visitors. Operations will be on HF and VHF and is open to visits from the public through to 2 September.

GB1SKC will be on the air for Churches and chapels On The Air, organised by WACRAL, on Saturday 8 September.

Hinckley Amateur Radio Electronics Society will be running a special event station at the Shackerstone Family Festival on 1 and 2 September. Directions for this event are on www.shackerstonefestival.co.uk/, with the nearest postcode being CV13 6NB. Any club or individual is welcome to attend and operate and any help with the running of these events setting up etc would be gratefully received. Contact is Vinny, M0TAV on 07947 330 700.

On Saturday 1 September, Ballymena Amateur Radio Club will be running a special event station, GB150WCB, in conjunction with 150 years of West Church, Ballymena. They will be on the air between noon and 5pm on VHF and HF. A special QSL card will be available via the bureau. Visitors will be very welcome, come and join in the celebrations.

And now the DX news compiled from 425 DX News and other sources

CT1FJZ is expected to be working in Angola for one year. Look for him to be active as D2FJZ, mainly on the weekends and limited times during the weekdays. Activity will be on 10 through to 80 meters SSB. QSL to his home callsign, by the bureau or direct.

A special event station with the callsign SU30ASR will be on the air from Alexandria in Egypt until 2 September. QSLs go via SM5AQD.

Paul, ZD9KN, will be on the air using SSB only on 10 through to 160m from Gough Island using an FT-2000 and dipoles until 31 September. The log will be uploaded to the Logbook of The World within one year. QSL direct via IZ0UIM.

Kevin, KL7/KJ4OAP, Nathaniel, KL7/W2NAF and Ethan, KL7/K8GU plan to become active on 6 through to 40m from Adak Island until 12 September. QSLs via homecalls.

Now the contest news

The UK Microwave Group's Cumulative Contest takes place today, Sunday 26th, on the 5.7GHz, 10GHz and 24GHz bands. It's the fourth in the series, with the final taking place next month. Running from 1000 to 1600UTC the exchange is signal report, serial number and locator.

The IRTS 2m Counties Contest also takes place today, the 26th, with awards for the leading non-EI station in each of the six sections of this 2-hour event. These awards often go to stations in GI, but if you have a good takeoff across the sea to Ireland it's definitely worth a try. Also, if you're a VHF `square basher' and have missing squares in Ireland, it could be a good afternoon to work some of them. Running from 1300 to 1500UTC using SSB and FM, the exchange is signal report and serial number. EI and GI stations also give their county. Like most contests, the goal is to work as many stations as possible (in this case CW stations only). Each station may be worked once per band.

The 50MHz UK Activity Contest takes place on 28 August between 1900 and 2100UTC. Using all modes, the exchange is signal report, serial number and locator.

Also on 28 August at 1900 to 2130UTC, the SHF Activity Contest takes place. Using all modes on the 2.3 to 10GHz bands, the exchange is signal report, serial number and locator.

Next weekend, 1 and 2 September, it's the RSGB SSB Field Day from 1300 to 1300UTC. Using the 3.5 to 28MHz bands, the exchange is signal report and serial number.

The 144MHz Trophy Contest takes place for 24 hours on the 1st and 2nd., from 1400 to 1400UTC. It is hotly contested in the Open category, but there are four other categories and three of them are for single ops, so there are opportunities for all to strive to do well. The exchange is signal report, serial number and locator.

Overlapping the last three hours of the 144MHz Trophy Contest, and then continuing for one hour on its own, the fifth and final 144MHz Backpacker contest takes place on Sunday 2nd. In the Backpackers there are two permitted power levels, 3W and 10W. The exchange is signal report, serial number and locator.

As we enter the autumn there are lots of international contests, the first being the All Asian DX SSB that takes place for the entire 48 hours of the 1st and 2nd. The exchange in this event is quite different to the exchange in SSB Field Day with which it coincides, so it can be handy for those teams taking part in SSB Field Day to have a suitable exchange at hand, perhaps the average age of those present to give to All Asian participants. Using the 1.8 to 28MHz bands the exchange is signal report and age, although ladies are allowed to give 00.

The IARU 144MHz Contest takes place at exactly the same time as the RSGB 144MHz Trophy, 1400 to 1400UTC. The exchange in these two contests are the same and all those who submit a log for the RSGB event will be automatically entered for the IARU event, unless they specify otherwise.

The CW Open is a new event run by the American-based CW Operators' Club. On the weekend of 1st - 2nd it consists of three 4-hour sessions, spread over the course of twenty hours. The sessions are adjudicated separately, so you don't have to enter all three, you can work the same stations in each session and you can work singly or as a member of a

team. For more information, and full rules, go to
www.cwops.org/cwopen.html.

And now the solar factual data for the period from Friday the 17th to Thursday the 23rd of August, compiled by Neil Clarke on Friday the 24th August.

The period started with three visible sunspot groups. A new group approaching the north-east solar limb produced six M class solar flares on the 17th and the 18th when solar activity was at moderate levels. By the 18th this group had rotated into view but by then solar flares had stopped taking place. Solar activity declined to very low levels for the remainder of the week. Solar flux levels varied little day to day and the average was 96 units. The 90 day solar flux average on the 23rd was 124 units, that's two units down on last week. X-ray flux levels averaged B2 units. Geomagnetic activity started at unsettled levels due to a recurring coronal hole but by the 21st activity declined to quiet levels. The most disturbed days were the 18th and the 20th with an Ap index of 13 units on both days. The average was Ap 10 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase from 340 kilometres per second on the 18th to 620 by the morning of the 20th. Speeds then returned to around 350 kilometres per second by the 22nd. Particle densities were low except for a brief increase to 20 particles per cubic centimetre late on the 18th and early on the 19th. Bz varied between minus 12 and plus 13 nanoTeslas during the disturbance and between minus 3 and plus 2 nanoTeslas on the quietest day.

And finally the solar forecast. This week the active side of the Sun is expected to be looking our way. Solar activity may not be as high as the last rotation but activity could still increase to moderate levels on some days. Solar flux levels should increase and be in the 120's later in the week. Geomagnetic activity could be `unsettled' today but activity should then decline to quiet levels for the remainder of the week. An Earth directed coronal mass ejection is unlikely this week. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 12MHz. Paths this week to Australia should have a maximum usable frequency with a 50 per cent success rate will be around 25MHz. The optimum working frequency with a 90 per cent success rate of about 20MHz. The best time to try this path will be between the hours of 0800 and 1100. With the summer Sporadic-E season coming to an end soon openings will become less frequent now but are still possible on some days.

And that's all for this week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

We start with clubs that have several events this week. Wythall Radio Club is holding a club net on 145.225MHz today and next Sunday. Monday sees a curry night at Monsoon, Wythall, and on Tuesday there's preparation for HF SSB NFD. Friday sees a social evening in the shack, and then next Saturday kicks off the HF SSB NFD weekend event. Details from Chris, G0EYO, on 07710 412 819.

Friskney and East Lincolnshire Communications is holding a club net on Monday on 144.165 USB, vertical polarisation. On Wednesday there is a M3+M6 club net on GB3FR, and on Friday there is a club net on GB3FR. For more information contact the FELCC Information Line on 07554 362 020.

Gloucester Amateur Radio & Electronics Society is operating at Crickley Hill on Bank Holiday Monday, then taking part in SSB Field Day weekend from next Saturday. Contact Anne, 2E1GKY, on 01452 548 478, daytime.

South Birmingham Radio Society is closed on Bank Holiday Monday, starting its training classes and review of exam results on Thursday. On Friday there's shack and aerial work plus loading the trailer for Telford Hamfest, where the club is running a stand next Saturday. Contact Don, on 01214 581 603.

Lincoln Short-Wave Club is taking part in the 50MHz UK AC from the shack on Tuesday from 8pm. On Wednesday there's an antenna workshop and preparation for SSB Field day at the shack, plus a natter night at the BSA club. Thursday sees the club simplex net on 145.375MHz, followed by more preparation for SSB Field day on Friday. Next Saturday there's the Surgery in the Shack from 9am plus SSB Field Day & the 144MHz Trophy, which continue into Sunday. For more information contact Pam Rose, G4STO, on 01427 788 356.

Midland Amateur Radio Society is holding an open meeting on Wednesday to discuss plans for new training classes. Next Sunday there is a club visit to the Telford Hamfest at the Enginuity Technology Centre, Coalbrookdale, Telford. Details from Norman, G8BHE, on 07808 078 003.

Telford & District Amateur Radio Society stages its 4th 2m DF hunt on Wednesday, with G8UGL as fox. Next Sunday there is a club visit to the Telford Hamfest. Contact Mike, G3JKX, on 01952 299 677.

Central Radio Amateur Circle has a night on the air on 145.300MHz from 8pm on Thursday, then a group visit to Telford Hamfest next Sunday. Contact Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

Now we return to the traditional listing in date order. On Tuesday 28 August Derby & District Amateur Radio Society is on the air. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 28 August Loughborough & District Amateur Radio Club is having a practical evening. More information from Chris, G1ETZ, on 01509

504 319.

On Thursday 30 August Salop Amateur Radio Society is holding a quiz night, competing against PARC. Details on the club website at www.salop-ars.org.uk.

On Thursday 30 August Tamworth Amateur Radio Society is holding a DF Hunt, initially meeting at the club. Details by email to Darren, secretary@tars.es.

On Friday 31 August Coventry Amateur Radio Society is having a radio workshop evening on VHF/UHF. Contact John, G8SEQ, on 07958 777 363.

On Saturday 1 September Hinckley Amateur Radio Society commences its weekend event operating a special event station for Shackerstone Family Festival. Any club or individual is welcome to attend and operate, where applicable, and any help with the running of these events or setting up etc would be gratefully received. The nearest postcode is CV13 6NB. Details from John, M0JAV, on 07836 731 544.

NEWS FOR THE NORTH OF ENGLAND

South Tyneside ARS is currently taking enquiries about their new Foundation Course that begins in Jarrow on Monday 3 September. For details, or to book a place, call or text Rob, M0LGV, on 07961 013 307.

Now for clubs that have several events this week. Angel of the North Amateur Radio Club is closed on Bank Holiday Monday. Next Saturday they commence their weekend event for the HF Contest at Windmill Hills school field. Contact Nancy Bone, G7UUR, on 01914 770 036.

Sheffield Amateur Radio Club is closed on Bank Holiday Monday. Next Saturday they commence their weekend event for the RSGB SSB Field Day & 144MHz Trophy Contest, with G2AS/P on HF and G3RCM/P on VHF. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Goole Radio and Electronics Society is having a contest planning night on Wednesday, and next Saturday are on the air and having an antenna test session. Contact Ken, G6YYN, on 01757 638 539.

South Manchester Radio and Computer Club is preparing for the contest on Thursday, then taking part in the 2m Trophy contest next weekend. Details from Ron, G3SVW, on 01619 693 999.

Now we return to the traditional listing in date order. On Monday 27 August Workington and District Radio and IT Group is having a talk on vertical antennas by Steve, G0MTD. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday 28 August Morecambe Bay Amateur Radio Society is having a talk on D-Star by Bob, G3VVT. Contact Sheila, on 07867 516 836.

On Wednesday 29 August Denby Dale Radio Club has a Real Ale night from 8pm at the Star Inn, Lockwood HD1 3PJ. Details from Richard, M0RBG, on

07976 220 126.

On Wednesday 29 August Hornsea Amateur Radio Club is having an activity night and preparing for Field Day. Contact Gordon MacNaught, G3WOV, on 01377 240 573.

On Wednesday 29 August South Lancs Amateur Radio Club will be signing up candidates for their Advanced course at Bickershaw Labour Club, Bickershaw Lane, Bickershaw WN2 5TE. More information from Allan, 2E0RAG on 07533 970 841.

On Thursday 30 August Wakefield & District Radio Society continues its Intermediate course with Chris, M0KJP. Contact Ken, G8FSO, on 07900 563 117.

On Friday 31 August East Cleveland Amateur Radio Club is having a technical forum. For more information contact Alistair, G4OLK, on 01642 475 671.

NEWS FOR NORTHERN IRELAND

No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND

On Thursday 30 August Aberdeen Amateur Radio Society is holding a Morse class and is on the air. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Tuesday 28 August Livingston & District Amateur Radio Society has Morse code practice. Details from Norman, GM1CNH, on 07740 946 192.

On Saturday 1 September Aberdeen Amateur Radio Society is taking part in the RSGB SSB Field Day from Walker Park, Aberdeen. Contact Fred Gordon, MM0ODL, on 01975 651 365.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

We start with clubs that have several events this week. Brede Steam Amateur Radio Society is at the shack on Tuesday. Next Saturday they commence their weekend event for SSB Field Day. For more information contact Steve, on 01424 720 815.

Chesham & District Amateur Radio Society is planning for HF SSB Field Day on Wednesday, which they are participating in all next weekend. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Norfolk Amateur Radio Club is having an informal meeting with Bright Sparks; the shack is open and the workshop available. Next Saturday they commence their weekend event for the RSGB SSB Field Day at DCP, near Great Ellingham. This coincides with the fun and educational Radio Active weekend of events at DCP, which includes talks and hands-on workshops from 9am Saturday until 4pm Sunday. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 29 August Worthing & District Amateur Radio Club is planning for the SSB Field day contest on Wednesday, which they are participating in next Saturday and Sunday. Contact John, G8FMJ, on 01273 593 232.

On Friday Mid-Sussex Amateur Radio Society is sorting out equipment for the SSB Field Day weekend event that commences next Saturday. Next Sunday evening there is a radio night and post event equipment check. Details from Rob, 2E0RJA, on 01444 232 129.

Now we return to the traditional listing in date order. On Monday 27 August Huntingdonshire Amateur Radio Society is holding its annual bank holiday rally at Ernulf Academy, St Neots PE19 2SH. Contact David Leech, G7DIU, on 01480 431 333.

On Tuesday 28 August Dorking & District Radio Society is having its fish and chip supper. Contact Garth, G3NPC, on 01737 359 472.

On Tuesday 28 August Farnborough & District Radio Society is having a club 2 metre net from 8 to 9pm on 144.675MHz. All are welcome. Contact Neville, G3SPD, on 01252 404 816.

On Tuesday 28 August Stevenage & District Amateur Radio Society is having a talk on repeaters by M1HOG. Details from Martin Juhe, M0XJP, on 07973 793 770.

On Thursday 30 August Bredhurst Receiving and Transmitting Society is having a club night, with CW practice from 8:30 to 9pm. Contact Charles, G4VSZ, on 07982 244 788.

On Thursday 30 August Horsham Amateur Radio Club is having a tour of the W J King Brewery. Details are on the web at www.harc.org.uk.

On Thursday 30 August Vange A R S is holding its summer barbecue. Contact Steve, G0KVZ, on 01268 552 606.

On Friday 31 August Fort Purbrook Amateur Radio Club is having a natter night and social evening. More information from Mick Ponsford, M0GWD, on 02392 366 699.

On Friday 31 August Wimbledon & District Amateur Radio Society is closed. Contact Andrew Maish, G4ADM, on 02083 353 434.

On Saturday 1 September Darenth Valley Radio Society commences its weekend event for HF Field day. Details from Bob, M0RAW, on 01322 663 804.

On Saturday 1 September Loughton & Epping Forest Amateur Radio Society commences its second Aylmers Farm field-weekend, for the final activation of the club's 50th anniversary callsign, GB5OLR. Contact Marc Litchman, G0TOC, on 02085 021 645.

NEWS FOR THE SOUTH WEST

Exeter Amateur Radio Society has its 2m net on 145.575MHz at 19:45 on Tuesday, and its 4m net on 70.425 MHz at 19:00 on Thursday. Contact

Nick, 2E0NRJ, on 01363 775 756.

On Monday 27 August Bristol RSGB Group is having a talk on LF band operations by Tom Boucher, G3OLB. Details from Robin, G3TKF, on 01225 420 442.

On Monday 27 August Riviera Amateur Radio Club is holding a portable RV. More information from Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday 27 August Weston Super Mare Radio Society is holding a natter night and Morse class. Details from Paul, G3SDH, on 01761 221 206.

On Tuesday 28 August Mid Somerset Amateur Radio Club is having a social night at the King's Arms, AKA Dusthole, Shepton Mallet. Contact Nick, 2E0FGQ, on 01749 346 320.

On Wednesday 29 August Thornbury & South Gloucestershire Amateur Radio Club is on the air. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 30 August Swindon & District Amateur Radio Club is closed. Contact Den, M0ACM, on 07810 317 750.

On Thursday 30 August Yeovil Amateur Radio Club is on the air and holding a committee meeting. Contact Steve Crask, G7AHP, by email to steve@g7ahp.co.uk.

On Friday 31 August Torbay Amateur Radio Society is having an an audio visual presentation on how we fooled the Germans with Radar. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

NEWS FOR WALES

On Thursday 30 August Aberystwyth & District Amateur Radio Society is having a club night on the Air on 145.500 then 145.550. Next Saturday they are participating in the Across Wales Walk. Details from Ray, GW7AGG, on 01970 611 853.

1612. Weekly Highlights of Solar and Geomagnetic Activity, 20 - 26 August 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-08-27 15:30:06 UTC
From: SWPC.Webmaster@noaa.gov
Message-ID: <20120827153001.A649033C94@panix2.panix.com>

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Aug 27 0630 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
20 - 26 August 2012

Solar activity was very low until 25 and 26 August. The largest
flare of the reporting period was a C1/Sf at 25/0236 UTC from Region
1554 (N16, L=215, class/area Dsi/170 on 25 August). No coronal mass
ejections observed during the reporting period were Earth-directed.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels from 21 - 24 August. Moderate levels were observed 20
August and again from 25 - 26 August.

Geomagnetic field activity was mostly quiet to unsettled with an
isolated active period mid-day on 26 August. At the beginning of the
period, solar wind speed, measured at the ACE spacecraft, indicated
the presence of a coronal hole high speed stream (CH HSS). Solar
wind decreased steadily from approximately 600 km/s to 400 km/s by
early on 22 August. Quiet to unsettled conditions were observed on
20 - 21 August. By mid-day on 24 August, the phi angle changed from
a positive to negative orientation indicating a solar sector
boundary crossing. Solar wind speed began to increase early on 25
August from approximately 400 km/s to 610 km/s as another CH HSS
moved into geoeffective position. Solar wind speed increased once
more mid-day on 26 August and ended the period around 700 km/s.
Conditions were quiet on 22 August. Conditions remained at quiet to
unsettled levels from 23 August until mid-day on 26 August as an
isolated active period was observed.

Forecast of Solar and Geomagnetic Activity
27 August - 22 September 2012

Solar activity is expected to be at very low to low levels with a
slight chance for M-class activity through the forecast period.

No proton events are expected at geosynchronous orbit.
```

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels on 29 - 30 August, 09 - 10 September, 16 - 17 September, and again on 22 September due to effects from coronal hole high speed streams.

Geomagnetic field activity is expected to be mostly quiet to unsettled until 15 September as a recurrent coronal hole high speed stream moves into a geoeffective position. Unsettled to active conditions are expected on 15 - 16 September. Conditions are expected to be mostly quiet to unsettled again from 17 September through 21 September. Another recurrent coronal hole high speed stream is expected to become geoeffective on 22 September causing unsettled to active conditions.

NS0SR Railroad Mobile Special Event 2nd Annual Scenic Railroad HF Event
6 Oct 2012

Posted: 26 Aug 2012 04:38 PM PDT
http://forums.qrz.com/showthread.php?359221-NS0SR-Railroad-Mobile-Special-Event-2nd-Annual-Scenic-Railroad-HF-Event-6-Oct-2012&goto=newpost

Railroad Mobile HF Event will be conducted attaching a passenger coach from the Lake Superior Railroad Museum on several routes throughout the 6th of October. Contacts will be made on multiple bands and with multiple modes depending on conditions.

Routes will bring the radio crew along the North Shore of Lake Superior between Duluth and Two Harbors, MN.

A special Eqsl card will be available to confirm contacts.

Event information is available on the NS0SR QRZ page.

Hurricane Watch Net in operation on 14.325, adds 7.268 for additional
reports

Posted: 26 Aug 2012 09:14 AM PDT
http://forums.qrz.com/showthread.php?359160-Hurricane-Watch-Net-in-operation-on-14-325-adds-7-268-for-additional-reports&goto=newpost

The Hurricane Watch Net will continue operating today on our primary
frequency of 14.325 MHZ as tropical storm Isaac moves toward the gulf. To
take advantage of good propagation into the area, HWN will also be
operating on 7.268 MHz this afternoon. Stations in the affected area are
encouraged to report your weather conditions and monitor for updates.

As always we appreciate your courtesy, and we appreciate your reports! They
have been a big help so far.

All Cameras Ready For This Weekends ATV QSO Party:

Posted: 26 Aug 2012 05:10 PM PDT
http://www.eham.net/articles/28885

The ATV QSO Party was the brainchild of Jim Linton, VK3PC initially used as a part of the 100 year celebration of Amateur radio Victoria. Jim assigned further development and implementation of the ATV QSO party idea to myself Peter VK3BFG. The ATV QSO party aims to encourage amateur TV activity and the concept is to maximise the use of amateur radio. Having said that, Skype is almost universal to most people and is a mechanism of including remote stations who are unable to access an ATV Repeater. This year there are two ATV Repeaters in use, VK3RTV in Melbourne and the W6ATN network of repeaters in Southern California.

Has 2O12L Broken a World Record?

Posted: 27 Aug 2012 05:19 PM PDT
http://www.eham.net/articles/28888

The team at 2O12L, the special event station for the London Olympic and Paralympic Games, believe that they have now broken the world record for the number of contacts by a Special Event Station. It is believed the record was made by DQ2006X during the 2006 World Cup, their total made between 13 May and 16 July 2006 was 47,790 contacts. At 2142UTC on 21 August, 2O12L made contact number 47,791. The team would like to thank the thousands who have joined the pile-ups to contact 2O12L and now they look forward to hitting their overall target of 60,000 QSOs.

- Closing the Season - ARRL September VHF Contest
- Continental Contests - Worked All Europe and All-Asia Phone
- A Flare for Predictions
- The Wayback Machine
- K6Z CQP Expedition Webpage
- ARRL Contest Branch Update
- A Totting Up of Tall
- Chat With the Designers
- Accounting for Technology

NEW HF OPERATORS - THINGS TO DO

The Worked All Europe contest is a great way to make some DX contacts
from North America with a novel twist - the QTC feature in which lists
of previous contacts are exchanged for extra points. Check it out on
the WAE website. There are several state QSO parties, as well -
Colorado, Tennessee, and Arkansas.

BULLETINS

Hurricane Isaac is due to make landfall on the evening of August 28th
near New Orleans. The Hurricane Watch Net <http://hwn.org> is active on
14.325 MHz with 7.268 MHz and 3.950 MHz as backup or reporting
frequencies. It may still be active through the weekend as well as
local and regional emergency nets responding to communications
emergencies. Please avoid all frequencies with emergency traffic.

BUSTED QSOS

Nothing seriously amiss was reported for the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

Sep 1-2
```

- QCWA Fall QSO Party (Sep 7)
- Worked All Europe DX Contest--Phone
- Arkansas QSO Party
- QRP ARCI Two Sidebands Sprint--Phone
- Ohio State Parks On the Air
- SKCC Straight Key Weekend Sprintathon

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

"Don't look back, something might be gaining on you!" so sayeth the great Satchel Paige. If that something was a solar flare, this new method of using radioactive decay rates <http://www.purdue.edu/newsroom/releases/2012/Q3/new-system-could-predict-solar-flares,-give-advance-warning.html> to predict flares could at least give you a little warning. Just 13 years ago, a huge flare <http://edn-mail.com/portal/wts/cemciv2dwd46eeeAvaAfi02hiSqw7c> had a dramatic affect on not only the ionosphere but integrated circuits so the ability to look ahead for the effects of solar neutrinos can pay big benefits right here on Earth.

Times Microwave <http://www.timesmicrowave.com/> (Wallingford, CT) has been announced as the supplier of feed line for WRTC2014 <http://www.wrtc2014.org/>, donating the necessary cable for all WRTC stations. Station Committee leader, Mark Pride K1RX, notes "It is mind boggling to realize that the 59 WRTC stations will need almost 6 miles of coax cable. The support of Times Microwave is a tremendous help in our efforts to equip each station with first-rate materials and stay within our budget." Times LMR®-400 cable will be used for the low-loss feed line to the Cycle 24 <http://www.cycle-24.com/> model TX38 tribander. LMR®-240 cable will be used for the 80 meter and 40 meter dipoles. WRTC2014 Chairman, Doug Grant, K1DG says, "We are very pleased to have the support of a New England company for this critical station component. It is a great example of companies in the local community

coming together to help make WRTC2014 successful." Robert Perelman, Director, Commercial Sales and Marketing at Times Microwave Systems, explained the decision to be involved with WRTC2014, "This is a great opportunity to demonstrate the quality and value of our products to the Amateur Radio community in such a prestigious event." (Thanks, WRTC2014 Co-Chair, Randy K5ZD)

Contest Club Finland <http://www.contestclubfinland.com/CCF/>
PileUP! magazine's latest issue is out and includes a number of thought provoking articles on the future of contesting, contest ethics, and a historical review of the first six WRTC events. (Thanks, Editor-in Charge, Timo OH1NOA/OJ0M)

The CW Open <http://www.cwops.org/cwopen.html> contest has been moved to the coming weekend (Sep 1-2) and has added support for live contest score reporting on the On-line Contest Score Server! <http://cqcontest.ru/> website. Al AD6E reports, "Dmitri RW4WM has graciously added "CWOPS-CWOPEN" as a (supported) contest... (it) should work with N1MM and TR4W. WinTest and Writelog are not compatible at this point." During supported contests, anyone can watch the scores pile up in near real time on Dmitri's website.

The article "Plug-and-Play Satellites <http://spectrum.ieee.org/aerospace/satellites/us-air-forces-plugandplay-satellites>" in the August issue of IEEE Spectrum discusses the new small-satellite architecture. This modular approach enables a much wider range of organizations to participate in satellite technology. The article also includes the CubeSats that frequently incorporate Amateur Radio for control, telemetry, or communication.

A great example of John Troster W6ISQ's legendary wit appeared in the September issue of the Potomac Valley Radio Club newsletter <http://pvrc.org/Newsletters/sep12.pdf>, entitled "Beat PVRC...But Not Too Badly". Searching for W6ISQ articles in the online QST archives available to ARRL members will turn up many of his articles - both technical and funny-bone tickling.

The dates of the Classic Exchange <http://www.classicexchange.org> antique radio contests have been swapped in September since the QST column was published - the phone weekend is now Sep 16-17 and the CW weekend Sep 23-24. Since these rigs can take a while to warm up and stabilize, we thought you might want to get started in plenty of time! (Thanks, Ron K2RP)

QST Managing Editor, Joel Kleinman N1BKE <http://www.arrl.org/news/em-qst-em-managing-editor-joel-kleinman-n1bke-sk-updated>, died from injuries sustained in a house fire on August 18th. Joel managed a lot of competing interests to make QST consistently readable and enjoyable to ARRL members. As reported in the Record-Journal story <http://www.myrecordjournal.com/meriden/article_cbe2f47e-eac4-11e1-9dc3-001a4bcf887a.html> on this tragedy, ARRL Publishing Manager Steve Ford said, "He was the quiet man behind the scenes, shouldering much of the burden that comes

with creating 164 pages of new content every month. Joel set a high standard for all who may follow him."

Web Site of the Week - If a favorite website seems to be gone, offline, reworked, or you just plain forgot how to find it, the Wayback Machine <http://archive.org/> is your friend. The Internet Archive organization's goal is to capture and store everything - text, graphics, music, anything that existed in digital format online. Be careful as you can spend hours in the "stacks"! (Thanks, Derward KD5WWI)

WORD TO THE WISE

Unique - when you get your log checking report and it shows a call in your log as "unique" it means that the log-checking software was unable to find any other log claiming a contact with that call nor could it determine conclusively that it was miscopied. Most contests give full credit for contacts with unique call signs although most of the them are too badly miscopied to cross-reference.

==> SIGHTS AND SOUNDS

Tim N6WIN has published a webpage for the K6Z 2011 California QSO Party Multi-Multi County Expedition <http://www.n6win.com/index_files/CQP2011.htm> to Inyo County, California. An all time new record was set for the category, beating the old record set in 1999 by over 200k points. Pictures, station description, link to the 3830 write up, and final results after log checking are included. The CQP is coming up at the beginning of October.

I guess a lightning strike webpage counts as "sights and sounds" - if you're close enough! Several websites about lightning were contributed as inspiration struck last week:

- Strikestar <http://www.strikestarus.com/>
- Vaisala STRIKEnet <http://thunderstorm.vaisala.com/explorer.html>
- TOGA Network Global Lightning Map <http://wwlln.net/TOGA_network_global_maps.htm>
- Intellicast <http://www.intellicast.com/Storm/Severe/Lightning.aspx>
- StormVue <http://rochesterweather.myserver.org/StormVue.html>

Lots of these sites have more to look at then lightning, as well...what's that I hear? (Thanks, Jim W1FMR, Bud W2RU, Paul WB2ABD)

This video <http://www.youtube.com/watch?v=HB7e4YC6vg8> demonstrates that there is no power greater than sibling rivalry. (Thanks, Tim K3LR)

On August 15, 1977, the "Big Ear" antenna at Ohio State University, now decommissioned, detected the "Wow!" signal <http://www.edn.com/electronics-blogs/other/4394137/Big-Ear-receives--Wow--Signal--August-15--1977?cid=EDNToday>.
Even today, we are still unsure whether the signal was of

extraterrestrial origins.

==> RESULTS AND RECORDS

ARRL Contest Branch Manager, Sean KX9X checks in with an update from Newington. "Certificates for the 2011 ARRL 10 GHz and Up Contest were shipped on Monday, 20 August. The next contest awards to be processed will be the 2011 September VHF Contest and the 2011 ARRL EME Competition. The log submission deadline for the 2012 IARU contest has passed and log checking is now in full swing. The Contest Branch is now preparing for the 2012 Sweepstakes. Sweepstakes Manager, Larry K5OT is working the field to ensure every op that's interested will be QRV for the November event. Speaking of Sweepstakes, the 2011 SS plaques have been ordered! Once they arrive from the engraver (about 6 weeks or so), we'll begin shipping them out. Sweepstakes certificates aren't far behind, either, and like all of the other contest awards we've issued this year, the Sweepstakes certificate has been redesigned. We hope you like 'em.

From the CQ World Wide Contest Direct, Bob K3EST, "The *official, corrected* *final results <http://www.cq-amateur-radio.com/cq_contests/index_cq_contests.html>* for the *SSB *CQ WW contest are now posted on the CQ magazine website. The *official, corrected final results* for the *CW* CQ WW contest will be posted on the CQ magazine website to coincide with the release of the September digital edition, on or around September 1, 2012. [The CW results <http://www.cq-amateur-radio.com/cq_contests/cq_ww_dx_contest/cq_ww_dx_cw_contest/2011_cq_ww_dx_cw_contest/2011_cq_ww_dx_cw_contest.pdf> are now available - Ed.] *The **official, corrected UBN/NIL SSB and CW reports* *are now available**at CQWW.com <http://cqww.com/>* (*NO new passwords are required*)." I think he *means* it!

The results of the 2011 Radio Amateurs of Canada, Canada Winter Contest <http://www.rac.ca/en/rac/programmes/contests/files/RAC%20Canada%20Winter%20Contet%202012%20Writeup%20V1.1.pdf%20> have been posted online. (Thanks, RAC Canada Winter Contest Manager, Sam VE5SF)

The results of the 2012 Minnesota QSO Party <http://www.w0aa.org/> have been published on the Minnesota Wireless Association home page. Participation was just a wee bit up but nevertheless at an all time high with some incredibly close races in several categories. We had quite a few in-state and out-of-state multi-operator efforts including some special event call signs; resulting in some obviously enjoyable group events. An article from Kenny K2KW is included, offering his insights on how he approached MNQP as a first timer and he was a category winner. (Thanks, Mark WA0MHJ)

The results of the 2012 DRCG Long Distance Contest - LDC RTTY <http://drcg.de/index.php?option=com_content&task=view&id=138&Itemid=93> are online and certificates can be downloaded from the same web page.

(Thanks, LDC Contest Director, Goetz DJ3IW and Bernd DC3HB, DRCG Contest Manager)

OPERATING TIP

Your logging software may have some sample message or macro files to ease the process of configuring the program for a new contest. For example, in the recent ARRL Rookie Roundup RTTY <http://www.arrl.org/rookie-roundup> contest, Larry K8UT created some function key messages aimed at the newcomer - both to RTTY contesting and to the Rookie Roundup, specifically. There are files for both N1MM <http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=23> and Writelog <http://writelog.com/downloads/third-party>. Your editor made good use of these for both reasons! The use of the files in N1MM has been added to N4ZR's "Quick Start <http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=3>" guide to N1MM, as well. Check around on the home page for your software or ask fellow club members if they might have some files to help get you started.

==> TECHNICAL TOPICS AND INFORMATION

Up, up, and away! Steve NU7T has collected sources of extendable and fixed antenna support poles <http://web1.greatbasin.net/%7Enu7t/> from a few feet to 65 feet and up. You will be amazed at the variety and resourcefulness of what can be used to hang a skyhook!

Troubleshooting is hard enough without having to follow 10-mil (or smaller) PCB traces under and around other components. This Instructables project <http://www.instructables.com/id/How-To-Quickly-Find-And-Trace-PCB-Tracks-1/> shows you how to put your finger right on the desired trace!

Everybody can get in on geomagnetic field measuring - all you need is this handy proton precession magnetometer <http://www.edn.com/design/analog/4392193/Geomagnetic-observatory?cid=Newsletter+-+EDN+on+Analog>!
It's actually quite buildable - did I hear someone say, "Science project!"? From the EDN description, "This article describes a proton precession magnetometer (PPM) for monitoring the Earth's magnetic field...By measuring very small changes in the Earth's magnetic field, one can also observe the diurnal variation of the geomagnetic field, typically on the order of tens of nano Tesla. Larger changes in the geomagnetic field are often related to solar activity. The Sun can send out massive amounts of charged particles as a Coronal Mass Ejection (CME)." Kind of a seismograph for the ionosphere!

Gregg W6IZT has a good way of using inexpensive plastic "dog bone" insulators to hold up Beverages and other low horizontal wires. "I use a bolt that has a machine screw thread on one end and a wood screw thread on the other (available at hardware stores). Drill the end of the dog bone to accept the machine thread and thread the wood screw

into a post, tree or whatever."

When you are trying to disassemble triband Yagi traps and find the manufacturer has "dimpled" them to secure the cover in place, John G3JVC/GM3JVC turns to the advice of Ron GW3YDX. "Drill out the dimples, taking care not to drill into the internal concentric plastic insulator of the traps. Then by using blocks of wood and applying gentle force, slide the traps apart without resorting to bending the contact strip between the element and the outer cover of the trap, and thereby risking its fracture.."

"CQ 10 centimeters, CQ 10 centimeters..." Two articles in Popular Science <http://www.popsci.com/technology/article/2012-08/new-room-temperature-masing-method-could-make-masers-more-common-lasers> and Nature <http://www.nature.com/news/microwave-laser-fulfills-60-years-of-promise-1.11199> describe a room-temperature MASER (Microwave Amplification by the Stimulated Emission of Radiation) built 60 years after the first MASERs were constructed. It won't be long until these find their way into the ham shack - probably of VHF+ contesters trying for a few extra grids!

Gene AD3F's Trylon tower has angle steel legs, making securing cables to the leg a breeze. "To attach (the cables) to the tower I wrapped a single length of #12 solid insulated house wire around the coax bundle, twisted it a couple of times, then ran a wire end through a pre-drilled hole and twisted both ends together. With this method I can re-enter the bundle to change or add cables, then reseal a few more times before I have to replace the wire."

Bonding coax shields to a tower at top and bottom is good practice for preventing lightning damage but doing so without an expensive grounding kit or letting water into the braid is not simple. Dick WC1M suggests this procedure: "It consists of a long UHF barrel connector with a metal spring clamp (a U-shaped piece of metal) tightly wrapped around the middle and screwed down. The other end of the spring clamp is screwed to a ground rod clamp large enough to go around a tower leg. The interface between the barrel connector and the metal clamp is waterproofed with coax seal and tape. I cut the feed line to the antenna near the fitting, attach PL-259 connectors to each free end, screw them into the barrel connector, and waterproof."

Here's another handy cheap-and-effective project that uses a single hex inverter IC <http://www.edn.com/design/test-and-measurement/4391393/Single-hex-inverter-IC-makes-four-test-gadgets?cid=Newsletter+-+EDN+Design+Ideas> to make four different test gadgets!

Technical Web Site of the Week - The podcast "Chat With the Designers <https://dl.dropbox.com/u/43021514/CWTD/TeamspeakChat.html>" often has a lot of good material to share. For example the last two "issues" on troubleshooting are sub-titled, "Basic guidance on troubleshooting

circuits that should be working ... but are not." I think we all have a few of those. There are more than 30 other podcasts available!

==> CONVERSATION

Accounting for Technology

Much is made lately about the problems created by too many stations pouncing on a high-precision spot at once. Even highly skilled operators find the ensuing blur of zero-beat signals impossible to unravel quickly. Without a reliable rhythm, the callers get increasingly out of sync until no one can hear the CQing station or the answering station and the whole pileups dissolves in chaos. Rate for everyone falls to zero and that's no fun! This has always been a problem with 'phone operation since the voices are all spread across the same spectrum but now it's an issue with CW and RTTY contesting, too.

We have an embarrassment of riches - radios with master oscillators accurate to plus or minus 10 Hz, worldwide spotting networks distributing spotting information in milliseconds to thousands of stations, and automated decoders using sophisticated signal processing to simultaneously translate hundreds of transmissions. Not to mention effective antennas and receivers and transmitters enabling us to hear and call stations around the world. These are the right problems to have! But they are still problems. Technology isn't going to go away (hopefully) and participation in radiosport of nearly all types is up so how do we manage the problem of "too many, too close"? By changing our strategies and tactics.

We've talked about this problem from the search-and-pounce perspective before. You probably can't count on jumping on a spot before anybody else - the information is basically available instantaneously everywhere there is Internet connectivity. i.e. - 95% of contest stations. With modern radios, you can't count on being the most accurate because everyone will be transmitting within 100 Hz of the frequency in the spot. Unless you have an RBS (Really Big Station) or you probably won't be much louder than the rest of the pileup on a consistent basis, either.

Your strategy has to be "stand out in the crowd" and the tactics available to you are timing and pitch, just as they have always been. Call a little behind everybody else: not so much that you cover up the CQing station but enough so that a letter or two sticks out. QNY - spread out! On phone - maybe a few hundred hertz. On CW - one or two hundred hertz. I'm not sure what works on digital! Hit 'em where they ain't, said Hall of Famer Wee Willie Keeler. Who knew he was a contester, too!

If you are a CQing station, just being loud isn't enough anymore, you have to worry about workability, too. To be sure, "alligators" have always been with us - a loud station with an operator not up to the

task of unwinding a big pileup. It's just that technology has amplified and spread the problem. Previously, being loud also generally meant being workable. Now the CQing station has to actively manage the zero-beat issue. (This is not just a problem for rare stations - even garden-variety stations can experience it, particularly when they are "fresh meat" on a band.)

It is often said that the optimum size pileup is one station calling: no interference, no disruption, one caller with every CQ. Somewhere between that elusive optimum and chaos lies a manageable pileup. If your pileups are packed too tightly, think about how to limit the number of callers that will come to your frequency or figure out how to get them to call across a small range of frequencies. There isn't much you can do about operators posting spots to your station but if automated spots are causing trouble, think about how you can operate to minimize being detected by the decoders - not sending CQ, just your call sign, for example. Combined with occasional small shifts in transmit frequency, that may spread the pileup just enough keep things moving. This is just one of many possible techniques.

What about a station that is not loud - such as on a long or particularly difficult path? A DXpedition will operate split when pileups are large or signals are weak. This generally isn't a desirable option during contests, but sometimes there may be no other way to work stations. If you have to, you have to - just try not to clobber somebody else's run frequency and do it only when you feel you have no other choice.

The point is not to write a manual for operating with big pileups. The point is that we are going to have to accommodate new technology by devising operating strategies and tactics that account for that new technology. It's not enough to demand that other operators behave as if there wasn't any new technology - and you won't be successful anyway. Bright, savvy operators are already thinking and planning for it.

73, Ward N0AX

==> CONTESTS

29 August through 11 September

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

North American Sprint-- CW, from Sep 9, 0000Z to Sep 9, 0400Z. Bands (MHz): 3.5-14. Exchange: Call signs, serial, name, and state. Logs due: 7 days. Rules <http://www.ncjweb.com/>

All-Asian DX Contest-- Phone, from Sep 1, 0000Z to Sep 2, 2400Z. Bands (MHz): 3.5-28. Exchange: RS, operator age (YL may send 00). Logs due: Oct 31. Rules <http://www.jarl.or.jp/English>

Russian Radio RTTY WW-- Digital, from Sep 1, 0000Z to Sep 1, 2400Z. Bands (MHz): 3.5-28. Exchange: RST and oblast or WAZ zone. Logs due: Oct 1. Rules <http://www.radio.ru/cq/contest/rule-results/index2.shtml>

DARC 10-Meter Digital "Corona"-- Digital, from Sep 1, 1100Z to Sep 1, 1700Z. Bands (MHz): 28. Exchange: RST and serial. Logs due: 2 weeks. Rules <http://www.darc.de/referate/ukw-funksport>

CWops CW Open-- CW, from Sep 1, 1200Z - multiple operating periods - see website. Bands (MHz): 1.8-28. Exchange: Serial and name. Logs due: Sep 20. Rules <http://www.cwops.org/cwopen.html>

Colorado QSO Party-- Phone, CW, Digital, from Sep 1, 1200Z to Sep 2, 0400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--50 kHz above band edge; Phone--1.870, 3.850, 7.250, 14.250, 21.350, 28.450. Exchange: Call sign, name, and county or S/P/C. Logs due: Oct 5. Rules <http://www.ppraa.org/coqp>

IARU Region I Field Day-- Phone, from Sep 1, 1300Z to Sep 2, 1300Z. Bands (MHz): 1.8-28. Exchange: RS and serial. Logs due: 16 days. Rules - see IARU Society web pages

Straight Key Party-- CW, from Sep 1, 1300Z to Sep 1, 1600Z. Bands (MHz): 7. Exchange: RST, serial, category, name, age. Logs due: Sep 30. Rules <http://www.agcw.de/>

Tennessee QSO Party-- Phone, CW, Digital, from Sep 2, 1800Z to Sep 3, 0300Z. Bands (MHz): 1.8-28, 50+, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 3. Rules <http://www.tnqp.org/>

OK1WC Memorial Contest-- Phone, CW, from Sep 3, 1600Z - multiple operating periods - see website. Bands (MHz): 3.5, 50, 144, see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

Labor Day Sprint-- CW, from Sep 3, 2300Z to Sep 4, 0300Z. Bands (MHz): 1.8-28, 50. Exchange: RST, S/P/C, MI QRP nr or power. Logs due: Oct 5. Rules <http://miqrp.org/>

ARS Spartan Sprint-- CW, from Sep 4, 0200Z to Sep 4, 0400Z. Bands (MHz): 3.5-28. Frequencies: Monthly on the first Monday evening local time. Exchange: RST, S/P/C, and power. Logs due: 2 days. Rules <http://www.arsqrp.blogspot.com/>

070 Club KA3X Memorial Sprint-- Digital, from Sep 7, 8 PM to Sep 8, 2 AM. Bands (MHz): 3.5. Frequencies: 3.580. Exchange: Call sign, RST and S/P/C. Logs due: Sep 21. Rules <http://www.podxs070.com/>

SNS and NS Weekly Sprints-- CW, Digital, from Sep 7, 0200Z to Sep 7, 0300Z. Bands (MHz): 1.8-14. Every Thursday evening (local). Exchange:

Serial, name, and S/P/C. Logs due: 2 days. Rules <http://www.ncccsprint.com/>

QCWA Fall QSO Party-- Phone, CW, Digital, from Sep 7, 1800Z to Sep 8, 1800Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, year lic'd, name, chptr or S/P/C. Logs due: 30 days. Rules <http://www.qcwa.org/qso-party.htm>

Worked All Europe DX Contest-- Phone, from Sep 8, 0000Z to Sep 9, 2400Z. Bands (MHz): 3.5-28. Exchange: RS and serial. Logs due: 2 weeks. Rules <http://waedc.de/>

Arkansas QSO Party-- Phone, CW, Digital, from Sep 8, 1400Z to Sep 9, 0200Z. Bands (MHz): 3.5-28, 144, Frequencies: CW--40 kHz above band edge; Phone--3.85, 7.18, 14.28, 21.38, 28.38, 146.55; PSK31--3.58, 7.08, 14.07015, 21.08, 28.08. Exchange: RS(T), county or S/P or "DX". Logs due: Oct 10. Rules <http://www.arkanhams.org/>

QRP ARCI Two Sidebands Sprint-- Phone, from Sep 8, 1500Z to Sep 10, 0300Z. Multiple operating periods. Bands (MHz): 1.8-28. Exchange: S/P/C and ARCI member nr or power. Logs due: 14 days. Rules <http://www.qrparci.org/contests>

Ohio State Parks On the Air-- Phone, CW, Digital, from Sep 8, 1600Z to Sep 8, 2400Z. Bands (MHz): 3.5-28, 50, Frequencies: CW--45 kHz above band edge;Phone--3.825,7.200,14.250,21.300,28.450,50.145. Exchange: "Ohio" or S/P/DX and Park ID. Logs due: 30 days. Rules <http://parks.portcars.org/>

SKCC Straight Key Weekend Sprintathon-- CW, from Sep 9, 0000Z to Sep 9, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member nr if member. Logs due: 5 days. Rules <http://www.skccgroup.com/>

VHF+ CONTESTS

ARRL September VHF Contest-- Phone, CW, Digital, from Sep 8, 1800Z to Sep 10, 0259Z. Bands (MHz): 50+. Exchange: Grid square. Logs due: Oct 10. Rules <http://www.arrl.org/contests>

Colorado QSO Party-- Phone, CW, Digital, from Sep 1, 1200Z to Sep 2, 0400Z. Bands (MHz): 1.8-28, 50+, Frequencies: CW--50 kHz above band edge; Phone--1.870, 3.850, 7.250, 14.250, 21.350, 28.450. Exchange: Call sign, name, and county or S/P/C. Logs due: Oct 5. Rules <http://www.ppraa.org/coqp>

Tennessee QSO Party-- Phone, CW, Digital, from Sep 2, 1800Z to Sep 3, 0300Z. Bands (MHz): 1.8-28, 50+, Frequencies: See website. Exchange: RS(T) and county or S/P/C. Logs due: Oct 3. Rules <http://www.tnqp.org/>

OK1WC Memorial Contest-- Phone, CW, from Sep 3, 1600Z - multiple operating periods - see website. Bands (MHz): 3.5, 50, 144, see website for bands. Exchange: RS(T) and serial. Logs due: 7 days. Rules <http://www.hamradio.cz/ok1wc>

Labor Day Sprint-- CW, from Sep 3, 2300Z to Sep 4, 0300Z. Bands (MHz):
1.8-28, 50. Exchange: RST, S/P/C, MI QRP nr or power. Logs due: Oct 5.
Rules <http://miqrp.org/>

QCWA Fall QSO Party-- Phone, CW, Digital, from Sep 7, 1800Z to Sep 8,
1800Z. Bands (MHz): 1.8-28, 50+. Exchange: Call sign, year lic'd, name,
chptr or S/P/C. Logs due: 30 days. Rules
<http://www.qcwa.org/qso-party.htm>

Arkansas QSO Party-- Phone, CW, Digital, from Sep 8, 1400Z to Sep 9,
0200Z. Bands (MHz): 3.5-28, 144, Frequencies: CW--40 kHz above band
edge; Phone--3.85, 7.18, 14.28, 21.38, 28.38, 146.55; PSK31--3.58,
7.08, 14.07015, 21.08, 28.08. Exchange: RS(T), county or S/P or "DX".
Logs due: Oct 10. Rules <http://www.arkanhams.org/>

Ohio State Parks On the Air-- Phone, CW, Digital, from Sep 8, 1600Z to
Sep 8, 2400Z. Bands (MHz): 3.5-28, 50, Frequencies: CW--45 kHz above
band edge;Phone--3.825,7.200,14.250,21.300,28.450,50.145. Exchange:
"Ohio" or S/P/DX and Park ID. Logs due: 30 days. Rules
<http://parks.portcars.org/>

==> LOG DUE DATES

29 August through 11 September

- August 31 - Venezuelan Ind. Day Contest
<http://www.radioclubvenezolano.org/rules.htm>
- August 31 - US Counties QSO Party <http://marac.org/contests.htm>
- September 1 - North American QSO Party, SSB
<http://www.ncjweb.com/naqprules.php>
- September 1 - CQ Worldwide VHF Contest
<http://www.cqww-vhf.com/rules.htm>
- September 1 - Portugal Day Contest
<http://www.rep.pt/portugal_day_contest/rules.html>
- September 1 - TARA Grid Dip Shindig
<http://www.n2ty.org/seasons/tara_grid_rules.html>
- September 2 - SARL HF CW Contest
<http://www.sarl.org.za/public/contests/SARL_2012_Contest_Manual_issue_10.pdf>
- September 3 - SCC RTTY Championship
<http://lea.hamradio.si/scc/rtty/rttyrules.htm>
- September 4 - ARRL UHF Contest <http://www.arrl.org/august-uhf>
- September 9 - QRP ARCI Welcome to QRP
<http://www.qrparci.org/content/view/8397/118/>
- September 11 - Maryland-DC QSO Party
<http://mdcqsoparty.w3vpr.org/Documents/MarylandQSOPartyRules2011v2.pdf>

*RAC Bulletin 2012-050E - Revocation of Volunteer Examiner Qualifications
*
2012-08-28

Over the past several months, the Radio Amateurs of Canada has been investigating reports of possible exam irregularities. Industry Canada has been asked to investigate some of these irregularities and take action where appropriate.

Today, the Radio Amateurs of Canada announces that the volunteer examiner qualifications of VA3MPM have been revoked. Effective immediately, Mr. Myers will no longer be able to administer the examination of new amateurs. The revocation was made following an investigation by Industry Canada in conjunction with several Amateurs in the Ottawa region. Details on any alleged irregularities will not be released.

The club to which Mr. Myers provided examination services has nominated a new examiner. That examiner has been interviewed by Industry Canada and has received approval to act as a volunteer examiner. RAC congratulates the replacement examiner for volunteering to provide service to the Amateur community to ensure examination services continue to remain available.

The Radio Amateurs of Canada are committed to ensuring the enforcement of Amateur Radio related regulations Canada wide. These regulations ensure the qualify of Amateur Operators for emergency operations, ensure spectrum efficiency and exist to govern our service in a fair and open manner. The over whelming majority of Amateur Operators operate within these regulations for the benefit of all. RAC places a priority on ensuring Amateurs and Non-Amateurs respect and abide by these regulations. We note that several other investigations are continuing.

The Radio Amateurs of Canada is funded by your membership. In addition to spectrum protection, we provide numerous other services to members. Why not tell a friend about the benefits of being a RAC member - like receiving The Canadian Amateur Magazine, a universal email address and access to Insurance for both club and personal needs. To become a member and ensure a strong representation for Amateurs in Canada, visithttp://www.rac.ca/en/

CW Open contest Sept. 1 and 2

Posted: 29 Aug 2012 05:35 AM PDT
http://forums.qrz.com/showthread.php?359510-CW-Open-contest-Sept-1-and-2&goto=newpost

Second Annual CW Open contest THIS WEEKEND!

Are you ready for one of the most unique and fun contests on the air? If
so, jump into the CW Open, organized by the CWops club it□s
three-contests-in-one!

Like most contests, the goal is to work as many stations as possible (in
this case CW stations only). Each station may be worked once per band.

Unlike other contests, however, in the CW Open there are three separate
competitions at three separate times -- each is called a "session". You
can enter one, two or all three of these sessions. Each session is scored
separately. For those who enter more than one session, there is also a
multiple-session category that combines all your session scores into one
grand total score. So, if you enter 2 or 3 sessions you will be competing
in each individual session plus the multiple-session category. More chances
to win!

Join us for as many sessions as you can make.

Session 1
September 1
1200-1559Z

Session 2
September 1
2000-2359Z

Session 3
September 2
0400-0759Z

The exchange is easy: just a serial number and your name.

Is it fun? Here□s what some of last year□s contestants said:

□A fun, new way to contest. Many thanks to the organizers!□ - AE6Y

☐Running QRP 5W from IC-7400 to a trap vertical. First time in this contest. Very enjoyable pace. Look forward to next year. ☐ G6CSY

☐Good traffic and very quick ops. Hats off .See all you next year. Ciao.☐ - IK0HBN

☐Enjoyed every minute and looking forward to next year! 73.☐ ☐ KA3DRR

Awards: (Sponsored by ICOM America)

Trophy for 1st place in each time period.Plaque for 1st place in each power level in each time periodTrophy for over all combined score of all three time periods.Plaque for 1st place for each power level in the combined score group.(Note: if the same entrant wins multiple awards, they may be combined).Certificates for achieving more than 100 QSOs in any or all time periods.

For more information, and full rules, go to:
http://www.cwops.org/cwopen.html

AMSAT 2012 Space Symposium On-Line Registration Opens

AMSAT announces that the registration for the 2012 AMSAT Space Symposium, to be held on Friday, October 26th through Sunday, October 28th is now open on-line. A mail-in option is also available those preferring this approach.

See the AMSAT Web Store to complete your on-line registration - then click on the "AMSAT 2012 Symposium" item in the top left box on your web browser.

Downloadable paper registration forms in MS-Word format and PDF format are available on the 2012 Symposium page.

Prices for the Symposium are:

Symposium Registration including Proceedings

Through September 23, 2012: $ 45.00Starting September 24, 2012: $ 50.00At the Door: $ 55.00
Saturday Evening Banquet $ 45.00Sunday Morning Area Coordinators☐ Breakfast $ 15.00Monday (Oct 29) bus trip to KSC and entrance ticket $ 100.00

The Symposium weekend will feature:

Space Symposium with Amateur Satellite PresentationsOperating Techniques, News, & Plans from the Amateur Satellite WorldBoard of Directors Meeting open to AMSAT membersMeet Board Members and OfficersAnnual General Membership MeetingAnnual Banquet-Keynote Speaker and Door Prizes

The Symposium Hotel is the Holiday Inn at Orlando-International Airport is located one mile from the Orlando International Airport (MCO). The AMSAT discount rate is $99 + taxes per night. The reservation block code used when calling the hotel directly is AMT.

The hotel telephone number is 407-851-6400. The Symposium Committee recommends you make reservations by calling the hotel directly ratherthan through the Web. Cutoff date for reservations is Oct 6, 2012. A link to the hotel web page is available here.

The hotel offers free Internet connection and free airport shuttle. When you arrive at the Orlando Airport call 407-709-5310 to request the shuttle.

The Orlando International Airport (MCO) is the closest to the Symposium and is served by most major air carriers. The hotel address is: 5750 T.G. Lee Blvd ☐ Orlando, FL 32822. A map link is included on the hotel web page.

[ANS thanks the 2012 Symposium Committee for the above information]

AMSAT 2012 Space Symposium Second Call for Papers

Symposium Proceedings Editor, Dan Schultz, N8FGV issued the second Call For Papers for the 2012 AMSAT Annual Meeting and Space Symposium to be held in Orlando, Florida on the weekend of October 26-28, 2012.

Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community:

Papers for publication in the ProceedingsSymposium PresentationsPoster PresentationsEquipment and Operating Demonstrations

Dan requests a tentative title of your presentation as soon as possible, with final copy to be submitted by October 1 for inclusion in the printed proceedings. Abstracts and papers should be sent to Dan Schultz, N8FGV, at n8fgv@amsat.org

The Symposium Committee still has prime slots available on the speaker's schedule. The AMSAT Symposium depends on YOU to make it happen, without speakers there is no Symposium.

Please consider doing a presentation, even if you have never done so in the past. We are especially interested in papers and presentations involving our educational partnerships with K-12 and university level classrooms. Education is quickly becoming critical for our future rides to space.

[ANS thanks 2012 Symposium Proceedings Editor Dan Schultz, N8FGV for the above information]

Rooms Still Available for AMSAT-UK Colloquium

AMSAT-UK Hon Sec Jim List, G3WGM says, "There are still rooms available at the hotel at which the AMSAT-UK Colloquium will be held on September 14, 15 and 16. The location of the Colloquium is at the Holiday Inn, Guildford, Surry, UK. TO BE SURE OF A ROOM AT THE HOTEL YOU SHOULD BOOK AS SOON AS POSSIBLE TO AVOID DISSAPPOINTMENT!"

The Colloquium is a truly international event and will include:

New this year will be guided tours of the new SSTL satellite construction facility, the Kepler Building, including a view of the clean rooms. This facility has been open less than a year, and is hugely impressive! Numbers on the tours are limited and strictly first come first served basis. Detailed timings to follow.Presentations by experts from AMSAT-SA, AMSAT-NA and AMSAT-DL on their current spacecraft projects.CubeSat presentations on UKube-1, STRaND-1, STRaND-2 and, of course the FUNcube-1 project.We will be including an exclusive roundup of a number of new live and potential spacecraft projects that are under investigation and/or development.Additionally a number of presentations are planned covering new communications techniques and similar futuristic topics.Plus all the usual networking opportunities, the gala dinner and auction/raffle, plus the opportunity to operate the sophisticated groundstation in the GB4FUN mobile demonstration module.

Exclusive New Product Launch at AMSAT-UK Colloquium

AMSAT-UK are delighted to announce that Howard Long, G6LVB, will be present at the Colloquium this year and will be launching a new "FUNcube Dongle PRO-PLUS" during his presentation.

Full technical details have been embargoed until his talk and we are not permitted to steal his thunder by releasing further details of this new product in advance. Attendees at the Colloquium will therefore be the first to learn about Howard's latest development which will further advance the

applications for SDR devices.

Further details are at: http://www.uk.amsat.org/9565#more-9565 - and

at - http://www.uk.amsat.org/colloquium/twelve.

You can book online using PayPal or Credit Card at:

http://shop.amsat.org.uk/shop/catalog/browse

[ANS thanks AMSAT-UK Hon Sec Jim List, G3WGM and Trevor, M5AKA for the above information]

Successful ARISS Contacts With Australia and Japan

An ARISS contact was held with students at the Kangaroo Inn Area School in Kangaroo Inn, South Australia on Tuesday, August 14 via station W6SRJ in California. ISS astronaut Sunita Williams, KD5PLB participated in the session, answering over 20 questions posed by the students. Nearly 90 visitors attended the event, including local

politician Mitch Williams and his wife, the ABC (Australian Broadcasting Corporation) radio network, WIN 8 regional TV and representatives from three newspapers. The contact complemented a science curriculum covering space and space exploration.

On Thursday, August 16, an ARISS contact was held between students attending Wada Elementary School in Nagawa Town, Japan and Akihiko Hoshide, KE5DNI, aboard the Space Station, which highlighted a comprehensive education plan covering space, astronomy and radio com-munications. The event drew an audience of approximately 120 students and guests and garnered extensive media coverage including six television stations and five newspapers.

US East Coast ARISS Contact September 1

An ARISS contact with the National Electronics Museum, Linthicum, Maryland is planned for Saturday, September 1 at 15:09:11 UTC. This 42° elevation pass with a direct contact via K3CUJ should be heard along the US East Coast on the 145.800 MHz downlink.

[ANS thanks Carol Jackson, KB3LKI, and Charlie Sufana, AJ9N for the above information]

South Africa University CubeSat With HF Beacon to Launch in November

South African Radio League, SARL News reports that a new CubeSat designed and built by students at the Cape Peninsular University of Technology in Bellville will be launched towards the end of November.

Known by its engineering name ZACube-1, the satellite will be shipped in the next few weeks to Holland where it will be integrated with two other CubeSats in the launch carrier before being shipped for integrating with the DNEPR rocket, joining up to 18 other amateur radio satellites on this launch. (See: http://www.uk.amsat.org/7717)

ZACube-1 carries a HF transmitter operating on 14.099 MHz which will be used for characterization of Hermanus Magnetic Observatory□s Dual Auroral Radar Network antenna at SANAE base in Antarctica.

Also aboard ZACube-1 will be a small camera and a telemetry transmitter. Monitor this link at SARL for the audio of an interview with the satellite's project leader. SA AMSAT has also posted detailed news on-line.

The IARU Amateur Satellite Frequency Coordination Panel list these frequencies:

Beacon 14.099 MHzUplink 145.860 MHzDownlink 437.345 MHz

[ANS thanks SA AMSAT, SARL, and AMSAT-UK for the above information]

Mars Landing Received Signals Recording Posted On-Line

An interesting article posted at UniverseToday.com tells more of the technical details of the Entry, Descent, Landing (EDL) phase when the Curiosity Mars Rover landed on Mars. The article also provides a link to the X-band radio signals received during landing.

With a 14 minute radio delay because of the distance between Earth and Mars, how did the JPL team know what was happening on Mars?

UniverseToday describes the signaling process between Mars and Earth: (http://tinyurl.com/MarsEDLTones - universetoday.com)

"The Mars Science Lander sent out different tones for each event that happened, and 128 distinct tones indicated when steps in the process were activated; one sound indicated the parachute deployed, while another signaled that the vehicle was in powered flight, and still another that the Sky Crane had been activated. These sounds were a series of basic, special individual radio tones.

They were simple tones, transmitted in X-band, comparable to semaphore codes, rather than full telemetry. The Deep Space Network listened for these direct-to-Earth transmissions. However, Earth went out of view of the spacecraft, "setting" below the Martian horizon, partway through the descent, so the X-band tones were not available for confirming the final steps in descent and landing. By then, the bent-pipe relay of telemetry via the Odyssey spacecraft had begun.

Also listening was the Mars Express spacecraft. It recorded about 20 minutes of the rover□s transmissions and tones. ESA engineers have now put together an audio reproduction, compressing the 20 minutes into about 19 seconds of audio that humans can hear that are a "faithful reproduction of the □sound□ of the NASA mission□s arrival at Mars and its seven-minute plunge to the Red Planet□s surface," the European Space Agency team wrote. You can listen to the MP3 audio on this link.

[ANS thanks UniverseToday.com for the above information]

Check Your Keps - ISS Orbit Successfully Readjusted

Space-Travel.com reported on August 22that Europe's ATV-3 unmanned supply spacecraft has raised the International Space Station's orbit to about 261 miles.

The successful orbital readjustment follows a failed attempt August 15 when the ATV-3's engines shut down prematurely because of an increase in temperature on one of the units, leaving the ISS short of its intended orbital height, RIA Novosti reported.

The orbit adjustment Wednesday was done in two stages, with the ATV-3 engines firing for 348 seconds to lift the orbit to 257 miles followed by another burn four hours later that brought the space station to its final altitude.

The maneuver was to prepare for the return to earth of Russia's Soyuz TMA-04M manned spacecraft on September 17 and the docking of the Soyuz TMA-06M manned spacecraft with the ISS on October 15.

Help Wanted: AMSAT News Service Rotating Editor Positions Available

The AMSAT News Service (ANS) is responsible for researching, writing, editing, and publishing the weekly amateur satellite news bulletins.

After the passing of Dee, NB2F, we currently have a two editors who take a turn weekly to publish the bulletins. With the addition of a volunteer, or two, this would generally involve taking a turn about every 3 to 4 weeks.

At present we a looking for interested satellite enthusiasts to join the ANS editorial team. Professional writing/editing experience is NOT a requirement. Your interest and enthusiasm in following and reporting on amateur radio in space will get you started! The ANS Editor team helps each other by rounding up items of interest. Plus we receive submitted items for publication ... so you won't be left all alone!

If you can commit to working on the bulletins for a week on a rotating basis please reply via e-mail to AMSAT News Service Editor JoAnne Maenpaa, K9JKM via k9jkm@amsat.org.

[ANS thanks AMSAT Vice-President User Services, Gould Smith, WA4SXM for the above information]

NASA Announces SpaceX Cargo Missions to ISS Begin in October

CAPE CANAVERAL, Fla. - NASA Administrator Charles Bolden announced Thursday [August 23, 2012] new milestones in the nation's commercial space initiatives from the agency's Kennedy Space Center in Florida. The latest advances made by NASA's commercial space partners pave the way for the first contracted flight of cargo to the International Space Station (ISS) this fall and mark progress toward a launch of astronauts from U.S. soil in the next 5 years.

Bolden announced Space Exploration Technologies (SpaceX) has completed its Space Act Agreement with NASA for Commercial Orbital Transportation Services (COTS). SpaceX is scheduled to launch the first of its 12 contracted cargo flights to the space station from Cape Canaveral in October, under NASA's Commercial Resupply Services Program.

Through the COTS program, NASA provides investments to stimulate the American commercial space industry. As part of its COTS partnership, SpaceX became the first commercial company to resupply the space station in May, successfully launching its Falcon 9 rocket and Dragon spacecraft to the orbiting complex. During the historic mission, the Dragon was captured by astronauts using the station's robot arm, unloaded and safely returned to Earth carrying experiments conducted aboard ISS. Later this winter, Orbital Sciences Corp. plans to carry out its first test flight under COTS.

The full NASA press release can be found on-line at:

http://www.nasa.gov/exploration/comm...ilestones.html

[ANS thanks NASA for the above information]

Satellite Shorts From All Over

AMSAT joins all of the spacefaring people of Earth in remembering a hero for mankind on the passing on August 25 of Neil Armstrong, the first man to walk on the Moon. Armstrong was 82.AMSAT has received the sad news of the passing QST Managing Editor Joel P. Kleinman, N1BKE, of Meriden, Connecticut. Joel died from injuries received during a house fire. He was 64. Kleinman was responsible for the coordination, organization, control and completion of all aspects of QST's editorial content each month. Kleinman's wife Jayne survived the fire, but is currently in the intensive care unit of a local hospital. The ARRL is collecting condolence messages to forward on to Joel's family. If you would like send a message, please email it to: news@arrl.org.A video about the amateur radio F-1 CubeSat that is due to be deployed from the International Space Station in September by Japanese astronaut Akihiko Hoshide KE5DNI using the ISS Kibo robot arm can be viewed on the AMSAT-UK web at: http://www.uk.amsat.org/9746 It was broadcast on the Vietnamese TV station VTC2 and features interviews with Thu Trong Vu XV9AA, Hong Thai Pham and Pham Quang Hung along with a graphics clip showing the proposed deployment of the CubeSat. Part of the interview is held on the roof of the FPT university and shows the antenna array that will be used to command the F-1 CubeSat.Scouts from all over the United States came to this year's Space Jam 6 sponsored by Crew 272 and Troop 17 where a ARISS contact with the ISS was held. Scouts talked with Japanese (JAXA) Astronaut Akihiko Hoshide KE5DNI using the WB9SA Satellite Communications Ham Radio Station on August 5, 2012. Watch the video on-line here.Photos from Mars keep coming in. An HD quality video of Curiosity's descent was assembled from full-resolution 1600×1200 frames from the MARDI descent imager. It also shows the best views yet of the heat shield impact on the surface of Mars.Add this to your wish list - a personal Unmanned Aerial Vehicle (UAV) is now available. The drone in this video one uses a 2.4 GHz WiFi connection to an iPhone or iPad.Watch a video by KB3TQO posted

on Southgate that shows a simple way to launch amateur radio antennas into the trees, really high. He demonstrates his homemade, bicycle pump powered, air cannon.The team from Mars Express put this great video together which shows what Mars looks like from above, during an elliptical orbit. They created it using 600 individual still images captured by the Visual Monitoring Camera (VMC), and it shows the view from a visiting spacecraft□s slow descent from high above the planet, then speeds up during closest approach, and then slows down again as the orbital distance increases.The next Hudson Valley Satcom net date is Thursday, August 30, at 8 PM EDT (UTC-4 UTC) on the 146.97 MHz MBARC Repeater (PL 100). An echolink connection is available on the N2EYH-L node. More information at: http://www.hvsatcom.org. (Stu, WA2BSS)NASA announced that for its 50th anniversary celebration it will be opening its gates for □virtual tours□ through a partnership with Google Maps and its Street View feature. With over 6,000 panoramic images of the space center you are only a click away from your tour.Do you want to live on Mars time? There□s an App for that now. Read the article at http://tinyurl.com/MarsTimeApp to decide which one is right for you. (UniverseToday)Photos showing the deployment of the small Russian Sfera satellite from the Space Station by Russian cosmonaut Gennady Padalka, RN3DT, Expedition 32 commander, during last week's EVA.

[ANS thanks everyone for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the stu-dent rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information. And with that, please keep in mind the August 16 - 17 temperatures measured by NASA□s Curiosity rover reported that ground temperature ranged between minus 131.8° F to +37° F; air temperature in Gale Crater ranged between minus 103° F and +28° F. That□s what being 50% farther from the sun than Earth will do for you.

Vanity Call Sign Fee to Increase September 4

Posted: 14 Aug 2012 06:49 PM PDT
http://forums.qrz.com/showthread.php?357780-Vanity-Call-Sign-Fee-to-Increase-September-4&goto=newpost

Vanity Call Sign Fee to Increase September 4

On August 3, the FCC announced via a Final Rule in the Federal Register that the cost of an Amateur Radio vanity call sign will increase 80 cents, from $14.20 to $15. The new fees take effect 30 days after publication, making September 4, 2012, the first day the new fee is in effect. Earlier this year, the FCC released a Notice of Proposed Rulemaking and Order (NPRM), seeking to raise the fee for Amateur Radio vanity call signs.

The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new 10 year term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal six years ago.

The FCC is authorized by the Communications Act of 1934, as amended to collect vanity call sign fees to recover the costs associated with that program. According to the FCC, the fees that are collected from vanity call signs are used to offset the cost of monitoring and researching new call sign requests to prevent the issuance of duplicate call signs. When asked why the fee is payable upon renewal, the FCC stated in 2011 that "[m]ore than likely, fees that are collected only on new issues and at the time of changes in call signs will not generate sufficient revenues to offset the cost of managing and monitoring this work at the Commission, the FCC stated in 2011. Therefore, we conclude that the basis upon which the Commission collects fees on Amateur Radio Vanity call signs will not change."

The vanity call sign fee has fluctuated over the 16 years of the current program -- from a low of $11.70 in 2007 to a high of $70 (as first proposed in the FCC's 1994 Report and Order). In Fiscal Year 2012, the FCC expects to grant 14,300 vanity call signs, bringing in $214,500 from the vanity call sign program, and looks to recover a total of $339,844,000 in fees from all the Services that it regulates.

Looks like one hand of NASA doesn't know what the other hand is
doing, because a press release today says that the wheels DO form
Morse code (while providing a distance measurement):

MMMonVHF Newsletter No. 1/ WEEK 35 2012

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2012-08-29
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

and use the FILTER for your personal wishes!
****

** DXCC: F ; France ; Square: JN39 ; start 2012-09-01

Hi friends
The City of Provins F6KOP ARC, is heading to North East France for
the next IARU VHF Championship 144 MHz, on September 1st and 2nd.
A joint opi¿½ration of F6KOP with the City of Sarreguemines ARC/F6KFH
is scheduled to put on the air the TM9A callsign.
They will be active from the grid square : JN39OC. The contest location
is on the road from OBERGAILBACH et RIMLING (Moselle Department) .
On the air in SSB and CW.
The gang :
Frank/F4AJQ, Yann/F1NGP, Bernard/F9IE, Bruno/F5AGB, Joï¿½l/F6JMT,
Olivier/F8UHU, Michel/F5PPG, Michel/F6HOK, Jean-Luc/F1ULQ, Walter/F5ONL,
Henri/F6CUC , Maurice/F5NQL and may be some other.
QSL via F6KOP
Stay tuned and don't forget to point your antennas to JN39OC to get and
to give us points Thank you.
See you down our log
Maurice, F5NQL, KOP Team 10.

** DXCC: ZK2 ; Niue ; Square: AH51 ; start 2012-09-07

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
LATEST NEWS from W7GJ, dated 2012-08-14:
The callsigns for the Niue JT65 EME operation next month will be:
E6M - 6m
E6RS - 2m
I have updated my website to include information on how to update your WSJT program
to include these calls as well as include the E6 prefix:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
Please watch for us on EME! GL and VY 73, Lance

SOURCE: Moon-Net

NEWS by W7GJ, dated 2012-09-03:
Hello! Well, I wanted to provide as much advance time as I could so you could mark your
calendars and/or get everything in your 6m station optimized by the end of August ;-)
As those of you know who completed JT65A mode contacts with me on 6m EME when I was in
E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows -
especially during the optimum days of the month for 6m EME.
The callsign is not in hand yet (but assured by email), and the QTH has not been finalized,
but all the plane tickets have been purchased (as usual, any contributions are VERY
welcome),
and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the
works.
As soon as the license is in hand, the information will also be available under the
callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a
takeoff shot

over water on moonrise. However, that is not necessary to work NA stations during their moonsets (I will be elevating),
so we will get the ground gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2;
Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure
time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** DXCC: GU & GJ ; Guernsey & Jesrey ; Square: IN89 ; start 2012-09-29

Hermann, DL2NUD, and Peter, DJ4TC, will be qrv some days from GU and GJ
during sept. 29th and oct. 09th, 2012
Main goal are the higher bands these time. Activity on 144 MHz will be only short!
The Team will be ready with following equipment:
144: 9 el 7KF hor./vert. abt. 400W
432: 21 el hor. 120W (400W sometimes)
1296: 62 el hor. 200W (400W sometimes)

Source: tnx to Hermann, DL2NUD, direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2012-10-01

Bodo, DF8DX, qrv from SV9 on HF and 23cm EME

Equipment will be like on my previous DXpeditions IC7000 with transverter (100W) and 59ele yagi.
call: SV9/DF8DX
Grid: KM25 (exact locator will be given later)
IOTA: EU-015
Activity on 23cm EME:
October 2, 2000-2130z (for EU)
October 3, 0400-0600z (for NA)
with backup dates:
October 3, 2030-2200z (for EU)
October 4, 0430-0600z (for NA)
Frequency: TX first on 1296.090MHz / RX on my own echo frequency (just like in CW)

I am one week on SV9 but I would prefer you work me on the suggested times because i want to spend some time with my wife on this vacation and also enjoy some HF (CW only) activity as well
as maybe activity from EU-187. Further skeds on request (if necesary). Check www.mmmonvhf.de for updates.

//
Amateur Radio Advances the Art of the Airwaves:

Posted: 28 Aug 2012 05:12 PM PDT
http://www.eham.net/articles/28889

Amateur radio network prepared for natural disasters, community service:
Like the old M*A*S*H TV show's Radar O'Reilly character who helped military personnel serving in Korea keep up with news back home, Memphian Pat Lane held a similar job during the Vietnam War. Lane, who is now chief engineer at WKNO, earned his amateur radio license in 1957, was hired at WKNO in 1964 and was drafted into the Army in 1965. He worked radio communications during the war from 1965 until 1968. "I already knew Morse code and was familiar with MARS procedure," explains Lane. "That enabled me to move up through the ranks rapidly. I had a positive experience with the Army." With skills and experience under his belt, Lane also is a perfect fit for his current position within the amateur radio network as Section Emergency Coordinator for the American Radio Relay League. ARRL is an organization that was formed in 1914 in response to a need for the organization of radio amateurs in the United States. As SEC for West Tennessee, Lane is tasked with coordinating emergency communication when all else fails. "When all else fails -- ham radio does not" is the ARRL motto.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

5B, CYPRUS, AS-004
Nick,G3RWF, will be active as 5B/G3RWF while on holiday in September.
QSL via homecall.

9G, GHANA
Emil,ZS6EGB, is working in Ghana again and plans to become active as
9G5ZS after his holiday using an Icom 706mkIIG, a HyGain vertical and
dipoles for the lowbands. QSL via homecall.

C2, NAURU, OC-031
Yoosuke "Yuki",JH1NBN, will be QRV as C21BN (and maybe also with a
special call) from Nauru (OC-031) from Sep 3-10. He will work with
100 watts using simple antennas on 40m-10m. QSL via homecall.

CT3, MADEIRA, AF-014
Helge,CT9/DG3FAW, Knut,CT9/DJ6KS, and Matthias,CT9/DJ8OG, plan to show
up from Madeira (AF-014) in SSB/RTTY/PSK on 80m-10m (maybe also 6m)
from Sep 4-11. DJ8OG will take part in the WAE SSB Contest using CR3L
as single op/high power. QSLs via homecall, CR3L via DJ6QT.
See also: http://www.cr3l.de

E5, NORTH COOK ISLANDS, OC-124
Andy,AB7FS, is QRV as E51AND from Palmerston (OC-124) for the next
three weeks. Listen for him on 40m and 20m and in the ANZA net on
14183 kHz after 0500 UTC. QSL via homecall, unfortunately only direct.

G, ENGLAND, EU-005
The "Kent Weald Radio Club" is working as GB1HA from the Headcorn
Aerodrome in Kent to support the air ambulance and other local
charities until Sep 2. They are demonstrating amateur radio on HF
and VHF to any visitors. QSL via bureau.
---
The "Ballymena Amateur Radio Club" celebrates the 150th anniversary
```

of the West Church in Ballymena by activating GB150WCB on Sep 1.
QSL via bureau.

HA, HUNGARY
The "Debrecen Radio Sports Club" celebrates the 20th Debrecen Civis
Amateur Radio Meetingn by using the special call HG20CRT until Dec 31.
The club members are working in all modes on all bands.
QSL cards will be sent after the activity via bureau.
Direct QSLs via HA0KA.

I, ITALY
The special call II3PAN will be used from Sep 1-20 to mark the
30th anniversary of the adoption of the MB339 aircraft by the National
Aerobatic Patrol (the Tricolour Arrows aerobatic team of the Italian
Air Force). QSL via IV3IUM.

Fabio Bonucci,IK0IXI, will be active as II0FIST to celebrate the
silver jubilee of the FISTS CW Club (1987-2012) from Sep 2-8.
QSL via IK0IXI. See also: http://www.fists.co.uk

KH0, NORTHERN MARIANAS, OC-086
The 19 year old students Yuzo,JQ2WTT (KH0XW), and Seiya "Sam",
JE1XUZ (KH0XH), will be QRV from the Saipan BBQ Contest Club (OC-086)
from Aug 29 until Sep 3. They will join the All Asian DX SSB Contest
on Sep 1/2 as AH0BT. QSL for AH0BT via 7L1FPU.
All other QSLs via homecalls, unfortunately only direct.

KH8/S, SWAINS ISLAND, OC-200
The team will be arriving on Swains Island (OC-200) on Sep 5 and leave
on Sep 19. They will operate as NH8S with seven stations in CW, SSB
and RTTY from 6m-160m (incl. 60m) around the clock for 14 days.
Great emphasis will be put in working European stations. Like all
major DXpeditions today this is a very expensive trip with total costs
estimated to be 200,000 US $. Each member has paid 8000 US $ plus his
costs to get to American Samoa. Donations are welcome via our website.
QSL via bureau/OQRS/LoTW or direct via AA4NN, Swains Island DXpedition,
PO Box 5005, Lake Wylie, SC 29710, USA.
Their website is: http://www.nh8s.org

LZ, BULGARIA
Nasko,LZ1YE, celebrates his 40th anniversary on air this year. He will
use the special call LZ40YE on all bands until the end of December.
QSL via homecall.

OE, AUSTRIA
The special club stations OE2XXM and OE5XXM are working in SSB mainly
on 80m/40m and on 2m/70cm from the International HAM meeting in Gosau
using the special ADL 553 every year from July 1-31 and from Sep 1-30.
See also: http://www.qrz.com/db/oe2xxm or http://www.qrz.com/db/oe5xxm
QSLs via bureau.

ON, BELGIUM
The clubstation ON4OSA, member of the Belgian Amateur Union celebrates
it's 20th birthday of the weekly news transmissions for radioamateurs.
The special event station ON20OSA is active until the end of the year.
QSL via bureau, LoTW, eQSL.

SV9, CRETE, EU-015
Uli,DJ9XB, will spend his holidays on Crete (EU-015) in September and
plans to become active as SW9XB. He will be active also in the upcoming
CQWW DX RTTY Contest (Sep 29/30). QSL via homecall, LoTW.

TR, GABON
Alain,TR8CA, is back in Gabon and usually can be found in CW on 15m
around 1600 UTC. QSL via F6CBC, unfortunately only direct.

UA, RUSSIA
The new award program "Gallery of the Great Genius of Russia" (GGGR)
was launched in Russia. following special event stations will be active
between Sep 1 and Nov 30:
R15GGGR Op: RK1AN
R14GGGR Op: RZ1AWZ
R21GGGR Op: UA2FDM
R45GGGR Op: UA4LAQ
R65GGGR Op: RU6BS
R75GGGR Op: UA6MM
R71GGGR Op: RK6AH
All QSLs via UA6MM.

V5, NAMIBIA
Hans,DF2UU, is working as V5/DF2UU in CW/SSB on 6m-160m until Sep 16.
He will sign V55V in the SSB Fieldday (Sep 1/2) and in the WAE SSB
Contest (Sep 8/9). QSL for V5/DF2UU via homecall, V55V via DJ8VC.

V6, MICRONESIA, OC-078
Yoshi,JJ8DEN, is QRV as V63PR from Falalop Island (Ulithi atoll/OC-078)
working in CW, RTTY, PSK31 and JT65A on 160m-10m until Sep 3.
QSL via homecall, unfortunately only direct.

YA, AFGHANISTAN
Ilian,LZ1CNN (ex YI9LZ), is active on the air as T6LG in SSB and CW
on all bands from September until February 2013. QSL via LZ1ZF.

ZD9, GOUGH ISLAND, AF-030
Gerard,ZS6KX, aka ZS7KX from the SANAE 4 base in Queen Maude Land in
Antarctica, is now staying on Gough Island (AF-030) starting in Sep.
He asked for the callsign ZD9KX.

DXpedition stories: The DXItalia Web page provides interesting DXpedition
stories with pictures at: http://www.dxitalia.it

PIRATES: ZD9KN who was announced in the last DXNL, is a Pirate! There is no
one named Paul on the island and the callsign has not been issued.
See also: http://forums.qrz.com/showthread.php?358481-ZD9KN-is-a-
Pirate!-By-W3UR-Bernie-McClenny-The-Daily-DX

2E0HKM, 2O0HKM, HV0E, HV1PBH, IZ0VHS and MJ0HKM are also Pirates.

SILENT KEYS: QST Managing Editor Joel P. Kleinman, N1BKE, of Meriden, CT, died from injuries received during a house fire. He was 64. Kleinman was responsible for the coordination, organization, control and completion of all aspects of QST's editorial content since 2001. Kleinman's wife Jayne survived the fire, but is currently in the intensive care unit of a local hospital. Kleinman came to ARRL in 1976. "Joel was obsessed with making QST the best Amateur Radio magazine it could be, but he pursued that obsession with uncommon dignity and kindness," said QST Editor Steve Ford, WB8IMY.
"With the passing of Joel Kleinman, N1BKE, we have lost not only a respected professional colleague, but also a friend," said ARRL President Kay Craigie, N3KN. "The shocking circumstances of his death sharpen the sadness we feel."
"Joel was a gifted writer and editor," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Amateur Radio is the richer today because he chose to devote his talents to the work of the ARRL."
The DARC sent condolences to the ARRL. Everybody is remembered of the former chairman of the DARC Committee for DX and HF Contesting Dr. Lothar Wilke,DL3TD, recently elected to the CQ Contest Hall of Fame who died under similar conditions last year.
The ARRL is collecting condolence messages to forward to Joel's family. If you would like send a message, please e-mail it to news@arrl.org
Other radio friends who passed away recently are:
Victor D. Poor, W5SMM, Araldo Ramundo,I8RAR, Enrico Lombardo,IT9TDJ, Thomas L. Hise,NC0O, Marilyn S. Carpenter,N8OAM, Finlay Bruce,ZL4HI, Helio M. de Carvalho,PY2BBO, and George Varvitsiotes,K6SV.
Our condolences and sympathy are with their families and friends. We do not want to be sad that we lost him, but grateful that we could get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at: http://www.sotawatch.org
---
Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 1 Russian RADIO RTTY WW Contest
Sep 1 CW open Competition (part 1+2)
Sep 1/2 JARL All Asian DX Contest
Sep 1/2 IARU Region 1 Fieldday
Sep 1/2 IARU Region 1 145 MHz September Contest
Sep 2 CW open Competition (part 3)
Sep 2 DARC 10m Digital Contest Corona
Sep 3 QCWA QSO Party

A word to the All Asia DX Contest: There is no law against giving a brief RST to a calling FD station. Usually the short report is given faster

than explanating the participation in the AA-DX Contest and you are working only Asian stations. A short report means Ham Spirit and the Fieldday station is glad about a new multi.

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
ILLW review: The "International Lighthouse Lightship Weekend 2012" took place on Aug 18/19. You can find the first impressions and photos on: http://illw.net/index.php/reports-2012

AF-016, FR, Reunion Island: Michael,DF8AN, is visiting Reunion Island (DIFO FR-001, WFF FFF-011, WLOTA 1812) from Sep 2-10 and plans to show up as FR/DF8AN mainly in CW. QSL via DF8AN.

AF-090, 5R, Madagascar's Coastal Islands East: Moise,F4EZG, will be QRV in SSB on 40/20/15/10m signing 5R8VE from Nosy Alanana Island (WLOTA 0888) from Sep 1-3. QSL via F4EZG.

AS-013, 8Q, Maldive Islands: Juergen,OE4JHW, plans a mini DXpedition to the Lhaviyani atoll from Sep 2-14. Listen for 8Q7OE mainly in SSB and BPSK on 40m-10m (BPSK during the night hours). QSL via OE4JHW.

AS-149, R0F, Sakhalin's Coastal Islands: Gennady,R3BY, Max,RU5D, and Oleg,R7LP, are working in SSB and CW on 40-10m signing RI0FM from Moneron Island (RR-16-01, RDA SL-16) between Aug 28 and Sep 2.
QSL via R3BY (bureau/direct).

R10RLHA is working from the lighthouse (RR16-01, ASR-047, LH-0006) on Moneron Island on Aug 30/31. QSL via RA1QY (bureau/direct).

EU-025, IT9, Sicily: Members of the Arcibessi DX & Contest Group will be QRV as II9P in the All Asian DX SSB Contest. QSL via IT9CHU, LoTW.
See also: http://ii9p.com

EU-032, F, Poitou-Charentes Region group: Ben,ON5GQ, will spend his holidays on Ile d'Oleron (DIFM AT-025, WLOTA 1369, DPF 19, DDFM17) and will be active as F/ON5GQ on HF from Sep 1-14. QSL via ON5GQ.
See also: http://www.on5gq.be

EU-146, PA, Zuid Holland/Zeeland Province group: PA6FUN will take part in the upcoming IARU Region 1 145 MHz September Contest from Schouwen Duiveland between Aug 31 and Sep 2. QSL via PE1GUR (bureau/direct).

EU-165, IM0, Sardinia's Coastal Islands: Riccardo,IM0/IZ5JMX, will be active from San Pietro Island working only in SSB on 40m-10m from Sep 2-14.
QSL via homecall.

EU-171, OZ Jylland North Group: Members of the Dutch Contest Group (PI4DX) will be QRV in holiday style signing OV2T from Jutland in SSB and CW (maybe also some RTTY) between Aug 29 and Sep 4.
They will join the team of OZ5GX/p during the IARU Region 1 Fieldday.
QSL for OV2T via bureau or direct to PA0ABM. QSL for OZ5GX/p via OZ5GX.

NA-143, W5, Texas State East (Matagorda to Jefferson County) group:
Joe,K5KUA/5, will once again be active from Galveston Island (NA-143,
USi TX001S) mainly in SSB on 80m-10m between Aug 31 and Sep 3.
If time permits he will make also some CW QSOs. QSL via K5KUA.

NON IOTA: The TC Special Wireless Activity Team and the Giresun Radio
Amateurs and Nature Sports Club will be active as TC6ILH from
Inebolu lighthouse (WEBLOTA 6, Loc KN61vx) between Aug 30 and Sep 2.
QSL via TA1HZ (bureau/direct). See http://www.tcswat.org/awards/WEBLOTA

TC2AL, Amasra Lighthouse: Another activity by the TC Special Wireless
Activity Team and the Giresun Radio Amateurs and Nature Sports Club
is planned as TC2AL from Amasra lighthouse (WEBLOTA 7, Loc KN61es)
on Sep 1/2. QSL via TA1HZ (bureau/direct).
See also: http://www.tcswat.org/awards/WEBLOTA

The Radio Club du Bassin d'Arcachon (F5KAY) will be active as TM5O from
Ile aux Oiseaux (DIFM AT-028) on Sep 1/2. Two stations will be QRV on
80m/40m/20m in SSB, CW and digital modes. QSL via F8IHE.

FFF: The radio club F8KGH will be active from the national park FFF-002 on
HF/VHF between Aug 31 and Sep 2. They will take part also in the
IARU Region 1 145 MHz Contest. QSL via F8KGH (bureau/direct).

YOFF: YP7P/YR7WFF will be QRV from the area YOFF-373 in SSB, CW and digital
modes on HF and VHF between Aug 31 and Sep 2. Their QTH is a mountain
with a height of 2.228m (Loc KN15ti). QSL via YO7MGG (bureau/direct).

Lighthouse activities

RAC Bulletin 2012-050-1E - Re-in statement of Volunteer Examiner Qualifications
2012-08-29

Industry Canada has advised the Radio Amateurs of Canada that the Volunteer Examiner Qualifications of VA3MPM have been re-instated. Mr. Myers was the subject of a previous bulletin announcing his qualifications had been revoked.

The information regarding the revocation of the qualifications was provided to RAC by Alan McLean, a Spectrum Management Officer with the Amateur Radio Service Centre of Industry Canada.

Mr. McLean now indicates that he spoke in error yesterday regarding Mr. Myers. Mr. McLean now indicates that the qualifications were suspended but then were re-instated a couple of weeks ago. It appears that Mr. McLean relied on a database of examiners which incorrectly showed the qualifications as suspended. Mr. McLean further indicates that a task has been assigned inside of Industry Canada to update the database to show the qualifications are no longer suspended.

Understandably, Mr. McLean does not wish to further discuss the matter publicly at this time.

The Radio Amateurs of Canada shares the concerns of Mr. Myers that incorrect information regarding his work as a volunteer examiner was provided by Industry Canada to not only the Radio Amateurs of Canada but also to several members of the public.

REMINDER: Central Illinois QRP Get Together

Posted: 29 Aug 2012 07:59 AM PDT
http://forums.qrz.com/showthread.php?359526-REMINDER-Central-Illinois-QRP-Get-Together&goto=newpost

The Cenois Amateur Radio Club in Decatur, Illinois is holding a Tailgate
Party on September 8, 2012 in Mt. Zion, Illinois. Parking lot of the Four
Star Family Restaurant. 1100 N. State Highway 121 Mt. Zion, IL 62549
Noon to 4 p.m.

Free Admission and there is no charge for selling but you have to bring
your own tailgate. Bring any QRP or Ham Stuff that you want to sell.

QRP'ers - 1st Annual Central IL Branch of the 4 States QRP Club Meeting.
Any and all interested QRP'ers and kitbuilders should plant to attend.
We're planning on having at least one operating QRP station and there will
be kits for sale from the 4SQRP Club.

All of the Four States QRP Club kits will be available for sale.

WIANEWS WEEK COMMENCING SEPTEMBER 2 2012.

VIP CENTENARY:

The West Australian VHF Group Inc. is running in top gear with another public
Amateur Radio display station similar to the VK100WIA Super Springtime.

September 2012 will see the Centenary of the establishment of our nation's
Coastal Radio station network.

VIP Perth on Wireless Hill, Ardross WA is believed to be the only remaining
survivor in public hands. The WA VHF Group was instrumental in the
preservation of the buildings to house a Telecommunications Museum and now
has almost certainly secured a permanent Hamshack as part of the re-vamping.

This was the site of the 2010 WIA Centenary celebration airing the VK100WIA
call for 12 consecutive days in a co-operative venture by 9 local radio
groups.

In co-ordination with the Melville City Council, the WA VHF Group has made
application to again air the commemorative callsign VI 6 VIP
(previous occasions being 1992 and 2004) for this station which will be open
to the public 01:00Z to 10:00Z daily Sat 29 Sept to 13 Oct inclusive.

The station should be active well beyond these hours.

(73 Bob, VK6KW, President)

RAOTC SEPTEMBER REMINDER.

Hallo everyone, this is Clive VK6CSW with a reminder that tomorrow Monday September 3rd the Radio Amateurs Old Timers Club of Australia's monthly News and Information bulletin will be broadcast on a number of HF and VHF frequencies.

The principal HF transmissions can be heard on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for Eastern states listeners, and again at 0200 beamed West for Western Australia.

During tomorrow numerous local relays will also take place on various VHF and lower HF frequencies. To find a frequency and time for your area, please visit the RAOTC website www.raotc.org.au

September 3 is the 73rd anniversary of the declaration of WW2 and in keeping with this occasion we have in the Monday Broadcast an item on Oboe, the most precise radio bombing aid of WW2.

Everyone, RAOTC members and non-members alike, is invited to listen to this interesting half hour of Old Timer news, stories and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday September 3rd.

73 from Clive VK6CSW.

PLANE HEARING

Ever wanted an ear inside the cockpit as a pilot prepares to land or take off from Melbourne Airport?

Well, according to the Sunbury Leaer, you could soon have the chance if a plan by Hume councillor Jack Ogilvie takes flight.

Cr Ogilvie wants a transmitter tower installed at the airport viewing area on the corner of Sunbury and Oaklands roads, allowing plane watchers to listen to conversations between pilots and air traffic controllers.

"It would be about 3m high, with a transmitter and a solar panel," he said.

"It would enable people to tune in to an FM station in their own cars and you would be able to hear what's happening."

Rhema Central Coast upgrades transmission facilities

Rhema FM on the NSW central coast has upgraded its broadcast antenna.

General Manager Rick Broome told radioinfo.com.au the coverage is much better and that their old antenna is looking for a new home.

"The increase in signal strength from about 1100w to licenced 2kw has made a tremendous improvement to coverage.

The new 4-bay antenna cost the station about $5,500, so they are looking to re-coup a little of the cost.

"Make us an offer!" says Broome.

Contact Rick Broome on mail@rhemacentralcoast.com.au to follow up

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

What a great weekend the Remembrance Day contest was.

We had over 1100 unique calls that made it on air. This meant that some stations were actually working 1 to 2 contacts per minute over a one hour period. Propagation was fantastic as well; with a very low noise figure it made it easy for eastern QRP stations to contact VK6 on a regular basis.

Some quotes extracted from logs received are:

"The most enjoyable RD since the 1980's"

"The RD contest bought the activity level on several bands up to where it was many years ago"

"I really like the new RST/exchange system - less competitive pressure."

"Thanks to the organisers for making this contest more accessible"

And

"A great format for a friendly contest"

I think the last comment sums it up perfectly.

Remember to send in your log. At the moment only 17 per cent have done so. That's 17 per cent of actual participants.

The state scores are very close and it only needs a few logs to tilt the current balance of power. So please, send me your logs.

Only 7 days left for log submission, so do it now!

Your log could decide if your state wins or loses.

(Alan, VK4SN)

Ballarat Amateur Radio Hamvention - 2012.

The Ballarat Amateur Radio Group will hold its annual Hamvention on Sunday the 21st of October 2012 in the usual venue provided by the Ballarat Greyhound Racing Club in Rubicon St, Redan.

Doors open for traders at 8am and general access is at 10am.

Those that have attended in the past will know that this is a good day out in a really roomy, indoors venue with historically around 60 to 70 tables of new and preloved amateur radio gear, test gear and general bits and pieces on sale.

They work very hard to make the event a place where both first timers and regulars are welcomed, be they traders, browsers or buyers and each and everyone is given every assistance to ensure that they have a great day out.

Entry for everyone, including traders is $6 per head and tables are available for $10 per 1.6 metre section.

Ballarat would really encourage people to use the opportunity to turn over some of that gear that has been sitting in the shack for a little too long and those bit and pieces that you have been struggling to find a use for, give another amateur a chance to put it to use and make yourself a few dollars in the process.

If you don't think you could support a full table then the Ballarat Club has a table where they are more than happy to sell the goods for you for a small commission.

Historically they have had a really strong representation of commercial traders and dealers and are pleased to continue this tradition into 2012.

No amateur gathering is ever complete without a bit a food, a place for a coffee and a good catch up with friends, there is a well catered food area designated and it is provided with a goodly amount of seating with generous

sized tables.

If you love building equipment then how about a bit of show and tell, there is a special section for home brew projects with sections for novices, skilled and very skilled with generous prizes for each category, amateurs just love seeing other amateurs projects and admiring their ingenuity.

If you attend every year they look forward to seeing you again, if you haven't been to Ballarat for a while then please consider paying a visit, it's a truly beautiful town with lots to do for families and they would really be delighted to see you at the Hamvention.

If you need more information then please visit the BARG web site www.barg.org.au

or you can contact via Roger VK3ADE on 03 5330 3081
or Ian VK3AXH on 03 5341 3012.

For bookings contact hamvention2012@barg.org.au

VK4 - QNEWS - CONTINUES

Interested in amateur microwaves?

In two weeks' time, the Brisbane VHF Group will be running another microwave test and tune-up day. The aim of this event is to provide an opportunity for amateurs interested in microwave bands to test and measure the performance of gear that they have built or bought for the bands we have available above 1 GHz.

Another aim is for amateurs who have a budding interest in the microwave bands to engage with others of similar interest, sharing plans and dreams or just to enjoying being together.

Last year, this event was a real blast and many microwave projects and items were tested and evaluated. The day also served as an all-in-one-place 'show and tell' session for working microwave gear.

We hope to do the same or better this year with test equipment available for frequencies right up to 24 GHz. There'll be power measurement, spectrum analysers and swept frequency testing to 24 GHz, a signal generator and frequency counting to 18 GHz, and noise figure measurement to 1.8 GHz.

When and where's this all happening? It'll be on Sunday the 16th of September at the club rooms of the Redcliffe and Districts Radio Club in Klinger Road, Kippa-Ring. The advertised start time is 9:00 a.m. and it will be easy to just come and go at different times of the morning, through to around 2:00 p.m.

Interest in amateur microwaves in South-East Queensland is starting to pick up. So, if you have a plan to one day get active there, or you've even got some completed or not yet completed gear, come along on the sixteenth.

Going on from that, like last year, the Brisbane VHF Group will also be holding another out-in-the-field microwave activity day on the last Sunday

of October. Keep that one in mind as well as the Spring VHF-UHF Field contest at the end of November!

But the focus right now is the microwave test and tune-up day on the 16th of September.

See you there!

www.ntarc.net

September NTARC Meeting

David Long, Tasmanian ACMA field representative, will be guest speaker at Wednesday 12 September's meeting. Please mark your diary and go along to hear David bring you up to date on ACMA's modern role and recent activity in VK7.

As previously suggested, members of the clubs in the North West might also like to attend this briefing. At least one CCARC member intends to get along, so why not join him? You would be more than welcome.

DISCUSSION POINT

The state of Amateur Radio in Australia today

Over the past months in VK6 we've been welcoming new Amateurs to the hobby by extracting the latest callsigns from the ACMA RADCOM database. This started me wondering what the overall numbers of Amateurs in Australia looks like today. Not having seen such statistics anywhere, I have compiled to the best of my ability the numbers based on information from the ACMA RADCOM database, Geoscience Australia[#1] and the Australian Bureau of Statistics[#2].

The big numbers first

As at August 13[#3], 2012, there were a total of 15,771 Amateur licenses across 14,653 people in the RADCOM database. Comprising 476 licenses for

beacons and repeaters and 15,295 licenses for Operators.

Just over 71% of licenses are Advanced Licenses. 15% are Foundation and nearly 14% are Standard Licenses. Ignoring repeaters and beacons, the most licenses are in New South Wales (VK2), where 4,239 Amateur Licenses are allocated, representing just under 28% of total Licenses issued. Just over 27% of Licenses are held by Victorians (VK3), Queensland (VK4) follows with over 18%, South Australia (VK5) with just under 10%, Western Australia (VK6) with under 9%, Tasmania (VK7) with under 4%, the Australian Capital Territory[#4] (VK1) with 2.5%, the Northern Territory (VK8) with 1%, followed by the external territories (VK9) with 0.2% and the Australian Antarctic Territory (VK0) with 0.05%.

The total population in Australia is 22,485,300. Amateur Radio license holders represent 0.07% of the population.

Taking into account the naming convention variation across the ACMA database[#5], the Wireless Institute of Australia is the largest Amateur License holder in VK, it holds 167 licenses[#6] in various names. Scouting around Australia[#7] holds 53 licenses across 21 different groups. 332 licenses[#8] are held by 135 groups, clubs and associations.

One amateur holds 9 licenses, three hold 7 and eleven amateurs hold 6 licenses each.

The most popular suffixes are AA, XX, DX and WI. The most common Foundation call is FAAF.

The largest beacon operator is the West Australian VHF Group who operate 8 beacon licenses across VK6. The largest repeater operator is the WIA who operate 115 licenses across VK. The next largest is the West Australian Repeater Group who operate 15 licenses in VK6, followed by Scouts who operate 8 licenses.

And that is a quick run-down on the state of Amateur Radio in Australia today. I'm Onno VK6FLAB

[#1] http://www.ga.gov.au/education/geoscience-basics/dimensions/area-of-australia-states-and-territories.html
[#2] http://www.abs.gov.au/ausstats/abs@.nsf/mf/3101.0/
[#3] There was a problem downloading the data for VK2, which was done a day later.
[#4] I've combined the population and area of the ACT and Jervoise Bay - I do not know if VK1 follows the same convention.
[#5] The ACMA RADCOM database holds a License Number, Category, Callsign, Ship Name, Client Number and Licensee. To produce these numbers Client Numbers and Licensees were combined where they were the same. For example, the Wireless Institute of Australia has three different Client Numbers with an identical Licensee. The WIA appears in several variations in spelling and state affiliation. These entities have been combined manually.
[#6] This combines licenses held by WIA, WIA NSW, WIA VIC, WICEN in several permutations and states.

[#7] This includes all licenses issued to an entity with the word "Scout" in it.
[#8] This includes all licenses issued to an entity with the words "Club", "Group" or "Assoc".

(Onno Benschop)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

British 'Phantom' star may tour to ISS

Singer Sarah Brightman may be the next paying passenger to ride a Russian rocket to the International Space Station, the Interfax news agency reported, citing an unidentified official in the space industry in Russia.

If it happens, Brightman, 52, would make the journey in 2015 and would be the first paying customer since Cirque du Soleil founder Guy Laliberte who donned a red clown's nose during his 2009 trip, the official was cited as saying.

But seats on the three-person Soyuz capsules have become scarce since U.S. space agency NASA retired its space shuttles last year, leaving Russian rockets as the only craft capable of carrying crews to the station for now.

Brightman - who rose to fame starring in the original London and New York casts of "The Phantom of the Opera" - visited Russia about a month ago and received the approval of a medical commission to begin training at the Cosmonaut Training Centre outside Moscow, the source added.

Gough Island pirate

Its seems the DX community has been duped on the Paul, ZD 9 KN, operation from Gough Island (AF-030).

ZD 9 KN is a Pirate!

Several sources report that Johan, ZS 1 A, has confirmed that the callsign ZD 9 KN has never been issued. So, OPDX say "do not waste time working this station if you hear him."

The good news is that Gerard ZS 6 KX/ZS 7 KX will be going to Gough Island sometime this month for one year. He is hoping to be issued the callsign ZD 9 KX and is awaiting for the approval/license. QSL route TBA.

Look for more details to be forthcoming.

(OPDX)

BBC TO TEST TURNING OFF MEDIUM WAVE TRANSMISSIONS

The British Broadcasting Corporation is running a five week trial of switching off existing Medium Wave services for four BBC local radio stations.

The experiment runs to the 24th of September and affects BBC Radio Kent, BBC Radio Lincolnshire, BBC Radio Merseyside and BBC Radio Nottingham.

The BBC say one way to make savings and preserve value to license fee payers is to switch off Medium Wave services EXCEPT where listeners depend upon Medium Wave as an alternative to FM or Digital Audio Broadcasting.

Medium Wave services in the UK mainly duplicate what is already available on FM and DAB.

Medium Wave is a European term that describes what we call the AM broadcast band here in VK.

The BBC notes that the aim of the trial is to get a better understanding of the impact of the loss of Medium Wave would have on its core listeners and also enable the broadcaster to ensure adequate coverage is available on other platforms in these regions.

==========

NEWS FROM ARNEWSLINE USA

UNESCO RECOGNIZES IRESC WITH SPECIAL CONSULTATIVE STATUS

A major coup for a relatively new ham radio emergency communications radio group. This as the United Nations Economic and Social Council known by the acronym UNESCO adopts the recommendation of the Committee on Non-Governmental Organizations to grant Special Consultative Status to the International Radio Emergency Support Coalition.

A group better known by its initials of IRESC.

For those who may have never heard of it, the International Radio Emergency Support Coalition bills itself as a global coalition of volunteer communicators, with dedicated members spread around the world providing assistance to those in need at all times of day or night. The main objectives of IRESC are to foster efficient collaboration between radio amateurs, extending friendships across the world and providing international emergency communication in times of need when all else fail.

Currently, IRESC has members in at least 40 countries. Most are also affiliated with national organizations such as the International Red Cross, the Salvation Army, the United Kingdom's RAYNET, the Israel's Magen David Adom, local amateur radio clubs, and many other groups the world over.

The decision to grant the International Radio Emergency Support Coalition this status was made at the recently concluded UNESCO session held in

July. More about this important milestone for
the IRESC can be found on-line at
www.irescintl.com

EARLY WARNING QUAKE DETECTION DEMONSTRATED AT CAL TECH

Earthquake prediction may be on the verge of
becoming a reality. This, following media
reports that a pair of temblors centred near
Yorba Linda, California were detected by a new
earthquake warning system that's being developed
at the California Institute of Technology.

A 4.5-magnitude quake struck one mile northeast
from Yorba Linda at 11:23 p.m. Tuesday, August
7th. About ten hours later another a 4.4
magnitude shaker struck two miles from the same location.

News reports quote Douglas Given from the U.S.
Geological Survey as saying that in the case of
the first event Cal Tech received about nine to
ten seconds warning before the strongest shaking
was felt at the facility. In regard to the
second quake the warning time was in the area of
four seconds. Cal Tech is located in Pasadena
California which is about 60 air miles from the two quake's epicentre.

Seismologists say that once the technology
advances, they should be able to quickly
determine a quake's magnitude and send that
information out to the public before the
strongest shaking waves reaches a given
location. In its current incarnation, the
early warning system sounds an audible alert,
shows a countdown timer and estimates the intensity of an earthquake.

Experiments in quake detection have been going on
for well over five decades but experts say that
this new prototype system is the first to ever
pick up quakes before the ground started shaking at its location.

NCDXF RECEIVES $4000 FUNDING BOOST

The Northern California DX Foundation is the recipient of a $4000 donation
from the Northern California DX Club. This is said to be the largest
donation ever received by the group from a club.

Of late more and more DX oriented clubs are making donations to the
Northern California DX Foundation. The organization thoroughly analyzes
the financial needs of planned DXpeditions and helps provide critical funding
to operations high on the DXers Most Wanted List. It's been said that without
support many DXpeditions would not be possible.

==========

WEIRD AND WONDERFUL

Ant-enna:

Radio tags aid hairy wood ant research

The BBC report that scientists investigating the behaviour of the UK's largest ant are to tag around 1,000 of the insects at a National Trust site in Derbyshire in the first study of its kind.

In the report Richard Black says:

Tiny radio tags will be glued to the backs of northern hairy wood ants, allowing researchers to study the ants' interaction with others within their own colony and between nests.

It is hoped the findings will help the National Trust look after the hairy wood ants, which are a protected species in the UK.

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Has 2 O 12 L broken a world record?

The RSGB reports that the team at 2 O 12 L, the amateur radio special event station for the London Olympic and Paralympic Games, believe that they have now broken the world record for the number of contacts by a Special Event Station.

It is believed the record was made by DQ 2006 X during the 2006 World Cup, their total was 47,790 contacts.

At 2142UTC on 21 August, 2 O 12 L made contact number 47,791.

The team would like to thank the thousands who have joined the pile-ups to contact 2 O 12 L and now they look forward to hitting their overall target of 60,000 QSOs.

2 O 12 L goes QRT on 9 September after the Paralympic Games' closing ceremony so there is still some time to work the station or get more band-slots.

http://www.2o12l.com/

(RSGB)

9/11 Special Event Stations

Members of the Symbol Technologies Amateur Radio Club (STARC), will be operational as N 1 Y, September 8th and 9th commemorating the September 11th, 2001, terrorist attacks.

They will be on 40/20/15 meters using CW and SSB.

N 3 U/F l t 93 (N3U/United Flight 93) to be activated once again between September 8-13th, to remind "Amateur Radio Operators World-Wide" of the tragic events that happened near "Shanksville (Pa), New York City and Washington DC, on September 11, 2001."

P 49 T (P 49 Towers) Aruba September 14-21st. QSL via W3BTX, by the W3 Bureau or direct. Don't QSL via the P4 Bureau or eQSL.

A pair of twinned Special Event Stations, GB 175 PO and TM 175 PO, are running in Dover and Calais to celebrate 175 years of P&O. Operation will be running till around September 10 approx. Both stations will have the opportunity to work from ferries at various times during the operation.

GB 0 TLR Railways on the Air

Southgate Amateur Radio Club will be operating a Special Event station for the Railways on the Air event on 22nd and 23rd of September.

This is being run in conjunction with the North London Model Engineering Society at the Tyttenhanger Light Railway site near London Colney, Hertfordshire using call sign GB0TLR, the same callsign as used last year and operating on 20, 40 and 80 metres.

Two Croatian amateurs are with the NATO-led troops in Afghanistan. T 6 TJ and T 6 VT until the end of September. QSLs for both operators go via 9 A 6 AA.

Stefan is in Afghanistan until the end of this month (September.) He is active as T 6 SS and so far has been worked mainly on 20m.

PB 100 PREFIX, Netherlands Special Event

To commemorate the 100th anniversary of the ITU Prefixes, look for special event station PB 100 PREFIX to be active between October 4-31st. QSL via PB 0 P.

After the tragic loss of the Titanic (Callsign MGY, the, "M", is from the Marconi company) in April 1912, there was an acknowledgement that there should be international standards for radio communications. Therefore, the leading colonial countries planned several meetings in the aftermath of the

loss of the Titanic.

INTRUDER WATCH - ENFORCEMENT ZONE

Region III IARUMS Coordinator Peter Young VK3MV

VK IARUMS reflector email to subscribe intruders@wia.org.au

INTRUDER NETS
Friday 0730 UTC 7.065.5 with VK4CEU David.

Amateur exclusive frequencies where any non-amateur signal is definitely an intruder.

Amateur HF Spectrum world wide
7.050 to 7.100
14.000 to 14.250
14.250 to 14.350 No broadcasters
21.000 to 21.450
24.890 to 24.990
28.000 to 29.700

Recently the Canadian Paragliding National Championships were held and the "Radio Amateurs of Canada" became extremely concerned about the organizers assertion that all participants must use a VHF radio tuned to 146.415 Mhz.

This frequency is inside the two meter amateur allocation.

Industry Canada has advised that the group that that use of Amateur Radio Frequencies by persons who are not in possession of a valid Amateur Radio Operator's Certificate is not permitted.

The Paragliding group assured Industry Canada that all participants who used the channel were indeed holders of a certificate.

Additionally, Industry Canada has advised the group of a VHF frequency inside the Aeronautical Radio Frequency Band that has been allocated for their use on a Canada Wide basis.

Rally Victoria is again being held in the forest area north of Warragul
Friday 16th and Saturday 17th November.

Rally Victoria is an Australian Rally Championship and Victorian Rally
Championship event.

On Friday, there will be 2 bush stages and on the Saturday, 5 stages.
Each stage will be run twice.

As previously, Rally HQ will be at Lardner Park. Event commander is
Chris VK3CJK. Communications will be required for logistics, safety, and
scoring, with scoring and car tracking via 2m packet and other functions
via 2m voice.

If you can assist with the event, could you please phone 51 955 247
in the evenings.

Hurricane Watch Net concludes 47 hour operation for Isaac

Posted: 29 Aug 2012 01:58 PM PDT
http://forums.qrz.com/showthread.php?359575-Hurricane-Watch-Net-concludes-47-hour-operation-for-Isaac&goto=newpost

The National Hurricane Center calls Tropical Storm/Hurricane Isaac the ☐Longest tropical storm in history.☐ After 47 hours of operation, the Hurricane Watch Net is closing down its operation. We received numerous reports that were reflected in forecasts and storm reports by the National Hurricane Center, with winds and flooding the predominant topic. At one point KF6UOZ reported mobile from within the eye of the storm itself as it moved through Houma, LA. We were in contact with several emergency operation centers and other safety service locations. The majority of our reports were from Ham Operators who were weathering the storm, yet who took the time to keep us informed. In the Ham Radio spirit of readiness, many of the stations we contacted were on stand-by generator power, some with temporary or storm-related antennas and most with quality weather measuring instruments. Many more stations stood by silently, waiting to relay if needed, and listening for the reports.

The Hurricane Watch Net☐s 47 hour run included a 31-hour continuous segment mostly on our home frequency of 14.325 but also on 40 meters as band conditions warranted. We are extremely grateful for those operators who provided reports and for those who showed us great courtesy by moving off frequency, or just allowed a clear slot for us to use. Thanks also to the nets who regularly used the frequencies for accommodating us.

Tropical Storm Isaac is by no means over. Extreme rains, flooding and even high winds are forecast to continue for days. However, the communication needs have now become much more local in nature. We wish those in the storm well; our thoughts and prayers are with you all.

==> + PUBLIC SERVICE: HAMS HEED THE CALL TO HELP AS ISAAC MAKES
LANDFALL, DOWNGRADED TO TROPICAL STORM

Seven years to the day that Hurricane Katrina smashed into New
Orleans, Hurricane Isaac came calling. But instead of making landfall
right at New Orleans like Katrina (a Category 3 storm) did on August
28, 2005, Isaac veered slightly to the west of the city. Through it
all, hams at WX4NHC -- the Amateur Radio station at the National
Hurricane Center (NHC) in Miami, Florida -- and those supporting the
Hurricane Watch Net and the VoIP Hurricane Net, along with various nets
within the ARRL's Delta Division, relayed reports to their served
agencies on Isaac's progress and the damage the storm created in its
wake.

"Even though Isaac has made landfall and is currently tracking slowly
up Central Louisiana to Arkansas, hams in the Delta Division are not
```

done," explained ARRL Delta Division Director David Norris, K5UZ. "We had quite a few nets running as Isaac came ashore, and some are still going on, relaying damage reports and assisting with health-and-welfare traffic. As the American Red Cross and other served agencies venture out in the field within the next few days to assess the damage created by Isaac, hams in the Delta Division are ready to assist these teams with whatever communications support is necessary. Just because Isaac itself is over, we know that storms like this can bring tornadoes, power outages and other weather events in their wake, and we are prepared to continue to provide any support that is needed." Read more here <http://www.arrl.org/news/hams-heed-the-call-to-help-as-isaac-makes-landfall-downgraded-to-tropical-storm>.

==> + ON THE AIR: 2012 ARRL FIELD DAY LOGS POSTED

More than 2600 submissions have been received for the 2012 running of ARRL Field Day <http://www.arrl.org/fieldday>. According to ARRL Field Day Manager Dan Henderson, N1ND, this is another great showing for the number of entries received for what is one of Amateur Radio's most popular on-the-air operating events. The combined list of Logs Received for Field Day has been posted online <http://www.arrl.org/logs-received>. The list includes all logs submitted via the http://www.b4h.net/ website, as well as those submitted via e-mail and US Mail.

Because Field Day is not a "Cabrillo-format" event, there is no automated robot for processing entries. When you go to the website to see if your submission was received, look near the bottom of the page under "Other Reports." Click on the link to open the PDF for the 2012 listings. If you find your listing is missing, please contact Henderson via e-mail <n1nd@arrl.org> or by phone at 860-594-0200. If you find a typographical error in your listing -- or if your log is marked as a "Checklog" -- please contact Kathy Allison, KA1RWY, via e-mail <ka1rwy@arrl.org>. Logs marked as "Checklog" indicate that required information is missing that is still needed to properly process your entry. All problems must be resolved by Friday, August 31.

Henderson explained that the current list only shows general categories; the various sub-categories are added when the data is merged into the master database. Claimed scores or bonuses are also not included, as these are not publicized until the results are officially released. The results from the 2012 ARRL Field Day will be posted online on or around November 1, as well as in the December issue of QST. The 2013 ARRL Field Day is scheduled for June 22-23.

==> + ON THE AIR: GET IN ON THE VHF FUN IN THE 2012 ARRL SEPTEMBER VHF QSO PARTY

September is here -- and according to ARRL Contest Branch Manager Sean Kutzko, KX9X, the VHF+ bands have been getting a workout: "If you've never experienced the fun of VHF+ operating, the 2012 ARRL

September VHF QSO Party the weekend of September 8-10 is a great place to start. With many HF radios now offering at least 6 meter SSB/CW capabilities -- and some offering 2 meters and 70 cm as well -- any amateur with a Technician class license or higher can experience long-haul communication on the VHF bands."

Kutzko explained that September -- as opposed to June with its sporadic-E openings -- is known for good tropospheric propagation. "In the past week, there have been some good tropo openings in the mornings on 2 meters along the Eastern seaboard and in the Midwest. There's even been a touch of sporadic-E propagation on 6 meters this week, primarily in the western half of the US. Couple the recent openings with talk among the VHF Hopeful of some F2 propagation on 6 meters (due to the upswing of Solar Cycle 24), and the potential for enhanced propagation during the contest looks favorable." Read more here <http://www.arrl.org/news/get-in-on-the-vhf-fun-in-the-2012-arrl-september-vhf-qso-party>.

==> + IARU SUPPORTS PROPOSAL FOR .RADIO DOMAIN NAME

The International Amateur Radio Union (IARU) has expressed public support for a .radio top-level domain name. Under the proposal as put forth by the European Broadcasting Union (EBU), registration will be available via the EBU to all eligible radio representative organizations and broadcasters, Internet radios, radio amateurs, radio professionals and their respective representative organizations, as well as companies providing radio-specific products and services in order to create a worldwide radio community. The proposal must be approved by the Internet Corporation for Assigned Names and Numbers (ICANN <http://www.icann.org/>); this organization is responsible for the coordination of the global Internet's systems of unique identifiers and, in particular, ensuring its stable and secure operation. Read more here <http://www.arrl.org/news/iaru-supports-proposal-for-b-radio-b-domain-name>.

==> + YOUTH AND AMATEUR RADIO: NORTH CAROLINA TEEN NAMED RECIPIENT OF ARRL'S 2011 HIRAM PERCY MAXIM AWARD

Derek Brown, W4DTB, of Chapel Hill, North Carolina, was named the recipient of the 2011 Hiram Percy Maxim Award. Derek, who is 14, has been licensed since 2010 and holds an Amateur Extra class license.

Derek first became interested in Amateur Radio after reading an article in MAKE Magazine. "After I read the ARRL Ham Radio License Manual, I went to the local club, the Orange County Radio Amateurs (NCOCRA <http://ncocra.org/>) to take my Technician test," he told the ARRL. "That same evening, I met my Elmer, Bruce Meier, N1LN, who inspired me to finish the next two tests. He helped me build a station, including my first radio that I bought at a swap meet. With his help, I put up a vertical antenna in my backyard. Unfortunately, a tree knocked down the antenna about two weeks ago and broke the mounting bracket, so I'll be offline until after we get the replacement parts."

Meier recalled meeting Derek when he first came in to take his Technician exam in September 2010: "Derek had just turned 14. He had discovered Amateur Radio and was starting to get involved. His interest quickly grew, and by November 2010, he had his General ticket and then in March 2011, his Extra. In February 2011, Derek and his father went to a hamfest and found his first rig. Since Derek lives in an antenna-restricted area, he started to research different stealth antennas. As he wanted to start to work on his WAS, DXCC and WAC awards, and potentially get in involved in contesting (he got exposed to contesting at my QTH), he wanted something beyond stealth. So because of the woods behind his house, he was able to put up a vertical antenna and not bother any of the neighbors. He was now on the air."

Meier told the ARRL that Derek started out with SSB, but because of his skills in computers and computer programming, he became interested in the digital modes. "Derek modified his radio (by himself) and connected an interface board to enable the necessary control signals, wired up a home brew soundcard interface and was then able to operate digital modes," Meier explained. "He now operates PSK 31, RTTY PSK 63, Olivia 250, JT35 and even SSTV. Not bad for a 14 year old!" Derek is working on his CW skills, and recently earned his DXCC Award and only needs Vermont to complete his Worked All States Award. He also enjoys operating on the satellite modes, as well as developing software for his local HSMM Mesh.

Meier said that Derek competed with him and his team of operators in the 2011 CQ WW SSB contest. "We operated as a Multi/Two entry and were fortunate to place first in North America," he said. "Derek has also operated from his own home in the CQ WPX SSB Contest, the ARRL Rookie Roundup and several other contests."

Derek is also involved in public service activities. Meier's wife, Laurie Meier, N1YXU, was the ARES Emergency Coordinator for Orange County, North Carolina (she and Bruce are now Assistant Emergency Coordinators). Through them, Derek became interested in public service activities and started to take the various ICS courses. He has now taken and passed ICS 100, 200, 700, 800 and IS-3. Meier said that Derek is ready to help with ARES drills, public service events and ARES activations.

Derek is an active member of NCOCRA and his local ARES® group. He has worked with the club's public relations officer to revamp the club's website. He is the founder of the Youth Amateur Radio Club of America (YARCA <http://www.yarca.org/>), which aims to further youths in Amateur Radio; one of YARCA's initial target audiences is Scout troops. The site includes license test training and a Boy Scout Radio Merit Badge Workshop. Derek said he is currently planning for YARCA to hold a Badge Day for local Boy and Cub Scouts. He is also an ARRL Public Information Officer (PIO).

When not on the radio, Derek spends time as a Computer Science intern, where he is creating computer programs in a variety of languages. He is also a Lincoln-Douglas debater and will be traveling to tournaments

across the country this year. He will be entering his freshman year at Durham Academy in Durham, North Carolina this fall.

The Hiram Percy Maxim Award <http://www.arrl.org/hiram-percy-maxim-award> is given to an ARRL member under the age of 18. It is intended to provide a tangible reward to those deserving young amateurs who contribute their time, skills and energies daily through their commitment to Amateur Radio. As models for their peers, and inspirations to us all, these fine young people are highly visible boosters of Amateur Radio awareness. The ARRL continues to recognize and encourage their hard work and contributions at every opportunity.

==> SOLAR UPDATE

Tad "Everything under the Sun is in tune, but the Sun is eclipsed by the Moon <http://www.youtube.com/watch?v=EoD_SEoDPzc>" Cook, K7RA, reports: Although solar activity is quite low, there was an increase in sunspot numbers and the solar flux over the past week. The average daily sunspot numbers were up nearly 20 points -- about 36 percent -- to 74.1, while the average daily solar flux increased nearly 13 points to 108.7. The latest forecast has activity over the next week a bit lower than what forecasts predicted a few weeks ago: Expected solar flux is 115 on August 30, 120 on August 31-September 2, 115 again on September 3-8, 110 on September 9-10, 105 on September 11-12, 100 on September 13-16, 95 on September 17-22, and then rising above 100 to a peak of 125 on September 26-28. The predicted planetary A index is 5, 10 and 8 on August 30-September 1, 5 on September 2-7, 8 on September 8-9, 5 on September 10-14, 12 on September 15-16, 8 on September 17-18, 5 on September 19, 8 on September 20-21, 10 on September 22, and 8 on September 23-25, followed by 5 on September 26 through the first few days in October. Look for more on the ARRL website on Friday, August 31. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Pink Floyd's The Dark Side of the Moon <http://en.wikipedia.org/wiki/The_Dark_Side_of_the_Moon> (Brain Damage <http://en.wikipedia.org/wiki/Brain_Damage_%28song%29>/Eclipse <http://en.wikipedia.org/wiki/Eclipse_%28song%29>).

==> + DXCC NEWS: DXCC DESK APPROVES 1998 XU1A CAMBODIAN DXPEDITION

After reviewing new information and documentation, the ARRL DXCC Desk has concluded that the 1998 XU1A DXpedition to Cambodia will be valid for DXCC credit. If you have had QSLs rejected for this operation, please send a request via e-mail <bmoore@arrl.org> to be placed on the list for update. If you remember the submission in which you included the QSL, please note this in your e-mail, as it will expedite the search for the rejected QSO.

==> + ARRL HEADQUARTERS TO CLOSE IN OBSERVANCE OF LABOR DAY

ARRL Headquarters will be closed in observance of Labor Day on Monday, September 3. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, September 4 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK IN RADIOSPORT

This week:

- August 31 -- NCCC Sprint Ladder
- September 1 -- Russian RTTY WW Contest; Wake-Up! QRP Sprint; AGCW Straight Key Party
- September 1-2 -- Colorado QSO Party; All Asian DX Contest (Phone); CWOps CW Open
- September 2 -- DARC 10 Meter Digital Contest
- September 2-3 -- Tennessee QSO Party
- September 3-4 -- Michigan QRP Labor Day CW Sprint
- September 4 -- ARS Spartan Sprint

Next week:

- September 7-8 -- PODXS 070 Club Jay Hudak Memorial 80 Meter Sprint (local time)
- September 8-9 -- Arkansas QSO Party; WAE DX Contest (SSB)
- September 8-10 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf>
- September 9 -- North American Sprint (CW); SKCC Weekend Sprintathon; Swiss HTC QRP Sprint
- September 10 -- NAQCC-EU Monthly Sprint
- September 12-13 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 14-15 -- W9DXCC Convention <http://www.arrl.org/hamfests/w9dxcc-convention-2>, Elk Grove Village, Illinois
- September 15 -- ARRL Virginia Section Convention <http://www.arrl.org/hamfests/virginia-section-convention-virginia-beach-hamfest>, Virginia Beach, Virginia
- September 22 -- ARRL Washington State Convention <http://www.arrl.org/hamfests/washington-state-convention-36th-annual-spokane-hamfest>, Spokane Valley, Washington
- September 22-23 -- ARRL Illinois State Convention

<http://www.arrl.org/hamfests/illinois-state-convention-peoria-superfest-2012
>,
Peoria, Illinois
- September 28-29 -- SEDCO/W4DXCC VIII Convention
<http://www.arrl.org/hamfests/sedco-w4dxcc-viii-convention>, Pigeon
Forge, Tennessee

The North Cork Radio Group - RALLY

9-September-2012, Commons Inn Hotel, Cork

Doors open 11AM.

http://www.facebook.com/events/442902192408157/

Folks,

NCRG are pleased to announce their annual Radio Rally & Electronics Fair to
be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn,
Blackpool, Cork.

Doors open at 11am and admission is ☐5 per person (children are free).
Raffle tickets will also be available at the door.

The usual commercial and private traders will be present. This year we will
also have iRepairs (www.irepairs.ie), so bring your broken iPhone, iPad,
iPod; screen replacements, software repairs or upgrades available. AREN
(www.aren.ie) has kindly offered to have their ops-trailer on the premisis
as a demo station.

Also, due to high demand, anyone wishing to reserve a table, or anyone
interested in setting up a stall, should contact Edwin Van Mierlo (EI2HEB)
on 086 3885741, or alternatively via email at ei2heb@ei1nc.com, as soon as
possible to avoid disappointment. Book your tables now!!

Lots of traders, AREN demo station, and offcourse a good opportunity to
meet, greet, and have a chat!

Hope to see you all there!

Rgds,

73 DE EI1NC

RAC Bulletin 2012-052E - Ontario Section News - 2012-08-30*

2012-08-30

All Ontario Amateurs - MESSAGE TO ALL AMATEURS THANK YOU FOR YOUR SUPPORT & WELCOME TO THE NEW ONTARIO RESTRUCTURING

As you are aware changes have been made and now are ready to launch September 01, 2012 here in Ontario on behalf of the Radio Amateurs of Canada in relation to the Ontario Field Services. In the past Ontario has been served by one elected official of Field Services that being the Ontario Section Manager. For the last 7 years I have had the honour and pleasure to be elected and serve as your Ontario representative for Field Services on behalf of RAC. This position brought responsibilities of overseeing the field services in Ontario including ARES, the NTS, Official Bulletin Service and the Official Observer Service. I have had the opportunity to work with many wonderful and knowledgeable amateurs in these services and the wealth of experience in the province is second to none. However I also have been around long enough to realize that one person and one person alone cannot do justice to the job it deserves.

I know that during my time I have spent relentless hours on e-mails and discussing issues with many amateurs over the phone. In reality these concerns should be addressed face to face. I am a firm believer that for RAC to flourish in the future you need to have personal, interaction with your RAC official. Living in Northern Ontario and working full time I did not have the luxury to visit many clubs or ARES groups. I have met many of you at flea markets and meetings but you need to have there ability to contact your RAC Official when you need him/her. This is why I am excited about the new restructuring proposal undertaking by RAC. With three more additional Section Managers in the province representing their section of the province there is the opportunity to get more interaction. Each Section having a coordinator for the field services will only work better and represent all of you and make RAC stronger as a national organization. One of my last duties as Ontario Section Manager is to welcome the three additional members to the Ontario Team.

* Section Manager Ontario South Ian Snow VA3QT Ontario South - ONS
* Section Manager GTA George Duffield VE3WKJ Greater Toronto Area - GTA
* Section Manager Ontario East Michael Hickey VE3IPC - Ontario East - ONE

I know these three experienced amateurs will serve the amateur community well and I look forward to the new direction Ontario is taking and working with these fine gentlemen. Having served as Section Manager for all of Ontario for the past 7 years I want to take this opportunity to thank all of you that have supported me and my field services members over the years. Your commitment to the program has been proven many times over. I look forward to serving the members of Northern Ontario as your Section Manager for Ontario North - ONN. As always I am open to any questions or concerns that you may have. Please feel free to contact me at anytime. I look forward to this new process and the exciting times ahead for Field Services and RAC.

Yours Truly

Allan Boyd - VE3AJB
Section Manager - Ontario
Radio Amateurs of Canada

Vernon Ikeda - VE2MBS/VE2QQ

1645. Amateur Radio Newsline(tm) Report 1829 - August 31 2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-08-31 09:00:15 UTC
From: "William M. Pasternak" <newsline@ix.netcom.com>
Message-ID: <20120831090004.57E5733C7E@panix2.panix.com>
Source record: 2112
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

Amateur Radio Newsline(tm) Report 1829 - August 31 2012

The following is a closed circuit and is not necessarily for air. With a report on the Amateur Radio Newsline current financial picture here's our producer Bill Pasternak, WA6ITF:

--

Well, the last time I was on here with a financial report I told you that I thought we had enough in the bank to hopefully hold us over the summer months June, July and August, and that I would not be asking for any contributions unless the sky was falling. Sadly, the sky is falling this year. This is mainly because we did not get some of the larger donations that we have come to count on to keep us going over the lean summer months when people are away on vacation.

Right now, we only have a couple of hundred dollars left in our bank account. Most of that will vanish as we pay off our financial obligation in regard to presenting this years Young Ham of the Year Award and the outstanding bills for the month of August which are quickly piling up. And unlike the years up through October 2009 when I retired from full time employment, I'm now living on fixed income and honestly cannot afford to underwrite the cost of bringing these newscasts to you.

To be candid, I do not like to lead off a newscast with an appeal such as this, but we have no other method of getting the word out to you that we need your financial assistance to keep Amateur Radio Newsline on the air, and that we need it now. To all of us involved, each donation is looked upon as an ongoing vote of confidence in the quality of the news and information that we provide each week. And for this I add my personal thank you.

Remember, Amateur Radio Newsline is a 501c3, not for profit corporation and your donations are tax deductible. The easiest way to donate is by going to our website at www.arnewsline.org and clicking on the Pay Pal button. Or you can mail a donation to the address you will hear at the end of this weeks newscast.

Whichever method you choose, the all volunteer Amateur Radio Newsline team says thank you so much for caring. We promise to do all that we can to continue bringing you the news and information you want to hear about amateur radio and personal communications in the coming years.

Thank you. I'm Bill Pasternak, WA6ITF, and now this weeks newscast.

--

Thanks bill. Now, Amateur Radio Newsline report number 1829 with a release date of August 31 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Amateur radio assists as Hurricane Isaac hits the U.S. Gulf shore; the London Olympics ham radio station may have set a world record and a star is found devouring a planet. Find out the details on Amateur Radio Newsline report number 1829 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO WAS READY FOR HURRICANE ISAAC

Amateur radio first responders along the United States Gulf shore were ready when Hurricane Isaac slammed ashore on August 28th and 29th. We have the more in this report:

--

As Hurricane Isaac made its way across the Gulf of Mexico and then made landfall several miles West of New Orleans, Louisiana, members of the Hurricane Watch Net took to the air to track its approach:

--

(Ham in Florida) ".Victor-Radio-4-Golf. The handle here is Bill and Im located in Pensacola, Florida and we've had some winds gusts up to about 44 miles an hour. We went out for a ride along the beach this afternoon and they do now have some roads closed and water was coming over the sand dunes and starting to flood some of the roads, over"

--

While band conditions on 20 and 40 meters were not the greatest, the net continued and began passing storm conditions to the National Hurricane Center in Miami:

--

(Ham in New Orleans: ".we have wind gusts of about 70 to 75 miles per hour right now. Its really coming bad on us but my antenna is located in the attic."

--

One report was rather interesting from a scientific point of view:

--

(Ham in New Orleans) "The Mississippi river at the Carrolton gate in New Orleans is flowing backward."

--

Also taking reports for the National Hurricane Center was the V-O-I-P Hurricane Watch net. This group gathers information mainly from local repeaters within the storm area and also passes it along to the National Hurricane Center:

--

(VoIP Net Audio) "K3-November-Foxtrot-Uniform in Slidell, Louisiana. Estimated winds of 30 and no rain as of this time."

--

Hams on the V-O-I-P net also provided ongoing damage assessment:

--

(VoIP Net Audio) "I was informed that the power has hone out in mid-city New Orleans, Louisiana near the steets of Murat and Bowden."

"Roger. I have Murast and Bowden. Did I copy correctly that was mid-city New Orleans?"

--

As this report is being prepared, Issac has been downgraded from a category 1 hurricane to a tropical storm but is soaking Louisiana and surrounding states for yet another day. As such, the job of ham radio operators in coping with the storm is far from over.

With thanks to K3VR for the recordings of the 20 meter Hurricane Watch Net, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

We will have more on the role of amateur radio in the wake of Hurricane Isaac in upcoming Amateur Radio Newsline reports. (ARNewsline(tm) with audio from Hurricane Watch Net and VoIP Hurricane Watch Net.)

**

RADIO LAW: IARU SAYS IT WOULD WELCOME DOT RADIO DOMAIN

The International Amateur Radio Union says that it will back the European Broadcasting Union proposal that the top level Internet domain dot radio be used to help to create a global radio community. IARU President Tim Ellam, VE6SH, says that his organization believes that the proposal, to be submitted by the European Broadcast Union, could provide a unique opportunity to standardize radio domain names on the Internet.

In a recently made public letter, VE6SH said that he recommends that the dot radio domain proposal be approved by the Internet Corporation for Assigned Names and Numbers. European Broadcast Union Director General, Ingrid Deltenre said the International Amateur Radio Union comments are an expression of confidence in the proposal. The complete

story on the new dot radio domain and how it will impact all spectrum users is on-line at tinyurl.com/iaru-dot-radio (IARU, VK3PC)

**

HAM HAPPENINGS: LONDON OLYMPICS COMMEMORATIVE STATION MAY HAVE SET WORLD RECORD

The Radio Society of Great Britain reports that the team at 2O12L, the amateur radio station for the London Olympic and Paralympic Games, believe that they have now broken the world record for the number of Q-S-O's by a Special Event Station. As of 21:42 UTC on August 21st, 2O12L had logged contact number 47,791.

2O12L goes QRT on September 9th at the end of the Paralympic Games closing ceremony. As such the operators are fairly confident that they can achieve their target of 60,000 contacts.

It is believed the previous standing record for a ham radio Special Event station was held by the group that operated DQ2006X during the 2006 World Cup. That station was on the air from May 13th through July 16th of 2006 and made 47,790 contacts.

More on the operation of 2O12L is on-line at www.2O12L.com. (RSGB)

**

HAM RADIO IN SPACE: APRS TO ASSIST VULTURE 2 SPACEPLANE TRACKING

The Low Orbit Helium Assisted Navigator Vulture 2 space plane will carry an amateur radio Automatic Packet Reporting System or APRS system.

The UK newspaper the Register reports that Anthony Stirk, M-Zero-U-P-U, who was involved in the Raspberry Pi In The Sky mission, is working on the custom control board for the Vulture 2 space plane.

As of now, the communications subsystem has a Radiometrix 300 milliwatt HX1 144 MHz band module for APRS and a Radiometrix 10 milliwatt NTX2 433 MHz band module for RTTY. More information on frequencies will ve announced at a later date.

More on this upcoming near to space adventure can be read on-line at tinyurl.com/vulture-2. And we will have more ham radio space related news later on in this weeks newscast. (UK Register)

RADIO LAW: VOTE ON ADDING ENGINEERS TO COMMISSION STAFF SEEMS STALLED IN CONGRESS

Legislation working its way Congress that would add a technical expert to the staff of each FCC commissioner may not come up for a vote this fall. This is because the House and Senate versions of the bill to allow each of the five commissioners to hire one additional staff engineer are still in committee. Amateur Radio Newsline's Norm Seeley, KI7UP, has the details:

--

Maine Republican Senator Olympia Snowe introduced S. 611 in May 2011. The measure seeks to amend the Communications Act of 1934 to provide commissioners additional technical expertise. However Snowe's intention to retire at the end of this year has led supporters to push for a vote before the end of this Congressional term.

The companion House companion measure is H.R. 2102: FCC Commissioners' Technical Resource Enhancement Act. The Society of Broadcast Engineers better known as the SBE is a major supporter of these two pieces of legislation. In a recent press statement, SBE President Ralph Hogan said that his organization has scheduled a trip to Washington to meet with key members of Congress in Washington, This to further groups efforts to move the bills through the House and Senate before the end 2012.

However, SBE General Counsel Chris Imlay, W3KD, acknowledged in a column that appeared in the August edition of the SBE publication "The Signal" that time is of the essence.

According to Imlay, the SBE's last chance this fall to get H.R. 2102 through the House is `on suspension.' That means the measure is without the usual hearing and report procedure.

To move a bill along in these cases normally requires that the bill have a large number of cosponsors. Imlay says that in an election year, this is not easy, noting that there are only four co-sponsors for the House bill now.

Currently, FCC commissioners can appoint only three legal advisors to counsel the Commissioners on the wired, wireless and cable media. As part of its legislative agenda, the Society of Broadcast Engineers has sought greater technical expertise on the commission for several years.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Passage of these measures is important to the ham radio community as it will put technical expertise to the highest level of the Commission which for decades has lead primarily by members of the legal profession

rather than technologists and engineers. This could lead to a better understanding of our needs than is possible right now. (SBE, RW)

**

ENFORCEMENT: RAC ACTS TO PREVENT UNLAWFUL USE OF 2 METERS BY PARAGLIDING COMPETITION

Radio Amateurs of Canada took action after a Paragliding competition in British Columbia told its contestants to communicate using a frequency in the 2 meter amateur band. Bob Holowenko, VE7WNK, has more:

--

Radio Amateurs of Canada received a report by a British Columbia ham who notified them of what appeared to be the use of the two meter band for the operation of a paragliding competition. Dave Cameron, VE7LTD, witnessed this radio traffic and I was able to talk with him over the phone.

-

VE7LTD: "I was at a local repeater site helping the locals there by doing a sweep trying to find a source of interference. I had my HP8920A Service Monitor and I was monitoring around the band trying to find what the sources of intermod could be, and I noticed a few spikes in the ham band. Knowing that there is not a lot of VHF activity in the Pemberton area, I decided to tune into each of those and one was on 146.415 simplex where I heard lots of intercommunication between both paragliders in the air and some kind of race coordination on the ground."

-

This "race coordination" which Dave was hearing was the Canadian Paragliding National Championships held in Pemberton, BC. Dave reported this to The Radio Amateurs of Canada who became extremely concerned about the organizers assertion that all participants must use a VHF radio tuned to 146.415 Mhz for launching and landing.

Southern BC is popular for paragliding and hangliding thrill seekers, and the ham community here knows many of those who take part in these events are licensed hams, however it has become apparent that many are not.

-

VE7LTD: "There was never a call sign used, and never any identification used. Although the communication was very structures, you could tell it was not by ham operators"

-

Dave did go on to say that of the registered Canadian participants at the event, at least 40% of their names were found in the Ras=dio

Amateurs of Canada database.

RAC has been in contact with representatives from the Paragliding community and has also requested enforcement action to be taken by government officals at Industry Canada.

For the Amateur Radio Newsline, I'm Bob Holowenko, VE7WNK, in Vancouver, British Columbia.

--

According to Radio Amateurs of Canada, protecting the ham radio spectrum from intruders is all in a days work for the group. (RAC, VE7WNK)

**

HELPING HAMS: RFINDER.NET SEEKS INPUT FROM FREQUENY COORDINATORS

The on-line repeater directory RFinder is inviting Frequency Coordinators to use the World Wide Radio Directory help them in conducting their work. The hams who operate RFinder say that they have already heard from several frequency coordinators who have told them that being able to see the repeaters across borders is very helpful. As such, RFfinder says that frequency coordinators in several countries are using RFinder/Web as a tool in their activities. They are also looking to compile a wish list from the coordination community to build a special portal for them to have the tools they need to make frequency coordination easier. If you are a coordinator who wants to contribute to this wish list please send your thoughts by e-mail to w2cyk (at) rfinder (dot) net. You lraen more about RFinder and the services that it provides all who use repeaters on-line at www.rfinder.net. (RFinder)

**

HAM HAPPENINGS: ARRL CENTENNIAL CONVENTION IN HARTFORD CT

On the ham radio social scene, the ARRL has announced the organization will hold its 2014 national Centennial Convention in Hartford, Connecticut, from July 17th to the 20th. The Convention will mark 100 years of the ARRL's founding that took place in the city of Hartford. The theme for ARRL's Centennial year is Advancing the Art and Science of Radio Since 1914. More information is on-line at www.arrl.org/expo. (ARRL)

**

RADIO HAPPENINGS: NRCDXAS SWITCHING FROM TAPE TO CD MAILOUTS

According to Amateur Radio Newsline's Fred Vobbe, W8HDU, the September and October issues of the National Radio Club's D-X Audio Service will be the last to issue on cassette tape. Beginning in November these reports will switch distribution to CD's after 27 years of tape mailouts.

Fred asks that if you know someone who is blind or otherwise visually impaired, and who loves the topic of broadcast radio, to please tell them about the DX Audio Service. More information about it can be found on-line at www.nrcdxas.org. (W8HDU)

NAMES IN THE NEWS: BRITISH SOPRANO SARAH BRIGHTMAN MAY BE THE NEXT SPACE TOURIST

A world famous entertainer may be the next to travel to the International Space Station. Amateur Radio Newsline's George Bowen, W2XBS, has the details:

--

British soprano Sarah Brightman could become the next space tourist to visit the International Space Station. This according to a senior official at the Russian Space Agency who hinted on August 22nd that the 52 year old songstress best known for her creating the role of Christine Daae' in the Andrew Lloyd Webber musical The Phantom of the Opera is being considered as candidate for such a trip.

The Interfax news agency cited a space industry source as saying that the name of the next space tourist, who will most likely fly to the ISS in 2015, will be officially announced in around a month. The source also told Interfax that Brightman visited Russia around a month ago and was given the go-ahead by the medical commission to train at the Yuri Gagarin Cosmonaut Training Centre in Star City outside Moscow.

Previous space tourists visiting the ISS have included the Canadian founder of the Cirque du Soleil, Guy Laliberte, and computer game creator Richard Garriott, W5KWQ. As most of you know, Richard Garriott is the son of retired Astronaut Owen Garriott, W5LFL, who was the first radio amateur to ever operate from space. This on shuttle mission STS-9. Iranian-American entrepreneur Anousheh Ansari is so far the only woman to make the trip to the I-S-S.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, in Albany, New York.

--

More about Sarah Brightman's proposed trip to Earth orbit is on-line at tinyurl.com/brightman-iss. (Interfax, AFP)

THE CHANGING OF THE GUARD: MIRAGE AND RF CONCEPTS FOUNDER EVERETT GRACY, WA6CBA - S.K.

The man responsible for many pieces of equipment in the shacks of so many hams has become a silent key at age 91. Amateur Radio Newsline's Don Carlson, KQ6FM, brings us the story of Everett Gracey, WA6CBA.

--

On Sunday morning, August 26, the Amateur Radio world lost a gentle giant, as Everett Gracey, WA6CBA became a silent key. For the many of us who knew Everett, it is loss unlike any other. We have lost a great source of knowledge, but most of all, a dear friend. For everyone else who did not know him, the word "giant" is not adequate to describe him. His contributions to the Amateur Radio world were immeasurable.

For those of you who ever owned a piece of gear with the name RF Concepts or Mirage Communications on it, you held a piece of his life and legacy, since he was a co-founder of both companies, which he started with Ken Holaday, K6HCP. Later in life Everett became a consultant to LDG Electronics, who, according to Everett put out one of the greatest automatic antenna tuners on the market, and are sold world wide.

Everett spent most of his life in and around Reno, Nevada, where he married his wife Dorothy on July 6, 1940. He was devoted to her, since she was always first and foremost in his mind. He took care of her in their later years, and finally, it was his concern for her well being that prompted his move from Reno to Grass Valley, California, so that her care could be shared with medical professionals.

Everett was also a decorated veteran, who fought in with the Army in Europe during WWII, and was awarded both the Bronze Star and Silver Star for bravery in Germany. He was also recipient of the Purple Heart. He was also author of several books, "From A 13 year old Hobo to an Entrepreneur" "My 20 Years of RV Adventures" and "Buying and Selling Real Estate by Owner". One of my most treasured possessions is an autographed copy of his autobiographical book, "From Freight Trains to Airplanes", published in 1999.

Everett was always ready to lend a friendly hand with a good piece of advice, Elmering and plenty of wisdom which helped many a ham in need, and always seemed to have exactly what they needed to complete the project, or get back on the air. He even gave away parts used for fixing antennas and gear, at no charge.

As a dear mutual friend of Everett's and mine said of his passing, Everett, "I will miss you.you rascal..Oh, and while you are winging your way around the heavens, and you had best not tamper with my RF signal when I am attempting to work DX, or someday, you and I will have a long discussion about that!".

With sincere thanks to Joe Wolfe, WA6RKN for his informative help, for the Amateur Radio Newsline, this is Don Carlson, KQ6FM in Reno.

--

Per his request no service or memorial will be held. Instead his ashes will be placed next to his wife Dorothy. Everett and Dorothy Gracey had been married 70 years. (KQ6FM, WA6RKN)

**

HAM RADIO IN SPACE: KEPLARIAN ELEMENTS CHANGE WITH ISS HIGHER ORBIT

Space-Travel.com reports on August 22nd that a European ATV-3 unmanned supply spacecraft was used to raise the International Space Station's orbit to about 261 miles. The orbit adjustment was done in two stages, with the ATV-3 engines firing for 348 seconds to lift the orbit to 257 miles followed by another burn four hours later that brought the space station to its final altitude.

The maneuver was conducted to prepare for the return to earth of Russia's Soyuz TMA-04M manned spacecraft on September 17 and the docking of the Soyuz TMA-06M manned spacecraft with the ISS on October 15th. For amateur radio space enthusiasts this means that you will have to readjust your Keplarian elements when tracking the I-S-S at its new higher altitude. The complete story of this orbital maneuver is on-line at tinyurl.com/ISS-Reboost. (ANS, Spece-Travel.com)

**

HAM HAPPENINGS: REGISTRATION OPEN FOR 2012 AMSAT SPACE SYMPOSIUM

AMSAT says that registration for its 2012 Space Symposium is now open on-line. To register over the World-Wide-Web simply take your computer to store (dot) amsat (dot) org/catalog and click on the "AMSAT 2012 Symposium" item in the top left box.

A mail-in option is also available for those who wamt to register the old fashioned way. A downloadable paper registration forms in MS-Word and PDF format are available on the 2012 Symposium page at tinyurl.com/amsat-2012-reg.

This years AMSAT Space Symposium takes place October 26th through the 28th at the Holiday Inn Orlando-International Airport in Orlando, Florida. This hotel is located at only one mile north of the Orlando International Airport. at 5750 T.G. Lee Blvd, in Orlando. (AMSAT)

**

HAM RADIO IN SPACE: CPUT CUBESAT TO LAUNCH END NOVEMBER

A CubeSat designed and built by students at the Cape Peninsular University of Technology in Bellville, South Africa, will be launched towards the end of November.

Still known by its engineering name ZA Cube-1, the satellite will be shipped in the next few weeks to Holland. There it will be integrated with two other CubeSats in the launch carrier before being shipped for integrating with the rocket.

ZA Cube-1 is rare for a ham radio bird in that it carries a High Frequency transmitter operating on 14.099 MHz in the 20 meter band. Also on-board is a small camera and a telemetry transmitter. (SARL)

**

DX

In DX, N6MW and possibly 1 or 2 other operators will be active stroke KH8 from American Samoa between November 8th and the 19th. Operations will be on 160 through 10 meters using mainly CW, but some SSB and RTTY. QSL via Logbook of the World.

A group of radio amateurs from Poland will be on the air as 5T0SP from Mauritania between November 24th and December 10th. Their activity will be on 160 through 10 meters using CW, SSB and the Digital modes. As of airtime no QSL route has been announced

Bill Moore, NC1L, at the ARRL says that the 1998 X-U-one-A operation from Cambodia has been approved for DXCC Credit. Moore says that if you have had QSLs rejected please send an e-mail to bmoore (at) arrl (dot) org to be placed on the list for update. If you remember the submission in which you included the QSL please note this to expedite the search for the rejected QSO.

Lastly, SM0JHF reports that he has retired and can no longer afford sending out QSL cards automatically. He notes that for the past 50 years that he has personally filled out and shipped more than 100,000 QSL cards for his activities using numerous past callsigns. He says that he will clean house and dispose of blank cards by the end of this year. If you need a card for any of his calls please contact him by e-mail to sm0jhf (at) gmail (dot) com. A complete list of his operations over the years is under SM0JHF on QRZ.com

(Above from various DX news sources)

**

THAT FINAL ITEM: STAR FOUND DEVOURING PLANET

And finally this week, radio and radio astronomy have brought some new light on the way nature works out in the cosmos. Amateur Radio Newsline's Cheryl Lasek, K9BIK, takes us to the far reaches of space:

--

Astronomers have found evidence of a planet being devoured by its star, yielding insights into the fate that will befall Earth several billions years in the future.

The team uncovered the signature of the planet that had been absorbed by looking at the chemistry of the host star. They also think a surviving planet circling this star may have been kicked into its unusual orbit by the destruction of a neighboring world.

The US-Polish-Spanish team made the discovery when they were studying the star BD+48 740 - which is one of a stellar class known as red giants. Rising temperatures near the cores of red giants cause these elderly stars to expand in size. This in turn results in any nearby planets to be absorbed by the expanding star or otherwise destroyed.

It's the way of the universe now brought to us thanks to the art of radio and the science of Astronomy.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Details of the work have been published in Astrophysical Journal Letters. The complete story is on-line at tinyurl.com/planet-hungry-star. (ScienceToday, BBC, others)

Normal 0 MicrosoftInternetExplorer4
Amateur Radio Newsline☐ Report 1829 ☐ August 31 2012

The following is a closed circuit and is not necessarily for air. With a report on the Amateur Radio Newsline current financial picture here☐s our producer Bill Pasternak, WA6ITF:

--

Well, the last time I was on here with a financial report I told you that I thought we had enough in the bank to hopefully hold us over the summer months June, July and August, and that I would not be asking for any contributions unless the sky was falling. Sadly, the sky is falling this year. This is mainly because we did not get some of the larger donations that we have come to count on to keep us going over the lean summer months when people are away on vacation.

Right now, we only have a couple of hundred dollars left in our bank account. Most of that will vanish as we pay off our financial obligation in regard to presenting this years Young Ham of the Year Award and the outstanding bills for the month of August which are quickly piling up. And unlike the years up through October 2009 when I retired from full time employment, I☐m now living on fixed income and honestly cannot afford to underwrite the cost of bringing these newscasts to you.

To be candid, I do not like to lead off a newscast with an appeal such as this, but we have no other method of getting the word out to you that we need your financial assistance to keep Amateur Radio Newsline on the air, and that we need it now. To all of us involved, each donation is looked upon as an ongoing vote of confidence in the quality of the news and information that we provide each week. And for this I add my personal thank you.

Remember, Amateur Radio Newsline is a 501c3, not for profit corporation and your donations are tax deductible. The easiest way to donate is by going to our website at www.arnewsline.org and clicking on the Pay Pal button. Or you can mail a donation to the address you will hear at the end of this weeks newscast.

Whichever method you choose, the all volunteer Amateur Radio Newsline team says thank you so much for caring. We promise to do all that we can to continue bringing you the news and information you want to hear about amateur radio and personal communications in the coming years.

Thank you. I'm Bill Pasternak, WA6ITF, and now this weeks newscast.

--

Thanks bill. Now, Amateur Radio Newsline report number 1829 with a release date of August 31 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Amateur radio assists as Hurricane Isaac hits the U.S. Gulf shore; the London Olympics ham radio station may have set a world record and a star is found devouring a planet. Find out the details on Amateur Radio Newsline report number 1829 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAM RADIO WAS READY FOR HURRICANE ISAAC

Amateur radio first responders along the United StatesGulf shore were ready when Hurricane Isaac slammed ashore on August 28th and 29th. We have the more in this report:

--

As Hurricane Isaac made its way across the Gulf of Mexico and then made landfall several miles West of New Orleans, Louisiana, members of the Hurricane Watch Net took to the air to track its approach:

--

(Ham in Florida) ☐ Victor-Radio-4-Golf. The handle here is Bill and Im located in Pensacola, Florida and we☐ve had some winds gusts up to about 44 miles an hour. We went out for a ride along the beach this afternoon and they do now have some roads closed and water was coming over the sand dunes and starting to flood some of the roads, over☐

--

While band conditions on 20 and 40 meters were not the greatest, the net continued and began passing storm conditions to the NationalHurricaneCenter in Miami:

--

(Ham in New Orleans: ☐ we have wind gusts of about 70 to 75 miles per hour right now. Its really coming bad on us but my antenna is located in the attic.☐

--

One report was rather interesting from a scientific point of view:

--

(Ham in New Orleans) ☐The Mississippi river at the Carrolton gate in New Orleans is flowing backward.☐

--

Also taking reports for the NationalHurricaneCenter was the V-O-I-P Hurricane Watch net. This group gathers information mainly from local repeaters within the storm area and also passes it along to the NationalHurricaneCenter:

--

(VoIP Net Audio) ☐K3-November-Foxtrot-Uniform in Slidell, Louisiana. Estimated winds of 30 and no rain as of this time.☐

--

Hams on the V-O-I-P net also provided ongoing damage assessment:

--

(VoIP Net Audio) ☐I was informed that the power has hone out in mid-city New Orleans, Louisiana near the steets of Murat and Bowden ☐

☐Roger. I have Murast and Bowden. Did I copy correctly that was mid-city New Orleans?☐

--

As this report is being prepared, Issac has been downgraded from a category 1 hurricane to a tropical storm but is soaking Louisiana and surrounding states for yet another day. As such, the job of ham radio operators in coping with the storm is far from over.

With thanks to K3VR for the recordings of the 20 meter Hurricane Watch Net, Im Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

We will have more on the role of amateur radio in the wake of Hurricane Isaac in upcoming Amateur Radio Newsline reports. (ARNewsline with audio from Hurricane Watch Net and VoIP Hurricane Watch Net.)

**

RADIO LAW: IARU SAYS IT WOULD WELCOME DOT RADIO DOMAIN

The International Amateur Radio Union says that it will back the European Broadcasting Union proposal that the top level Internet domain dot radio be used to help to create a global radio community. IARU President Tim Ellam, VE6SH, says that his organization believes that the proposal, to be submitted by the European Broadcast Union, could provide a unique opportunity to standardize radio domain names on the Internet.

In a recently made public letter, VE6SH said that he recommends that the dot radio domain proposal be approved by the Internet Corporation for Assigned Names and Numbers. European Broadcast Union Director General, Ingrid Deltenre said the International Amateur Radio Union comments are an expression of confidence in the proposal. The complete story on the new dot radio domain and how it will impact all spectrum users is on-line at tinyurl.com/iaru-dot-radio (IARU, VK3PC)

**

HAM HAPPENINGS: LONDON OLYMPICS COMMEMORATIVE STATION MAY HAVE SET WORLD RECORD

The Radio Society of Great Britain reports that the team at 2O12L, the amateur radio station for the London Olympic and Paralympic Games, believe that they have now broken the world record for the number of Q-S-O s by a Special Event Station. As of 21:42 UTC on August 21st, 2O12L had logged contact number 47,791.

2O12L goes QRT on September 9th at the end of the Paralympic Games closing ceremony. As such the operators are fairly confident that they can achieve their target of 60,000 contacts.

It is believed the previous standing record for a ham radio Special Event station was held by the group that operated DQ2006X during the 2006 World Cup. That station was on the air from May 13th through July 16th of 2006 and made 47,790 contacts.

More on the operation of 2O12L is on-line at www.2O12L.com. (RSGB)

HAM RADIO IN SPACE: APRS TO ASSIST VULTURE 2 SPACEPLANE TRACKING

The Low Orbit Helium Assisted Navigator Vulture 2 space plane will carry an amateur radio Automatic Packet Reporting System or APRS system.

The UK newspaper the Register reports that Anthony Stirk, M-Zero-U-P-U, who was involved in the Raspberry Pi In The Sky mission, is working on the custom control board for the Vulture 2 space plane.

As of now, the communications subsystem has a Radiometrix 300 milliwatt HX1 144 MHz band module for APRS and a Radiometrix 10 milliwatt NTX2 433 MHz band module for RTTY. More information on frequencies will ve announced at a later date.

More on this upcoming near to space adventure can be read on-line at tinyurl.com/vulture-2. And we will have more ham radio space related news later on in this weeks newscast. (UK Register)

RADIO LAW: VOTE ON ADDING ENGINEERS TO COMMISSION STAFF SEEMS STALLED IN CONGRESS

Legislation working its way Congress that would add a technical expert to the staff of each FCC commissioner may not come up for a vote this fall. This is because the House and Senate versions of the bill to allow each of the five commissioners to hire one additional staff engineer are still in committee. Amateur Radio Newsline□s Norm Seeley, KI7UP, has the details:

--

Maine Republican Senator Olympia Snowe introduced S. 611 in May 2011. The measure seeks to amend the Communications Act of 1934 to provide commissioners additional technical expertise. However Snowe□s intention to retire at the end of this year has led supporters to push for a vote before the end of this Congressional term.

The companion House companion measure is H.R. 2102: FCC Commissioners□ Technical Resource Enhancement Act. The Society of Broadcast Engineers better known as the SBE is a major supporter of these two pieces of legislation. In a recent press statement, SBE President Ralph Hogan said that his organization has scheduled a trip to Washington to meet with key members of Congress in Washington, This to further groups efforts to move the bills through the House and Senate before the end 2012.

However, SBE General Counsel Chris Imlay, W3KD, acknowledged in a column that appeared in the August edition of the SBE publication □The Signal□ that time is of the essence.

According to Imlay, the SBE□s last chance this fall to get H.R. 2102 through the House is □on suspension.□ That means the measure is without the usual hearing and report procedure.

To move a bill along in these cases normally requires that the bill have a large number of cosponsors. Imlay says that in an election year, this is not easy, noting that there are only four co-sponsors for the House bill now.

Currently, FCC commissioners can appoint only three legal advisors to counsel the Commissioners on the wired, wireless and cable media. As part of its legislative agenda, the Society of Broadcast Engineers has sought greater technical expertise on the commission for several years.

For the Amateur Radio Newsline, I□m Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Passage of these measures is important to the ham radio community as it will put technical expertise to the highest level of the Commission which for decades has lead primarily by members of the legal profession rather than technologists and engineers. This could lead to a better understanding of our needs than is possible right now. (SBE, RW)

**

ENFORCEMENT: RAC ACTS TO PREVENT UNLAWFUL USE OF 2 METERS BY PARAGLIDING COMPETITION

Radio Amateurs of Canada took action after a Paragliding competition in British Columbia told its contestants to communicate using a frequency in the 2 meter amateur band. Bob Holowenko, VE7WNK, has more:

--

Radio Amateurs of Canada received a report by a British Columbia ham who notified them of what appeared to be the use of the two meter band for the operation of a paragliding competition. Dave Cameron, VE7LTD, witnessed this radio traffic and I was able to talk with him over the phone.

-

VE7LTD: "I was at a local repeater site helping the locals there by doing a sweep trying to find a source of interference. I had my HP8920A Service Monitor and I was monitoring around the band trying to find what the sources of intermod could be, and I noticed a few spikes in the ham band. Knowing that there is not a lot of VHF activity in the Pemberton area, I decided to tune into each of those and one was on 146.415 simplex where I heard lots of intercommunication between both paragliders in the air and some kind of race coordination on the ground."

-

This "race coordination" which Dave was hearing was the Canadian Paragliding National Championships held in Pemberton, BC. Dave reported this to The Radio Amateurs of Canada who became extremely concerned about the organizers assertion that all participants must use a VHF radio tuned to 146.415 Mhz for launching and landing.

Southern BC is popular for paragliding and hangliding thrill seekers, and the ham community here knows many of those who take part in these events are licensed hams, however it has become apparent that many are not.

-

VE7LTD: "There was never a call sign used, and never any identification used. Although the communication was very structures, you could tell it was not by ham operators"

-

Dave did go on to say that of the registered Canadian participants at the event, at least 40% of their names were found in the Ras=dio Amateurs of Canada database.

RAC has been in contact with representatives from the Paragliding community and has also requested enforcement action to be taken by government officals at Industry Canada.

For the Amateur Radio Newsline, I'm Bob Holowenko, VE7WNK, in

Vancouver, British Columbia.

--

According to Radio Amateurs of Canada, protecting the ham radio spectrum from intruders is all in a days work for the group. (RAC, VE7WNK)

**

HELPING HAMS: RFINDER.NET SEEKS INPUT FROM FREQUENY COORDINATORS

The on-line repeater directory RFinder is inviting Frequency Coordinators to use the World Wide Radio Directory help them in conducting their work. The hams who operate RFinder say that they have already heard from several frequency coordinators who have told them that being able to see the repeaters across borders is very helpful. As such, RFfinder says that frequency coordinators in several countries are using RFinder/Web as a tool in their activities. They are also looking to compile a wish list from the coordination community to build a special portal for them to have the tools they need to make frequency coordination easier. If you are a coordinator who wants to contribute to this wish list please send your thoughts by e-mail to w2cyk (at) rfinder (dot) net. You lraen more about RFinder and the services that it provides all who use repeaters on-line at www.rfinder.net. (RFinder)

NAMES IN THE NEWS: BRITISH SOPRANO SARAH BRIGHTMAN MAY BE THE NEXT SPACE TOURIST

A world famous entertainer may be the next to travel to the International Space Station. Amateur Radio Newsline□s George Bowen, W2XBS, has the details:

--

British soprano Sarah Brightman could become the next space tourist to visit the International Space Station. This according to a senior official at the Russian Space Agency who hinted on August 22nd that the 52 year old songstress best known for her creating the role of Christine Daae□ in the Andrew Lloyd Webber musical The Phantom of the Opera is being considered as candidate for such a trip.

The Interfax news agency cited a space industry source as saying that the name of the next space tourist, who will most likely fly to the ISS in 2015, will be officially announced in around a month. The source also told Interfax that Brightman visited Russia around a month ago and was given the go-ahead by the medical commission to train at the Yuri Gagarin Cosmonaut Training Centre in StarCity outside Moscow.

Previous space tourists visiting the ISS have included the Canadian founder of the Cirque du Soleil, Guy Laliberte, and computer game creator Richard Garriott, W5KWQ. As most of you know, Richard Garriott is the son of retired Astronaut Owen Garriott, W5LFL, who was the first radio amateur to ever operate from space. This on shuttle mission STS-9. Iranian-American entrepreneur Anousheh Ansari is so far the only woman to make the trip to the I-S-S.

For the Amateur Radio Newsline, I□m George Bowen, W2XBS, in Albany, New York.

--

More about Sarah Brightman☐s proposed trip to Earth orbit is on-line at tinyurl.com/brightman-iss. (Interfax, AFP)

THE CHANGING OF THE GUARD: MIRAGE AND RF CONCEPTS FOUNDER EVERETT GRACY, WA6CBA ☐ S.K.

The man responsible for many pieces of equipment in the shacks of so many hams has become a silent key at age 91. Amateur Radio Newsline☐s Don Carlson, KQ6FM, brings us the story of Everett Gracey, WA6CBA.

--

On Sunday morning, August 26, the Amateur Radio world lost a gentle giant, as Everett Gracey, WA6CBA became a silent key. For the many of us who knew Everett, it is loss unlike any other. We have lost a great source of knowledge, but most of all, a dear friend. For everyone else who did not know him, the word ☐giant☐ is not adequate to describe him. His contributions to the Amateur Radio world were immeasurable.

For those of you who ever owned a piece of gear with the name RF Concepts or Mirage Communications on it, you held a piece of his life and legacy, since he was a co-founder of both companies, which he started with Ken Holaday, K6HCP. Later in life Everett became a consultant to LDG Electronics, who, according to Everett put out one of the greatest automatic antenna tuners on the market, and are sold world wide.

Everett spent most of his life in and around Reno, Nevada, where he married his wife Dorothy on July 6, 1940. He was devoted to her, since she was always first and foremost in his mind. He took care of her in their later years, and finally, it was his concern for her well being that prompted his move from Reno to Grass Valley, California, so that her care could be shared with medical professionals.

Everett was also a decorated veteran, who fought in with the Army in Europe during WWII, and was awarded both the Bronze Star and Silver Star for bravery in Germany. He was also recipient of the Purple Heart. He was also author of several books, ☐From A 13 year old Hobo to an Entrepreneur☐ ☐My 20 Years of RV Adventures☐ and ☐Buying and Selling Real Estate by Owner☐. One of my most treasured possessions is an autographed copy of his autobiographical book, ☐From Freight Trains to Airplanes☐, published in 1999.

Everett was always ready to lend a friendly hand with a good piece of advice, Elmering and plenty of wisdom which helped many a ham in need, and always seemed to have exactly what they needed to complete the project, or get back on the air. He even gave away parts used for fixing antennas and gear, at no charge.

As a dear mutual friend of Everett☐s and mine said of his passing, Everett, ☐I will miss you you rascal .Oh, and while you are winging your way around the heavens, and you had best not tamper with my RF signal when I am attempting to work DX, or someday, you and I will have a long discussion about that!☐.

With sincere thanks to Joe Wolfe, WA6RKN for his informative help, for the Amateur Radio Newsline, this is Don Carlson, KQ6FM in Reno.

--

Per his request no service or memorial will be held. Instead his ashes will be placed next to his wife Dorothy. Everett and Dorothy Gracey had been married 70 years. (KQ6FM, WA6RKN)

**

HAM RADIO IN SPACE: KEPLARIAN ELEMENTS CHANGE WITH ISS HIGHER ORBIT

Space-Travel.com reports on August 22nd that a European ATV-3 unmanned supply spacecraft was used to raise the International Space Station's orbit to about 261 miles. The orbit adjustment was done in two stages, with the ATV-3 engines firing for 348 seconds to lift the orbit to 257 miles followed by another burn four hours later that brought the space station to its final altitude.

The maneuver was conducted to prepare for the return to earth of Russia's Soyuz TMA-04M manned spacecraft on September 17 and the docking of the Soyuz TMA-06M manned spacecraft with the ISS on October 15th. For amateur radio space enthusiasts this means that you will have to readjust your Keplarian elements when tracking the I-S-S at its new higher altitude. The complete story of this orbital maneuver is on-line at tinyurl.com/ISS-Reboost. (ANS, Spece-Travel.com)

**

HAM HAPPENINGS: REGISTRATION OPEN FOR 2012 AMSAT SPACE SYMPOSIUM

AMSAT says that registration for its 2012 Space Symposium is now open on-line. To register over the World-Wide-Web simply take your computer to store (dot) amsat (dot) org/catalog and click on the "AMSAT 2012 Symposium" item in the top left box.

A mail-in option is also available for those who wamt to register the old fashioned way. A downloadable paper registration forms in MS-Word and PDF format are available on the 2012 Symposium page at tinyurl.com/amsat-2012-reg.

This years AMSAT Space Symposium takes place October 26th through the 28th at the Holiday Inn Orlando-International Airport in Orlando, Florida. This hotel is located at only one mile north of the OrlandoInternationalAirport. at 5750 T.G. Lee Blvd, in Orlando. (AMSAT)

**

HAM RADIO IN SPACE: CPUT CUBESAT TO LAUNCH END NOVEMBER

A CubeSat designed and built by students at the Cape Peninsular University of Technology in Bellville, South Africa, will be launched towards the end of November.

Still known by its engineering name ZA Cube-1, the satellite will be shipped in the next few weeks to Holland. There it will be integrated with two other CubeSats in the launch carrier before being shipped for integrating with the rocket.

ZA Cube-1 is rare for a ham radio bird in that it carries a High Frequency transmitter operating on 14.099 MHz in the 20 meter band. Also on-board is a small camera and a telemetry transmitter. (SARL)

**

DX

In DX, N6MW and possibly 1 or 2 other operators will be active stroke KH8 from American Samoa between November 8th and the 19th. Operations will be on 160 through 10 meters using mainly CW, but some SSB and RTTY. QSL via Logbook of the World.

A group of radio amateurs from Poland will be on the air as 5T0SP from Mauritania between November 24th and December 10th. Their activity will be on 160 through 10 meters using CW, SSB and the Digital modes. As of airtime no QSL route has been announced

Bill Moore, NC1L, at the ARRL says that the 1998 X-U-one-A operation from Cambodia has been approved for DXCC Credit. Moore says that if you have had QSLs rejected please send an e-mail to bmoore (at) arrl (dot) org to be placed on the list for update. If you remember the submission in which you included the QSL please note this to expedite the search for the rejected QSO.

Lastly, SM0JHF reports that he has retired and can no longer afford sending out QSL cards automatically. He notes that for the past 50 years that he has personally filled out and shipped more than 100,000 QSL cards for his activities using numerous past callsigns. He says that he will clean house and dispose of blank cards by the end of this year. If you need a card for any of his calls please contact him by e-mail to sm0jhf (at) gmail (dot) com. A complete list of his operations over the years is under SM0JHF on QRZ.com

(Above from various DX news sources)

THAT FINAL ITEM: STAR FOUND DEVOURING PLANET

And finally this week, radio and radio astronomy have brought some new light on the way nature works out in the cosmos. Amateur Radio Newsline□s Cheryl Lasek, K9BIK, takes us to the far reaches of space:

--

Astronomers have found evidence of a planet being devoured by its star, yielding insights into the fate that will befall Earth several billions years in the future.

The team uncovered the signature of the planet that had been absorbed by looking at the chemistry of the host star. They also think a surviving planet circling this star may have been kicked into its unusual orbit by the destruction of a neighboring world.

The US-Polish-Spanish team made the discovery when they were studying the star BD+48 740 - which is one of a stellar class known as red giants. Rising temperatures near the cores of red giants cause these elderly stars to expand in size. This in turn results in any nearby planets to be absorbed by the expanding star or otherwise destroyed.

It□s the way of the universe now brought to us thanks to the art of radio and the science of Astronomy.

For the Amateur Radio Newsline, I□m Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Details of the work have been published in Astrophysical Journal Letters. The complete story is on-line at tinyurl.com/planet-hungry-star. (ScienceToday, BBC, others)

September 7-8 - David Packard's Birthday

Posted: 30 Aug 2012 02:04 PM PDT
http://forums.qrz.com/showthread.php?359688-September-7-8-David-Packard-s-Birthday&goto=newpost

Join Hewlett-Packard employee radio clubs nationwide celebrating the 100th
anniversary of HP founder and Silicon Valley pioneer David Packard□s birth.
Dave was an avid early ham operator, and it has been said that without
Dave□s interest and involvement in radio, the Hewlett-Packard Company would
have never existed.

HP clubs will be on the air nationwide Friday September 7 through Saturday September 8. All stations contacting HP clubs will receive a special commemorative QSL card from each location-collect them all! HP clubs will be on the air at various times during the event period. ((There may be a special "worked all HP" certificate, details still in the works.))

Coordinator:

AB7HP Hewlett-Packard Boise ARC

Participating clubs:

AB7HP - Boise ID

NE1HP - HP New England

WA7HP - Vancouver WA

K5WH & N5EN - Houston TX

W1HP - Phillips (Former HP/Agilent) New England

Frequencies:

10-15-20-40-80 Meters

Tenative SSB center freqs: 7.260 14.260 18.140 21.360 28.360

Some clubs may be running CW and/or PSK as well.

Who Ya Gonna Call?

Posted: 30 Aug 2012 05:05 PM PDT
http://www.eham.net/articles/28904

Amateur radio operators formed chain of communication during Irene:
CATSKILL -- When all systems fail, the amateurs are king. If there is any question of that being the case, take it up with Len Signoretti, a man of many hats in the Greene County Amateur Radio Emergency Services. The 10-year Catskill resident relocated to the area from Brooklyn after the the 2001 World Trade Center attacks and headed emergency communications during Tropical Storm Irene last year. Signoretti talked to Greene County legislators in a presentation during August's Public Safety Committee meeting, gave them a recap of the work done by his team of Amateur Radio Emergency Service and Radio Amateurs Civil Emergency Services members, or ARES and RACES, and said there were a number of things his team needs in order to be more effective. "Today, in modern technocracy," Signoretti said, "we take everything for granted, cell phones \& Mid-Hudson Cable \& Verizon DSL \& but no matter what, Hurricane Irene was a test that they all do fail."

Ham Radio Operators on Standby to Help Storm Victims:

Posted: 30 Aug 2012 10:08 AM PDT
http://www.eham.net/articles/28901

SPRINGFIELD, Mo. -- Local radio volunteers are on stand-by as tropical storm Isaac slams the Gulf Coast. Radio is still one of the most reliable forms of communication during disasters. Amateur Radio Operators, often called "Hams" are continually ready to move in. When Hurricane Katrina and the Joplin tornado wiped out all other communication, Amateur Radio Volunteers stepped up. Rob Reid spends more than ten hours a week listening to the radio, but he's not enjoying music. He's listening to special frequencies, while patiently waiting for an emergency message. As tropical storm Isaac hits the Gulf Coast, he's standing by for assistance. "That's the name of the game. Can we help that agency accomplish its goal by volunteerism?" said Rob Reid, Amateur Radio Operator. Reid is one of the 30,000 Amateur Radio Operators in Missouri that serves as a one-man-communication center. When the internet and smart phones fail, Ham Operators become the most reliable way to pass emergency messages during disasters like the Joplin tornado and Hurricane Katrina.

Posting-Frequency: posted twice monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team had decided to consider |
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. After a successful trial |
period (90 days, through early July 2009), we decided to adopt this |
change permanently. |

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

October 7, 2012 - Southeast Iowa Hamfest

Posted: 30 Aug 2012 07:05 PM PDT
http://forums.qrz.com/showthread.php?359723-October-7-2012-Southeast-Iowa-Hamfest&goto=newpost

The Muscatine Amateur Radio Club and the Washington Area Amateur Radio Club will present the 28th Annual Southeast Iowa Hamfest on Sunday, October 7th, at the Muscatine County Fairgrounds, in West Liberty, Iowa. (The Wiener & Bratwurst Roast will be held Saturday, October 6th, from 6:00pm to 8:00pm.) The Hamfest will be held on Sunday, October 7th, from 7:00am to 1:00pm. It features indoor and outdoor flea market, commercial vendors, license testing, food and drink. There will be testing for all Amateur Radio license classes from 9:30am to 11:30am. All tickets are $7. Children age 14 and under are admitted free. Gates open at 7:00am. There will be hourly drawings for door prizes, including a cash grand prize drawing. Indoor flea market table space is available for $10 per table. A "Tailgating" flea market space is free with paid admission and available on a first come, first serve basis. Electricity will be available for a fee. Vendor setup will commence on Saturday, October 6th, from 3:00pm to 9:00pm, as well as Sunday, October 7th beginning at 5:00am. Overnight camping will also be available for a fee. For more information, visit http://www.muscatinehams.org/hamfest.html or contact Tom Brehmer, N0LOH, at (563) 263-3097 or n0loh@live.com.

RepeaterBook - The Free Repeater App for the USA and Canada.

Powered by the popular community database of RepeaterBook.com and

software of ZBM2.com RepeaterBook, enables you to easily find repeaters
across the USA and Canada, for free and without a network connection.

https://play.google.com/store/apps/d..._result#?t=W10.

☐ No network connection required.

☐ Use network, GPS or a grid square to find Repeaters.

☐ Displays your grid and selection distance.

☐ Comprehensive selection, sorting and display options.

☐ Displays distance, heading and full repeater details.

☐ Fast and flexible, designed to help you use the repeater network.

☐ Easily submit updates and additions from within the app.

☐ Supports BlueCAT - FT-857 / FT-857 Bluetooth CAT interface

Touch a repeater to instantly set your radio, no more fiddling with

CTCSS, frequency and offsets.

For our friends outside North America we have our popular Repeater app.

RepeaterBook and Repeater will always be free.

1656. SARL News in English 1/9/2012

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-01 16:22:53 UTC
From: website@sarl.org.za
Message-ID: <035ED42DAC5E4EAE89D9B3CD165EAA6A@ZAJNBTCSARL01>
Source record: 2123
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

SARL NEWS - SUNDAY 26 AUGUST 2012

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa, with a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe to receive future bulletins by e-mail.

Your newsreader this morning is (name), (call sign), on 145,725 and 7,066 MHz from Pretoria, with relays on 3,695 MHz SSB. (Other newsreaders change to suit).

SILENT KEY

It is with regret that the Port Elizabeth ARS has to announce that one of their long standing members, Dudley Forsyth, ZS2AW, passed away on Sunday 26 August. He was 91 years old and was first licensed as ZU2D in 1936 when he was 15 years old. He served during WWII and was a POW in Germany. After the war he obtained the ZS2AW call sign.

We offer our condolences to his family and friends.

(PAUSE)

In the news today:

PLANNING TO WRITE THE RAE IN OCTOBER?

IARU SAYS IT WOULD WELCOME DOT RADIO DOMAIN

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

PLANNING TO WRITE THE RAE IN OCTOBER?

The closing date for the October RAE is on Monday 10 September. Please note the new closing date. It is 10 days earlier than before to accommodate the requirements of ICASA. Details of how to register for the examination can be found on www.sarl.org.za, click on licensing in the left hand column and select the link amateur radio examinations.

It is important to follow the instructions to the letter and to ensure that all forms are duly completed and forwarded to admin@sarl.org.za or by fax to 086 299 0566. Please use a black pen and write clearly in

block letters. For assistance, call Mariska at 011 675 2393. No late entries can be excepted.

Affiliated clubs wishing to facilitate an exam centre should ensure that an examiner and an invigilator are registered by 6 September latest.

IARU SAYS IT WOULD WELCOME DOT RADIO DOMAIN

The International Amateur Radio Union says that it will back the European Broadcasting Union proposal that the top level Internet domain dot radio be used to help to create a global radio community. IARU President Tim Ellam, VE6SH, says that his organization believes that the proposal, to be submitted by the European Broadcast Union, could provide a unique opportunity to standardize radio domain names on the Internet.

In a recently public made letter, VE6SH said that he recommends that the dot radio domain proposal be approved by the Internet Corporation for Assigned Names and Numbers. European Broadcast Union Director General, Ingrid Deltenre said the International Amateur Radio Union comments are an expression of confidence in the proposal. The complete story on the new dot radio domain and how it will impact all spectrum users is on-line at tinyurl.com/iaru-dot-radio

ARRL CENTENNIAL CONVENTION TO BE HELD IN HARTFORD

The ARRL has announced that the organization will hold its 2014 national Centennial Convention in Hartford, Connecticut, from 17 to 20 July. The Convention will mark 100 years of the ARRL's founding that took place in the city of Hartford. The theme for ARRL's Centennial year is Advancing the Art and Science of Radio Since 1914. More information is on-line at www.arrl.org/expo.

NORTH CAROLINA TEEN NAMED RECIPIENT OF ARRL'S 2011 HIRAM PERCY MAXIM AWARD

Derek Brown, W4DTB, of Chapel Hill, North Carolina, was named the recipient of the 2011 Hiram Percy Maxim Award. Derek, who is 14, has been licensed since 2010 and holds an Amateur Extra class license.

He first became interested in Amateur Radio after reading an article in MAKE Magazine. "After I read the ARRL Ham Radio License Manual, I went to the local club, the Orange County Radio Amateurs to take my Technician test," he told the ARRL. "That same evening, I met my Elmer, Bruce Meier, N1LN, who inspired me to finish the next two tests. He helped me build a station, including my first radio that I bought at a swap meet. With his help, I put up a vertical antenna in my backyard. Unfortunately, a tree knocked down the antenna about two weeks ago and broke the mounting bracket, so I'll be offline until after we get the replacement parts."

He is the founder of the Youth Amateur Radio Club of America (YARCA), which aims to further youth in Amateur Radio; one of YARCA's initial target audiences is Scout troops. The site includes license test training and a Boy Scout Radio Merit Badge Workshop. Derek said he is currently planning for YARCA to hold a Badge Day for local Boy and Cub Scouts. He is also an ARRL Public Information Officer (PIO).

When not on the radio, Derek spends time as a Computer Science intern, where he is creating computer programs in a variety of languages. He is also a Lincoln-Douglas debater and will be travelling to tournaments across the country this year. He will be entering his first year at Durham Academy in Durham, North Carolina this autumn.

The Hiram Percy Maxim Award is given to an ARRL member under the age of 18. It is intended to provide a tangible reward to those deserving young amateurs who contribute their time, skills and energies daily through their commitment to Amateur Radio.

CONTEST NEWS

SARL HF Digital Contest. The Competition Committee received eleven single operator logs and one multi-operator log for the Digital contest held on 19 August 2012.

In the single operator class, Noel Hammond, ZR6DX, with 127 points beat Brendon Muller, ZS4BM, with 125 points for first place. Marius Snyman, ZR6MS, with 120 points took third place. Francois Reynecke, ZS6FDX, and friends participated as a multi-operator station and made 5 points.

Rohan Schreuder, ZS6RJS, achieved the highest score on a single band with his 99 points on 40 metres. In the Club Competition, the East Rand Branch took top honours with 199 points, followed by the West Rand ARC with 127 points and the Bloemfontein ARC with 125 points.

Congratulations to Noel, Rohan and the East Rand Branch.

The Contest Committee has already received 14 logs for the HF CW contest held on Sunday 26 August. The closing date is midnight on Monday 3 September.

The second leg of the SARL VHF/UHF Analogue and Digital contest will be held from 10:00 UTC on Saturday 15 September to 10:00 UTC on Sunday 16 September. Activity will be on 6, 4 and 2 metres as well as 70 and 23 cm and the higher bands. Read the complete rules from page 32 of the 2012 SARL Contest Manual, there is too much to include here in the bulletin.

CLUB NEWS

At the AGM of the Potchefstroom Amateur Radio Club held on 25 August 2012 the following were elected as committee members for 2012/13: Chairman: Stef Terblanche, ZS6AOK Vice-chairman: Joe Mayer, ZS6ANW Treasurer: Chris Viljoen, ZS6BYQ Secretary: Johan Bamberger, ZS6LVG Technical: Stef Terblanche, ZS6AOK Member: Dawie Genis, ZS6GWD Social: Annetjie Terblanche, ZR6BYG

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels but that the outlook is very promising. A returning sunspot region is crackling with C-class flares as it is rotating into view. There is also a good probability for M-class flares. Sunspot growth is also observed around various sunspots.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 56.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. 10 m openings will be less frequent due to the moderate solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 3 September - Closing date for log submission for the HF CW Contest. 6 September - Clubs wishing to facilitate RA examination centres must register examiners and invigilators before this date. 10 September - Last day to enrol for the October RAE. 15 and 16 September - SARL VHF/UHF analogue and digital contest. 30 September - Nominations for MTN sponsored SAARDT awards to be in to saardt@intekom.co.za.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Martin Schwella, ZS4MS, and edited George Honiball, ZS6NE.

Thank you for listening, 73. /EX

http://forums.qrz.com/showthread.php?359810-Colorado-QSO-Party-Sat-AM&goto=newpost

I don't know why this was not posted here. This one is a challenge since
there are some counties in CO with only a handful of amateurs. Like mine,
there are two of us that I know of, on HF. Hope you will play along.

http://ppraa.org/coqp

I'll be there with my new call, not yet in the Zed...NA0AA from Eagle
County.

Selah!

Billerica Ham Radio Fans Band Together:

Posted: 31 Aug 2012 05:03 PM PDT
http://www.eham.net/articles/28912

Billerica, Mass. -- The biennial New England chapter of the Amateur Radio Relay League's convention at the Boxborough Holiday Inn, held Aug. 23-26, drew amateur radio or "ham" radio enthusiasts from around the region. Participants included those from neighboring communities such as Billerica and Chelmsford, but also from throughout New England and even New York. Those in attendance took in classes, demonstrations, an equipment flea market, an event banquet and more. The event, held every two years, draws ham radio enthusiasts from all backgrounds and generations, from college students to retirees.

//
Radio to the Rescue -- Hams Establish Link with World After 1964 Earthquake

Posted: 31 Aug 2012 05:03 PM PDT
http://www.eham.net/articles/28910

In 1964, when amateur Ham radio operator Zilla Maile wanted a new, state-of-the-art radio, she knew the man to contact: Al Hershberger, owner of Hershberger's Radio and TV store in Soldotna. What Maile didn't know was the important role that synchronicity and her new radio would play during one of the most memorable events in Alaska history.

Somaliland: Radio Hargeisa Broadcasts Received Worldwide on 7.120 MHz:

Posted: 31 Aug 2012 05:03 PM PDT
http://www.eham.net/articles/28909

HARGEISA (Somalilandsun) - The installation of the new Radio Hargeisa transmitter is a success. This was revealed by Mr. Don Jensen who added that Listeners in Japan, India and Europe are beginning To hear Radio Hargeisa on a frequency of 7,120 kHz, with generally good signals For tests noted at various times between 1500 UTC (universal time) and 1900 UTC hours (6 to 10 pm Somaliland time) Mr. Don Jensen a retired American journalist who further revealed that the station, which has been noted since Monday, is yet to be received in the US conveyed this information to Somalilandsun via email messages that included a taped transmission with audible soft Somali music. The American ham radio operator further informed that there

is also a considerable interference from ham transmissions since the 7,120 kHz frequency used by Radio Hargeisa is in the middle of the amateur radio (ham radio) band.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 26th-August, through Sunday, 2nd-September there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5V, TOGO (Update). Wim, ON4CIT, will be active as 5V7TH from Togo (Grid Square JJ06rf) between October 26th and November 5th. Activity will be on 40-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. He will focus on JAs and use an Icom IC-7000 into a 6-band Broad-

band hexbeam and verticals for 30/40m. Suggested frequencies are:
CW - 10112, 14022, 18072, 21022, 24892 and 28025 kHz
SSB - 7070, 14190, 18132, 21292, 24972 and 28492 kHz
RTTY - 7042, 10142, 14082, 18102, 21080, 24922 and 28090 kHz
6m - 50.090/CW, 50.120/SSB and 50.200/RTTY

Wim request on SSB to PLEASE call him only using the "International Radiotelephony Spelling Alphabet". QSL via his home callsign, direct (2 USDs/EU and 3 USDs/US), by the Bureau, LoTW (uploaded year later) or by the ClubLog's OQRS. For more details, visit: http://www.dxpedition.be/5V7TH.html

5X, UGANDA (Update to OPDX.1076). Nick, G3RWF/5X1NH, announced this past week he is "considering how best to get 160 on the air as it is the only band I have not worked and reckon there must be un-met need!" He works at a community university, so this is not a DXpedition but a solo operation with plenty of time to get on the air. He is looking for help/advice in erecting a simple antenna for 160m. Nick states, "I have access to roach poles (30 footers) and can get max height of about 50 feet. No high trees locally and insufficient room for beverage antennas. Contemplating a 50 ft vertical with capacity top loading and some induction at the feed point. I will get grounding as good as possible within local constraints (small site, vehicles near the house etc). What do you think? Grateful for advice on antennas. I would only work CW - lots of experience on HF (110k QSOs from 5X on the other bands) but novice on 160 DX - advice (polite) also invited on operating." Nick's E-mail address is: nick@henwood.demon.co.uk

6V, SENEGAL. Enrico, IK2FIL, will once again be active as 6V7X from Le Calao between September 24th and October 4th. His activity will include the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/Single-Band (??)/Low-Power entry. Operations will be on 80-10 meters using Elecraft K3 + KAT3 + KXV3 + KFL3A-400. Outside of the contest, Enrico will be on 30-10 meters RTTY only. QSL via LoTW, eQSL, by the BUREAU or direct to IK2FIL. Visit his Web page at: http://6v7x.jimdo.com

7P8, LESOTHO (Update to OPDX.1051). Donovan, ZS2DL, has finalized his team of operators and plans to arrive in Lesotho on November 21st, and leave on December 4th. Operations will possibly take place between November 23rd and December 3rd. Naturally this means they will be an entry in the CQWW DX CW Contest (November 24-25th). The callsign will 7P8D. Operators mentioned are made up of three teams:
South Africans - Donovan/ZS2DL (CW), Mitch/ZS2DK (SSB/RTTY) and Roger/ZS6RJ (CW/RTTY)
Germans - Jo/DJ3CQ (CW), Chris/DL2MDU (CW) and Emil/DL8JJ (CW)
N. Americans - Frosty/K5LBU (SSB,RTTY), Keith/VE7MID (CW) and Neil/VA7DX (CW)
Activity will be on 160-10 meters using CW, SSB and RTTY with a minimum of three stations (possibly 5 stations) on the air 24/7. The suggested frequencies are:
CW - 1820, 3520, 7026, 10105, 14020, 18075, 21020, 24895 and 28015 kHz

SSB - 1840, 3780, 7160, 14185, 18150, 21220, 24945 and 28480 kHz
RTTY - 7038, 10138, 14085, 18102, 21085, 24922 and 28080 kHz
ADDED NOTES: They will be listen up.
NO 60m - Licence does not cover it-Sadly!
QSL direct via: LESOTHO DXPEDITION 2012, P.O. Box 29169, Sunridge Park, 6008, SOUTH AFRICA (w/2 USDs - Please no IRC as it is difficult to convert at the post office). A OQRS system (PayPal) will also be implemented just before the expedition. Logs will be uploaded to LoTW within 6 months after the DXpedition has ended. For more details, visit: http://www.zs2dl.co.za/7P8D.html

8P, BARBADOS. Dean, 8P6SH, will be active as 8P2K during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m) entry. QSL via KU9C.

9J, ZAMBIA. Shinichi, JA7SGV, is now active as 9J2JA from Zambia. His length of stay is unknown. Activity has been on the HF bands (30/20/17/15 meters) using CW. QSL via his home callsign.

AH0, MARIANA ISLANDS (Update). Kuroi, JH0MGJ/AL5A, will be active as AL5A/AH0 from Saipan Island (OC-086) between September 7-9th. He informs OPDX that he will stay at the rental shack on Saipan and will operate for just several (ten) hours on 40-10 meters using a 1 kw on SSB or CW. Also, he states that he will bring his FT-817 with him and be active as AL5A/AH0/QRP several times. Kuroi states that he will be looking "for many friends who will be in the Europe". QSL via LoTW. If you want a paper QSL (if it is necessary), his QSL Manager is JA7JEC.

C6, BAHAMAS. Operators George, KQ8Z/GM0IIO, will be active as C6AZZ from Grand Bahama Island (NA-080, WLOTA 0527, WW Loc. FL06UO) between October 24-31st. Activity will focus on 6 meters (CW, SSB, FM) if there are any band openings, otherwise on 80-10 meters, mainly CW with some SSB using his Icom 756Pro3. His activity will also include the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m)/Low-Power entry. George will use a 80m OCFD antenna at 40 feet. The 20m antenna will be a full sized 20m delta loop right on the beach vertically polarized with the apex at 40 feet. QSL via KQ8Z.

CR3/CT9, MADEIRA ISLANDS. German operators Helge/DG3FAW, Knut/DJ6KS and Matthias/DJ8OG will be active as CT9/homecall from AF-014 between September 4-11th. Look for Matthias/DJ8OG to be active as CR3L during the Worked All Europe DX (WAE) Contest (September 8-9th) as a Single-Op/High-Power entry. QSL CR3L via DJ6QT, all others via their home callsigns.

DXCC NEWS. Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
XU1A • Cambodia; 1998 Operation

Bill states, "After reviewing new information, we have concluded that the XU1A documentation and operation are acceptable and sufficient and that QSLs will be accepted for DXCC. If you have had QSLs rejected please

send an E-mail to <bmoore@arrl.org> to be placed on the list for update.
(If you remember the submission in which you included the QSL please note
this to expedite the search for the rejected QSO)."

DX MAGAZINE'S MOST WANTED SURVEY. Carl, N4AA, editor of "QRZ DX" and
"The DX Magazine", reports to DXers: "Effective immediately the 2012
Most Wanted Survey form is available on the DX Publishing web site.
Please go to: www.dxpub.net and under the heading MOST WANTED SURVEY
you will find a link to the form. Click on '2012 SURVEY'.
Several prefixes are in BOLD type. These are ones which may cause
confusion due to their similarity, i.e. 3D2, VK9, VK0, etc. Please use
care when marking these to be sure the correct one is counted.
There are a few shown in RED. These indicate either an addition to the
list from last year or a change in the prefix (ZK2 is now E6).
There is a 'block' at the bottom of the form for you to send along any
comments, or to include any country that you need which is not on the
list.
Please pass the word to your friends and to any DX clubs in your area
that the survey will be available until October 15th.
Thanks for your participation. 73, Carl, N4AA"

DXPEDITION VIDEO AVAILABLE. The HK0NA Malpelo Island DXpedition DVD is
now available and can be ordered online at: http://www.k4uee.com/dvd

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting
their videos on YouTube and other Web services, we decided to list them
(possibly) each week. For this week's listings:
2012 - ID9A Strombolicchio Island (EU-017):
http://www.youtube.com/watch?v=eOfROfax0
2008 - VE2DXY CQWW Contest DXpedition to Zone 2:
http://www.youtube.com/watch?v=_AKj_UMnY
2008 - Ham Radio QRP DXpedition into the Needles Utah's Canyonlands:
http://www.youtube.com/watch?v=vyovWRd-0 (Part 1)
http://www.youtube.com/watch?v=vL8D63REc (Part 2)
http://www.youtube.com/watch?v=oOU0eL24w (Part 3)
2003 - TX4PG Marquesas Island DXpedition:
http://www.youtube.com/watch?v=oCP_6r70E

If you have a DXpedition 'video' available on the Web and would like to
have it listed in the OPDX, PLEASE send the URL to use, and we will publish
it.

E5, NORTH COOK ISLANDS. Andy/AB7FS (E51AND) and his XYL Kathy are still
(as they call it) stranded on Palmerston Atoll (OC-124), North Cook
Islands, possibly until September 16th or 17th. It does not sound like
the couple is having a good time there. Andy states, "I have minimal
equipment with me and there are no stores or supplies on island so it is
'make do with what we have!'." He is operating under a solar charged
battery power for his FT857D into a Snowdonia Radio Co. SRCX80 5m vertical,
and for CW he is using a hand key and paper logging in a school exercise
book. He states, "Life on island is COMPLETELY different from anything

one might experience in the U.S. or Europe and operating is interrupted
by things like the battery being used to pump water, the social demands
of my host family, a visit from the island secretary . . . ." To read
his complete report, go to QRZ.com under E51AND. QSL via AB7FS.

E5, SOUTH COOK ISLANDS. Rudi, ZL2KBR, will be active as E51KBR from
Rarotonga Island (OC-013) between November 12-19th. Activity will be
holiday style on 20-10 meters using SSB, RTTY and PSK31. QSL via ZL2KBR.

HG1912, HUNGARY. Members of the Puskas Tivadar Radio Aamateur Club (HA5KHC)
will be active as HG1912PTTT from Budapest between now and September 30th.
Activity is to celebrate the 100th anniversary of the "Puskas Tivadar"
Telecommunications Technical High School. Operations will be on all HF
bands using CW, SSB and the Digital modes. QSL via HA5AUC by the HA QSL
Bureau. Visit the club's Web page at: http://www.ha5khc.hu

IOTA NEWS.............
EU-052. Dirk, ON5CT, will be active as SV8/ON5CT/P from Corfu Island
(Greek IOTA INS-042) between September 4-18th. Activity will
be on 20/17/15/12/10/6 meters using SSB and RTTY (preferred).
QSL via LoTW or eQSL. NO PAPER QSL.

NA-124. (Update) Operators Felix/XE2I, Saul/XE2HQI, Tony/XE2HVF,
Enrique/XE2AA, Fred/KG6HGK, Craig/XE2HWJ, Ana/XE2IHA, Jose/
KD6AFA and Manuel/XE2HUQ will be active as XF1F from San
Francisco Island between October 7-13th. Activity will be on
all HF bands using CW, SSB, RTTY and PSK. The team will use
Hexbeams for HF bands and wires for lower bands. QSL via XE2HUQ.

OC-233. Scott, VK7HVK, will once again be active as VK7HVK/p from
his holiday home on Bruny Island between September 9-14th
(pending repairs to the tower). His activity is usually 20
meter SSB. QSL via his home callsign direct (see QRZ.com).

OC-271. (New One!) Joppy, YB8XM, and possibly another operator will
be active as YB8XM/6 from Babar Island between November 1-6th.
QSL via YB9BU. Look for more details to be forthcoming.

KH8, AMERICAN SAMOA. Anci, JA2ZL, will be active as KH8/JA2ZL from Pago Pago, American Samoa (OC-045), between October 23-29th. Activity will be on 80-10 meters using CW, SSB and RTTY. He will use a TS-480HX into a HX-5Bi Hexbeam, 30m vertical, 2 element 40m and 80m vertical. QSL via his home callsign, direct or by the Bureau.

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will be active as KP2MM during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/ Low-Power entry. QSL via LoTW. For more details, see: http://www.n2tta.info

NH8, SWAINS ISLANDS. Two members of the 19 international NH8S DXpedition team, Joe/W8GEX and Dietmer/DL3DXX, arrived on American Samoa late Thursday evening to coordinate last minute details. The reminder of the team will arrive in Pago Pago late Monday evening, September 3rd. They anticipate leaving for Swains Island on Tuesday morning for the 24 hour boat trip. Since the equipment is already there, they should be able to get right to work on erecting the antennas and setting up stations. They are anxious to get on the air and will be active as soon as possible.
Joe, W8GEX, mentions in his "60m Newsletter" this week that [edited] "This tent/generator operation will start around September 6th, and last until September 18th. I'll be on channel 5 when I am on, unless I have QRN and then I'll move the channel 4. It will take a few days after the operation has started before I think about getting on 60 meters. San, K5YY, will be my pilot station, and he will keep you posted on my activities. I plan to look for Europe around 0400z during their sunrise. I think the best time for NA should be between 0900z to 1100z. If you don't hear me, feel free to call me as we may just be monitoring the channel. Keep in mind I have my regular three hour shift to perform on the other bands, and I'll work you guys in between. I'll try to have Jerry, WB9Z, who's a great op and knows the 60m band, help me out. Please give your call many times in order for us to get your call. I will have a beverage so that will be helpful on receive. I am using a vertical I have made, and our propagation charts says we should be able to work NA East coast at S3 levels. Let's hope this is the case to get some W1s and W2s in the log." More details on the NH8S operation, see the Web site: http://nh8s.org

LAST MINUTE NH8S UPDATE BEFORE GOING TO PRINT:
"SAFE LANDING ON SWAINS ISLAND
SWAINS ISLAND 2012 NH8S DX-PEDITION
The weather was absolutely gorgeous on Swains Island for off loading the cargo and David's crew. They arrived on Saturday afternoon, August 25, 2012, and had enough tide for the landing craft to off load most of the fuel, supplies, and David and his crew. They immediately set up a couple of tents at the beach for shading while awaiting supplies from the ship.
Then Sunday morning at high tide they off loaded the rest of the cargo.
The MV. Sili departed Swains Sunday @ Noon, and arrived Pago Pago early Monday morning August 27, 2012.
Hands down, the star of the show was this old landing craft that was

specially repaired for this operation. It was able to take all the cargo fuel and passengers all the way to the beach with about 5 trips. David and his crew are currently clearing areas to construct stations, sleeping quarters and restroom facilities. Since the arrival of Team Leader Joe Pater And Dietmar Kasper, David has been working with Joe on specific station Locations on the island.
Everything is in place and the SWAINS ISLAND 2012 NH8S DXPEDITION is shaping up. We are finalizing our food supplies and await the arrival of the rest Of the Team set for Monday night, September 3, 2012. Then the Team and cooks will depart for Swains by noon September 4, 2012. The only other thing that will make this more exciting is if the Team members will bring with them all their &#65533;McGaiver Tricks&#65533; for 2 week survival on a remote island like Swains Island. Oh I hope everyone likes fish because the fish is really biting, and the reef is full of lobsters.
- Alex Jennings"

To see the NH8S Press Release with pictures, visit the NODXA FaceBook page at:

PACIFIC TOUR (5W, KH8 and Possibly ZK3). Opertaors John/N7CQQ and Ron/N6XT are on an exploratory trip to American Samoa (KH8), Western Samoa (5W0) and possibly Tokelau (ZK3). They depart the West Coast USA on Thursday, August 30th, for Pago Pago, American Samoa, via Honolulu, Hawaii. John and Ron will be in American Samoa to see the Swains expedition group off from American Samoa. During the 30 day trip to the Samoa area, John and Ron hope to get permission to visit Tokelau for two weeks. Their equipment will be shipped to Samoa via US Postal Service to Pago Pago, American Samoa. They will take a flight from American Samoa to Apia, Western Samoa. They hope to find the Tokelau Visitors center open on Saturday where they hope to get permission to visit Tokelau. They will return to American Samoa to get their gear, see the Swains guys off and take a ferry either to Tokelau or back to Western Samoa. If all else fails, they will set up shop in Western Samoa to operate and continue to try to get permission to visit Tokelau. Western Samoa has a few islands that they might visit during their stay. John hopes to get his old 5W0QQ callsign and Ron will get his special 5W callsign. They also might operate from American Samoa during late September while they await their flight home. John and Ron will both be using ICOM IC 7000 transceivers with SteppIR BIG Vertical antennas. They will construct wire antennas for 80 and possibly 160 meters. They might have access to an amplifier on Western Samoa, as John, N7CQQ, is taking two 3-500z tubes to Atsuo Sakuma, 5W1SA, the only Ham at Western Samoa. Support for this mini expedition was received from SteppIR Antennas, ICOM America, The DX Store, and Radio World of Boulder City, Nevada. QSL to Ron and John via their QRZ.com home callsign addresses.

PC12, NETHERLANDS (Special Event). Fred, PA0FAW, will be operating PC12WSF between September 3-30th. Activity will take place during the World Statues Festival in Arnhem. Operations will be on CW, SSB and PSK etc. Fred has

the reference numbers: DIG1487, ISWL PA-11092 and WAB-11722. QSL via
PA0FAW, direct, by the Bureau or EQSL (NO LoTW and SWLs are welcome).
More details will be on QRZ.com.

OLD QSL COLLECTION (Update). Jean Michel, F6AJA, wants to remind everyone
to visit the Les Nouvelles DX (LNDX) Web page to see more than 10000 old
QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2011) with more than
300 QSLs
- At least one card for each 60 deleted DXCC countries (more than
1400+ QSLs)
- Nearest the totality of current prefixes, disappeared now (more
than 3600+ QSLs)
- Album for stations from North Africa 1945-1962 (300+ QSLs)
- More than 850 QSLs from the Antarctic bases.
- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques
Francaises).
- More than 300 QSLs for the rare French Pacific Islands such as
FK/C, FO/C, FO/A, FO/M, FO/C and FW
- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
- The FG, FM, FP, FS, FY stations from 1945 to 1970
- More than 1400 cards for the old timer with more than 130 countries
before 1945.
- Cards from the French Department before 1945.
- At least one card from each of the states in the U.S. before 1945.

The URL address for the Web site is: http://LesNouvellesDX.free.fr
Some cards are still needed for the collection, and your particip-
ation is welcome. Please visit their site and give them your comments
by sending an E-mail to: LesNouvellesDX@free.fr

QSL ROUTE CHANGE. Khalid, A61BK, has decided to manage his own cards.
As of August 20th, all cards for Khalid should now go direct to him at
his new QRZ.com address. Buzz, NI5DX, will no longer be confirming any
cards for A61BK. However, he will answer any A61BK cards that arrive in
the next Bureau shipment to NI5DX. After this shipment, no A61BK cards
will be confirmed via the Bureau either.
Effective immediately, also NI5DX will no longer be answering requests
for any of the special event callsigns (A60HD, A60A, A60JJ, A60ITU,
A60WARD, and A60DWC). Please check QRZ.com to see the QSL route.

S7, SEYCHELLES. Operators Luca/I5IHE, Simone/IK5RUN and Dan/I5OYY will
be active as S79LC, S79UN and S79YY, respectively, from Praslin (AF-024)
between October 21st and November 4th. Activity will be holiday style on
80-10 meters using CW, SSB and RTTY. Equipment will be a Elecraft K2 and
KX3 transceiver into home made 5 band vertical antenna (on the beach) and
a G5RV. QSL via their home callsign, direct only or LoTW. Online logs
will be available at: http://www.ik5run.it/s79.html

T6, AFGHANISTAN. Martin, DL3ASM, is now active as T6SM from ISAF Camp
Marmal, Mazari Sharif, until the end of November. Activity has been on

20/17/15/10 meters using CW (preferred) and SSB. He is operating with an Icom IC7000 with 75 watts into a 7m Vertical antenna. QSL via his home callsigns.

TC, TURKEY (LH Op!). Members of the "TC Special Wireless Activity Team" (TCSWAT) and the "Giresun Radio Amateurs and Nature Sports Club" (GITRAD) continued to activate lighthouses in Turkey this past weekend for their "Western Blacksea Lighthouses On The Air (WEBLOTA) Award". The next and last operations for this award will take place in September. In mid-September look for TC6GLH from Sinop Gerze Lighthouse and the last activation will be TC2ZLH from Zonguldak Lighthouse at the end of September. QSL via TA1HZ (please do not hurry to send for QSL cards, they will be printed at the end of January 2013). For more details about the lighthouses award, visit: http://www.qrz.com
http://www.tcswat.org/awards/WEBLOTA/index.html

TI, COSTA RICA. Operators Juan/TI2JCY, Carlos/TI2KAC, Mauricio/TI4ZM, Eddie/K4UN, Bob/W4BW, Keith/W4KTR and Lex/W4XO will be active as TI8M from Costa de Pajaros, located in the North West Pacific Coast from Costa Rica, during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. Look for activity before, after and during the contest on 160-10 meters. QSL via route on QRZ.com.

TT8, CHAD (Update to OPDX.1072). Members of the "Italian Dxpedition Team" will be active as TT8TT from N'Djamena between October 3-16th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1072. Operators mentioned are Alfeo/I1HJT, Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT. The pilot station is Art/IK7JWY. The team will pay particular attention to Japan and the West Coast, as Chad is 40th and 23rd, respectively in the world ranking of the most wanted. QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A TT8TT survey (for needs), a log search and an OQRS are all available on their Web page at: http://www.i2ysb.com
Official forum is at: http://bit.ly/NVQaav

V7, MARSHALL ISLANDS. Rick, WH0AI (ex-T32AI), is currently active from Kwajalein Island (OC-028) from the Kwajalein Amateur Radio Club station and using the club callsign V73AX. Activity has been on 20/15/10 meters at various times using CW and SSB. Rob, KD7H, had a CW QSO with him, and was told by Rick to QSL via his WH0AI QRZ.com address, but PLEASE use "green stamps" to help with return postage instead of IRCs. Apparently, his wife is having a problem exchanging IRCs for the return postage. Rick will be on Kwajalein for a while working and is trying to obtain a "V73" callsign (he has requested V73AI) which he hopes to have within several days. Also, Rick plans to be active during the upcoming contest season.

ZA, ALBANIA. Operators Franta/OK1HH and Bob/OK2BOB will be active as ZA/homecall between September 12-20th. Activity will be on 160-6 meters using CW and SSB. QSL via their home callsigns.

ZD9, TRISTAN DA CUNHA (Update). Operators Martin/G3ZAY and Robert/M0VFC
will be active as ZD9UW from Tristan da Cunha possibly on September 27th
for 7 days. They will leave Cape Town on September 20th, for a seven day
trip (depending on the wx) aboard the "Baltic Trader". Activity is not
expected to be on all bands because of the time they have. Logs will be
uploaded to ClubLog and LoTW shortly after their operation (or during,
if an Internet connection is available). QSL cards will be handled by an
OQRS, direct to M0VFC, or via E-mail for Bureau requests. For more details
and updates, visit their Web page at: http://www.zd9uw.org.uk
ADDED NOTE: They state on their Web page, "We would like to try and raise
some extra funds for the Tristan da Cunha Educational Trust Fund, and
plan to take some QSL cards to the island. Anyone willing to donate 25
USDs (maximum of 100 donors) will receive a direct card mailed from
Tristan for their first two QSOs (the rest to be posted at no extra cost
to the recipient on return to the UK). We'll add details of how to donate
shortly - check back here soon, or email M0VFC."

Licence Examination

There is now just under three weeks left to Thursday 20 September which is the closing date for the next Amateur Station Licence Examination which will be held on Thursday 4th October at 2 p.m.in the ComReg Offices in Dublin.

Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis.

Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

---

2 Metres Counties Contest

Perhaps it was due to the good weather, but we noticed that there were quite a few portable stations active during last Sunday's counties contest. Two clubs went portable - Dundalk Amateur Radio Society, who operated in their home county of Louth, and Shannon Basin Radio Club who were on Sliabh an Iarainn. We also heard David EI7GEB, who had climbed Sorrell Hill in Wicklow, Pat EI8GZB on Gallows Hill County Clare, Michael EI9GGB who was on Tara Hill in Wexford and Joe EI7GY in County Laois on the Slieve Blooms. There were plenty of fixed stations on the air as well, so the band was reasonably busy for most of the contest. Those who participated should send their logs as soon as possible to contestmanager \at\ irts.ie

---

IRTS Shop update

Following discussion with our friends at RSGB the Society has agreed to give a 10% discount to IRTS members on purchases from the RSGB Shop. IRTS members should select the "Non members Price" before placing the order and then enter the special IRTS Discount Code during the checkout process. At this point the 10% discount will be calculated. IRTS

members, who are also RSGB members, should continue to select the "RSGB Member's Price" to get the RSGB Member's discount and not use the IRTS Discount Code. It is not possible to obtain both discounts! The IRTS Discount Code will change from time to time and will be published for members in Echo Ireland. Just follow the 'Book Sales' link on the IRTS website.

North Cork Radio Group

NCRG will be hosting their annual Radio Rally & Electronics Fair to be held on Sunday, 9th September 2012 at the Roebuck Room, Commons Inn, Blackpool, Cork.

Doors open at 11am and admission is 5 per person (children are free). Raffle tickets will also be available at the door.

The usual traders will be present. The AREN trailer will also be at the venue and hopes to have a HF /VHF station set up for visitors to see or work from. Due to high demand, anyone wishing to reserve a table, or anyone interested in setting up a stall, should contact Pat Thompson (EI2GHB) on 085 1407715 or Edwin Van Mierlo (EI2HEB) on 086 3885741, or alternatively via email atei2heb /at/ ei1nc.com, as soon as possible to avoid disappointment.

Special room rates are on offer, with single rooms at 45 and double/twin rooms at 60 (including breakfast), please quote "North Cork Radio Group" when booking. We would like to congratulate Mick EI9GNB and his wife Tip on the birth of their daughter, Amy, born on Saturday, 18thAugust at 13.45pm.

This year Dublin Bus celebrates its 25th Birthday.

To celebrate the event a Special Event Station EI25DB will be aired between 1st July 2012 and 30th June 2013. The station will be operated by current and former employees of Dublin Bus led by Declan EI9HQ and Pete EI4GZB. QSLs to Declan EI9HQ or on LOTW or HamLog.eu

---

DX News

The multi-national DXpedition to Swain's Island hope to be QRV by 6 September. This is a separate entity for DXCC purposes and counts as OC-200 for the Island on the Air Award. The callsign to be used is NH8S. The island is owned by the Jennings family and used as a copra plantation. It is culturally a part of Tokelau (ZK3) and has a population of 37 Tokelauans who harvest the island's coconuts. NH8S will be QRV on all bands until 18 September. Full details can be found on www.nh8s.org

Other Pacific activities in the coming week are KK6WW/KH0 and KH0R operated by JA6EGL and JE6DND from the Mariana Islands. They will be

there from 6 - 9 September.

The new E6 prefix will be heard from Niue Island when the calls E6M and E6RS are aired by W7GJ and ZL1RS. Activity is expected to start on 5th September.

Gerard ZS6KX is due to start work on Gough Island later this month. He has applied for the callsign ZD9KX. Gough Island counts as Tristan da Cunha for the DXCC award. This should not be confused with pirate activity from a station signing ZD9KN during August.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Telecom Invites Central Luzon Radio Groups to Inaugural 'Radshow':

Posted: 01 Sep 2012 05:46 PM PDT
http://www.eham.net/articles/28918

CITY OF SAN FERNANDO, Pampanga, Sept 1 (PIA) -- The National Telecommunications Commission (NTC) invites professional and amateur radio users, dealers, and broadcasters as well as socio-civic organizations, local government units, non-government organizations, and safety officers of private companies in Central Luzon to join the inaugural "Radshow (Radio Show)" on September 7 and 8 at the SMX convention center in SM Mall of Asia in Pasay City. "The conference-trade event, which was organized by the National Disaster Risk Reduction and Management Council (NDRRMC) and Commercial and Amateur Radio Transceivers Dealers Association of the Philippines (CARTDAPI), aims to create awareness on the importance of radio communications during disaster, a realization when cellular phone communications were adversely affected during recent typhoons," NTC Regional Director Azor Sitchon said.

On September 26, 1912, the then 31-year-old Reverend John Flynn presented two long, detailed reports on the Northern Territory to the Presbyterian General Assembly in Melbourne: one on the needs of Aborigines and one on the needs of white settlers. The assembly appointed Flynn superintendent of its Australian Inland Mission, which it established at the same meeting. The centenary of this event will be celebrated in Melbourne on September 22, with a special service at Scots' Church.

GB2RS NEWS

Sunday 2nd September 2012

The news headlines:

Amateur radio helps tracks Hurricane Isaac

Broadcaster vacates 40m amateur band

G5RP Trophy nominations sought

Amateur radio first responders along the United States Gulf shore were ready when Hurricane Isaac slammed ashore on 28 and 29 August. Members of the Hurricane Watch Net took to the air to track its approach and, although band conditions on 20 and 40m were not the greatest, the net continued and began passing storm conditions to the National Hurricane Center in Miami. The Net ceased its operation on the afternoon of Wednesday 29 August once Hurricane Isaac was downgraded to a tropical storm.

Radio Bangladesh has left 7105kHz in the amateur 40m band. They finished the experimental transmissions and are now using 7250kHz. The move is thanks to the many amateur radio users who reported the infringement on the band. Particular thanks go to the German regulator BNetzA, who made official complaints to Radio Bangladesh.

The G5RP Trophy is an annual award for the greatest progress in the DX field made by an RSGB member resident in the UK during the previous 12 months. The award is intended to encourage newcomers to the world of HF DXing. Nominations are being sought for up and coming DXers who have made rapid progress within the last year in the field of DXing. Nominees for the award do not necessarily have to be recently licensed. The HF DX bug can bite at any time! If you are an active DXer and would like to recommend someone to be awarded the G5RP Trophy for 2012, please send your nomination, with a brief outline of why you think they deserve the award, to Ian Greenshields, G4FSU, RSGB HF Manager, by email to ian.greenshields@gmail.com or by post, QTHR, to arrive no later than Friday 21 September. This prestigious award will be presented at the RSGB Convention on 13 October.

Dr Chris Bridges recently appeared on Sky News discussing why space is cool. On 15 and 16 September he will be giving two presentations to the AMSAT-UK International Space Colloquium at the Holiday Inn, Guildford, GU2 7XZ. The event is open to all. Chris will cover the Nexus Android Smartphone amateur radio satellite STRaND-1 that will carry both a

Resistojet and a Pulsed Plasma Thruster module. He will also cover STRaND-2, which will use Microsoft Xbox Kinect controller technology. These satellites are being built by volunteers from the Surrey Space Centre and SSTL. Further details are online at www.uk.amsat.org/9946.

The International Amateur Radio Union says that it will back the European Broadcasting Union proposal that the top level internet domain dot radio be used to help to create a global radio community. IARU President Tim Ellam, VE6SH, says that the IARU believes that the proposal could provide a unique opportunity to standardise radio domain names on the internet. The complete story on the new dot radio domain and how it will impact all spectrum users is online at www.tinyurl.com/iaru-dot-radio.

Copyright © RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

Telford & District ARS are holding their Amateur Radio Hamfest at Enginuity, Coalbrookdale, Telford, today, Sunday 2 September. Doors open at 10.30am and admission is £3, with accompanied children free. There will be new and second hand radio equipment, antennas and parts as well as a Bring and Buy. Refreshments will be available on site and there are two pubs nearby. Rally goers can obtain reduced admission to the Enginuity Museum for a real hands-on experience. There will be a special illustrated talk at 11.30am on Light Communications; be seated early as space is limited. For more information, speak to Martyn on 01952 255 416.

Dorking & District Radio Society will take part in the National Trust's Open Day at Polesden Lacy on 8 and 9 September. They will operate special event station GB0NT. Further details from Garth, G3NPC on 01737 359 472.

The North Norfolk Amateur Radio Club Car Boot Sale will take place on 9 September at Muckleburgh Military Collection, Weybourne NR25 7EG. Radio and non radio pitches are available from 7am, doors open 10am. The Radio Museum will be open and admission is free. For further information see www.gb2mc.com.

The Friskney & East Lincolnshire Communications Club Rally will take place in the Friskney Village Hall, Church Road, Friskney on 9 September. Details from Bren, 2E0BDS on 01754 820 060.

Now for the news of special events

Kent Weald Radio Club is operating GB1HA today, Sunday 2 September. The event is part of sponsored activities being held at the Headcorn Aerodrome, Kent, in aid of the air ambulance and other local charities, and to demonstrate amateur radio to any visitors. Operations will be on HF and VHF and is open to visits from the public.

Hinckley Amateur Radio Electronics Society will be running a special event station at the Shackerstone Family Festival today, 2 September. Directions for this event are at www.shackerstonefestival.co.uk, with the nearest postcode being CV13 6NB.

Preston Amateur Radio Society will be activating GB0PGY during the month of September to celebrate the Preston Guild, an event which takes place every 20 years. The first transmissions will take place today, Sunday 2 September, and then at various times through the month.

It is hoped that GB2OWM will be on the air Orkney Wireless Museum at Kiln Corner, Kirkwall. Operation is planned between Thursday 6 September and Wednesday 12 September during the 22nd Orkney International Science Festival. Listen out for the station on weekdays and Sunday afternoons between 2 and 4.30pm and Saturday morning between 10am and 12.30pm. Operation will be primarily on HF SSB.

GB1SKC will be on the air for Churches and chapels On the Air, organised by WACRAL, on Saturday 8 September.

And now the DX news compiled from 425 DX News and other sources

OE4JHW will be operational as 8Q7OE from the Maldives between 3 and 14 September. Activity will be holiday style on 10 through to 40m using SSB and BPSK. QSL via his home callsign, direct or by the bureau, alternatively use either Logbook of the World or eQSL.

Moise, F4EZG, who also operates from Madagascar as 5R8VE, will be active from Nosy Alanana off the coast of Madagascar until 3 September. This small island counts as separate from Madagascar and is IOTA AF-090. He will be active mainly on 15 and 20m.

Copyright © RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast. Michael DF8AN will be on the air as FR/DF8AN from Reunion Island in the Indian Ocean until 10 September. Look for him on SSB on 10, 15, 20 and 40m.

Yuki, JH1NBN will be on the air as C21BN from Nauru from 3 to 10 September. Activity will be on 10 to 40m. QSL to his home callsign.

Erik, LA2US is on the air as JW2US from Bear Island, IOTA EU-027, until November 30. He is there on work assignment at a meteorological station located about 50 meters from Tromso University. He is generally active on 20, 30 and 40 meters. QSL to his home callsign.

A large group of operators will be on the air as NH8S from 5 to 19 September from Swains Island. Activity will be on 160 to 6m, including 60m, using CW, SSB and RTTY, with seven stations active around the clock. QSL direct to AA4NN.

Now the contest news

Today, 2 September, sees the RSGB SSB Field Day finish at 1300UTC. Expect the 3.5 to 28MHz bands to be busy, the exchange being signal report and serial number.

The 144MHz Trophy Contest also finished today, 2 September, but at 1400UTC. It is hotly contested in the Open category, but there are four other categories and three of them are for single ops, so there are opportunities for all to strive to do well. The exchange is signal report, serial number and locator.

The IARU 144MHz Contest takes place at exactly the same time as the RSGB 144MHz Trophy and so also finishes at 1400UTC today, 2 September. The exchange in these two contests are the same and all those who submit a log for the RSGB event will be automatically entered for the IARU event, unless they specify otherwise.

Overlapping the last three hours of the 144MHz Trophy Contest, and then continuing for one hour on its own, the fifth and final 144MHz Backpacker contest also takes place today. In the Backpackers there are two permitted power levels, 3W and 10W. The exchange is signal report, serial number and locator.

The All Asian DX SSB finishes at 2359 today, 2 September. Using the 1.8 to 28MHz bands the exchange is signal report and age, although ladies are allowed to give 00.

The 144MHz UK Activity Contest takes place from 1900 to 2130UTC on 4 September. Using all modes the exchange is signal report, serial number and locator.

Next weekend, on 9 September, the second 70MHz contest takes place from 0900 to 1200UTC. Using all modes the exchange is signal report, serial number and locator.

Also next weekend, from 0000UTC on the 8th to 2359 on the 9th, the WAE DX SSB contest takes place. European stations can only work non European stations for this contest. Using all contest bands from 3.5 to 28MHz, the exchange is signal report and serial number.

And now the solar factual data for the period from Friday the 24th to Thursday the 30th of August, compiled by Neil Clarke on Friday the 31st August.

All the visible groups were small and magnetically simple and with it solar activity was at very low levels. On the 30th though, a sunspot group started to rotate into view over the south-east limb and solar activity increased to moderate levels, when the only M class solar flare of the period took place. Solar flux levels increased from 104 units on the 24th to 128 by the 30th. The average was 113 units. The 90 day solar flux average on the 30th was 124 units, the same level as last week. X-ray flux levels increased from B1.6 units on the 24th to B6.7 by the 30th, the average was B3 units. Geomagnetic activity was unsettled from the 24th to the 26th due to a small coronal hole. Activity then decreased and the

Copyright © RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast. Ap index on the 30th was 3 units. The average was Ap 7 units. Solar wind data from the ACE spacecraft saw

solar wind speeds increase from 350 kilometres per second to 700 by the morning of the 27th. Speeds then gradually declined to 400 kilometres per second by the end of the period. Particle densities were low, except for a brief increase to 14 particles per cubic centimetre on the 25th. Bz varied between minus 9 and plus 11 nanoTeslas during the disturbance and between minus 2 and plus 4 nanoTeslas on the 29th and the 30th.

And finally the solar forecast from Sunday the 2nd of September. A new sunspot group has just rotated into view in the last few days and this could be the source of any large solar flare activity taking place this week. Solar activity could be at moderate levels on some days. Solar flux levels should increase and be around the 140's. Geomagnetic activity is expected to be at quiet levels most days. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows should be about 11MHz. Paths this week to South America should have a maximum usable frequency with a 50 per cent success rate of around 30MHz. The optimum working frequency with a 90 per cent success rate will be about 24MHz. The best time to try this path will between 1200 and 1800 hours. With the summer Sporadic-E season just about over now, no more forecasts will be made in this report. However, occasional openings will take place for the next few weeks.

And that's all for this week from the propagation team.

Copyright © RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies can be found on the RSGB

website, including email addresses and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS We start with clubs that have several events this week. On Sunday 2 September Central Radio Amateur Circle is making a group visit to Telford Hamfest today, 2 September. The regular night on the air is on Thursday from 20.00 on 145.300MHz. Details from Martin Hallard, G1TYV, by email to radio-circle@live.co.uk.

Lincoln Short-Wave Club is taking part in the SSB Field Day & 144MHz Trophy today. On Wednesday there's a natter night with G5FZ on the air. Thursday sees a club repeater net on 145.725MHz from 20.00. The Surgery in the Shack is next Saturday from 9am, and next Sunday sees the second 70MHz Contest. For more information contact Pam Rose, G4STO, on 01427 788 356.

Midland Amateur Radio Society is at the Telford Hamfest today. On Wednesday there's an open meeting plus training classes, and the shack will be on the air. Details from Norman, G8BHE, on 07808 078 003.

South Birmingham Radio Society has a club stand at the Telford Hamfest today. On Monday they will be unpacking the trailer and holding a rally debrief. Wednesday sees a lecture in the main hall and Morse class. On Thursday there are training classes with Dave Murphy, G8OWL, and Friday sees shack and aerial work. Contact Don, on 01214 581 603.

Telford & District Amateur Radio Society is running the Telford Hamfest today. On Wednesday GX3ZME is on the air on HF and 2m, plus there's a committee meeting. Contact Mike, G3JKX, on 01952 299 677.

Wythall Radio Club has a club net on 145.225MHz today and next Sunday. On Tuesday there's a free 'n' easy evening alongside the 2m UKAC Contest. Friday sees a social evening in the shack. Details from Chris, G0EYO, on 07710 412 819.

On Monday Friskney and East Lincolnshire Communications Club has a VHF SSB club net on 144.165MHz USB, vertical polarization. Tuesday sees a club meeting from 19.30. On Wednesday there's a M3+M6 club net on GB3FR, and Friday sees a simplex VHF net on 145.450MHz. Next Sunday is the FELCC radio rally and sale at Friskney Village Hall, Church Road, Friskney, PE22 8RR, from 9am. Contact the FELCC Information Line on 07554 362 020 for more information.

Now we return to the traditional listing in date order. On Monday 3 September Aldridge & Barr Beacon Amateur Radio Club is having a talk on computers in radio. Contact Albert, G0KFS, on 01922 614 169.

On Monday 3 September Welland Valley Amateur Radio Society has a 2m club net on 145.275MHz FM. For more information contact Peter D Rivers, G4XEX, on 01858 432 105.

On Tuesday 4 September Derby & District Amateur Radio Society is holding a junk sale. Contact Richard Buckby, by email to radio@dadars.org.uk.

On Tuesday 4 September Loughborough & District Amateur Radio Club is having a DF hunt on 2m, from the normal start point.. More information from Chris, G1ETZ, on 01509 504 319.

On Wednesday 5 September South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO, on 01476 402 550.

On Thursday 6 September Salop Amateur Radio Society is having a natter night and committee meeting. Details on the club website at www.salop-ars.org.uk.

Copyright © RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast. On Friday 7 September Bromsgrove & District Amateur Radio Club is having an update on the K2. Contact Chris, M0BQE on 01905 776 869.

On Friday 7 September Coventry Amateur Radio Society is having a talk on the 2011 T32C Kiritimati DXpedition. Contact John, G8SEQ, on 07958 777 363.

NEWS FOR THE NORTH OF ENGLAND On Monday 3 September Angel of the North Amateur Radio Club is on the air and continues its Advanced course. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday 3 September Bolton Wireless Club is having a talk on astronomy projects for the amateur by Ross, G6GVI. For details, send an email to boltonwireless@gmail.com.

On Monday 3 September Sheffield Amateur Radio Club is having a talk on operating in the 2012 RSGB Commonwealth Contest from Malta by Peter, G3PHO/9H3C. More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Tuesday 4 September Chester & District Radio Society is having a talk on operating procedure. Contact Bruce Sutherland, M0CVP, on 01244 343 825.

On Tuesday 4 September Morecambe Bay Amateur Radio Society is having a talk on homebrew antennas by Ken Hough. Contact Sheila, on 07867 516 836.

On Wednesday 5 September Denby Dale Radio Club is having a talk and demo on fact and fiction in microwave radio by Gary Whittaker, M1EGI. Details from Richard, M0RBG, on 07976 220 126.

On Thursday 6 September South Manchester Radio and Computer Club is having a post-expedition report by Ron, G3SVW. Details from Ron, G3SVW, on 01619 693 999.

On Thursday 6 September Spen Valley Amateur Radio Society is having a layman's guide to software defined radio by Ian, G7DWY. Details from Russell, G0FOI, on 01274 875 038.

On Friday 7 September East Cleveland Amateur Radio Club is on the air. For more information contact Alistair, G4OLK, on 01642 475 671.

On Saturday 8 September Tynemouth Amateur Radio Club commences its weekend event operating G5N for the SSB Work All Europe Contest. Contact Bob, M6KLO, by email to mail@g0nwm.com.

NEWS FOR NORTHERN IRELAND No news items have been received for Northern Ireland this week.

NEWS FOR SCOTLAND On Tuesday 4 September Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Wednesday 5 September Ayr Amateur Radio Group is holding a Bring and Buy sale and a group programme discussion to decide the way forward. Details from Tom Ferguson, GM1OST, on 01292 532 088.

On Thursday 6 September Aberdeen Amateur Radio Society is holding a junk sale. Contact Fred Gordon, MM0ODL, on 01975 651 365.

On Friday 7 September Cockenzie & Port Seton Amateur Radio Club is having a normal club night. More information from Bob, GM4UYZ, on 01875 811 723.

Copyright © RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast.

NEWS FOR THE SOUTH EAST and EAST ANGLIA We start with clubs that have several events this week. Mid-Sussex Amateur Radio Society is having a radio night and post event equipment check tonight. On Friday there's a talk by the Sussex Lowland Search and Rescue Team. Contact Rob, 2E0RJA, on 01444 232 129.

Farnborough & District Radio Society is running a Top Band net on 1.995MHz from 8pm on Monday. On Wednesday there's an 80m CW net on 3.570MHz, then a 2m net on 144.675MHz on Friday. Contact Neville, G3SPD, on 01252 404 816.

Southdown Amateur Radio Society is having a talk at Chaseley on Monday. On Wednesday they are operating at the Hailsham Shack. Details from John, G3DQY, on 01424 424 319.

Brede Steam Amateur Radio Society is at the shack on Tuesday. On Friday they commence the Brede Church weekend for Churches on the Air. For more information contact Steve, on 01424 720 815.

Now we return to the traditional listing in date order. On Monday 3 September Braintree & District Amateur Radio Society is having a talk on scanning by Howard, G6LXK. For more information contact John, M5AJB, on 01787 460 947.

On Monday 3 September East Kent Radio Society is having an evening of holiday photos. Details from Karl Davies, M1DFM, on 01227 710 120.

On Monday 3 September Surrey Radio Contact Club is having a talk on the history of sound recording by Alvin, G6DTW. Contact John, G3MCX, on 02086 883 322.

On Tuesday 4 September Chelmsford Amateur Radio Society is having a discussion on practical antennas. Contact Martyn, G1EFL, on 01245 469 008.

On Tuesday 4 September Leiston Amateur Radio Club is holding a practical session on experiences with portable antennas & digital modes. Details from Andy, G3ZYP, on 01394 460 441.

On Tuesday 4 September Stevenage & District Amateur Radio Society is looking at its L-C meter club project. Contact Martin Juhe, M0XJP, on 07973 793 770.

On Wednesday 5 September Chesham & District Amateur Radio Society is holding a general meeting. More details from Terry, G0VFW, on 01442 831

491.

On Wednesday 5 September Havering & District Amateur Radio Club is having a talk on operating in St Lucia by Jonathon Mitchener, G0DVJ. More information from John, M0UKD, on 07890 222 111.

On Wednesday 5 September Norfolk Amateur Radio Club is holding a club forum to discuss talks that you would like to hear or offer. Details from Chris Danby, G0DWV, on 01603 898 678.

On Wednesday 5 September Worthing & District Amateur Radio Club is having a talk on how to reach the top in SOTA by Bob, G3VXJ. Contact John, G8FMJ, on 01273 593 232.

On Thursday 6 September Bredhurst Receiving and Transmitting Society is holding a club night, with CW practice from 8:30 - 9:00pm. Details from Charles, G4VSZ, on 07982 244 788.

On Thursday 6 September Cray Valley Radio Society is having a talk on Health & Safety for the radio amateur by Dave, M0BGR. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday 6 September Horndean & District Amateur Radio Club is having a natter night and social evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday 6 September Vange Amateur Radio Society is holding a junk sale. Contact Steve, G0KVZ, on 01268 552 606.

Copyright RSGB 2012. Not for public release before Monday 3 September 2012 except as a GB2RS broadcast. On Friday 7 September Crystal Palace Radio and Electronics Club is having an evening of short talks. Contact Bob, G3OOU, on 01737 552 170.

On Saturday 8 September Bromley & District Amateur Radio Society commences its Foundation course. Details from Andy, G4WGZ, on 01689 878 089.

On Saturday 8 September Dorking & District Radio Society commences its weekend event operating GB0NT for the National Trust open day at Poulsden Lacey. Details from Garth, G3NPC, on 01737 359 472.

On Saturday 8 September Harwell Amateur Radio Society is holding its annual summer barbecue. Details from Malcolm, G8NRP, on 01235 524 844.

NEWS FOR THE SOUTH WEST We start with clubs that have several events this week. Exeter Amateur Radio Society holds its Monday HF net on 3.675MHz at 19:45. On Tuesday the 2m net is at 19.45 and the 4m net takes place on Thursday at 19.00. Contact Nick, 2E0NRJ, on 01363 775 756.

Cornish Radio Amateur Club is holding a committee meeting on Wednesday, and having a main club meeting on Thursday. Details from Steve, G7VOH, on 01209 844 939.

Now we return to the traditional listing in date order. On Sunday 2 September Jersey Amateur Radio Society has the second part of its Field Day and will be active on all HF bands using phone and CW. Details from Rob Luscombe, MJ0RZD, on 07797 923 916.

On Monday 3 September Riviera Amateur Radio Club is having a club night. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Wednesday 5 September Taunton & District Amateur Radio Club is visiting GB2NLO at the Norman Lockyer Observatory in Sidmouth. More information from Peter Robinson, G0EYR, on 07811 635 819.

On Wednesday 5 September Thornbury & South Gloucestershire Amateur Radio Club is looking at Eddystone radio restoration with Mike, M1DPB. Contact Tony, G0WMB, on 01454 417 048.

On Thursday 6 September Swindon & District Amateur Radio Club has a talk. Contact Den, M0ACM, on 07810 317 750.

On Friday 7 September Torbay Amateur Radio Society is having a natter night and running the TARS 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 8 September Appledore & District Amateur Radio Club is running a special event station at Arlington Court for the National Trust. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

NEWS FOR WALES On Monday 3 September Dragon Amateur Radio Club is having a talk on contests as a learning tool by GW0ETF. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 4 September Carmarthen Amateur Radio Society is having a night on the air on GB3FG. Details from Lloyd, 2W0LLT, on 01239 711 297.

```
:Product: Weekly Highlights and Forecasts
:Issued: 2012 Sep 03 1342 UTC
# Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction Center
# Product description and SWPC contact on the Web
# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
27 August - 02 September 2012

Solar activity was very low 27 and 28 August. Moderate activity was
observed on 30 August as Region 1563 (S25, L=078, class/area Dso/70
on 01 September) produced the largest flare of the period, an M1 at
30/1211 UTC. Solar activity was at low levels for the remainder of
the period. A C8/2f flare associated with a filament eruption in the
southeast quadrant of the solar disk occurred at 31/2043 UTC. An
associated CME was observed on SOHO/LASCO and STEREO A/B
coronagraphs with a possible Earth-directed trajectory. Two other
CMEs were observed on 02 September in STEREO A COR2 imagery
beginning at 02/0409 UTC and 02/1109 UTC with potential
Earth-directed components.

A greater than 10 MeV proton event (category S1-Minor) associated
with the filament eruption on 31 August, began at 01/1335 UTC,
reached a maximum of 60 pfu at 02/0850 UTC, and is currently above
threshold.

The greater than 2 MeV electron flux at geosynchronous orbit was at
moderate levels on 27 August. Levels increased to high from 28
through 31 August. Moderate levels were observed for the remainder
of the period.

Geomagnetic field activity was mostly quiet from 27 August through
01 September. Activity increased on 02 September with unsettled to
active conditions observed due to an extended period of negative Bz.

Forecast of Solar and Geomagnetic Activity
03 September - 29 September 2012

Solar activity is expected to be at very low to low levels with a
slight chance for M-class activity through the forecast period.
```

The greater than 10 MeV proton event currently in progress is expected to remain above the 10 pfu threshold 03-04 September with a additional enhancements possible with CME arrivals.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate or lower levels from 03-16 September, 21-23 September, and 27-29 September. High levels are forecast 17-20 September and 24-26 September due to coronal hole (CH) effects.

Geomagnetic field activity is expected to be as high as minor storm (G1) conditions on 03 September with anticipated effects from the 31 August CME. Residual elevated conditions ranging from unsettled to minor storm levels are expected to persist from 03-06 September due to continued transient activity in conjunction with possible CH effects. Mostly quiet conditions are expected from 08 September through 29 September with the exception of two CH periods; 14-16 September and 20-23 September, which should see unsettled to active periods.

2012 Salmon Run (aka WA QSO Party)

Posted: 02 Sep 2012 01:48 PM PDT
http://forums.qrz.com/showthread.php?360036-2012-Salmon-Run-(aka-WA-QSO-Party)&goto=newpost

The Western Washington DX Club has announced that the 2012 Salmon Run (aka WA State QSO Party) will take place September 15 - 16. Full details and rules for this very popular event can be found on the WWDXC website.

So, what's so special about this QSO Party? Aside from nifty certificates for high scorers, packages of smoked salmon will be awarded to (at least) the highest scoring entry in each of the following 30 categories:

Out of Washington:

First Call AreaSecond Call AreaThird Call AreaFourth Call AreaFifth Call AreaSixth Call AreaSeventh Call AreaEighth Call AreaNinth Call AreaTenth Call AreaHigh PowerLow PowerQRP

DX/VE:

CanadaDX Entities

Inside Washington:

http://forums.qrz.com/showthread.php?360095-Busy-times-for-disaster-response&goto=newpost

Busy times for disaster response

Soon after the strongest earthquake in more than two decades,
measuring 7.6 on the Ritcher scale, hit the Philippines members of the Ham
Emergency Radio Operations (HERO) soon after were exchanging messages with
the affected coastal areas.

Eddie Valdez DU1EV, the Chief Operating Officer of the
Philippines Amateur Radio Association said that DU1VHY handled traffic and
got reports from the affected areas of DU4, DU5, DU6, DU8 and DU9.

Eddie DU1EV said "The area of DU5 was nearest the epicenter
and DV5PO reported there was a power outage in Borongan, Samar Island.
DV5RAY reported tha people were evacuating because of the tsunami alert."

The Philippine Institute of Volcanology and Seismology later lifted its
tsunami alert after only small waves were generated and not the
life-threatening waves that can be expected to occur with an earthquake of
that size. It also caused tsunami warnings in Indonesia, Japan and Papua
New Guinea.

He said the earthquake was felt over a wide area with
numerous reports including shaking chandeliers and triggering alarms in
some vehicles.

Eddie DU1EV said it was good that many hams in the affected
areas showed up on the 2-metre and 40-metre emergency channels and other
districts were on standby if needed.

The undersea earthquake struck the central part of the
archipelago off the town of Guiuan on Samar Island on Friday. It killed
one person in collapsing house, caused damage to infrastructure and people
to flee to higher ground.Tens of thousands of people have since returned
home.

Eddie DU1UV reports that an initial assessment by the government's
National Disaster Risk Reduction Management Council is that there was no
major structural damage in the affected areas. Most of the homes destroyed
were made of light materials in the coconut growing low socioeconomic area.

In February this year a 6.8 quake killed 51 and left more
than 60 people missing in the Negros and Cebu regions on the Philippines.

The latest earthquake followed HERO being activated during
the flooding caused by heavy recent seasonal monsoon rains and storms,
including most of the capital of Manila being under water during a 48 hour
deluge.

Authorities have also renewed their warning of further
disasters in the Pacific-rim of fire which includes the Philippines, where
an earthquake measuring 7.9 killed thousands in the area of Luzon on July
16, 1990.

Jim Linton VK3PC

Chairman IARU Region 3 Disaster Communications Committee

and

Eddie Valdez DU1EV

Chief Operating Officer of PARA

AMSAT NEWS SERVICE

ANS-246

ANS is a free, weekly, news and information service of AMSAT North America,
The Radio Amateur Satellite Corporation. ANS reports on the activities of a
worldwide group of Amateur Radio operators who share an active interest in
designing, building, launching and communicating through analog and digital
Amateur Radio satellites.

Please send any amateur satellite news or reports to:

ans-editor at amsat.org

Board of Directors Ballots Due by September 15

AMSAT Corporate Secretary Alan Biddle, WA4SCA reminds all AMSAT-NA members, "Your ballots for the 2012 Board of Directors election need to be received at AMSAT-NA headquarters by September 15th, 2012. This is one of your best opportunities to make your views on the path of our organization known."

Ballots for the 2012 AMSAT-NA Board of Directors election have been mailed to all members. Also included is biographical information about each of the candidates.

Select no more than three of the six listed candidates (in alphabetical order):

Tom Clark, K3IOSteve Coy, K8UDMark Hammond, N8MHLou McFadin, W5DIDGould Smith, WA4SXMPatrick E. Stoddard, WD9EWK

The 3 candidates receiving the most votes will become directors serving 2 year terms. The 2 receiving the next highest number of votes will be seated as alternates for 1 year terms.

You must mail your ballot back to be received at the AMSAT-NA Office no later than the close of business on September 15, 2012:

AMSAT

850 Sligo Avenue, #600

Silver Spring, MD 20910

[ANS thanks AMSAT Corporate Secretary Alan Biddle, WA4SCA for the above information]

IARU International Amateur Radio Satellite Forum

The IARU International Amateur Radio Satellite Forum will this year be held in conjunction with the AMSAT-UK Colloquium which takes place in Guildford, England on the weekend of September 15-16.

The forum, chaired by IARU Amateur Satellite Advisor Hans van de Groenendaal ZS6AKV, takes place on Saturday, September 15 at 1700 BST (1600 UT). On the Agenda is a report on the activities of the IARU Satellite Adviser and his Advisory Panel.

Colloquium information can be found here.

IARU Amateur Radio Satellite Frequency Coordination web page.

[ANS thanks AMSAT-UK for the above information]

Atlas V Launch From Vandenberg Re-scheduled to September 13

The Atlas V NROL-36 launch from Vandenberg Air Force Base in California, originally planned for August has been now re-scheduled for September 13. This date was selected as one of the first available for launch range operations.

This launch will be carrying a pair of ocean surveillance satellites to locate ships at sea. Also aboard this flight at four cubesats as part of ELaNa IV mission and seven cubesats for government missions.

The ELaNa Cubesats aboard are:

CINEMA (Cubesat for Ion, Neutral, Electron, Magnetic fields)

Downlinks for engineering telemetry and command are in the 2400-2450 MHz range; Science telemetry is in 2200-2300 MHz range.
CSSWE (Colorado Student Space Weather Experiment)

Downlink 437.345 MHz, 9k6 with AX25
CP5 (PolySat)

Downlink 437.405 MHz at 1 watt, AFSK on LSB AX.25 over NRZI at 1200 baud, every 2 minutes, begins 3.5 hours after first turn-on.
CXBN (Cosmic X-Ray Background Nanosatellite)

Downlink 437.525 MHz, GFSK, AX.25

The US Government Satellites aboard are:

Aeneas

First cubesat to deploy 2.4 GHz Dish Antenna. WIFI transmitter will transmit on 2425.0 MHz with 1 watt of output power.Downlink 437.600 MHz AX25 1200 bps beacon every 10 seconds and spread spectrum two-way link

elsewhere in the 70cm band.
ORSES (ORS Enabler Satellite)HorusReAerocube 4A, 4B, 4C

Testing deployable solar panels.Technology demonstration of
□parachute-like□ devices to deorbit satellites.Testing closed-loop attitude
control system based around a three-axis gyroscope.

A discussion of the launch re-scheduling can be found on-line. at:

Please refer to the prior bulletin for mission summaries and satellite team web pages.

A detailed article of the launch can be found on-line.

[ANS thanks NASA, the CubeSat Teams noted above, AMSAT-UK, Gunter's Space Page and nasaspaceflightnow.com for the above information]

Rooms Still Available for AMSAT-UK Colloquium

AMSAT-UK Hon Sec Jim Heck, G3WGM says, "There are still rooms available at the hotel at which the AMSAT-UK Colloquium will be held on September 14, 15 and 16. The location of the Colloquium is at the Holiday Inn, Guildford, Surry, UK. TO BE SURE OF A ROOM AT THE HOTEL YOU SHOULD BOOK AS SOON AS POSSIBLE TO AVOID DISSAPPOINTMENT!"

This week, Dave Johnson, G4DPZ announced on behalf of the AMSAT-UK Committee that the program for the Colloquium is now posted on-line.

AMSAT-UK is pleased to welcome senior representatives from AMSAT-NA, AMSAT-DL and AMSAT-SA who will be giving status updates on their respective development programs.

There will be an update on the FUNcube project as well as some realtime demos of the Engineering model.

There are some other surprises in the programme, so please take a look.

Details of the Colloquium itself can be found here.

Exclusive New Product Launch at AMSAT-UK Colloquium

AMSAT-UK are delighted to announce that Howard Long, G6LVB, will be present at the Colloquium this year and will be launching a new "FUNcube Dongle PRO-PLUS" during his presentation.

Full technical details have been embargoed until his talk and we are not permitted to steal his thunder by releasing further details of this new product in advance. Attendees at the Colloquium will therefore be the first to learn about Howard's latest development which will further advance the applications for SDR devices.

Further details are at: http://www.uk.amsat.org/9565#more-9565 - and at - http://www.uk.amsat.org/colloquium/twelve.

You can book online using PayPal or Credit Card at:
http://shop.amsat.org.uk/shop/catalog/browse

[ANS thanks AMSAT-UK Hon Sec Jim Heck, G3WGM, Dave, G4DPZ and Trevor, M5AKA for the above information]

Smartphone and Kinect Satellite Presentations at AMSAT-UK Colloquium

Dr Chris Bridges recently appeared on the nationwide TV channel Sky News discussing why space is cool. On September 15-16 he will be giving two presentations to the AMSAT-UK International Space Colloquium at the Holiday Inn, Guildford, GU2 7XZ, UK.

Chris will cover the Nexus Android Smartphone amateur radio satellite STRaND-1 which will carry both a Resistojet and a Pulsed Plasma Thruster (PPT) module and STRaND-2 which will use Microsoft Xbox Kinect controller technology.

STRaND stands for Surrey Training, Research and Nanosatellite Demonstration and the programme is intended to be a long-term arrangement between the space company SSTL and academic researchers at the Surrey Space Centre (SSC), with STRaND-1 the first of a long line of STRaND nanosatellites.

The dual STRaND-2 cubesats will test a novel in-orbit docking system based upon XBOX Kinect technology that could change the way space assets are built, maintained and decommissioned. The identical twin STRaND-2 satellites will each be a 3 unit Cubesat. Components from the XBOX Kinect games controller to scan the local area and provide the satellites with spatial awareness on all three axes.

SSTL says on their web site, "The STRaND-2 twins will be separated after launch. After the initial phase of system checks, the two satellites will be commanded to perform the docking procedure and, when in close proximity, the Kinect-based docking system will provide the satellites with 3D spatial awareness to align and dock. Other applications for STRaND-2 include the safe removal of space debris and spacecraft maintenance, with a low cost "snap-on" nanosatellite providing backup power, propulsion or additional on-board computing capability."

SSTL Project Lead Shaun Kenyon says, "We were really impressed by what MIT had done flying an autonomous model helicopter that used Kinect and asked ourselves: Why has no-one used this in space? Once you can launch low cost nanosatellites that dock together, the possibilities are endless, like space building blocks."

Dr. Chris Bridges, Surrey Space Centre Project Lead says, "It may seem far-fetched, but our low cost nanosatellites could dock to build large and sophisticated modular structures such as space telescopes. Unlike today's big space missions, these could be re-configured as mission objectives change, and upgraded in-orbit with the latest available technologies."

The SSTL employees involved with the STRaND programme are volunteers. It is a condition of the programme that volunteers from SSTL and SSC use their own, free time for STRaND activities (such as lunches and breaks). The

project has no budget for staff so is entirely dependent on volunteers.

TAPR Digital Communications Conference in Atlanta September 21 - 23

The ARRL/TAPR Digital Communications Conference is an international forum for radio amateurs to meet, publish their work, and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical

applications.

Topics include, but are not limited to: Software Defined Radio, digital voice (D-Star, P25, WinDRM, FDMDV, G4GUO), digital satellite communications, Global Position System, precision timing, Automatic Position Reporting System, Digital Signal Processing, HF digital modes, spread spectrum,

This week TAPR published the schedules for the technical and introductory sessions. The DCC Saturday Night Banquet Speaker & Topic will be Bdale Garbee, KB0G talking about the "Sharing the Joy of Making"

The DCC Sunday Morning Seminar will be a hands-on tutorial using Gnuradio to design and implement software defined radios on your laptop presented by Tom Rondeau, KB3UKZ, the leader of the Gnuradio project.

All of the seminar information and registration can be accessed on TAPR's DCC page.

[ANS thanks ARRL and TAPR for the above information]

NASA Issues Request for Information - Nano Satellite Launch Challenge

On August 10, 2012 NASA published a Request for Information (RFI), titled, "Centennial Challenges Nano Satellite Launch Initiative". The full text of this RFI is available on the US General Services Administration web.

Centennial Challenges is a program of prize competitions to stimulate innovation in technologies of interest and value to NASA and the nation.

In 2010 NASA announced a Nano-Satellite Launch (NSL) Challenge to encourage development of safe, low-cost, small-payload delivery systems for frequent access to low Earth orbit (LEO) through innovations in propulsion and other technologies as well as operations and management for broader applications in future launch systems that could result in a commercial capability for dedicated launches of small satellites at a cost comparable to secondary payload launches. To assist in formulation of the Nano-Satellite Launch Challenge, NASA is seeking additional information on the nano-satellite market and on approaches to address the market needs.

There are currently several existing launch vehicles and new launch vehicle programs that could provide ride-sharing opportunities for nano-satellite.

This NASA Nano Satellite Launch Challenge focuses on:

Launch vehicle design dedicated to providing greater payload design flexibility for cubesats and other small payloads, more frequent access to space at costs comparable or less than existing or proposed ride-share launch options.Tradeoff designs for a payload market for a very low cost vehicle but with less orbital accuracy or lower reliability?How frequently should the vehicle launch?Initially the Challenge competition would be for one year and a $3M prize purse would be divided between all successful competitors.A second phase of the competition would require successful competitors to deliver payloads to LEO at least ten times within a one-year period using a launch system sized to deliver up to 10Kg to LEO.

A total prize purse of $6M would be offered for at least 10 successful payload deliveries to LEO orbit: 1st Place receiving $3M for most deliveries; 2nd place, $2M for next most deliveries; and 3rd place, $1M for next most deliveries.

Responses must be submitted in electronic form no later than September 10, 2012 to Dr. Larry Cooper, Centennial Challenges Program, NASA Headquarters, 300 E Street, SW, Washington, DC 20546-0001. E-mail address: larry.p.cooper at nasa.gov.

For general information on the NASA Centennial Challenges Program can be found here.

ARISS Status - 27 August 2012

1. Upcoming School Contacts

The Iruma Junior Ham Club in Iruma, Japan will participate in an ARISS (Amateur Radio on the International Space Station) contact on Sunday, September 2 at 08:32 UTC. The club members recently received their amateur radio licenses and are learning about satellite orbits and space. They look forward to speaking with Astronaut Akihiko Hoshide on the ISS.

2. Students Make Connection with Akihiko Hoshide on ISS

Students from Institute for Education on Space, Wakayama University in Wakayama, Japan spoke with on-orbit Astronaut Akihiko Hoshide, KE5DNI via an ARISS contact on Sunday, August 26. The contact highlighted science lessons about space, satellites and radio waves.

3. ARISS International Team Meeting Held

The monthly ARISS International Team meeting was held on Tuesday, August 21. The team discussed whether ARISS supporters should be recognized on the ARISS website and a status was given on the HamTV project and on the new Ericsson VHF radio which is scheduled to launch later this year. Minutes have been posted.

4. Astronaut Training Status

Gregory Wiseman, KF5LKT is scheduled for a basic operations training session in September. Wiseman is slated to fly with the Expedition 40 crew in May 2014.

[ANS thanks Carol, KB3LKI, for the above information]

/EX

In addition to regular membership, AMSAT offers membership in the President's Club. Members of the President's Club, as sustaining donors to AMSAT Project Funds, will be eligible to receive additional benefits. Application forms are available from the AMSAT Office.

Primary and secondary school students are eligible for membership at one-half the standard yearly rate. Post-secondary school students enrolled in at least half time status shall be eligible for the student rate for a maximum of 6 post-secondary years in this status. Contact Martha at the AMSAT Office for additional student membership information.

http://forums.qrz.com/showthread.php?359908-RFinder--The-World-Wide-Repeater-Directory-now-supports-Winlink-RMS-Nodes!&goto=newpost

RFinder ☐ The World Wide Repeater Directory now supports Winlink RMS Nodes!

Saturday, September 1st, 2012

For immediate release

9/01/2012

From the shack of W2CYK

Winlink: We have been asked so many times we lost count to support Winlink. As of 1 September, 2012, we will have a weekly feed of Winlink Remote Mail Servers. They are designated (RMS) in the node Notes, but we are currently revamping our apps on Android, iPhone and web.rfinder.net to allow showing only individual node types (ie IRLP, RMS, Echolink, DStar, AllStar, etc.).

Bring a Friend to The World Wide Repeater Directory (WWRD) Promo still running for details click here

RFinder runs on iPhone/iPad/iPod and Android and http://web.rfinder.net.
The World Wide Repeater Directory is also accessible from RTSystems radio programmers and via CHIRP on Windows, Linux and Macintosh with the same user/password you use on handheld devices. Our goal is to have the WWRD accessible from most pervasive platforms. To that end Windows Phone and Symbian versions are in development and slated for release this fall. The web version has been tested and works on Blackberry. RFinder web has downloads for POI☐s for TPE and most major GPS☐s, including AvMap G5/G6, the GPS for Amateur Radio Operators.

Android Pad format is now in development, look for it in September!

RFinder data is constantly updated by frequency coordinators and users worldwide. Our data is dynamically loaded, which means its always up-to-date.

EMA Expands Approach to Emergency Preparedness:

Posted: 02 Sep 2012 05:12 PM PDT
http://www.eham.net/articles/28920

In an effort to enhance local emergency response capabilities, the Marshall County Emergency Management Agency is forming a new unit that will encompass and expand the current public safety communications network by taking advantage of new technology. Since 2003, the Marshall County Auxiliary Radio Service group, comprised of mainly amateur radio operators, has maintained the last line of communication in times of emergency. Since that time there's been a lot of change to public safety communications, and EMA has seen a decline in the amount of participation in the group. "As the old saying goes 'change is inevitable but growth is optional,'" said Anita McBurnett, director of the Marshall County EMA. "The face of communication has changed over the last five years. Amateur radio still has a place within public communications and assistance in emergency communications, but we also have other groups that want to become more involved." In response EMA is "closing the books" on the MCARS unit and forming the Marshall County Emergency Communications unit. The MCEC will combine three primary areas, including amateur radio, professional public safety communications and storm spotters. "Because when all other communication sources fail, amateur radio still works. We need to have that as a viable option for our backup communications," McBurnett said. "Another area is going to include dispatchers and other professionals who are wanting to learn more about emergency communications and how that fits into the big scheme of things.

>Subject: Information - Leslie - 2012-09-04 16:02:14 UTC

WOCN31 CWHX 041745
TROPICAL CYCLONE INFORMATION STATEMENT ISSUED BY THE CANADIAN
HURRICANE CENTRE OF ENVIRONMENT CANADA AT 1:01 PM ADT TUESDAY
4 SEPTEMBER 2012.

TROPICAL CYCLONE INFORMATION STATEMENT FOR:
=NEW= ATLANTIC PROVINCES.

FOR TROPICAL STORM LESLIE.

THE NEXT STATEMENT WILL BE ISSUED BY 3:00 PM ADT WEDNESDAY.

EARLY DISCUSSION REGARDING TROPICAL STORM LESLIE AND POSSIBLE
INFLUENCE IN EASTERN CANADA.

==DISCUSSION==
THE CANADIAN HURRICANE CENTRE WILL BE MONITORING THE DEVELOPMENT OF
TROPICAL STORM LESLIE THIS WEEK. THE STORM IS EXPECTED TO MOVE VERY
SLOWLY AND INTENSIFY GRADUALLY OVER THE NEXT SEVERAL DAYS.
COMPUTER MODELS ARE PREDICTING LESLIE TO ONLY TRAVEL 500 KILOMETRES
IN 4 DAYS WHICH IS BASICALLY A PERSON'S AVERAGE SPEED OF WALKING.
WITH SUCH A SLOW SPEED OF TRAVEL AND THE FACT THAT THE STORM IS STILL
IN ITS ORGANIZING STAGE, THERE IS MUCH (MORE THAN USUAL) UNCERTAINTY
IN THE PREDICTED PATH/INTENSITY OVER THE NEXT WEEK.

COMPUTER MODELS INDICATE THAT LESLIE COULD EVENTUALLY PUSH THROUGH
THE LARGE 'BERMUDA HIGH' AND ACELLERATE TOWARD EASTERN CANADA WITH A
RANGE OF TRACK SCENARIOS FROM MAINE TO OFFSHORE NEWFOUNDLAND.
THE MIDDLE OF THESE TRACK FORECASTS IS OVER NEWFOUNDLAND - BUT EVEN
THAT 'AVERAGE' WILL LIKELY SHIFT BY HUNDREDS OF KILOMETERS OVER TIME
WITH EACH NEW RUN OF SIMULATIONS. IF LESLIE MAKES IT TO EASTERN
CANADA, IT WOULD NOT LIKELY DO SO UNTIL EARLY NEXT WEEK.

WE WILL UPDATE THIS BULLETIN THROUGHOUT THE WEEK IF LESLIE CONTINUES
TO DEVELOP AND WILL PROVIDE INTERPRETATION OF THE POSSIBLE SCENARIOS
AND DEGREE OF PREDICTABILITY.

VISIT WWW.WEATHEROFFICE.GC.CA/HURRICANE/TRACK_E.HTML (ALL IN LOWER
CASE) FOR THE LATEST HURRICANE TRACK MAP.

END/FOGARTY

Ham Radio Club Alumni Reunite for Annual Field Day:

Posted: 03 Sep 2012 05:05 PM PDT
http://www.eham.net/articles/28922

MOBILE, Alabama -- The Silver Panthers Alumni Radio Club, whose members are Murphy High School graduates, held their annual field day at Camp Grace this summer on a date which coincided with the class of 1958's 54th reunion. Eight of the club's 18 amateur radio operators ("hams") gathered to test their emergency communication readiness at an outlying area not normally used for a ham radio station, where they set up portable equipment powered by generators, batteries and sometimes even solar power. "My favorite part of this year's field day was operating a radio totally solar powered," said SPARCS member Terry Young. "This technology was never dreamed of in the 1950s. We've come a long way." "The SPARCS club has let me enjoy the ham radio camaraderie I have known since high school and helped me keep in touch with old friends," said David Goldberg, who has been operating a ham radio for 59 years. "I really enjoy meeting and communicating with people from all over the world."

//
Elliot N. Sivowitch, Radio, Television Historian, K3RJA (SK):

Posted: 03 Sep 2012 05:05 PM PDT
http://www.eham.net/articles/28921

Elliot N. Sivowitch, 80, a scholar of television and radio history who worked at the Smithsonian Institution for four decades, died July 20 of cardiac arrest at Holy Cross Hospital in Silver Spring. A former colleague, Melinda Machado, confirmed the death. Mr. Sivowitch joined the Smithsonian in 1959, then worked for a year at the Library of Congress before returning to the Smithsonian. He spent nearly his entire career in the electricity collection of the National Museum of American History and its predecessor, the Museum of History and Technology. He helped develop exhibitions including "Information Age," "Person to Person" and "Transistors at Fifty." He was an amateur radio operator and was instrumental in establishing the Smithsonian's old ham radio station, Machado said.

translation by: Bob, DL7VOA
(e-mail: dl7voa@darc.de)

8Q, MALDIVES, AS-013
Hamed,8Q7HA, was active in SSB on 17m around 1700 UTC. QSL via 9K2HS.

9A, CROATIA
Jan,9A/PA4JJ, from Pores is working in holiday style in his favourite
modes RTTY and PSK31 until Sep 12.
QSL via homecall, OQRS: http://www.pa4jj.nl

9J, ZAMBIA
Shinichi,JA7SGV, is QRV as 9J2JA from Zambia but the length of his
stay is not known. He has been spotted in CW on 30m, 20m, 17m and 15m.
QSL via homecall.

E6, NIUE, OC-040
Lance,W7GJ, and Bob,ZL1RS, are planning an EME DXpedition as E6M and
E6RS to Niue (OC-040, WLOTA 2139, Loc AH51ba) from Sep 7-21.
Sep ausgesucht. Lance will focus on 6m EME (50.190 MHz) and Bob on 2m
but they may show up from other bands as well.
See also: http://www.qsl.net/zl1rs/zk2.html and
http://www.bigskyspaces.com/w7gj/Niue2012.htm
QSL E6M via W7GJ, QSL E6RS via ZL1RS; both only direct or LoTW.

G, ENGLAND, EU-005
The Churches and Chapels on the Air (CHOTA) on Sep 8 is a good oppor-

tunity to introduce amateur radio and also the World Association of
Christian Radio Amateurs and Listeners (WACRAL). CHOTA is organised by
WACRAL member John,G3XYF.
A list of stations can be found at: http://www.wacral.org/CHOTA.htm
---
GB2HST (the suffix stands for High Stoy Telegraph) is a special event
station in Minterne Magna, Dorset from Sep 9-14. QSL via M0XIG.

Gary,M0NNH, and Chris,M0DOL, are using the special callsign GB2012LP
during the Paralympics in London until Sep 9.

ISWL members will activate following special event stations during the
Paralympic Games in September:
Sep 1-7:
GO4BJC/a from Great Sutton in Cheshire by Geof,M0BAU (ISWL G-20665),
WAB SJ37, EU-005, WLOTA 1841
MO1SWL/a from Dagenham in Essex by John,M0HEM (ISWL G-20579) WAB TQ48,
EU-005, WLOTA 1841
Sep 8-9:
GO4BJC from Broad Oak in East Sussex by Arthur,G0KOC (ISWL G-20358),
WAB TQ62, EU-005, WLOTA 1841
MO1SWL/a from Walton on the Naze in Essex by Herbie,G6XOU (ISWL
G-20006), WAB TM22, EU-005, WLOTA 1841
Sep 10-30:
G4BJC tba.
MX1SWL/a from Hartford in Cambridgeshire by Tom,G3RPV (ISWL G-7964),
WAB TL27, EU-005, WLOTA 1841
All QSLs via G6XOU, eQSL. See also: http://www.iswl.org.uk

HA, HUNGARY
Members of the Puskas Tivadar Radio Aamateur Club (HA5KHC) is QRV as
HG1912PTTT from Budapest until Sep 30 celebrating the 100th anniversary
of the "Puskas Tivadar" Telecommunications Technical High School.
Activities will take place in CW, SSB and digital modes on all HF bands
QSL via HA5AUC. See also: http://www.ha5khc.hu

J2, DJIBOUTI
Christian,F5MBF, has been in Djibouti since July and finally received
his callsign J28NC. He will stay there for at least two years and is
working mainly in CW with some SSB on 80m-10m using a vertical.
The QSL route has not been announced yet, the cluster says via F5MBF.

KH0, MARIANA ISLANDS, OC-086
Mike,JA6EGL, and Yu,JE6DND, will be active in CW and SSB on 30m-10m
signing KK6WW/KH0 and KH0R from Saipan (OC-086) from Sep 6-9.
QSLs via homecalls, unfortunately only direct.

Kuroi,JH0MGJ/AL5A, will be QRV as AL5A/AH0 from Saipan as well and
wants to listen for his friends in Europe from Sep 7-9.
QSL via JA7JEC, LoTW.

ON, BELGIUM
The Groupement De Verviers (GDV) will activate the special callsign
ON4USA in SSB and PSK on 40m/20m/15m/10m/6m on Sep 8/9 for the
68th anniversary of the liberation of Verviers by US GI's.
QSL via ON4GDV.

PA, THE NETHERLANDS
Fred,PA0FAW, will be QRV as PC12WSF in CW, SSB and digital modes
from the "World Statues Festival" in Arnheim until Sep 30.

Fred is DIG 1487, ISWL PA-11092, WAB-11722. QSL via homecall.

UA1, EUROPEAN RUSSIA
The special event station R1150I is active from Sep 2-9 celebrating
the 1150th anniversary of the Izborsk Fortress. QSLs will be sent
via bureau automatically, eQSLs are available as well.

Several stations will be using the suffix SRR from Sep 4-13 celebrating
the 10th anniversary of IARU membership of the Soyuz Radiolyubitelej
Rossii (SRR). QSL routes will be announced in the QSO.

V7, MARSHALl ISLANDS, OC-028
Rick,WH0AI (ex T32AI), is working from Kwajalein Island (OC-028) from
the Kwajalein Amateur Radio clubstation and using the club call V73AX.
He has been heard in CW and SSB on 20m, 15m and 10m. Rich has applied
for the call V73AI. He also plans to be active in the upcoming contests
QSL via WH0AI, unfortunately only direct (QRZ.com) with "green stamps".

W, USA
Members of the Symbol Technologies Amateur Radio Club (STARC) will be
QRV as N1Y in CW and SSB on 40m/20m/15m on Sep 8/9 commemorating
Sep 11, 2001. QSL via W2SBL.

The special event station N3U/Flt93 (N3U/United Flight 93) remembers
the terrorist attack on this flight from Sep 8-13. QSL via W3PN.

Wayne,AB8DD, plans to activate Kiser Lake State Park in Champaign
County/Ohio mainly in SSB and CW on all bands during the "Ohio State
Parks On The Air" (OSPOTA) event on Sep 9.

The Milford Ohio Amateur Radio Club (MARC) is using the call W8MRC from
The East Fork State Park in Clermont County during the same event.
They will three stations in SSB on 80m-10m. See: http://www.w8mrc.com
---
Andy,N8OFS (SMIRK #6737), will be QRV as N8OFS/p from "Big Caboose"
during the "QCWA Fall QSO Party" on Sep 7 and during the
"ARRL September VHF QSO Party" on Sep 8/9.
QSL via homecall, unfortunately only direct.

YA, AFGHANISTAN
Martin,DL3ASM, is based in Mazar-i-Sharif until the end of November.
He is an officer in the German Army and maintains the radios. His call
is T6SM and his equipment includes a TS590, TS870, IC7000, a TL922 plus
a W3DZZ (12m high), a FB 33 yagi, a TripleLeg for the WARC bands and
verticals for 2m/70cm. QSL via homecall.

PACIFIC TRIP: John,N7CQQ, and Ron,N6XT, will be "in the Samoa area" until
the end of September. They plan to become active from Samoa (5W),
hopefully from Tokelau (ZK3) and maybe also American Samoa (KH8).
QSLs via homecalls.

DXCC: The XU1A DXpedition of 1998 has been approved for DXCC credit after
reviewing new information. If you have had QSLs rejected please send
an e-mail to bmoore@arrl.org to be placed on the list for update.
If you remember the submission in which you included the QSL please
note this to expedite the search for the rejected QSO.

SURVEY: A survey about the Most Wanted DXCCs is online until Oct 15:
http://www.dxpub.net

SILENT KEYS: Fr. Lars Rooth, SJ (SM1BOE), passed away on July 21, aged 90.
He was responsible for the Scandinavian department of Vatican Radio
OP at HV3SJ.
Cris Henderson,GM4FAM, passed away at the age of 57 on Aug 23. He was
one of the zop CW DXers in the UK.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 8 Kulikovo Polye Contest (see: http://www.kpctest.ru)
Sep 8/9 WAE DX Contest
Sep 8/9 IARU Region 1 ATV Contest
Sep 9 North American Sprint
The HTC QRP Sprint 2012 has been cancelled!

IOTA compiled by Klaus, DL7UXG (e-mail: iota@dxhf.darc.de)

Island activities:
AF-049, 3B8, Mauritius Island: After visiting South Africa Alex,IW5ELA, and
Michaela now plan to stop at Mauritius (WLOTA 0595) next. He will work
in holiday style as 3B/IW5ELA from Sep 6-12. Alex is working mostly in
CW using his FT-857 and vertical. QSL via IW5ELA (bureau/direct).

AS-042, R0B, Severnaya Zemlya: Vladimir,RV3EFH/0, will be QRV again from
Bolshevik Island (RRA RR-07-03, RDA KK-65, Loc OQ28dh) in September.
QSL via homecall (bureau/direct).

EU-004, EA6, Balearic Islands: Alessandro,IZ4WNA, and Giuliano,IZ4WNP,
will show up as EA6/homecalls from Ibiza (DIE E-023, MIA MB-003,
WLOTA 0958) from Sep 7-10. They also plan to visit other islands.
Activities will take place on these bands: 80m SSB, 40m SSB,
20m PSK63/SSB, 15m PSK63/SSB, 10m PSK63/SSB. QSLs via IZ4WNA.
Their website is: http://www.iz4wna.com

EU-015, SV9, Crete Island: Silvia,SV9/EA1AP, and Alberto,SV9/EA1SA, will be
active from Crete (GIOTA KRS-005, MIA MGC-005, WLOTA 1400) in SSB, CW
and RTTY on 80m-6m from Sep 9-15. QSLs via homecalls (bureau/direct).

EU-031, I*8, Campania Region group: Hubert,OE3FHA, and Sal,IC8SQS, will be QRV as IC8/OE3FHA from Ischia (IIA NA-001, MIA MI-042, WAIS EL44, WLOTA 0689, LOC JN60) from Sep 6-22. They will work only in SSB on the HF bands and maybe also 6m. QSL only via bureau to OE3FHA.

EU-043, SM6, Goteborg och Bohus/Halland County group: Stephan,SM5YRA, plans an activation of the lighthouse Halloe (ARLHS SWE173, Loc JO58oh, SMFF-0465, LH C0375) as SB6HL in SSB and digital modes on 80m-6m from Sep 8-15. QSL via SM5YRA (bureau/direct).

EU-052, SV, Ipeiros/Dytiki Elaas Region group: Dirk,SV8/ON5CT/p, is going to visit Corfu (GIOTA INS-042, MIA MG-055, WLOTA 4132, Loc JM99) from Sep 4-18 and will be QRV mainly in RTTY and SSB on 20m-6m. QSL only via LoTW or eQSL. No paper QSLs.

EU-088, OZ, Kattegat group: Bernd,DL8AAV, will sign OZ0AV from the island of Laeso (DIA NK-003, WLOTA 2820) from Sep 10-22. QSL via DL8AAV.

EU-138, SM7, Blekinge County group: Fred/SM7DAY/p will show up again from Senoren Island. He will work in SSB/CW on the HF bands from Sep 8-14. QSL via homecall (bureau/direct).

EU-165, I*0, Sardinia's Coastal Islands: Riccardo,IZ5JMX, spends his holiday on San Pietro island from Sep 2-14. Listen for IM0/IZ5JMX in SSB on 40m-10m. QSL via IZ5JMX (bureau/direct).

OC-233, VK7, Tasmania's Coastal Islands: Scott,VK7HVK/p, wants to hand out a few IOTA points from Bruny Island (WLOTA 1829, Loc QE36PQ) if his antenna can be repaired. QSL via homecall (d).

Non IOTA: John,VE3ISE, and Doug,VE3GJ, plan to activate the Canadian island Byng (ON-037) on Sep 8. They will use two stations: VE3ISE with 100 W starting around noon local time on 40m/20m and VE3GJ with QRP on 20m. QSLs via homecalls (bureau/direct).

OEFF/IFF: Fred,DL8DXL, is underway in IN3 and OE during the next two weeks and wants to activate several WFFs and SOTAs. QSL via homecall.

USECA Swap (SE MI) Oct 7th... NEW DATE!! NEW LARGER LOCATION!!

Posted: 04 Sep 2012 09:52 AM PDT
http://forums.qrz.com/showthread.php?360263-USECA-Swap-(SE-MI)-Oct-7th-NEW-DATE!!-NEW-LARGER-LOCATION!!&goto=newpost

We've moved!!! USECA's annual swap has historically been near the end of October. We've been looking for some time for a new venue with more room for our vendors more parking, and more accomodating to our needs and we've found it.. You'll love the layout.. more space, better floor traffic patterns, & much larger parking lot.

Come to one of the largest Ham Swaps in Michigan..

Reserve your table(s) now! Make plans to attend!

Full Swap info in povided on our Club website... http://usecaarc.com/

Easy access off I-75...

http://forums.qrz.com/showthread.php?360312-Route-66-on-the-air-special-event&goto=newpost

The 13th annual Route 66 On The Air Special Event is coming September 8-16, 2012 . This is one of the years best event and this year we will have 17 stations along with 3 rovers. For further information please visit the event's official website at www.w6jbt.org and click the Route 66 On The Air link. It will show you how to order a certificate and/or, decal along with QSL information.

Below is a list of the participating clubs:

W6A Santa Monica, CA

W6B Los Angeles, CA

W6C San Bernardino, CA

W6D Victorville, CA

W6E Barstow, CA

W6F Kingman, AZ (additional rover station)

W6G Flagstaff, AZ

W6H Albuquerque, NM

W6I Amarillo, TX

W6J Elk City, OK

W6K Oklahoma City, OK

W6L Tulsa, OK

W6M Riverton, KS

W6N Joplin, MO

W6O Lebanon, KS

W6P St. Louis, MO

W6Q Chicago, IL

W6S ROVER 1 (Arizona)

W6T ROVER 2

Hope to hear you on the air...when you get your "KICKS ON ROUTE 66"

Jeff Richardson, W6JJR

Coordinator, Route 66 On The Air

http://forums.qrz.com/showthread.php?360289-Dxers-taking-a-new-course-in-azores-september-28-30-2012&goto=newpost

PRESS RELEASE

September 5, 2012

DXERS TAKING A NEW COURSE IN AZORES, SEPTEMBER 28-30, 2012

NEW WEBSITE GOES LIVE http://azores-islands-hunt.com/

It is often said that DXers only work DX. More recently, we have seen a healthy shift toward assisting the society they visit by helping locals become stronger in Amateur Radio. Something totally new is now happening in the CU-land □ the Azores.

In recent years, the Azores Islands have balanced their agriculture and livestock sectors through increased awareness of their great location and unique landscape facilitated by the development of the local infrastructure to receive more visitors from industrialized countries. Significant progress has been made in expanding tourism facilities, convention hotels and holiday resorts. The Azores are now capable of accommodating 10,500 visitors per day. Additionally, the Azorean airline (SATA) is set to serve many European destinations in addition to the US and Canada.

Radio amateurs are now stepping forward to help the Azoreans increase public awareness of all their nine islands, all within reach of SATA airline service. Forming nine country teams with the locals, a total of twenty DXers will fly in from SATA destinations to be on the air from the nine islands as part of the ☐Azores Nine Islands Hunt☐ - a unique concept to bring everyone on board globally to share what the Azores can offer. Those participating are:

K2DO, KI1U, KE3Q, N2GA, VE3DZ, VE3FWA, DJ9ZB, DF9TF, G3TXF, G7VJR, OH2BH, OH8NC, OH9MDV LB3HC, ON7LX ON7TK, ON5NT, OZ7AM and OZ1IKY together with locals: CU1AAD, CU2BV, CU2CE, CU2DX, CU3CS, CU4AB, CU5AM, CU6AB, CU7CA,CU8AAE and CU9AC

The Amateur Radio group is also set to streamline emergency communications procedures throughout the archipelago. Together with the local amateur population and administrators, they will be using this activity to test the island-to-island amateur radio network. The ARRL is sending their best resources, lending their expertise in this field.

The project website was launched today at http://azores-islands-hunt.com/ for your review while you can also study the Azores at http://www.visitazores.com/en

175th Anniversary of Morse Code:

Posted: 04 Sep 2012 05:38 PM PDT
http://www.eham.net/articles/28925

The United States is honoring the 175th anniversary of Morse code. A method of transmitting text as sequences of short and long signals called "dots" and "dashes" was developed by Professor Samuel Morse of New York University in 1836. Seven years later, he sent the world's first telegram with the Biblical text "What hath God wrought" via a 64-kilometer telegraph cable laid between Washington and Baltimore.

//
Car Key Mystery:

Posted: 04 Sep 2012 05:37 PM PDT
http://www.eham.net/articles/28924

Are experts any closer to solving the case of the defunct key fobs? One local man says it may be a mixture of several frequencies. CHEYENNE -- A mysterious signal that has been shutting down cars and key fobs in a parking lot north of Frontier Mall may not be the fault of any one entity. Rather, it could be a combined effort, an expert says. The Wyoming Tribune Eagle published a story on Aug. 28 describing the strange happenings at the Rue Terre plaza n which includes Kohl's, Hobbytown USA, Bed Bath and Beyond and several other stores. In response, one local ham operator decided to take on radio expert David Maxson's suggestion that someone try to find the source of a possible rogue radio transmitter. The man, who has asked not to be identified, said he drove out to the parking lot the same day the story ran to do a little detective work. According to his readings, nearly every business in the plaza is emitting a powerful radio signal that corresponds to a frequency of 911.75 to 945 megahertz. The ham operator said those belong to a band of frequencies reserved for wireless in-store radio systems. He said the businesses are likely receiving the signals from their initial sources, then boosting their power and broadcasting them throughout their stores. While it appears no individual store is causing the problem, the close proximity of so many strong frequencies could be what's shutting down key fobs of late-model cars that park nearby, he said. Frequencies of 900 MHz are well above those used by modern key fobs and electronic car starters, the HAM operator said. But he added that all those all are bouncing off of one another, creating pockets in the lot where the frequencies have dropped to 315 MHz n the same range that modern key fobs operate on. As a result, he was able to find a number of areas where the radio signals were strong enough and of the right wavelength to shut down a key fob. The problem, he said, is that no one store or piece of equipment is solely responsible. He added that if his suspicions are correct, it's not likely the key fob killer will resolve itself anytime soon. It's possible the situation may have caught the eyes of the Federal Communications Commission, which is responsible for the management and certification of communications technology.

6m (&2m) EME DXpedition to ZK2 September 7-21, 2012
LATEST NEWS from W7GJ, dated 2012-08-14:
The callsigns for the Niue JT65 EME operation next month will be:
E6M - 6m
E6RS - 2m
I have updated my website to include information on how to update your WSJT program
to include these calls as well as include the E6 prefix:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
Please watch for us on EME! GL and VY 73, Lance

SOURCE: Moon-Net

NEWS by W7GJ, dated 2012-09-03:
Hello! Well, I wanted to provide as much advance time as I could so you could mark your
calendars and/or get everything in your 6m station optimized by the end of August ;-)
As those of you know who completed JT65A mode contacts with me on 6m EME when I was in
E51, 3D2 and 5W, I will do my best to set up and be active during our common moon windows -
especially during the optimum days of the month for 6m EME.
The callsign is not in hand yet (but assured by email), and the QTH has not been finalized,
but all the plane tickets have been purchased (as usual, any contributions are VERY

welcome),
and the equipment (a KX3 portable transceiver with compatible 6m amplifier) is in the works.
As soon as the license is in hand, the information will also be available under the callsign on QRZ.com.
In the meantime, preliminary information about the DXpedition is here:
http://www.bigskyspaces.com/w7gj/Niue2012.htm
I don't know if it will be possible to find a QTH that provides my usual preference for a takeoff shot
over water on moonrise. However, that is not necessary to work NA stations during their moonsets (I will be elevating),
so we will get the ground gain on YOUR end for that ;-) And if a QTH with a good moonrise shot (for EU moonset)
cannot be found, it is quite likely that we will instead wind up with a good moonset over the water for the EU moonrise.
Currently, ZL1RS is planning to activate ZK2 on 2m EME during the same time period, as we did together from E51 and 3D2;
Bob's call will probably be his old callsign of ZK2RS. More details will be posted on the above website as the departure
time at the end of August gets closer.
I am very much looking forward to giving you a new one on the Magic Band! GL and DX! VY 73, Lance

SOURCE: tnx to Lance, W7GJ, direct to MMMonVHF

** DXCC: GU & GJ ; Guernsey & Jesrey ; Square: IN89 ; start 2012-09-29

Hermann, DL2NUD, and Peter, DJ4TC, will be qrv some days from GU and GJ
during sept. 29th and oct. 09th, 2012
Main goal are the higher bands these time. Activity on 144 MHz will be only short!
The Team will be ready with following equipment:
144: 9 el 7KF hor./vert. abt. 400W
432: 21 el hor. 120W (400W sometimes)
1296: 62 el hor. 200W (400W sometimes)

Source: tnx to Hermann, DL2NUD, direct to MMMonVHF

** DXCC: SV9 ; Crete ; Square: KM25 ; start 2012-10-01

Bodo, DF8DX, qrv from SV9 on HF and 23cm EME

Equipment will be like on my previous DXpeditions IC7000 with transverter (100W) and 59ele yagi.
call: SV9/DF8DX
Grid: KM25 (exact locator will be given later)
IOTA: EU-015
Activity on 23cm EME:
October 2, 2000-2130z (for EU)
October 3, 0400-0600z (for NA)
with backup dates:
October 3, 2030-2200z (for EU)
October 4, 0430-0600z (for NA)
Frequency: TX first on 1296.090MHz / RX on my own echo frequency (just like in CW)

I am one week on SV9 but I would prefer you work me on the suggested times because i want to spend some time with my wife on this vacation and also enjoy some HF (CW only) activity as well
as maybe activity from EU-187. Further skeds on request (if necesary). Check www.mmmonvhf.de for updates.

WIANEWS WEEK COMMENCING SEPTEMBER 9 2012.

ARISS to contact Australian school

What use is an f-call?

SEQ-ATV Repeater now full power from Deception Bay

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING SEP 09 2012.

Coast FM in Mandurah, WA, recently ran a competition that saw all the schools
in the area campaign for the chance to do something very special.

Pinjarra Primary School were the eventual winners and they then had the
chance to send an object into space.

On Friday 31st the near space weather balloon, 'Expandasaurus', was launched
and tracked by the students.

Attached to it they placed a piece of Star Wars Lego

The stats were impressive...

- it travelled 27,500 metres high
- had a top speed of 256 kph
- total flight time of 1.5 hours

The craft was finally recovered 212 kms away near Narrogin.

Starting with a real shot showing the Lego figure in space visit
http://www.radiotoday.com.au

Now with a bit of digging it would appear Ham Radio was involved in a small way helping these students. A VK6ND-11 was noticed on the video on the radiotoday.com.au web site using APRS via VK6RMW-3.

On the DK0 web site of old APRS data, we found that at 22.47UTC 30th the balloon was at 5,737ft and burst at a height of 88,449 foot almost 2 hours later on the 31st.

ARISS to contact Australian school

The Tara Anglican School for Girls, North Parramatta in New South Wales is due to have a telebridge contact with the International Space Station this Sunday in Europe or Monday morning local time.

The International Space Station will be audible over Europe on 145.800 MHz FM as it passes over the ground station ON4ISS in Belgium through the Amateur Radio on the International Space Station project.

The contact will also be broadcast on EchoLink AMSAT node 101 377 and JK1ZRW node 277 208 conference servers, as well as on IRLP Discovery Reflector 9010.

Among the questions students will ask Astronaut Sunita Williams KD5PLB are what inspired her to be a space traveller, the research projects in space, junk or meteorites that has been seen and how the craft is powered.

A leading Australian girls' school, Tara was selected by Oxford University to join the Global Jet Watch Program which links university astronomers to high schools also from Chile, South Africa and India.

ARISS contact postponed

Friday September 7, 2012's 08.52 UTC, ARISS contact planned with Gymnasium Michelstadt, Michelstadt, Germany was postponed.

This direct radio contact with the International Space Station was postponed till a later date to be determined.

The reason is an additional EVA (Extra Vehicular Activity or Space Walk).

For security reasons, ARISS contacts are not permitted during an EVA.

(Jim Linton VK3PC/SouthGate)

SCAM alert - 'PHISHING' email

Reports have been received about scam emails claiming to come from the ACMA.

The subject heading is 'Broadband Account Upgrade Pending' and the subheading is 'Urgent news, your Broadband Account needs to Upgraded for Security Measures!' or similar.

This is not an ACMA email but links to a 'phishing' webpage that seeks details about your internet accounts. It is important that you do not click on the link, and do not provide any details. In the event that you have already done so, please contact your Internet Service Provider as soon as possible.

25 kHz spaced UHF Citizen Band Radio equipment in NZ

In a recent statement, New Zealand's RSM says that all manufacturers and importers of UHF CB radio equipment with 25 kHz channelling should note that in accordance with the ZL General User Radio Licence for Citizen Band Radio, equipment that does not comply with AS/NZS 4365:2011 cannot be sold in New Zealand if it is manufactured or imported into New Zealand after 1 December 2012.

ON THE AIR

The UK's Daily Mail and General Trust has sold its remaining 50 per cent of DMG Radio Australia.

The buyer is Illyria, Lachlan Murdoch's private company, which already owned the other 50 per cent after a deal in 2009.

The announcement ends a 15-year involvement in Australian radio from DMGT which began when foundation CEO Paul Thompson purchased 5AA Adelaide in the late 90′s.

DMG Radio Australia most recently launched Smooth FM in Sydney and Melbourne earlier this year and owns the CHR network Nova

WIA
President Michael Owen VK3KI president@wia.org.au
Vice President Phil Wait VK2ASD vk2asd@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Greetings Everyone, from the President and Board of the WIA.

In August I was engaged in conversation with a recently licensed and very keen Foundation licensee. I quickly realised he had given long, considered and unemotional thought to the issues he was raising and the elements underlying them that he had identified. From my hurried notes made at the time and post the all too short casual meeting I will share some of his thoughts with you.

It is his belief that it is essential we all remember and reflect on our first introduction to the mysteries and science of Amateur Radio, the people and personalities who whetted our appetite for more knowledge and understanding, and those who guided us through the learning process to gain

our first Amateur licence. Whenever we hear a new callsign on air, especially Foundation licence callsigns, it is prudent we each pause and recall our own first tentative steps onto the airwaves before we dismiss the caller as a 'Cornflake Cowboy' not worthy of our communication. It is far better to spend a few moments with the caller to give acknowledgment, encouragement and friendship in the true spirit of Amateur Radio. Hard to argue against this view of his isn't it?

His next point was many Foundation licensees, such as himself, felt somewhat abandoned once they had achieved their first step into the hobby. He would like to see more commitment in time and knowledge, by the person or persons who introduced a newcomer to the hobby, post the Foundation licence. He believes as current mentors fade away or become silent keys the mentoring skills will be lost unless people, such as him, are subject to skilled mentoring and can learn to carry those skills, and our hobby, into the future.

My ready response to that was to be "Well, new people can get all that within a club." But then I paused and thought about isolated Amateurs or would be Amateurs whose only contact with Amateur Radio may be with some local Radio Amateur. Older people keen to enter the world of Amateur Radio who do not have private transport or have restricted travel options. Two words kept buzzing in my mind as he was speaking;

Consideration and Commitment.

I left the conversation feeling confident that while we had young people such as him entering Amateur Radio the future of our hobby looked bright. Then I fondly recalled my early days in Amateur Radio and the camaraderie I enjoyed then and now with the wider Amateur community.

This has been Ewan VK4ERM for the WIA Board

HAMS ACROSS AUSTRALIA.

VK2
web service:- http://www.arnsw.org.au/html/news_vk2wi.htm

Amateur Radio will be conducting the next one day Foundation course at the VK2WI site, 63 Quarry Road, Dural 23rd September . Assessments will be the following Sunday. Details under Training on the ARNSW web site www.arnsw.org.au
Contact by email education@arnsw.org.au or telephone 02 9651 1490 and leave message and contact details.

Sunday the 30 th September is the next activity at the VK2WI Dural site, 63 Quarry Rd. Dural with the morning T&T, exam assessments and Home Brew afternoon gathering. Check out the ARNSW web site home page www.arnsw.org.au for the various activities. Those attending assessments bring a passport photo and identification.

October NTARC Meeting

To be held on Wednesday 12 October, this will again be the yearly pilgrimage to Mt Barrow. Last year this was a really great evening and those that attended thoroughly enjoyed themselves, especially in the extended twilight that came with the introduction of daylight saving just days before.

This formula will also apply in 2012, so get along.

Arrive any time in the afternoon and NTARC have the site overnight so if you are appropriately equipped, why not camp until next morning. There are members who regularly do just that and they would love to have your company.

DISCUSSION POINT

What use is an f-call?

To be a HAM means different things to different people. For some it's an excuse to have a radio or it's a reason to participate in competitions. For others it's a reason to invent new contraptions in the shack, but for most, being a HAM is about communication. The obvious communication is that heard on-air across the Amateur Bands, but that's not the only communication that

is occurring. Many Hams are members of clubs, or find like-minded individuals where they make their experience a shared one.

Whatever your bent in Amateur Radio, you're participating in this hobby to get something from it.

Of course, if everyone only ever took something without giving something back, there would not be a hobby at all. For me, giving back is in the realm of the things I do, making this segment, hosting F-troop on the local repeater, participating in my club, writing articles, sending email feedback and making myself available for others to talk to.

It's strange to me, but I've heard many new licensees say that because they only have an F-call, or because they've only been licensed for a small time, they're not able to contribute. Worse still, even if those excuses are not used, there seems to be the idea that they have no right to speak up, or that they have not enough knowledge to contribute in any meaningful way.

I'd have to say that this makes no sense to me. I know that I'm not backwards in coming forward, some would say I've got more front than a Mac truck, but I try very hard to make my contributions in the realms that I understand and one of those is that I'm a beginner, so I'll spend lots of time asking questions and reading articles. At some point someone will say something that runs contrary to my understanding, so I'll ask why?

Asking "Why?" is in of itself a contribution, but you can expand on it by doing something with what you learnt from asking the question. You could write an article for the local newsletter, send an email to your local mailing list, or post a story on your website. You could go on air and talk about it, or sit around the BBQ and share.

Contributions can be made everywhere. Having a Foundation License, or being new to the hobby is no excuse. What did you contribute to your hobby today?

I'm Onno VK6FLAB

(Past editions of What use is an f-call can be found online at harg.org.au under F-troop.)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Philippine hams get new privileges

The Philippines Amateur Radio Association has announced a new Foundation Licence with VHF frequencies is available to those aged at least nine years.

In other regulations access is given to the new low and medium frequency bands, increases 40-metres 7.201 MHz to 7.300 MHz, while also allowing Class B and C licence holders to operate mobile HF.

Internet technology such as EchoLink is now explicitly allowed and an organising committee will oversee the examination question pool.

Amateur radio helps track Hurricane Isaac

Amateur radio first responders along the United States Gulf shore were ready when Hurricane Isaac slammed ashore on 28 and 29 August.

Members of the Hurricane Watch Net took to the air to track its approach and although band conditions on 20 and 40m were not the greatest, the net continued and began passing storm conditions to the National Hurricane Centre in Miami.

The Net ceased its operation on the afternoon of Wednesday 29 August once Hurricane Isaac was downgraded to a tropical storm.

MARS ROVER GETS SOFTWARE UPDATE

NASA's Mars Science Laboratory at JPL team has sent a software update to the Curiosity Rover on Mars, more than 160 million miles away. According to Venturebeat dot com, the software had to be updated because Curiosity needed different directions to drive around on Mars than it did to land on the planet's surface.

The computer hardware in the Curiosity Rover is powered by a pair of computers built by BAE Systems. These RAD750 computers use a 10-year-old IBM PowerPC microprocessor running at a relatively slow 132 megahertz. These machines also have only 120 megabytes of random access memory, but are built to withstand wild temperature swings, radiation, and physical shaking.

The drawback is that the computers on the robot vehicle did not have enough memory for both the landing and its surface missions. So NASA had to swap out the software over four days of communication through the void of space. It took so long because it takes about 14 minutes to send the signal to the rover and another 14 minutes to get a response back.

APRS TO ASSIST VULTURE 2 SPACEPLANE TRACKING

The Low Orbit Helium Assisted Navigator Vulture 2 space plane will carry an amateur radio Automatic Packet Reporting System or APRS system.

The UK newspaper the Register reports that Anthony Stirk, M-Zero-U-P-U, who was involved in the Raspberry Pi In The Sky mission, is working on the custom control board for the Vulture 2 space plane.

As of now, the communications subsystem has a Radiometrix 300 milliwatt HX1 144 MHz band module for APRS and a Radiometrix 10 milliwatt NTX2 433 MHz band module for RTTY. More information on frequencies will be announced at a later date.

More on this upcoming near to space adventure can
be read on-line at tinyurl.com/vulture-2. And we
will have more ham radio space related news later
on in this week's newscast.

==========

NEWS FROM ARNEWSLINE USA

HAM RADIO DELUXE UPDATED

HRD Software announces an updated release of Ham
Radio Deluxe version 5.24.36. This update
includes fixes for cross band contacts in Logbook
and some PTT issues hams have run into with DM780.

Meanwhile the Ham Radio Deluxe development team
continues work on HRD Version 6.0. The specific
date release date will be announced in a future press release.

For those who are unfamiliar with it, Ham Radio
Deluxe or HRD is an integrated suite of software
products for amateur radio. The five modules
provide rig control, logging, digital
communications, satellite tracking, and rotator
control.

More about it is on-line at www.ham-radio-deluxe.com

==========

WEIRD AND WONDERFUL

Hamfest talk shows Invisible Surprises

With a forgotten technology first used by Marconi , Chip Cohen W1YW, brought
Marconi's "metamaterials" to a whole new level, he made them do a
disappearing act.

In Massachusetts, W1YW has given the first public demonstration of an
actual "invisibility cloak."

Well over a 150 eager radio hams and guests saw a live demonstration of
metal mast disappear at microwaves, over a wide bandwidth, by partially
covering it with a Marconi-inspired invisibility cloak.

W1YW's invisibility cloak is the first actual device that makes things
disappear. Using fractals as resonators, it slip-streams the waves around
an obstacle, and in that process hides the obstacle completely. It joins
these resonators/antennas with a very close (but not touching) spacing,
an idea that came to Marconi and his collaborator Franklin in 1919.

"Marconi never came close to making an invisibility cloak, but everyone using
metamaterials -- those closely spaced resonators -- owes that basic idea to
him."

W1YW's invisibility cloak development was a slow one over a dozen years. It harps back to work he did when tinkering with antennas when the bands were dead. The first invisibility cloak demonstration finally came to fruition in 2009.

While science fiction and Harry Potter have fascinated people with the notion of the invisibility cloak, W1YW's invention is the only one that works. W1YW has just received the very first, and basic, patent for invisibility cloaks -- U.S. patent 8,253,639.

W1YW also showed a very large invisibility cloak with nearly 10,000 little resonator/antennas making it the largest, in number, antenna array in the world. " I was delighted to show something very special in terms of the size and type of objects cloaked. The general public will be aware of this soon, but I wanted my fellow radio amateurs to have the fun of seeing it first" . Added W1YW: "This changes everything."

WW SPECIAL INTEREST GROUPS --- ATV (Every pixel tells a story) - Video
arvideonews.com
hamradiotube.com
youtube.com
qdg.org.au

The South East Queensland ATV group's digital ATV repeater is undergoing on air testing using full output power.

Martin VK4JVC has brought the VK4RMG repeater down from Ocean View and changed the analogue transmitter for a newly built dual stream digital unit. He has built the new power amplifier for the SEQATV groups Digital ATV repeater and is sending out test transmissions on 446.5 MHz.

The digital signal is to commercial television standards and is truly linear with no distortion.

Testing is currently using a beam pointing South from Deception Bay to the Brisbane CBD.

The home built power amplifier is currently working well above expectations so the signal is easy to find when on air.

The transmitter is now being tested, filters adjusted etc, when Martin is home so look for a signal outside business hours, both channels are in operation.

Good reports have been received ranging from Samford Valley to the Brisbane south side.

During the next month improvements will be made to the repeater input receivers ready to go back up the mountain.

(Alan VK4NA)

WW SPECIAL INTEREST GROUPS --- DIGITAL

D-STAR Repeater Update

VK7RRR is now running in full duplex mode, so local QSO's are now possible. There will no doubt be some kinks to work out over the next few weeks (and months) but so far the repeater is operating reliably.

By default VK7RRR is now connected to DCS014 (Module B), the new Australian x-Net reflector, located in Sydney. VK7RRR is joined on the new reflector by 10 other repeaters from around Australia, and one from New Zealand, making it generally very active.

Typhoon and an earthquake strike

A powerful storm called Typhoon Bolaven battered Korea and then a big earthquake occurred in the Philippines - and responding to both disasters were radio amateurs with emergency communication.

The Korean Amateur Radio League spokesman Yong-Surke Lee HL1FB said when the typhoon hit late last month the messages kept flowing to the authorities via its mountain located D90IK 2-metre repeater, with 6K2BUF the control officer.

The South Korean state disaster management agency reported ten deaths as the storm, the strongest to hit the country for almost a decade, left hundreds of thousands with homes without power and suffering property damage.

Meantime the strongest earthquake in more than two decades, measuring 7.6 on the Richter scale, hit the Philippines and members of the Ham Emergency Radio Operations (HERO) soon after were exchanging messages with the affected coastal areas.

Eddie Valdez DU1EV, the Chief Operating Officer of the Philippines Amateur Radio Association said that DU1VHY handled traffic and got reports from the affected areas.

Eddie DU1EV said the area of DU5 was nearest the epicentre and DV5PO reported there was a power outage in Borongan, Samar Island. DV5RAY reported that people were evacuating because of the tsunami alert.

The alert was lifted after only small waves were generated. Tens of thousands of people who headed out of the danger zone have now returned.

The National Disaster Risk Reduction Management Council initial assessment was that there was no major structural damage in the affected areas. Most houses destroyed were built from light material.

Eddie DU1EV said it was good that many hams in the affected areas showed up on the 2-metre and 40-metre emergency channels and other districts were on standby if needed.

(Jim Linton VK3PC, Chairman IARU Region 3 Disaster Communications Committee)

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit
material and do not necessarily reflect those of the rebroadcasters,
nor the National WIA, but are broadcast in the spirit in which they were
submitted.

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Tony's 10 Metre Band Report

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/bYJjX7Sg4EA/september_05.htm?utm_source=feedburner&utm_medium=email

A good weekend for the Field Day contest Region 1 with Saturday being a little more prolific than Sunday. Ah yes, memories of lots of coffee, curry and beer and large fry-up breakfasts. That apart, the week was slow. Friday improved probably with the various groups out testing their kit and working out operating schedules. Fun on a stick!

Startup deploying new wireless network over TV white space

Posted: 05 Sep 2012 08:36 PM PDT
http://forums.qrz.com/showthread.php?360460-Startup-deploying-new-wireless-network-over-TV-white-space&goto=newpost

From http://levelrf.com/blog.html:

Level RF is building the next generation wireless network. As a startup with a little funding, Level had to find a way to overcome the high cost of quality spectrum. The FCC, thanks to the persuasion of some of the largest tech giants, has opened up spectrum for unlicensed use in the frequencies previously used for TV broadcasting. TV frequencies in the UHF band are great for covering long distances and penetrating through walls. However, there are a lot of TV stations still operating in urban markets presenting new challenges for a wireless carrier.

Level RF is in developing custom network infrastructure to deploy a next generation wireless network for the next generation of connected people and machines. To prove the capabilities of this new space in challenging urban environments, Level is deploying the first network in the San Francisco Bay area and opening up to makers and start ups who want to connect their low bandwidth projects to the web. Base stations are hosted at volunteers homes and offices. Since Level is operating in the UHF band they only need 40-50 base stations to cover the bay area.

The most exciting feature of the network is that it will adapt and improve rapidly, similar to how websites change today. Software Defined Radio allows changes to hardware remotely and ensures the wide range of possible applications are getting the best service possible. With the help of the community, Level plans to leap frog the capabilities of current networks in terms of data throughput and efficiency.

Level RF is working hard in Sunnyvale, CA to deploy the first network by March 2013. If you are interested in building the next generation wireless network, please contact

founders [at] levelrf.com.

Bob Cox, K3EST, Retires as CQWW Contest Director

Posted: 04 Sep 2012 07:24 PM PDT
http://forums.qrz.com/showthread.php?360334-Bob-Cox-K3EST-Retires-as-CQWW-Contest-Director&goto=newpost

From the CQ Newsroom...

(Hicksville, NY - Sept. 4, 2012) -- Bob Cox, K3EST, has retired as Director of the CQ World Wide DX Contest and as CQ's Director of Contesting, it was announced today by CQ Publisher Dick Ross, K2MGA. Cox has been at the helm of the CQWW for 35 years, guiding the contest through massive changes in technology - both on and off the air - and CQWW's growth to become the world's most popular amateur radio contest. Cox's retirement is effective immediately. A successor has not yet been named. For additional information, visit the CQ Newsroom at

http://cqnewsroom.blogspot.com/>.

Parachute Mobile Vertical DXpedition Sunday Sept 9 2012, special QSL cards available

Posted: 05 Sep 2012 04:42 PM PDT
http://forums.qrz.com/showthread.php?360437-Parachute-Mobile-Vertical-DXpedition-Sunday-Sept-9-2012-special-QSL-cards-available&goto=newpost

Details at www.parachutemobile.org

Jumpers will be Mark Meltzer AF6IM and Michael Gregg KF6WRW. We expect to start jumping around 11 AM, but scheduling is dependent on weather and plane loading. We pay $20 a jump. Tandem jumpers pay about 8x. Guess who has priority? We hope to make four jumps during the afternoon.

Both jumpers will be carrying APRS gear which will transmit GPS data, heart rate and SpO2 (blood oxygen level). Look up their callsigns on www.aprs.fi

Jumpers will be exiting from a King Air 90 over the Byron CA airport at about 13,500 ft and deploying a few seconds later to give maximum canopy hang time for QSOs. Distant hams are encouraged to try for a QSO. We routinely make contacts over 100 miles and could go further if hams go to mountain tops for their QSOs.

QSOs with the Jumpers will be on 146.430 FM simplex with an alternate of 147.570 simplex. Special event Parachute Mobile QSL cards will be swapped with hams who contact our jumpers and SWLs who provide sufficient QSO details to verify reception.

Parachute Mobile: In the air, On the air.

North America SOTA Weekend: September 8-9

Posted: 05 Sep 2012 10:54 AM PDT
http://forums.qrz.com/showthread.php?360394-North-America-SOTA-Weekend-September-8-9&goto=newpost

Summits on the Air (SOTA) is a world-wide award scheme for radio amateurs and

shortwave listeners that encourages portable operation in mountainous areas.

Summits qualify for listing in the SOTA database based on prominence. Each SOTA

summit earns the activators and chasers a score which is related to the height

of the summit. Certificates are available for various scores.

In order to promote SOTA operations in North America, September 8-9 has been

designated NA-SOTA weekend. Activators will make a special effort to be

operational on SOTA summits this weekend.

For more information the SOTA Program, see http://www.sota.org.uk or http://na-sota.org/

For information on planned activations, see http://sotawatch.org/alerts.php

Also visit the NASOTA Yahoo Group. http://groups.yahoo.com/group/nasota/

==> + ARRL SECOND CENTURY: ARRL PLANS CENTENNIAL CELEBRATION IN
HARTFORD IN 2014

The ARRL has announced plans to hold its National Centennial Convention
in Hartford, Connecticut on July 17-20, 2014. The Convention will mark
100 years of the ARRL's founding in Hartford. ARRL President Kay
Craigie, N3KN, has also announced a theme for ARRL's Centennial year:
Advancing the Art and Science of Radio -- Since 1914.

In May 1914, Hiram Percy Maxim, W1AW -- a leading inventor and
industrialist in Hartford, Connecticut -- founded the American Radio
Relay League, together with Clarence Tuska, 1WD, the secretary of The
Radio Club of Hartford. Today, the ARRL serves almost 160,000 members,
mostly licensed radio amateurs, in the US and around the world.
```

The decision to hold the ARRL Centennial Convention in Hartford was made by the ARRL Board of Directors at its July 2012 meeting. The organization's headquarters has been maintained in the Hartford area since its founding. ARRL's present headquarters is located on Main Street in Newington, Connecticut, a suburb of Hartford, and is visited by nearly 2000 groups and individuals each year. The site has been home to The Hiram Percy Maxim Memorial Station, W1AW, since 1938. Read more here <http://www.arrl.org/news/arrl-plans-centennial-celebration-in-hartford-in-2014>.

==> + PUBLIC SERVICE: VOIP HURRICANE NET PROVIDES SUPPORT DURING HURRICANE ISAAC

The VoIP Hurricane Net -- running on the *WX_TALK* EchoLink conference node 7203/IRLP 9219 -- was active over a two day period from August 28-29 as Hurricane Isaac pounded the Northern Gulf Coast with high winds, extremely heavy rainfall, significant storm surge and river and stream flooding. The VoIP Hurricane Net operated for more than 25 hours continuously during the US coast landfall. Read more here <http://www.arrl.org/news/voip-hurricane-net-provides-support-during-hurricane-isaac>.

==> + CHECK OUT THE OCTOBER 2012 ISSUE OF QST

Have you ever wanted to go on a DXpedition, but lacked the time -- or resources -- to make it happen? Never fear, because you can go on four DXpeditions from the comfort of your armchair, thanks to the October edition of QST! In our annual DXing issue, discover DXpeditions of lore and legend as we take you to Malpelo, Rotuma, Navassa and the Mountains of the Moon. So sit back and enjoy all the fun and challenges that come with being in a remote part of the world, connected to civilization only by radio waves racing through the ether.

The cover of the October issue of QST features the 2012 HK0NA DXpedition to Malpelo, an island located about 235 miles of the coast of Colombia. In his article "Malpelo Island DXpedition 2012 -- HK0NA," Bob Allphin, K4UEE, recounts how 20 hams from six countries came together to activate the #12 most-wanted DXCC entity earlier this year. Travel with Paul S. Ewing, N6PSE, to Rotuma in his article "DXpedition to the Future," and with J. Robert Eshleman, W4DR, to Navassa in "DX Determination." Lots of hams depend on spotting networks to work DX. Murray Green, K3BEQ, tells how DX spotting networks have advanced from voice over 2 meter simplex to the Reverse Beacon Network in his article "The Evolution of DX Spotting."

As many hams know, tubes can be expensive and hard to find. To overcome this, James Klitzing, W6PQL, developed a compact linear amplifier. In his article "Solid State 1 kW Linear Amplifier for 2 Meters," he shows readers exactly what they need to build the amplifier. Arch Doty, W7ACD, knows that there's more to cosmic and atmospheric noise than meets the ear. In his article "Those Mysterious Signals," he explains that while these signals may just sound like noise to us, they mean a

lot more to radio astronomers. ARRL Education and Technology Program Coordinator Mark Spencer, WA8SME, shows how to control your VHF SSB transceiver to simulate full duplex operation in his article "Satellite CAT Interface for Working the Analog Birds."

ARRL Test Engineer Bob Allison, WB1GCM, takes a look at the Alinco DJ-V57T handheld dual-band transceiver in this month's Product Review. He says the rig "offers a nice selection of basic features and good transmit and receive performance at a reasonable price. The standard battery pack is fine for casual use, but consider one of the optional high capacity packs if you expect to transmit frequently." ARRL Contributing Editor Rick Palm, K1CE, checked out the Kenwood TH-K20A handheld 2 meter FM transceiver, saying that it "is solidly built and easy to operate; it has a long battery life and great receiver performance."

Of course, there are the usual columns you know and expect in the October QST: Happenings, Hints & Kinks, The Doctor Is In, Short Takes, Vintage Radio, How's DX and more. Look for your October issue in your mailbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join, or to renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join-arrl-renew-membership/>.

==> + ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of August -- takes a look at the upcoming Director and Vice Director elections, the 2012 sessions of the ARRL's Teachers Institute on Wireless Technology, the ARRL's perspective on the FCC's Congressionally mandated study on Amateur Radio, Field Day logs, changes for the upcoming November Sweepstakes, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-49>.

==> SOLAR UPDATE

Tad "I've seen sunny days that I thought would never end <http://www.youtube.com/watch?v=-T35WXFOmwI>" Cook, K7RA, reports: There was a surprising jump in solar activity occurred this week: The average daily sunspot numbers rose nearly 55 points (that's almost 74 percent) to 128.7, while the average daily solar flux values were up more than 28 points to 136.9. A pair of coronal mass ejections (CMEs) on September 3 and 4 excited Earth's geomagnetic field, causing A index values to jump. The middle latitude A index on September 2-5 was 14, 23, 14 and 24, and the planetary A index on those dates was 12, 32, 13 and 28, while high-latitude college A index (Fairbanks, Alaska) was 48, 52, 39 and 49. Solar flux predictions show the flux values peaking on September 6-7 at 130, then on September 8-12 the solar flux lowers to 125, 120, 115, 110 and 105. Solar flux on September 13-16 is predicted at 100, then 95 on September 17-22, then 100, 110, 115, 120 and 125 on

September 23-27, and then peaking at 130 on September 28. The planetary A index is predicted to be 10 and 8 on September 6-7, then 7 on September 8-10, 5 on September 11-13, 10 on September 14-16, 5 on September 17-19, 10 on September 20, 8 on September 21-23, and back down to 5 on September 24-28. Look for more on the ARRL website on Friday, September 7. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by James Taylor's Fire and Rain <http://en.wikipedia.org/wiki/Fire_and_rain>.

==> + ARRL RECOGNIZES: BOB BRUNINGA, WB4APR, WINS AUGUST QST COVER PLAQUE AWARD

The winner of the August QST Cover Plaque award is Bob Bruninga, WB4APR, for his article "Rethinking Electrical Power for the Ham." Congratulations Bob! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your favorite article in the September issue today.

==> + AMATEUR RADIO FUN: NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page <http://www.arrl.org/quickstats> on the ARRL website. Let your voice be heard!

Questions in this month's QuickStats poll:

- Will you be participating in the CW or Phone Sweepstakes contests in November?
- Are you "fluent" in any computer programming languages?
- Does your HF transceiver have a DSP noise reduction feature?
- Have you taken the new Amateur Extra (Element 4) exam that went into effect on July 1?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure to bookmark it in your browser. Results from this QuickStats poll will be published in the December 2012 issue of QST on the QuickStats page, located in the rear advertising section of the magazine. Along with monthly poll results, QST QuickStats offers colorful charts and graphs that highlight interesting Amateur Radio statistics.

==> THIS WEEK IN RADIOSPORT

This week:

- September 7-8 -- PODXS 070 Club Jay Hudak Memorial 80 Meter Sprint (local time)
- September 8-9 -- Arkansas QSO Party; WAE DX Contest (SSB)
- September 8-10 -- ARRL September VHF QSO Party

<http://www.arrl.org/september-vhf>
- September 9 -- North American Sprint (CW); SKCC Weekend Sprintathon;
Swiss HTC QRP Sprint
- September 10 -- NAQCC-EU Monthly Sprint
- September 12-13 -- CWops Mini-CWT Test

Next week:

- September 14 -- NCC Sprint Ladder
- September 14-16 -- FISTS Get Your Feet Wet Weekend
- September 15 -- Feld Hell Sprint
- September 15-16 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/news/explore-the-upper-reaches-of-the-amateur-radio-spec
trum-in-the-arrl-10-ghz-and-up-contest>;
South Carolina QSO Party; Washington State Salmon Run; Scandinavian
Activity Contest (CW); SRT HF Contest (SSB); QRP Afield
- September 16 -- North American Sprint (SSB); WAB 144 MHz QRO Phone
Contest
- September 17 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint
(local time)
- September 20 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 14-15 -- W9DXCC Convention
<http://www.arrl.org/hamfests/w9dxcc-convention-2>, Elk Grove Village,
Illinois
- September 15 -- ARRL Virginia Section Convention

Amateur Radio Newsline(tm) Report 1830 - September 7 2012

Amateur Radio Newsline report number 1830 with a release date of
September 7 2012 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio responds to a typhoon in Korea and
an earthquake in the Philippines. Also, Yaesu donates a pair of
FT-2000 transceivers to help rebuild a flood ravaged national society
station in Thailand; the European Commission proposes an all out
spectrum sharing plan; a shortwave transmitter in Bangladesh vacates
the amateur exclusive section of 40 meters and an old modulation
technique makes a money saving comeback for commercial broadcasters.
Find out the details are on Amateur Radio Newsline(tm) report number
1830 coming your way right now.

RESCUE RADIO: IARU REGION 3 HAMS RESPOND TO TWIN DISASTERS

A powerful storm called Typhoon Bolaven battered Korea on August 27th
and 28. Then on August 31st a major earthquake occurred off the coast
of the Philippines. Responding to both disasters were ham radio
operators equipped to provide emergency communication. Amateur Radio
Newsline's Norm Seeley, KI7UP, reports:

--

The South Korean state disaster management agency reported ten deaths
as a result of Typhoon Bolivan. It was the strongest storm to hit the
country for almost a decade and left hundreds of thousands without
electricity and suffering property damage. It also churned up rough
seas that smashed two fishing ships into rocks off southern Jeju
island.

Yong-Surke Lee, HL1FB, is the spokesperson for the Korean Amateur Radio
League. He said when Bolaven hit that emergency traffic between the
affected areas kept flowing to the authorities via its D90IK, 2 meter
repeater. In charge of the ham radio relief operations was 6K2BUF
acting as the network control officer. At the height of the severe
weather outbreak almost two million South Korean homes and businesses
were without power or telephones.

Meantime the strongest earthquake in more than two decades, measuring
7.6 on the Ritcher scale, hit the Philippines on August 31st local

time. Almost immediately after the event members of the Ham Emergency Radio Operations group were exchanging messages with the affected coastal areas.

Eddie Valdez DU1EV, is the Chief Operating Officer of the Philippines Amateur Radio Association. He says that Roberto Vincencio, DU1VHY, handled traffic and got reports from the affected areas.

Valdez said the area of DU5 was nearest the epicenter. Lester Price, DV5PO said that there was a power outage in Borongan, on Samar Island. Reynaldo Tan, DV5RAY reported that people had been evacuating because of the tsunami alert. The alert was lifted after officials reported that only small waves had been generated. Tens of thousands of people who headed out of the danger zone have since returned.

According to DU1EV, many hams in the affected areas showed up on the 2 meter and 40 meter emergency channels. He added that other districts were on standby if needed.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

The Philippine National Disaster Risk Reduction Management Council initial assessment was that there was no major structural damage in the affected areas. It noted that most structures destroyed were built from light material. (VK3PC, Post World, BBC)

**

RESCUE RADIO: YAESU DONATES NEW GEAR TO HELP REBUILD RAST STATION HS0AC

Yaesu has donated a pair of FT-2000D transceivers to the Radio Amateur Society of Thailand. This to help rebuild its headquarters station HS0AC that lost its radio gear during severe flooding last year.

The presentation of the two transceivers to the Radio Society of Thailand was made by Dennis Motschenbacher, K7BV, who is the company's Executive Vice President Amateur Radio Sales and also holds the call sign HS0ZKS.

In his note, K7BV said that Thailand is what he called extremely "radio active" with over 300,000 hams most of whom are on VHF. However, that is in the process of changing.

Dennis says that after seven years of waiting, Thai hams are once again able to test for a license that gives them operating privileges on the High Frequency bands. According to K7BV some 40 applicants have already passed the new exam this year and at least one more test is schedule before years end.

Photos of the presentation of the new Yaesu transceivers can be seen at tinyurl.com/yaesu-thailand-radios (K7BV)

**

RADIO LAW: EUROPEAN COMMISSION RECOMMENDS NEW SHARED SPECTRUM PLAN

The European Commission has unveiled plans to deal with the exponential growth in mobile and wireless data traffic. This, by enabling wireless technologies, including broadband, to share the use of the radio spectrum with other services.

The European Commission notes that with new technologies it is possible to share radio spectrum among several users such as internet providers or use the spectrum available between TV frequencies for other purposes.

The Commission says that national spectrum regulation often does not reflect the new technical possibilities, leaving mobile and broadband users at risk of poor service as demand grows. It also prevents a single market for investment in such communications growth. Because of this the Commission believes that a coordinated European approach to sharing spectrum will lead to greater mobile network capacity, cheaper wireless broadband, and new markets such as tradable secondary rights for a given spectrum allocation.

The proposal is 12 pages long and does not seem to exclude any service from the possibility of sharing spectrum with another. What impact this proposal might eventually have on amateur radio operations across Europe is at this point unknown. You can download the proposal in PDF format at tinyurl.com/european-shared-spectrum. (Southgate)

**

INTRUDER WATCH: RADIO BANGLADESH VACATES 7.105 MHZ

Some good news for users of the low end of 40 meters. The Radio Society of Great Britain reports that Radio Bangladesh has left 7 point 105 MHz after the broadcaster finished its experimental transmissions and is now using 7 dot 250 MHz in the shared portion of the band.

The move is likely due to the many amateur radio operators world wide who reported the infringement on the band. Particular thanks go to the German telecommunications authority which filed the official complaints to Radio Bangladesh. (GB2RS)

**

RADIO PROPAGATION: SOLAR CME HITS EARTH ON SEPTEMBER 3RD

If you were wondering about the strange band conditions this past week you can blame it on old Sol. This after a Coronal Mass Ejection or C-M-E hit Earth's magnetic field on at approximately 1200 UTC on Monday, September 3rd.

According to Spaceweather.com the impact induced measurable ground currents in the soil of northern Scandinavia and sparked bright auroras around the Arctic Circle. In fact, at the time the alert was issued, a moderately strong geomagnetic storm that lasted several days was underway.

For current and future information on what the Sun is up to and how it might affect radio propagation here on Earth, simply take your web browser to spaceweather.com for the very latest updates. (Spaceweather)

**

RADIO HISTORY: CELEBRATING 100 YEARS OF STANDARDIZED RADIO PREFIXES

To commemorate the 100th anniversary of the use of ITU callsign prefixes, special event station PB-100-PREFIX will be on the air between October 4th and the 31st.

The back story on the standardization of calls came following the loss of the ocean liner Titanic in April of 1912. The Titanic used the call letters MGY with the "M" representing the Marconi company.

As a result there was an acknowledgement that there should be international standards for radio communications. This lead to several international meetings in the aftermath of the Titanic's sinking and the emergence of the callsign prefix system that has evolved into what we have today.

For more details, visit on this special commemorative operation please take your web browser to www.PB100PREFIX.nl. And if you make contact with PB100PREFIX QSL via PB0P. (OPDX)

**

BREAKING DX NEWS: GROUGH ISLAND "SLIM"

Hams making contact with a station signing ZD5KN on Gough Island will not be getting any credit for the contact. This is because Zed-D-9-K-N is what DX'ers call a "slim" or a "pirate" operation.

According to the Ohio Penn DX Newsletter several sources report that ZS1A, has confirmed that the callsign ZD9KN has never been issued. As such the advice being given is to not waste time working this station if you happen to hear him.

But there is some good news regarding this rather rare entity. Word is that ZS6KX will be going to Gough Island sometime this month and will be there for a year. He is hoping to be issued the callsign ZD9KX and is waiting for the approval of his license. No QSL route has yet been announced so look for more details to be forthcoming. And we will have more DX related news later on in this weeks Amateur Radio Newsline report.

(OPDX)

RESTRUCTURING: NEW RULES AND MORE SPECTRUM FOR PHILIPPINE HAMS

Restructuring has come to ham radio in the Philippines. This according to an announcement by the Philippines Amateur Radio Association which says that following meetings between the Amateur Radio Consultative Panel and the National Telecommunications Commission or NTC, numerous changes to that nations amateur service have been enacted. Amateur Radio Newsline's Jim Meachen, ZL2BHF, is in Nelson, New Zealand with more:

--

As reported by Philippines Amateur Radio Association that organization has now been officially recognized by the National Telecommunications Commission as the nations only national amateur radio organization with the NTC to maintaining a database of licensees that will be made available in the public domain.

Under the revised rules an applicant for a Philippine amateur license who passes an exam but does not own a radio will be given an operator certificate with his own call sign. Also a new entry level Foundation License or Class D certificate with VHF-only privileges has been created with a minimum age requirement of 9 years. And in the area of administering Philippine Amateur Service exams, new question pool and oversight committees have been officially organized.

One other very important change is that the NTC will now allow Philippine radio amateurs what it calls convergence with the Internet. In other words it has authorized interconnects for operations such as Echolink, IRLP and other VoIP operations.

Lastly, hams in the Philippines have been granted to some additional spectrum. Depending on license class, hams will be permitted to operate from 135.7 kHz to 137.8 kHz; 472 kHz to 479 kHz and 7.201 MHz to 7.300 MHz with Class B and Class C allowed to operate High Frequency mobile.

For the Amateur Radio Newsline, Im Jim Meachen, ZL2BHF.

--

These changes to the Philippine Amateur Radio Service regulations came into effect on August 30th. More details can be found at www.para.org.ph/news.htm (PARA)

**

ENFORCEMENT: THE VANISHED VENTURA UNLICENSED STATION BUSTED BY THE FCC

A follow up to a story from a few weeks ago involving an unlicensed station in Ventura, California, on 89.7 MHz that called itself KSSR, The Peoples Radio. It has now been established that this station has been busted by the FCC with a Notice of Unlicensed Operation issued to the station itself as well as to the property owners that hosted it. Amateur Radio Newslines Jim Damron, N8TMW, reports:

--

In a pair of letters dated August 14th the FCC notified the station as an entity well as property owners John and Lisa Darby that KSSR was found to be operating without a license and must leave the air immediately. Both letters also advised the recipients that they had ten days from the date of the notice to respond with any evidence that they have authority to operate granted by the FCC.

The notices said that the FCC staff will use all relevant material information before it to determine what, if any, enforcement action is required to ensure your compliance with FCC Rules. This will include any information that the station management or the property owners disclose in their reply.

This notification from the FCC ends speculation that perhaps the pirate saw private DF'ing activity taking place and voluntarily suspended operations. But the station my have had the final word. As of August 26th the unlicensed stations website carried the following message: "Due to unforeseen circumstances KSSR had the leave the FM airwaves for a while."

Whether that means the station operator plans to return to the airwaves at a later date or is just a smug way of bidding its audience a fond farewell, is unknown. But if the FCC has its way, the unlicensed KSSR will never be heard on the Ventura, California airwaves, ever again.

>From Charleston West Virginia, Im Jim Damron, N8TMW reporting.

--

As is normal in these cases both the station and the property owner were give the customary 30 days to file a response. (CGC, FCC)

RESCUE RADIO: SUFFOLK COUNTY NY SEEKS DONATION OF TRAILER

New York's Suffolk County Radio Club is seeking a donation of a mid-sized trailer to continue its Emergency Communications Field work. This after its present communications vehicle has become unusable due to its age.

For those not aware, the Suffolk County Radio Club was established in 1947 and is the oldest radio club on Long Island. Its members provide free manpower as a public service for special events in addition to

their volunteer emergency communications during disasters such as hurricanes and wildfires.

If you have a covered trailer in the 12 by 8 foot category that you would consider donating, please contact club Vice President, Jim Fehling, N2JFD by telephone at area code 631-926-4370. Or you can e-mail him to n2jfdny (at) gmail (dot) com. (Suffolk Radio Club)

RADIO TRAGEDY: COLORADO HAM RADIO OPERATOR AND WIFE DIE FROM INJURIES SUFFERED IN CAR COLLISION

A Colorado Springs, Colorado, ham radio operator and his wife who were involved in an automobile accident on their way home from church have died from their injuries. This, after their car was broadsided by a driver alleged to have been going the wrong way down a one-way street. Amateur Radio Newsline producer Bill Pasternak, WA6ITF, has the details on this tragic event:

--

According to police reports, Teddy Allison, N0NKG and his wife Mary Ann were in their Saturn headed home from church services at about 10:45 a.m. on Sunday, August 12th. That's when a Chevrolet Malibu, driven by 18 year old Khalil Sanders allegedly drove the wrong way on a one-way street, entered an intersection without stopping and slammed into the Allison's car.

The couple was taken to the hospital, both in critical condition. Teddy Allison, who was age 67, died on August 15th. Mary Ann Allison succumb to her injuries on August 18th.

Khalil Sanders was also taken to the hospital and was treated and later released. Police continue to investigate the crash and are still determining what charges, if any, he potentially faces.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, I the newsroom in Los Angeles.

--

Teddy Allison, N0NKG, was an electronics technician at Hewlett Packard and Mary Ann Allison was a homemaker and accountant at Young life. The Allison's had just celebrated their 49th wedding anniversary on July 7th. (N0RDC)

NAMES IN THE NEWS: ARRL SUMMER SECTION MANAGER ELECTION RESULTS ANNOUNCED

Some new faces and some old ones are returning to the ARRL Field Operations arena. This following the counting of ballots in this years Section Manager elections.

In the North-East, ARRL Connecticut Section Manager Betsey Doane, K1EIC, was re-elected to another term. Meantime John Mueller, K2BT, won out as the new Western New York Section Manager.

Also, Puerto Rico will be getting a new Section Manager in Rene Fonseca, NP3O, of the city of Fajardo. Fonseca will be taking over from Roberto Jiminez, KP4AC, who has served as Section Manager since 2007 but decided not to run for another term of office.

All elected start their new terms on October 1st. (ARRL)

**

NAMES IN THE NEWS: K3EST RETIRES FROM DIRECTOR OF CQWW DX CONTEST

Some names in the news. CQ Magazine has announced that Bob Cox, K3EST, has retired as Director of the CQ World Wide DX Contest and as CQ's Director of Contesting. Cox has been at the helm of the CQ World Wide DX contest for 35 years. During his tenure he guided the competition through numerous changes in technology and growth to become the world's most popular amateur radio contest. Cox's retirement is effective immediately. A successor has not yet been named. (CQ)

**

NAMES IN THE NEWS: MIKE BAXTER KA0XTT OF LAST MAN STANDING GETS NEW ANTENNA FARM

According to a posting on Facebook by the lead character of the situation comedy Last Man Standing, as soon as it get closer to the shows season two premiere of Friday, November 2nd, they will be holding a combined HF, VHF, UHF and D-Star ham radio operating event. This will put all of the amateur radio gear used on the show and the licensed staff members on the air for you to contact.

The shows producer is John Amodeo, NN6JA. He has just uploaded to Facebook close to a dozen photos of the new outdoor antenna installation on the roof of the Studio City, California sound stage where the Last Man Standing is recorded. If you are on Facebook you can see them by putting the words "Last Man Standing Season 2 Antenna Farm" into the search line at the top of any Facebook page.

For those of you who have not yet seen the show, Last Man Standing follows the adventures of Mike Baxter played by actor and comedian Tim Allen. Baxter's character is the director of marketing at an outdoor sporting goods store in Denver, Colorado, whose world is dominated by women. This is especially true at home with his wife and three daughters. His hobby turns out to be amateur radio with Baxter using the call letters KA0XTT. Last Man Standing airs on the ABC television network. (ARNewsline(tm))

HAM RADIO IN SPACE: NASA ANNOUNCES OPPORTUNITIES FOR CUBESAT LAUNCHES

Want to put a small satellite into orbit? Well now is your chance providing the bird you want to launch meets some specific criteria. Amateur Radio Newslines Don Wilbanks, AE5DW, has the details:

--

NASA is seeking proposals for small satellite payloads to fly on rockets planned to launch between 2013 and 2016. These miniature spacecraft, known as CubeSats, could be auxiliary payloads on previously planned missions or on yet to be announced orbital opportunities.

CubeSats are a class of research spacecraft called nano-satellites. These cube-shaped satellites are approximately four inches long, have a volume of about one quart and weigh less than three pounds.

Proposed CubeSat investigations must be consistent with NASA's Strategic Plan and the NASA education vision and goals. The research must address aspects of science, exploration, technology development, education or operations.

Applicants must submit proposals electronically by 4:30 p.m. EST, November 12th. NASA will select the payloads by next January 31st. Selection does not guarantee a launch opportunity but the selected spacecraft will be eligible for flight after final negotiations when a launch opportunity arises. It should be noted that NASA provides only a possible launch opportunity but it will not provide funding for the development of the small satellites.

Meantime from the first three launch initiatives, 64 payloads made the short list for launch opportunities between now and 2014. These satellites come from 25 states and are eligible for la ride to orbit pending an appropriate opportunity and final negotiations.

I'm Don Wilbanks, AE5DW.

--

For additional information about NASA's CubeSat Launch Initiative program, visit go.nasa.gov/puk9K2 (NASA)

**

WORLDBEAT: ZAMBIA MAKES READY FOR DIGITAL BROADCASTING

The Zambian government has issued 10 licenses and 16 construction permits to radio and TV stations in the country.

Those chosen are expected to switch to digital broadcasting before the 2013 deadline set by the Southern Africa Development Community.

According to the nations Minister of Information and Broadcasting Services, the move is intended to enhance participation in the affairs of the country, as well as offer people an opportunity to air their views on issues of national interest. (RW)

**

ON THE AIR: COMMEMORATING THE LIBERATION OF KNOKKE BELGIUM

On the air, special event station ON44CLM will be operational from October 16th through November 15th in commemoration of the liberation of the town of Knokke in Belgium by the Canadian Army in 1944. The C-L-M suffix stands for Canadian Liberation March. More information is on-line at www.on44clm.be. (Southgate)

**

ON THE AIR: CELEBRATING THE DUBLIN BUS

Hams in Erin's Isle have taken to the air to celebrate the 25th anniversary of the Dublin Bus with special event special event station E-I-25-D-B operational from now through June 30th of 2013. The station will be operated by current and former employees of Dublin Bus Company led by EI9HQ and EI4GZB. QSL this operation to EI9HQ or electronically using either Logbook of the World or HamLog.eu. The Dublin Bus Company is a major public transportation supplier through out the city of Dublin, Ireland. (Southgate)

**

ON THE AIR: VOODOO CONTEST CLUB TO BE ACTIVE FROM LIBERIA

For the 24th straight year look for the VooDoo Contest Group to again be active from Liberia between November 21st and the 27th. Operations will be from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQ World Wide DX CW Contest on November 24th and 25th as a Multi-Multi category using the callsign E-L-2-A. Outside of the contest the operators will use their own personal callsigns. QSL as directed by each operator. (OPDX)

**

DX

In DX, SM1TDE will be active portable 5Z4 from Diani Beach, Mombasa, Kenya between November 5th and the 22nd. This will be a family vacation and activity will be limited to how much his XYL and kids allow. His operation will be on 40 through 10 meters on CW only. QSL via his home callsign, either direct, via the bureau or electronically using Logbook of the World.

JA7SGV is now operational as 9J2JA from Zambia. His length of stay is unknown. Activity has been on the 30, 20, 17 and 15 meters using CW only. QSL via his home callsign.

W4XP who was expected to be active now as VQ9XP from the club station VQ9X on Diego Garcia Atoll has been forced to cancel the operation. He says that this is because the station has been placed off-limits by the installation Commander.

PA0FAW will be operating PC12WSF through September 30th for the World Statues Festival in Arnhem in the Nethlands. Modes mentioned are CW, SSB and PSK. QSL to PA0FAW either direct, via the bureau or electronically via eQSL. This operation will not accept Logbook of the World confirmation requests.

Lastly, CT1FJZ will be working in Angola for the next year or so and will be operational on 80 through 10 meter SSB using the callsign D2FJZ. His activity will be mainly at the weekends but he will try to get on the air whenever possible during weekdays. QSL as directed on the air.

(Above from various DX news sources)

**

THAT FINAL ITEM: CONTROLLED CARRIER AM -SOMETHING OLD IS NEW AGAIN

And finally this week, an old modulation technology is making a comeback for A-M broadcast stations in a new and money saving way. Amateur Radio Newsline's George Bowen, W2XBS, has the details where something old is new again:

--

Back in the days of full carrier A-M transmission one very popular and low cost way to put ones voice onto a carrier wave was to modulate the final power amplifier's screen grid. A variation on this that required no heavy modulation transformer was to vary the output power of the transmitter at an audio rate by varying the final amplifier's screen voltage at an audio rate. This system was called controlled carrier A-M and it was made very popular on the ham bands in the 1940's, 1950's and 1960's in such budget priced transmitters as the Heathkit DX-35, DX-40 and DX-60 to name only a few.

With the advent of single sideband transmission, full carrier A-M fell out of favor in the ham radio world but it has remained a staple in the broadcast industry and other services that want to get their message to the public. And now, carrier control modulation is making a comeback among broadcasters but not in the way it was done by radio amateurs of the past.

For broadcasters who spend 10's of thousands of dollars a year paying for electric service, the ability to raise and lower power levels can be a major cost cutting factor. And because of this a number of stations have received waivers from the FCC to experiment with several

new forms of carrier control technology.

In one instance, transmitter manufacturer Harris Broadcast and New York City powerhouse WOR-AM say they have had success with a power-saving Modulation Dependent Carrier Level algorithm. This with no effect on Arbitron Portable People Meter data encoding/decoding, the stations H-D Radio signal coverage or digital audio quality.

Harris engineers worked with Tom Ray, W2TRR , who is the Corporate Director of Engineering WOR AM in New York, to test the compatibility of two Harris Modulation-Dependent Carrier Level algorithms. Amplitude Modulation Companding provided the largest reduction in transmitter power consumption, by saving 37 percent in average AC power input to the transmitter. WOR estimated this translates up to a $3,000 per month savings on the electric bill at his New Jersey transmitter site.

So will this new form of Amplitude Modulation Companding bring back full carrier AM to the ham bands? While a tiny segment may decide to experiment with it more than likely SSB will remain the preferred voice system among ham radio operators world wide. At least until it's replaced by a digital voice system at sometime in the future.

For the Amateur Radio Newsline, I'm George Bowen, W2XBS, at the North East Bureau in Albany New York.

--

Nautel, another transmitter manufacturer has estimated that a 50 kilowatt AM transmitter using this technology and operating 24 hours a day, 7 days a week could easily save $20,000 a year or more in electricity costs. This based on modest electricity rates of 10 cents per kilowatt hour.

The complete story can be found on-line at
tinyurl.com/harris-modulation (RW)

NZART Headquarters Infoline Issue 258

7 September 2012

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· FMTAG Proposals

· Rule for Nationals Woodskills Festival Award

· Doug Gorman Frequency Memorial Measuring Contest

>From HQ…Not a very big issue this week, so if you have any articles or events coming up, make sure you let me know by the Thursday prior to this being sent out. For the next issue date check the bottom of this issue.

During the week I attended some training held by RSM at the Ministry building in Wellington.

Our discussions soon ventured to the silent key call signs and the many that still appear in SMART. Even though RSM recently e-mailed, then posted to all amateurs a request to update their records, many went unanswered. In order for them to clearly identify whose call signs need to be removed, next week I will be posting out a special edition of HQ Infoline written predominantly by Jeff Hicks from RSM, regarding the reservation of call signs that have not been updated. A full list of all these call signs will be included.

We would appreciate when you see this list, if you can contact me as soon as possible so we can determine if the call signs are still active, or the holders have become silent keys.

On the official broadcast I advised that we are planning a membership promo to go out to all non-members of the Association. This was to have been organised for May this year, however due to time and call sign issues within SMART, NZART Council have approved this to go forward now in October this year.

The special offer of $49 for one year’s membership will run from 1 October 2012 to 31 December 2013. This will also include a CD Rom call book and the chance to win a hand held radio. Only those amateurs within New Zealand who have not belonged to the Association for 3 or more years, or have never been a member will be eligible to join with this offer.

While it looks like we are not considering members who have loyally contributed to the Association for a number of years, rest assured, if we are able to attract enough new comers to NZART, your subscriptions will not increase in the foreseeable future. Sadly we are in one of those no win situations, whereby not having enough members means the subs are almost unachievable for some.

I would like to offer once again…for any persons having a problem with coming up with a lump sum payment, the small price of $8.25 per month for 12 months, will not only ensure you keep all the benefits of belonging to your parent body, but also keep the much needed numbers of membership within the Association that it needs to continue to offer them.

Recently I had the unenviable task of contacting branches whose memberships fell below the requirements of the NZART Constitution. To put it plain and simply…NZART does not want to see these branches close. Merely to see if there is something that can be done to increase membership within your area, so that you can function more effectively and assist the Association at the same time.

I have received calls and letters from some of the branches I wrote to, horrified that NZART would consider such a thing, but if we can help you to encourage your branch members to belong to this important organisation, then it will benefit us all.

My sincere apologies if branches felt this was unfair.

Talk soon…Debby ZL2DL

FMTAG Proposals.

Branch 39 Tauranga Districts Amateur Radio Club Inc has applied for an inverted 70cm Repeater to be located at Papamoa Topo 50map reference BD894.13 184.87.

The transmit frequency will be 433.025MHz and the receive frequency will be 438.025.

Branch 34 South Canterbury has applied for a 144.575 MHz Digipeater on Mount Studholme, located at TOPO50 CA18 352.25 531.31. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations. Branch 63 Upper Hutt has applied for a 6-metre Repeater on Mount Climie, located at TOPO50 BP32 798.83 423.94. The repeater transmit frequency will be 53.950 MHz and the receive frequency 52.950 MHz. An engineering investigation, in accordance with RSM PIB38, confirms that there will be no interference to other stations.Branch 39 Tauranga Districts Amateur Radio Club Inc has applied for an inverted 70cm Repeater to be located at Papamoa, Topo50map reference BD894.13 184.87.The transmit frequency suggested is 433.025MHz and the receive frequency is 438.025MHz.

Please send your comments and suggestions on the above matters, by email to: <fmtag@nzart.org.nz>

Thanks

73

Chair FMTAG

Rules for National Woodskills Festival Award 1st to 14th September 2012

Members of Kawerau Branch will be available on the Awards net 3.677 each night at 8pm and also available on the repeaters and National system.

Contacts with Kawerau Branch 67 on any band i.e. HF, VHF, National System. Ten points required for ZL applicants (five for DX Stations) may be accumulated as follows:

1.. ZL1KW worth 5 points, Branch President Barry ZL1CAY and Kel ZL1ASL vice President worth 3 points, any other branch member worth 1 point.
2.. Award is available to all Amateur Operators or SWLs who accumulate 10 points or 5 points if DX.
3.. The Award application containing a copy of Log details or SWLs name and address plus $5 fee to be received by the Awards manager Branch 67 no later than November 1st 2012

Applications for the award to:
Awards Manager Branch 67 NZART
C/- Bev Osborne ZL1OS
34 Cobham Drive
Kawerau 3127 New Zealand

Doug Gorman Frequency Memorial Measuring Contest

Monday 1st October 2012 at 2100 NZST

The date of the Doug Gorman Memorial Frequency Measuring Contest has been shifted to Monday 1st October for 2012.

The 60th annual NZART Doug Gorman Frequency Measuring Contest will be held slightly later this year than usual on Monday 1st October 2012 at 2100 NZST.

Details will be posted on the NZART webpage.

- 73 de John ZL4JY

Housekeeping

1.. Break-In-Closing Date Reminder: Copy for the Sept/October issue of Break-In-closes on 10 Sept 2012.
2.. Copy for Break-In: Copy is welcome in most electronic formats but word.doc files are preferred. Photos and other graphics should be send as separate discrete files (*.jpg preferred); not as embedded pix in the body

of the text. Please ensure that suitable descriptive captions/legends are included with your copy.
All received copy will be acknowledged to confirm receipt.
Thank you for your cooperation.
John Walker ZL3IB Editor.
3.. Break-In: Early receipt of copy is much appreciated
4.. Break-In-AREC Column: The close-of-copy date is the 5 Sept 2012 for articles for publication in the AREC COLUMN OF BREAK-IN. Photos, if available, to be on a separate floppy or CD (with captions), posted DIRECTLY TO US. Use the Call Book address. All other material can go to e-mail: zl3qr@nzart.org.nz or zl3ov@nzart.org.nz
5.. The ARRL and WIA Weekly News
6.. Subscribe TO/FROM Infoline
Next NZART Official Broadcast is on Sunday 30th September. Next HQ-Infoline e-mailed on FRIDAY 21st September 2012. Closing date for this is Thursday 20th September 2012.

You have received this message because you are subscribed on an NZART infoline list.

September 15th- SPECIAL EVENT for the Roanoke Valley Amateur Radio Club-----Blue Ridge Bonanza 1300z till 2100z.

The object of this is for you to contact ALL 5 of the stations. If you only contact 4 but contact the "Special" Station it will be treated as a wildcard. You can earn a QSL card from W4CA if you have 1 QSO and send us a QSL card. If you have 5 confirmed stations you will get a nice certificate. You can go all 20M, all 40M, or even a mix of the 2. Remember this year it is ONLY 1 DAY. GOOD LUCK!!

Please vote for the grids(EM24 or EM32) for next summer's DX
expedition/vacation

Posted: 06 Sep 2012 10:34 AM PDT
http://forums.qrz.com/showthread.php?360515-Please-vote-for-the-grids(EM24-or-EM32)-for-ne
xt-summer-s-DX-expedition-vacation&goto=newpost

Am starting the planning for next summer's DX expedition. Am looking at
EM24(Beavers Bend Park or Ouachita National Forest) and EM32av(family farm
in NW Louisiana). Will be working 6m and, possibly, 10m.

Please vote on what grid is the most desired.

Thanks,

AMSAT Mission to MARS*: HamRadioNow Episode 19

Posted: 06 Sep 2012 07:28 AM PDT
http://forums.qrz.com/showthread.php?360486-AMSAT-Mission-to-MARS*-HamRadioNow-Episode-19&goto=newpost

HAMRADIONOW.tv

Episode 19: AMSAT Mission to Mars*

AMSAT has some big plans. Going to Mars? Well, it's on the table. And although when we're

talking about AMSAT, we never really say anything is "down to earth," there are some more

immediate projects. Like controlling a remote vehicle with commands relayed from the ISS (think

Curiosity Rover... hmmm, that Mars thing keeps creeping in).

AMSAT's President Barry Baines WD4ASW stopped by the HamRadioNow 'studio' at the

Shelby NC Hamfest last weekend for a quick chat with KN4AQ. When they finished, almost an

hour later, everyone around them had closed their booths and headed to dinner! Another

in-depth HamRadioNow interview is waiting for you.

Watch this episode at our web site, www.HamRadioNow.tv.

*AMSAT going to Mars? Yes - the German arm of AMSAT has active plans to test

a satellite designed for Mars orbit. This won't win you the Elser-Mathes cup, but it's a start!

Episode 18:

ARRL Heading West, CQ on Hams at 100, and

Hams Cheat in CQ Contest Scoring

We didn't promote Episode 18 here on QRZ.com (don't want to wear out our welcome... but thanks, QRZ!),

so let's catch up. This episode comes out of the Huntsville Hamfest. Gary and Jeff talk to the ARRL's Bob Inderbitzen

NQ1R about several things, including the upcoming ARRL National Convention in the San Francisco area in October.

And they chat with CQ Magazine editor Rich Moseson W2VU about the lack of excitement over the 100th

anniversary of the most specific date anyone can point to regarding the beginning of Amateur Radio

(the Radio Act of 1912), and CQ's plans to speed up contest reporting and publication. Part of the reason

for the speed-up? To make it harder to cheat by massaging your score after looking at other published logs.

Hams cheating on contests? We're shocked... shocked!

Watch this episode at our web site, www.HamRadioNow.tv.

1705. [RAC-Bulletin] {EMCOMM] Tropical cyclone information statement updated by the CanadianHurricane Centre of Environment Canada at 1:48 PM ADT Friday

Newsgroup: rec.radio.amateur.misc
Date: 2012-09-07 18:31:41 UTC
From: rac-bulletins@eton.ca
Message-ID: <4FD244C9.3090006@rac.ca>
Source record: 2072
Cross-posted to: rec.radio.amateur.misc,rec.radio.info

WOCN31 CWHX 071745 Tropical cyclone information statement updated by
the Canadian Hurricane Centre of Environment Canada at 1:48 PM ADT
Friday 7 September 2012.

Tropical cyclone information statement for: Labrador Newfoundland Nova
Scotia Prince Edward Island. For tropical storm Leslie. The next
statement will be issued by 9:00 AM ADT Saturday. Leslie weakening
just below hurricane strength. Still much Uncertainty if weather
impacts will reach Canada.

Tropical cyclone information statement ended for: New Brunswick.
Probability of Leslie's influence in New Brunswick is very low At this
point. However general information statements will Continue to be
issued at WWW.HURRICANES.CA.

==discussion== The Canadian Hurricane Centre continues to monitor the
evolution of Leslie. The storm remains parked over the cold water
which it has stirred up. This has resulted in winds dropping below
hurricane force based on hurricane hunter aircraft data this morning.
Leslie should still regain hurricane strength when it eventually
moves, unless it stirs up even cooler water for a longer period. Most
of the computer models still show a slow northward movement with
acceleration early next week. However - as mentioned and now observed
- the computer models are known to have difficulty simulating these
ocean feedback effects and situations where the atmospheric steering
currents are very weak. It is uncertain if Leslie will even strengthen
to category 2 status given the latest developments - but the storm is
quite large with an extensive area of rainfall, cloud cover and large
waves. In general, the threat of Leslie on Nova Scotia has been
decreasing but still enough to bear watching. The possibility of some
impact in Newfoundland is greater, but still necessarily low (about
30%) for the Tuesday to Wednesday time-frame next week. This may seem
contradictory to the official track forecast which depicts the storm
center just south of the Avalon Peninsula early Wednesday. However the
position only represents an average of an unusually broad range. Stay
tuned to our updates for the trend in the track and discussions. One
of The Key weather features that will tell the tale is the behaviour
of a (easier-to-predict) trough of low pressure now approaching the
Great Lakes. This feature is forecast to slowly intensify and move
southeastward over the weekend. During the early part of next week the
computer models are predicting that the trough will "pick up" the
hurricane and drive it northward. There could be a front merging with

the storm and drawing moisture northward along it. However, all this is contingent on the timing of the trough and position of the tropical storm/hurricane. Much smaller but more intense hurricane Michael over 2000 kilometres east of Leslie now, will also move very slowly and is currently not expected to affect Eastern Canada. Leslie and Michael will likely draw closer to each other over the next several days. Since Leslie is much larger, its possible impact on Michael would likely be to shear-apart its upper clouds and acellerate it northward away from Leslie. A true merging of the hurricanes is not expected based on their differing sizes. But experience with this sort of situation is limited and we will certainly monitor it. Moderate surf conditions related to Leslie will persist along south-facing coastlines of Nova Scotia and Newfoundland throughout the next several days. If near the water, exercise caution knowing that wave heights can vary significantly over a span of several minutes and that rip currents can develop at local beaches. Incident wave heights near 2 metres (7 feet) may break at the shore at heights near 3 metres (10 feet). The Canadian Hurricane Centre will continue issuing these general information statements today and Saturday with more detailed track forecasts possibly beginning early Sunday. Visit WWW.WEATHEROFFICE.GC.CA/HURRICANE/TRACK_E.HTML (all in lower case) for the latest hurricane track map. Please also refer to the public and marine forecasts and warnings issued by Environment Canada for your area. END/FOGARTY

Sixth Annual Sacramento Valley Hamfest

Saturday the 8th - McBean Park, Lincoln, CAThe WPARC Sacramento Valley Hamfest is now in its sixth year. The event has proven to be very popular with both vendors and buyers and is growing every year. We have vendors who come from as far away as Los Angeles and buyers from around the region. The event is limited to ham related items for sale or trade. The club will hold periodic drawings during the Hamfest and there are several valuable prizes including a grand prize of a base station radio (brand and model to be announced soon). Tickets for the drawing will be sold throughout the morning and you need not be present to win. Food will be available. The gates open at 0700 hours.

Check out the club web site at http://www.wparc.us

Windfarm Developers: Amateur Operators Can Use 'Alternative Frequencies'.

Posted: 07 Sep 2012 03:34 AM PDT
http://forums.qrz.com/showthread.php?360589-Windfarm-Developers-Amateur-Operators-Can-Use-Alternative-Frequencies&goto=newpost

Of interest to UK amateurs, where wind energy is currently undergoing a
huge boom, will be this statement by developers RWE Innogy:

'Amateur radio operators have a variety of ways to improve

radio system performance. These are mostly associated with

changes to aerials and radio equipment or increasing

transmitted power levels.'

which goes on to state that, as RWE's view of how amateurs should cope with
any interference by using:

'...alternative amateur radio frequencies or technologies'

That's nice. Legally licensed operators working protected bands can take a
hike, or pay - if they get planning permission - to erect bigger, higher
antennas! All terrbily realistic, I'm sure.

The problem is that the law does not protect us from path interference by
physical structures, just interference arising from other sources.

Anyone with concerns can submit their views, as I did, using the forms
found here.

The document from which the above statements are taken can be found here.

Atlanta-based team of hams heading to activate Sand Island Lighthouse,
Dauphin Island

Posted: 07 Sep 2012 10:25 AM PDT
http://forums.qrz.com/showthread.php?360627-Atlanta-based-team-of-hams-heading-to-activate
-Sand-Island-Lighthouse-Dauphin-Island&goto=newpost

Plans are complete for the Atlanta-based team of hams heading to activate
Sand Island Lighthouse, Dauphin Island, Alabama, on September 25-30. This
will activate a lighthouse (ARLHS USA-723) and a rarely activated island
(IOTA NA-213). The team has members from several clubs in the Atlanta
area and consists of Ricky K4JTT (team leader), Steve Knittle KC4YBO, Tim
Lemon WK4U, Ernie Braxton KJ4VUX, John Powell KI4IYC, James Rogers N4DU,
and Joe Grimes WD4FGB. Expedition special event call sign is K4D.

CW: 7.040, 10.115, 14.040, 18.098, 21.040, 24.920 and 28.040

SSB: 7.250, 14.250 to 14.260 (main), 21.350, 28.450

Digital: 7.035.15; 10.142.15; 14.070.15

In general, digital and CW will not be on the same band at the same time.
For 40m, every effort will be made by the team to stay some distance away
from the 40m QRP frequency of 7.030

For the past two years the Kennehoochee Amateur Radio Club (KARC) has
sponsored teams to activate an IOTA / Lighthouse Island Expedition. The
objective of these events is foster community involvement, bring
excitement to a new level of HF operation, and most of all have fun.
These events have been a memorable experience and have logged QSO's in
excess of 4000. Some of the achievements have been Working 50+ countries,
Worked All States, and Worked all Continents. In addition, the teams
worded over 400 prefixes and twenty-two zones.

Sponsors for this year's activation include Yaesu who will be supply the
radios and Alpha Delta who will provide the antennas. A special call,
K4D, has been assigned by the FCC for this activation. Updated
information can be found on www.w4bti.org.

All QSO's will be confirmed with a 4 color card through the bureau or
directly to the address shown at www.qrz.com. The logs will be uploaded to
LOTW and eQSL.cc.

//
15-16 September - CIS DX PSK63 Contest

Posted: 07 Sep 2012 09:02 AM PDT
http://forums.qrz.com/showthread.php?360617-15-16-September-CIS-DX-PSK63-Contest&goto=newpost

The European PSK Club has the honour to invite the radio amateurs all over the world to participate in the CIS DX PSK Contest 2012. The objective of the contest is to establish as many QPSK63 contacts as possible between radio amateurs around the world and radio amateurs in the Commonwealth of Independent States (CIS). Everybody can work everybody for QSO and multiplier credit. Every station can be contacted once per band. The operator may change the bands without any restrictions.

The CIS DX PSK Contest is held every year on the third weekend of September. This year it starts at 12:00 UTC on Saturday 15th September, 2012 and ends at 12:00 UTC on Sunday 16th September, 2012.

All contacts should be made by using QPSK63 mode (Quadrature Phase Shift Keying at 62.5 Baud Rate). According to the EPC HF Band Plan it is recommended to use the following frequencies for contacts during the contest:

160 (1.838 - 1.840)

80 (3.582 - 3.585)

40 (7.042 - 7.044)

20 (14.072 - 14.075)

15 (21.072 - 21.075)

10 (28.072 - 28.075)

All operators may change bands at any time.

RT 66 on the Air SPECIAL EVENT -Starts Sept 8th at 00:00Z -LET THE PILEUPS BEGIN!!!!

Posted: 06 Sep 2012 09:31 PM PDT
http://forums.qrz.com/showthread.php?360581-RT-66-on-the-Air-SPECIAL-EVENT-Starts-Sept-8th-at-00-00Z-LET-THE-PILEUPS-BEGIN!!!!&goto=newpost

This, the 13th year of the RT 66 on the Air special event, will bring 17 stations and

3 mobiles all with W6_ calls, along Route 66 from Sept 8th(00:00Z) until Sept 16th-23:59Z.

You will have 9 full days to try to work them all.

Google "RT 66 on the Air" for all details. The host club is again, the fabulous Citrus Belt ARC in Barstow!

Our local Arizona club, the Northern Arizona DX Association, will offer a new twist to the event. Work

each of the 3 calls manned by the Northern Arizona DX Association(W6G -W6T & W6S) and send "each"

of those 3 different QSL managers a S.A.S.E. and receive 3 seperate QSLs that, when lined up side by side,

will show one continuous senic view of our area of RT 66. You can frame the mural for your wall and show the

results of your efforts in working these NADXA strations. It will make a nice momento. BUT don't forget,

try to work all of the stations involved and GET YOUR KICKS ON ROUTE 66!!

73

Bob, NF7E

Northern Arizona DX Assn

(ps: REMEMBER NO S.A.S.E---NO QSL)

DX= SEND $2 FOR EACH QSL

CARRIER AM - SOMETHING OLD IS NEW AGAIN SAYS A AMATEUR RADIO NEWSLINE REPORT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

RADIO TECHNOLOGY IN ACTION SYMPOSIUM - LAST STOP CAPE TOWN

The last in the 2012 series of the SARL Radio Technology in Action Symposiums will be held min Cape Town on 29 September 2012 at the Cape Peninsula University of Technology Bellville Campus. The full programme and registration forms are now available on www.sarl.org.za. Click on RTA or the link in the news update centre stage on the home page.

The programme offers some interesting presentations. Tony Voorveld is back with a presentation called "Tuning into Nature". He will focus on various electromagnetic phenomena that appear in nature. He will explain by discussion and demonstration how phenomena such as Solar Flares, Cosmic Rays and Lightning may be detected by amateur radio and amateur scientific equipment. He will also be discussing radio astronomy for the amateur. The presentation was highly acclaimed in

Durban and Gauteng where Tony presented.

Another Cape Town exclusive is a presentation and demonstration on MMANA, a freeware antenna simulation program by Raoul Coetzee, ZS1REC. You will learn how to simulate basic wire antennas, how to do impedance matching, tune for resonance and observe SWR and bandwidth curves to mention some facilities.

Last week's RTA in Port Elizabeth was also attended by a record number of radio amateurs following similar trends as RTA in the other cities. One of the highlights in Port Elizabeth was the Presentation on the SKA by Jason Manley of the SKA office in Cape Town.

The challenge is for the Western Cape radio amateurs to beat the Gauteng record of close to 100 participants. Please make use of the pre-booking facility and stand a change to win an ARRL Basic Antenna Book. Prebooking assures that we will have stock of the SDR 80 metre kit as well as the CD. It also will assist with catering. The booking form can be downloaded from www.sarl.org.za.

SARL YOUTH COUNCIL- YOUR INPUT IS NEEDED

Some time back the idea of creating a youth council to organize and manage youth events was proposed. The SARL is looking for volunteers from radio amateurs under 25 to put forward names for consideration. Here clubs can play an important part to nominate candidates. Send details such as name, callsign, age, address and email to secretary@sarl.org.za.

ANOTHER SA CUBESAT ON THE CARDS

Twenty Interns at the Denel Dynamics Engineering Academy of Learning are designing and building a CubeSat as part of their internship training. Denel Dynamic takes on up to 20 interns, students who have completed their engineering degree, masters or PhD. During the first year they spend half their time in the Academy and the other half in their designated departments. "The programme is aimed at exposing interns to a complete product development cycle", said Grant Wilson who leads the Academy. "Designing and building a CubeSat and developing a ground station to manage the satellite is an ideal project to achieve this."

The 20 strong Intern Project Team was split into three separate teams, each responsible for certain aspects of the project. Team Ground Zero is responsible for the ground station and radio frequency (RF) link components. Team Virtuoso is responsible for the cube structure and on-board computer; and Team Frodo is responsible for the payload, Attitude Control and Determination System (ADCS), and the launch. Read more about DynaCube on www.amasatsa.org.za.

MTN RADIO AMATEURS OF THE YEAR AWARDS

Here is an opportunity to recognize radio amateurs that has made a contribution to amateur radio. There are three categories:

GARTH MILNE TECHNICAL INNOVATION AWARD The award is made for the support, development and application of Technological Innovation in Amateur Radio in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or a tertiary education institution.

MTN RADIO AMATEUR OF THE YEAR AWARD The award is made for the support and development of the Amateur Radio Service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her expertise and time to the promotion of Amateur Radio in South Africa.

MTN AMATEUR RADIO COMMUNITY SERVICE AWARD Annually the South African Amateur Radio Development Trust is recognising a radio amateur or a group of radio amateurs for service to the community.

Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Nomination forms are available on www.amateurradio.org.za or by sending a mail request to saardt@intekom.co.za. The closing date for nominations is 30 September.

CONTROLLED CARRIER AM - SOMETHING OLD IS NEW AGAIN SAYS AN AMATEUR RADIO NEWSLINE REPORT

Back in the days of full carrier AM transmission one very popular and low cost way to put one's voice onto a carrier wave was to modulate the final power amplifier's screen grid. A variation on this that required no heavy modulation transformer was to vary the output power of the transmitter at an audio rate by varying the final amplifier's screen voltage at an audio rate. This system was called controlled carrier AM and it was made very popular on the amateur bands during the 1940's to 1960's in such budget priced transmitters as the Heathkit DX-35, DX-40 and DX-60 to name only a few.

With the advent of single sideband transmission, full carrier AM fell out of favour in the amateur radio world but it has remained a staple in the broadcast industry and other services. And now, carrier control modulation is making a comeback among broadcasters but not in the way it was done by radio amateurs of the past.

For broadcasters who spend 10's of thousands of Rands a year paying for electricity, the ability to raise and lower power levels can be a major cost cutting factor. And because of this a number of stations have received waivers from the FCC to experiment with several new forms of carrier control technology.

In one instance, transmitter manufacturer Harris Broadcast and New York City Powerhouse WOR-AM say they have had success with a power-saving Modulation Dependent Carrier Level algorithm. This with no effect on Arbitron Portable People Meter data encoding/decoding, the stations H-D Radio signal coverage or digital audio quality.

Harris engineers worked with Tom Ray, W2TRR, who is the Corporate Director of Engineering WOR AM in New York, to test the compatibility of two Harris Modulation-Dependent Carrier Level algorithms. Amplitude Modulation Companding provided the largest reduction in transmitter power consumption, by saving 37 percent in average AC power input to the transmitter.

So will this new form of Amplitude Modulation Companding bring back full carrier AM to the amateur bands? While a tiny segment may decide to experiment with it more than likely SSB will remain the preferred voice system among amateur radio operators world wide. At least until it's replaced by a digital voice system at sometime in the future.

CONTEST NEWS

Boland Amateur radio club 40 m Sprint results: The July 2012 BARK sprint has drawn a total of 9 logs.

The winner of the competition was ZS3R with 80 points. In 2nd place was ZS6LH with 78 points and 3rd place went to ZS6APT with 77 points.

The various division winners were as follow: Division 2 - ZS2EC Division 3 - ZS3R Division 4 - ZS4BM Division 6 - ZS6LH

Certificates will soon be mailed the these winners.

No log sheets from Division 1 or 5 were received. Due to the poor participation in this competition, BARK has decided not to continue with this competition in the future.

2012 SARL HF CW Contest: The Contest Committee received twenty single operator logs and one check log for the CW Contest held on 26 August 2012. This is more than received for the 2011 contest.

Roger Jones, ZS6RJ, takes top honours with 116 points, followed by the West Rand ARC, ZS6WR, operarted by Joop, ZS6C, with 100 points and Barry Nugent, ZS2NF, with 94 points in third place.

Pierre van Deventer, ZS6A, made the most points on a single band with his 80 points on 40 metres. In the Club competition, Pretoria ARC leads the pack with 176 points, followed by Boland ARC with 166 points and the West Rand ARC with 146 points.

After adding up the totals for the HF Phone, Digital and CW contests to get the combined results, Pierre van Deventer, ZS6A, takes the first place with 318 points, followed by Mitchel Mynhaardt, ZS6YH, on 288 points and Brendon Muller, ZS4BM, on 276 points.

The winner of the Club Competition is the East Rand Branch with 812 points followed by the West Rand ARC with 519 points and the Pretoria ARC with 399 points.

The full list of results is available in HF Happenings 521. Congratulations to all the winners. Well done!

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is at moderate levels. Sunspot 1 564 remains a fairly large sunspot but there is only an isolated chance for M-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 85.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. 10 m openings will be more frequent due to the increase in solar activity.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

10 September - Last day to enroll for the October RAE. 15 and 16 September - SARL VHF/UHF analogue and digital contest. 30 September - Nominations for MTN sponsored SAARDT awards to be in to saardt@intekom.co.za <mailto:saardt%40intekom.co.za> .

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible - in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205 and 17 760 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio TODAY', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 17:30 UTC on 3 230 kHz. Sentech sponsors the ARMI transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League, compiled by Martin Schwella, ZS4MS, and edited George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

DXers Taking a New Course in Azores, September 28-30, 2012:

Posted: 07 Sep 2012 05:11 PM PDT
http://www.eham.net/articles/28949

It is often said that DXers only work DX. More recently, we have seen a healthy shift toward assisting the society they visit by helping locals become stronger in Amateur Radio. Something totally new is now happening in the CU-land - the Azores. In recent years, the Azores Islands have balanced their agriculture and livestock sectors through increased awareness of their great location and unique landscape facilitated by the development of the local infrastructure to receive more visitors from industrialized countries. Significant progress has been made in expanding tourist facilities, convention hotels and holiday resorts. The Azores is now capable of accommodating 10,500 visitors per day. Additionally, the Azorean airline (SATA) is set to serve many European destinations in addition to the US and Canada.

//
Busy Times for Disaster Response:

Posted: 07 Sep 2012 05:11 PM PDT
http://www.eham.net/articles/28948

Soon after the strongest earthquake in more than two decades, measuring 7.6 on the Ritcher scale, hit the Philippines members of the Ham Emergency Radio Operations (HERO) soon after were exchanging messages with the affected coastal areas. Eddie Valdez DU1EV, the Chief Operating Officer of the Philippines Amateur Radio Association said that DU1VHY handled traffic and got reports from the affected areas of DU4, DU5, DU6, DU8 and DU9. Eddie DU1EV said "The area of DU5 was nearest the epicenter and DV5PO reported there was a power outage in Borongan, Samar Island. DV5RAY reported that people were evacuating because of the tsunami alert."

//
Propagation Forecast Bulletin #36 de K7RA:

Posted: 07 Sep 2012 09:05 AM PDT
http://www.eham.net/articles/28945

A surprising jump in solar activity occurred this week. Average daily sunspot numbers rose nearly 55 points (about 74 percent) to 128.7. Average daily solar flux values were up over 28 points to 136.9. A pair of coronal mass ejections on September 3 and 4 excited Earth's geomagnetic field, causing A index values to jump. Middle latitude A index on September 2-5 was 14, 23, 14 and 24. The planetary A index on those dates was 12, 32, 13 and 28, while high-latitude college A index (Fairbanks, Alaska) was 48, 52, 39 and 49.

Amateur Radio and Youth:

Posted: 07 Sep 2012 09:04 AM PDT
http://www.eham.net/articles/28944

Getting more young people involved in Amateur Radio is essential for the growth of the hobby. The pre-teen and early teen years are the best time to get involved. This is the time when Amateur Radio can change your life and the world around you. This concept is explained on the website http://www.lastingmomentsoffirstexcitement.com. Take a look and give some feedback with your thoughts. This concept is not new or revolutionary but it seems to have been missed by a lot of people.

//
When All Else Fails, Washington County Amateur Radio is There:

Posted: 06 Sep 2012 05:04 PM PDT
http://www.eham.net/articles/28941

WCARES is the local chapter of the Amateur Radio Emergency Service, a volunteer group of amateur ham radio operators who are activated following an emergency such as a natural disaster or blackout (their popular motto is "When all else fails, radio is there!") During these times, ARES members collaborate with public safety departments and organizations including the American Red Cross, National Weather Service and Federal Emergency

Management Agency to provide communication when other means are unavailable. Its personnel have responded to countless crisis situations since the foundation of ARES in the 1930s. In the aftermath of Hurricane Katrina, over one thousand operators assisted in the relief effort by serving as 911 dispatchers and the sole means of communication for citizens in southern Mississippi. "The group is poised to react when called to (aid) the (emergency service) agencies of Washington County (with) communications needs," WCARES public information officer Norman Smith said. "It is (our) goal to be ready to respond to all activations in a timely manner." Currently, 40 operators serve in WCARES, though leadership is concentrated on a smaller team of five to seven. Jim Ashby is the Emergency Coordinator, who serves as the liaison with local emergency services personnel and is also responsible for arranging meetings, training members and activating the group when crisis hits. A veteran of the United States Navy and electronics engineer by trade, Ashby has been active in amateur radio since childhood and previously served in ARES organizations in Texas and California before joining WCARES. He is also involved with Skywarn, a program developed by the National Weather Service to document severe weather occurrences to aid with future prediction and preparation.

//
Ham Radio Is Not An 'Old Man's Hobby', Say Enthusiasts:

Posted: 06 Sep 2012 05:04 PM PDT
http://www.eham.net/articles/28940

Members from 36 amateur radio clubs around Vancouver Island and surrounding areas will converge at Cedar Community Hall for Ham Happenings 2012 this Saturday. The event, which happens once a year in various cities, brings together hundreds of hobbyists involved in using 2-meter radios, repeaters and HF frequencies. Hosted by the Nanaimo Amateur Radio Association, Ham Happenings is a chance for amateur radio enthusiasts to swap gadgets and for newcomers to learn more about how it all works. A station will be set up so people can try transmitting on the radio. There will also be a fox hunt where teams attempt to locate a transmitter hidden in town using just their radios. "The hobby is growing stead-ily in Nanaimo. As well as being a fun sport, it is also becoming more complex," said Yvonne Findlay, secretary of NARA. NARA was formed over 60 years ago strictly for those who had a keen interest in amateur radio, also commonly called ham radio, but as the technology grew and grew, so did the amount of things members could do.

RAC Bulletin 2012-054E - Two Commercial Operations Evicted from Two Meter Band
2012-09-07

Following investigation into several member complaints, the Radio Amateurs of Canada is pleased to announce that two cases of frequency incursion have been resolved.

In the first, a transportation company based in Reinfeld, Manitoba was observed to be operating illegally on 144.100 Mhz. In addition to operating inside the amateur radio two meter band, this operation posed a threat to low signal operations across a wide portion of North America. The company in question had purchased VHF radios from a US based supplier who failed to indicate correct licensing procedures. Upon contact from RAC, the company agreed to immediately cease operating in the two meter band and shifted their operation to a business band frequency. Industry Canada was notified of the incursion and continues to work with the company to secure a licensed channel.

In the second matter, a home moving company was observed to be operating on 144.940 Mhz. The company is based in Winkler, MB but the operation was observed in Alberta during the moving of a house. In this case, the company had already licensed frequencies with Industry Canada. They had requested 144.940 Mhz as a channel. Their request was denied by Industry Canada and a business band channel was issued. However, the company failed to check their license paperwork and assumed they had been approved for their requested channel.

The moving company was also contacted by RAC and agreed to move their operations to their correctly licensed frequencies. Given their wide geographic operations Industry Canada has licensed their operation on four separate channels including 140.730, 154.325, 158.940 and 151.730.

In both cases, it appears that channels in the two meter band were chosen by these businesses because their new vhf radios defaulted to that frequency range. As well, both businesses indicated they could simply dial a new frequency into the radio to move out of our band. This is strong cause for concern that the actual radios being used are modified Amateur Radio equipment. The use of equipment intended for Amateur Radio operation outside of the Amateur Bands or by persons who do not hold an Amateur Radio Certificate is illegal.

Action on these and other incursions has been made possible by quality reports from monitoring stations. RAC thanks those Amateurs who have

provided assistance in these specific files. The strong national voice
for Amateur Radio that the Radio Amateurs of Canada provides is made
possible by members across our country and associate members beyond
our borders. You can find out more about the benefits of membership
for you and the benefits to Amateur Radio as a whole at www.rac.ca

Reports of confirmed or suspected illegal operation should be sent to

QSLs for Special Events ?? What is appropriate to confirm?

Posted: 09 Sep 2012 06:39 AM PDT
http://forums.qrz.com/showthread.php?360852-QSLs-for-Special-Events-What-is-appropriate-to-confirm&goto=newpost

I am just wondering what is the "common" practice with regard to confirming contacts with special event stations?

I have received several eQSLs from special event stations AND have also received eQSLs from the presumed "operators" of these special event stations.

I have confirmed all the contacts where the eQSL is consistent with the call-sign actually used during the event. The question is, should I also confirm contacts with the "operators" as well?

For example, let's say I have a QSO with N1HAPPYDAYS and during the QSO there is no mention of the call-sign of the operator N1OPERATOR. Then I receive QSLs from both N1HAPPYDAYS and N1OPERATOR. Of course N1OPERATOR does NOT appear in my log, because the call-sign was never actually used or discussed. So what would you do? Confirm one or confirm both??

CW at the Old Mulkey Meetinghouse Special Event

Posted: 08 Sep 2012 11:11 AM PDT
http://forums.qrz.com/showthread.php?360779-CW-at-the-Old-Mulkey-Meetinghouse-Special-Event&goto=newpost

It should be mentioned that we will are planing on having someone do CW at the Old Mulkey Meetinghouse Special Event on Saturday the 15th (Sept. 2012). The operator will be on 80 meters (3.560 +/- 20 KHz) and 20 meters (14.050 +/- 20 KHz). Saturday we will probably be on there late that night and will have the Boy Scouts on voice with us.We forgot to mention this in our post about a month or so ago. Hope to make contact with you from our special event..Thx...Mark KD4QHG

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 9th September 2012

Licence Examination

There is now just under two weeks left to Thursday 20 September which is the closing date for the next Amateur Station Licence Examination which will be held on Thursday 4th October at 2 p.m.in the ComReg Offices in Dublin.

Full details, including entry procedure, examination fee and how to pay the fee online are available by clicking on the Licence Exam button on the IRTS homepage at www.irts.ie Places for the examination are limited and will be allocated on a first come first served basis.

Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form.

SSB Field Day

We heard six portable EI stations participating in last weekend's SSB Field Day. Three of them were at the amateur radio "Electric Picnic" in Garbally, Ballinalsoe, County Galway. The hosts for this event were Shannon Basin Radio Club EI3Z/P, who were joined in Garbally by South Dublin Radio Club EI2SDR/P and Galway Radio Experimenters Club EI4GRC/P.

Elsewhere in the country, Dundalk Amateur Radio Society EI0W/P were active from Fieldstown, Monasterboice just North of Drogheda, while Tipperary Amateur Radio Group were located at Mooncoin in County Kilkenny and Tim EI2KA/P was heard operating from Baltimore, County Cork.

The IRTS SSB Field Day is part of an IARU Region 1 Field Day contest, so most of the interest is from stations in the UK and mainland Europe. There was a lot of emphasis, therefore, on 40 metres and 80 metres. Most stations reported very little activity on 10 metres or 15 metres - these bands were open, but a lot of the contest activity on the higher bands was from stations participating in the All Asian DX Contest, and most of them showed little interest in working European field day

stations.

Achill Henge CASHOTA Activation

The Galway VHF Group will be activating Achill Henge on Sunday the 16th of September from 11 am - 3 pm and active on 80, 40 and 20 metres. Achill Henge is a "stone henge" like structure that was built on a hilltop on Achill Island near the village of Keel. The Henge was built in record time over the weekend of 26th and 27th of November 2011. Achill Henge is located in WAI Square F60 Co. Mayo &#65533;nd has the CASHOTA Designator EI-02-M. The Callsign for this operation will be EI4ALE/P. Check out EI4ALE on QRZ.com for more details.

North Cork Radio Group

Today Sunday 9th September the NCRG will be host their annual Radio Rally & Electronics Fair at the Roebuck Room, Commons Inn, Blackpool, Cork.

Doors open at 11am and admission is 5 per person (children are free). Raffle tickets will also be available at the door.

The usual traders will be present. The AREN trailer will also be at the venue and hopes to have a HF /VHF station set up.

Dundalk Amateur Radio Society, EI7DAR

Radio Theory Classes will commence Monday 5th November at DAR Society premises 'Larkin House', 113, Castletown Road, Dundalk, for preparation to sit the radio theory exam early in 2013. Tuition places are strictly limited and intending candidates are encouraged to enrol at the earliest opportunity. Tuition will involve approximately 20 weeks class attendance and an investment of 100 is required. Open nights to find out more information and to enrol on the course will be held on Sept 19th, October 3rd, October 17th, October 31st. All are welcome to enrol and this will be a fun learning experience. More information from www.ei7dar.com or secretary at ei7dar dot com.

Oleg EI7KD World Champion

Oleg EI7KD has won the Ukranian DX Contest 2011.

He came 1st in the Single-Op, All Bands, High Power, CW. Oleg is our technical expert on the EI0W team at Dundalk Amateur Radio Society and he recently participated in the IARU Region 1 VHF contest in Monasterboice.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to

both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2VU, AA3B, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, N4JF, WA4DAN, W5JE, KH6BZF, N7CQQ, K8GI, K8YSE, KQ8Z, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, HK3CW, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, OH2BH, OH2YY, ON5NT, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SM3CVM, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd-September, through Sunday, 9th-September there were 218 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/n, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KH8/s, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T30, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP6, VP8, VP8/h, VP9, VR, VU, XE, XU, YA, YB, YI, YJ, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Orlando, PT2OP, will be active as 3D2OP from Viti Levu between October 7-14th. Activity will be holiday style on the HF bands. QSL via his home callsign, direct (preferred) or by the Bureau.

3D2, FIJI. Cicero, PY7ZY, a member of the T30PY/T30SIX DXpedition, will be active as 3D2ZY from Viti Levu, Fiji (OC-016), between October 11-15th, prior to his participation in the Tarawa Island, Western Kiribati, DXpedition. Activity will be on the HF bands (specific bands were not mentioned). QSL via his home callsign.

5H, TANZANIA. Arne, OH2NNE, will be active as 5H2DK from Moshi (KI86qq) between October 2-17th. Also, there may be sporadic activity using a portable setup from different locations between October 18-27th. This will be a one man operation on SSB only. The setup includes an Icom 706 MKIIG boosted with an SG-500 to emit full 100 watts permitted, A3S tribander (10/15/20) and dipoles for 12/17/40/80 meters bands. The portable setup will include the Icom 706, an AH-4 mobile antenna tuner, a wire antenna taped to a 6m fishing stick. Prelimanry TX frequencies plan is: 3790, 7090, 14250, 18150, 21250, 24950 and 28450 kHz. The RX will be the same as TX, 5up, 5-10up or 7.145 on 40m band. In order to maximize the possibility for everyone to get into the log, Arne suggest/asks that Europe call 5 up and outside Europe/Scandinavia to call 10 up. Arne states, "We will try our best to serve everybody. Please behave according to the rules in order to maximize QSO rate and minimize the number of failed QSOs. We will try to upload the log, if possible." QSL via his home callsign.

5R, MADAGASCAR. Eric, F6ICX, will once again be active as 5R8IC from Saint Marie Island (AF-090) between November 10th and December 9th. Activity will be holiday style operating CW, RTTY, and PSK63, and using a FT450 with 100 watts into various GPs or Inverted-Ls and a Hexbeam for 20-10 meters. There will be no online log during his activity. QSL via his home callsign (QRZ.com). View pictures of his last trips at: http://f6kbk.free.fr/5r8ic/5r8ic.htm

5W & KH8, SAMOA AND AMERICAN SAMOA (ZK3 Cancelled!). John, N7CQQ, sent out the following press release on September 9th [edited]: "Well gang, we have thrown in the towel on getting to Tokelau (ZK3) this time around. The boat is normally scheduled for a two week turn around with about two days to get to and two days to return from Tokelau. This month the boat scheduled to go to Tokelau was tasked to do another cruse and another boat was substituted from New Zealand. The weather has delayed the arrival of the substituted boat from New Zealand, so we still don't know when the boat to Tokelau will depart Apia, Western Samoa. But wait the story gets better!
The return boat trip is 'Scheduled' for departure from Apia, WS, on September 18th. The return date to Apia, WS, after picking us up at Tokelau is September 29th give or take weather and the changing schedule. The scheduled flight returning Ron/N6XT and John/N7CQQ back home is scheduled out of American Samoa on October 1st. So we have given up our attempt to visit Tokelau this trip. We will continue to operate 5W and KH8 when we return to AS about the 19th or 20th of September to see the Swains guys return. We have lots of information to share about visiting Samoa and Tokelau.
73, de John/5W0QQ and Ron/5W0XT see you in the pile up and still having fun in the Pacific."

ADDED NOTES: There has been plenty of SSB activity by John and Ron
on 20 meters. John also mentioned to OPDX on Friday, "We just finished
installing the SteppIR Big vertical at the Samoa Marina Hotel, they
are nice folks. Had some difficulty with power strips, 120v power
strips don't work well on a 220 volt system... Got a great internet
connection so should be able to stay in touch."

6Y, JAMAICA. J�rgen, DL3JH, is now active as 6Y5/DL3JH from Jamaica
(NA-097) until September 22nd. Activity should be on all HF bands using
CW and SSB. QSL via his home callsign.

BY, CHINA. Members of the Dongcheng District Radio Club station (BY1WXD)
will be active as BY1WXD/0 for ten days from the Tibet Autonomous Region
(near Lhasa, grid square NL59hi) between September 27th and October 7th.
This will be the first DXpedition in the Tibet Autonomous Region by
Chinese operators. Operators mentioned are Che/BA7CK, Xu/BA8IK, XiangQian/
BA9TX, Donghui/BD2FW, Gu/BD4TS, Zheng/BD5FFK, Ampear/BD5QDM, Youjun/BD5SO,
Li/BD9GQ, Lin/BG0GE, BG3MTK, BG5TOW, Lihua/BG6MA, Nalan/BG9API and Xiaolei/
BG9XE. This operation is sponsored by WOUXUN Elecs. Activity will be on
40/30/20/17/15/12/10/6 meters (To Be Finally Determined) using modes CW,
SSB, RTTY and PSK. They will have two stations on the air using Icom
IC-7000's and SpiderBeam (To Be Finally Determined). Also, this activity
will take place during the "Worked All Provinces of China" Contest [WAPC]
(October 6th, between 0000-2356z). For details on the WAPC, visit:
http://www.mulandxc.org/?page_id=
CE, CHILE. Robert, SQ1DWR, will be active as CE3/SQ1DWR from Chile between
October 10-22nd. Activity will be on 40-10 meters using CW. QSL via his
home callsign.

CR3/CT9, MADEIRA ISLANDS. The CR3L contest station in Santana on Madeira
Island (AF-014) will be busy over the next few months during the upcoming
contest season. Look for the following operators to be active possibly
as CT9/homecall and CR3L during the upcoming dates and contests:
Sept. 20th-Oct. 4th: Operators Walter/DJ6QT, Goetz/DJ3IW, Kalle/DM3BJ,
Stefan/DK1MM, Horst/DK1QH, Dieter/DK4QT, Han-J./
DL1YFF, Boris/E73Y and Marijan/S56A. Activity
during the CQWW DX RTTY Contest (September 29-30th)
as a Multi-Multi entry.

Oct. 21st- Nov. 2nd: Operators Karlfried/DL1EK, Peter/DH4JQ, Marion/
DF4UM, Marco/DJ5KW and Leo/DK8VC. Activity during
the CQWW DX SSB Contest (October 27-28th) as a
Multi-Op entry.

November 20-27th : Operators Arno/DL1CW, Ulf/DL5AXX, Frank/DL8WAA,
Ulrich/DJ2YA, Falk/DK7YY, Gennady/UA9MA, Mikhail/
UA9PM and Ruslan/UA9ONJ. Activity during the CQWW
DX CW Contest (November 24-25th) as a Multi-2 entry.

QSL CR3L via DJ6QT. Activity by operators, QSL via their home callsign.
Visit the CR3L Santana, Madeira Island, Web page at: http://www.cq3l.de

CQ NEWS. Richard, W2VU, sent the following press release on September 4th:
"CQ News: Bob Cox, K3EST, Retires as CQWW Contest Director - Bob Cox, K3EST, has retired as Director of the CQ World Wide DX Contest and as CQ's Director of Contesting, it was announced today by CQ Publisher Dick Ross, K2MGA. Cox has been at the helm of the CQWW for 35 years, guiding the contest through massive changes in technology - both on and off the air - and CQWW's growth to become the world's most popular amateur radio contest.
Cox first took the reins of the CQWW in January, 1977, along with Larry Brockman, WA6EPQ (now N6AR), who worked with Bob until March, 1994. In making his announcement to members of the CQ World Wide Contest Committee, Bob said, '35 years encompasses almost the entire history of modern contesting. All the way from paper logs to today's need for instant answers. During that time a framework was created that made the CQWW the innovator of almost everything used in contesting today including log checking.' He added, 'With that in mind I am tired and wish to move on with other interests.'
Ross said the association had been long and fruitful, telling Cox 'it has been an honor to have worked with you for these many decades. Your contributions to the art and sport of amateur radio contesting have been enormous.'
Cox's retirement is effective immediately. A successor has not yet been named."

CU1-CU9, AZORES (Press Release - Dated September 4th)[edited]). Martti, Laine, OH2BH, sent out the following:
DXERS TAKING A NEW COURSE IN AZORES, SEPTEMBER 28-30, 2012
NEW WEBSITE GOES LIVE http://azores-islands-hunt.com

It is often said that DXers only work DX. More recently, we have seen a healthy shift toward assisting the society they visit by helping locals become stronger in Amateur Radio. Something totally new is now happening in the CU-land the Azores.
In recent years, the Azores Islands have balanced their agriculture and livestock sectors through increased awareness of their great location and unique landscape facilitated by the development of the local infra-structure to receive more visitors from industrialized countries. Signif-icant progress has been made in expanding tourist facilities, convention hotels and holiday resorts. The Azores is now capable of accommodating 10,500 visitors per day. Additionally, the Azorean airline (SATA) is set to serve many European destinations in addition to the US and Canada.
Radio amateurs are now stepping forward to help the Azoreans increase the awareness of all of their nine islands, all within reach of SATA airline service. Forming nine country teams with the locals, a total of twenty DXers will fly in from SATA destinations to be on the air from the nine islands as part of the 'Azores Nine Islands Hunt' - a unique concept to bring everyone on board globally to share what the Azores can offer. Those participating are:

United States: K2DO (YL), KI1U, KE3Q, N2GA
Canada: VE3DZ, VE3FWA

Germany: DJ9ZB, DF9TF
United Kingdom: G3TXF, G7VJR
Finland: OH2BH, OH8NC, OH9MDV
Norway: LB3HC
Belgium: ON7LX (YL), ON7TK, ON5NT
Denmark: OZ7AM, OZ1IKY
Together with local hams from each island: CU1AAD, CU2BV, CU2CE, CU2DX, CU3CS, CU4AB, CU5AM, CU6AB, CU7CA, CU8AAE and CU9AC

The Amateur Radio group is also set to streamline emergency communications procedures throughout the archipelago. Together with the local amateur population and administrators, they will be using this activity to test the island-to-island amateur radio network. The ARRL is sending their best resources, lending their expertise in this field.

The project website was launched today at <http://azores-islands-hunt.com> for your review while you can also study the Azores at: http://www.visitazores.com/en "

CY0, SABLE ISLAND (Update). The following was a press release dated September 5th [edited]: "Planning continues for the October 8-17th DXpedition to Sable Island (CY0). Half of our gear is in storage at the Maritime Air Charter facility in Halifax, Nova Scotia. We are in the process of shipping the remaining gear. We have booked our flights to Halifax. All remains on schedule for the CY0 operation to begin around 2300z on October 8th. As always, weather and flying conditions will dictate the actual schedule. The aircraft has to land on the beach as there is no "runway" on the island.
This operation will be highly focused on 10,12 and 15 meters where the most demand for CY0 exists. We continue to discuss antenna options due to the restrictive environment we will be operating under.
Ron and Murray will begin loading the Britten-Norman aircraft late in the afternoon on October 7th. All gear must be weighed as we have a 1400 pound weight limitation, including our body weights. We will then watch the weather very closely. On Monday morning, October 8th, Maritime Air and the OIC on Sable have scheduled a 1200z call to determine if a flight is GO/NO GO. More updates to follow.... WA4DAN/CY0 and AA4VK/CY0"
For more details and updates, visit: http://www.cy0dxpedition.com

EA8, CANARY ISLANDS. Mike, DL3FCG, will once again be active as EA8/DL3FCG from La Orotava, Tenerife Island (AF-004, S-012 for the Spanish Islands Award, WLOTA LH-1276) between October 15-28th. Activity will be on 80-10 meters using CW, SSB and the Digital modes. He also plans to be in the WAG Contest (October 20-12th) and the CQWW DX SSB Contest (October 27-28th). QSL via DL3FCG, direct or by the Bureau (preferred). All QSOs will also be confirmed via LoTW and eQSL. Visit his Blog Page for more details at: http://dl3fcg.blogspot.de

GJ0, JERSEY. Jim, G0UPG, will be active as GJ0UPG from Jersey between September
9-15th. Activity will be on the HF bands, mainly SSB, probably using a FT-857D,

an LDG 200 Pro II tuner - both powered by 12V 8AH battery, into a vertical antenna made from a telescopic fishing pole. QSL via his home callsign, direct
or by the Bureau. Also LoTW or eQSL.

HS, THAILAND (Yaesu Presents Radios to HS0AC in Thailand)). Press release from Dennis Motschenbacher, K7BV, received on September 3rd: "I depart Thailand early Tuesday morning after a number of days of DX pileups along side some of the most enthusiastic and friendly hams in the world! I will never forget my time here to present two Yaesu FT 2000D radios (thanks to Yaesu President Mr. Jun Hasegawa) to the Radio Amateur Society of Thailand headquarters station HS0AC that lost their radios during the terrible floods last year.
http://www.qsl.net/rast/
http://www.hs5ac.net/smf1112/smf/index.php?topict9.0
I was delighted to find Thailand extremely "radio active" with over 300,000 hams; most on VHF. However, after seven years of waiting, the Thai hams are once again able to test for a license that gives them the HF bands. Over 40 have already passed the exam this year and at least one more test is schedule in 2012. I understand that upgrade testing will likely now occur three times a year meaning 100s of new HF operators are about to appear on the HF bands.
All this is great news for hams around the world!

73 Dennis Motschenbacher K7BV HS0ZKS
Executive Vice President Amateur Radio Sales"

IOTA NEWS.............
AS-095. Operators Victor/RU0ZM, Valery/UA0ZC, Valdimir/RA0ZJ and Alex/UA0ZAM will be active as homecall/p from Starichkov Island between September 8-14th. Activity will be on the HF bands. QSL via their homecallsigns.

EU-069. Members of the "Invoker Team" will be active as EG5INT from Columbretes Island between September 20-24th. Operators mentioned are George/EA2TA, Christian/EA3NT, Ramon/EA3OR and Raul/EA5KA. QSL via EA5KA.

EU-088. Bernd, DL8AAV, will be active as OZ0AV from Laeso Island (DIA NK-003, WLOTA 2820) between September 10-22nd. Activity will be on the HF bands, propagation permitting. QSL via DL8AAV, by the Bureau or direct.

EU-172. Mike, DG5LAC, will be active as OZ/DG5LAC from Langeland Island (DIA FY-019, WLOTA 0590) between September 29th and October 5th. Activity will be on 80-10 meters using SSB. QSL via his home callsign, by the Bureau or direct.

OC-110. Rod, YJ8RN, is currently visiting Loh Island in the Torres Island IOTA Group (in Vanuatu) and is active as YJ8RN/p. The length of stay unknown. Activity has been mainly 20 meters SSB. QSL via his home callsign: Rod Newell, Box 905, Port Vila,

Vanuatu.

KP2, U.S. VIRGIN ISLANDS (Update). Yuriy, N2TTA, announced this past week that he will also be active as KP2MM during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. For more details, see: http://www.n2tta.info

N1, UNITED STATED (Special Event). Members of the Symbol Technologies ARC will be honoring the lives lost during the horrific events of September 11th, 2001, with activating special event station N1Y between 1400z Monday, September 10th, and 1400z Tuesday, September 11th. Suggested frequencies are: 3911, 7240, 14070 and 50135 kHz, as well as D-Star REF10C. QSL direct to W2SBL: STARC, One Motorola Plaza, B-13, Holtsville, NY 11742 (with a #10 SASE). PLEASE NOTE: There will be a reading of one name of the fallen with every QSO.

NEW OFFICERS FOR 2012-2014. Members of the Colombian Radio Amateur Association (LCRA - Liga Colombiana de Radioafionados <www.lcra.org.co>, elected the following new Board of Directors as of September 1st, for the 2012-2014 term. They are:
President - Roberto "Rob" Rey, HK3CW (cwdude@gmail.com)
V. President - Francisco "Siso" Hennessey, HK3W (hk3w.info@gmail.com)
(Vocal) is - Francisco Pineda, HK3IXI
Aquilino Torres, HK3Z
Dalia Preziosi, HK3JI
Controller (Attorney) - Alvaro G�mez, HK5LNJ

NH8, SWAINS ISLANDS. The international team of 19 operators are now active as NH8S from Swains Island until September 18th. San, K5YY, 60m pilot station for NH8S, reported earlier in the week that "Joe, W8GEX, will try to get on 60m after NH8S has been on a few days and things 'settle down' ... Do not expect him on before Sept. 9th or 10th.....
As announcements have said, he will look for Europe at about 0400z and North America from about 0900-1100z during USA sunrises." Remember, the NH8S team will also be running seven stations from 160-6 meters using

CW, SSB and RTTY. They plan to upload logs to ClubLog daily and can be found at: https://secure.clublog.org/charts/?c&#65533;8S#r
Before going to print, as of 0116z September 9th, the NH8S team has made a total of 27899 QSOs with 9707 Unique callsigns (13245/SSB, 2134/CW and 1/RTTY). Breakdown by Continent: 104/AF, 0/AN, 10333/AS, 5254/EU, 11060/NA, 874/OC and 274/SA. The NH8S team recommends to QSL via OQRS by ClubLog for both direct or Bureau QSLs. PLEASE NOTE: They will activate the OQRS system after the DXpeditions ends -- on or about Saturday, 22-September-2012. Complete instructions will be provided on the NH8S QSL page. Direct QSLs can be mailed to: Swains Island DXpedition, P.O. Box 5005, Lake Wylie, SC 29710, USA. Bureau QSLs go to AA4NN (but use the OQRS - it is faster). QSL via LoTW (Logs will be posted 6 months after the conclusion of the DXpedition). There will not be any QSLs via eQSL. More details on the NH8S operation, see the Web site at: http://nh8s.org

QSLS RECEIVED VIA THE BUREAU: NONE REPORTED THIS WEEK!

SI9, SWEDEN (Special Event). Special event station SI9AM from the King
Chulalongkorn Memorial in Ragunda, Sweden, the largest Thai Pavilion in
the world outside Thailand, will be active between September 15-16th.
Operators will be Lars/SM3EAE, Joe/SM3FJF and G&#65533;ran/SM5SIC. They plan to
be an entry in the Scandinavian Activity Contest [CW] (September 15-16th).
Outside of the contest, activity will be on 160-10 meters. Suggested
frequencies are:
CW - 1817, 3517, 7017, 10117, 14017, 18077, 21017, 24897 and 28017 kHz
SSB - 1840, 3760, 7060, 14210, 18160, 21310, 24960 and 28510 kHz
FM - 145.550 MHz and repeater RV49 - 145.612 MHz
QSL via SM3CVM, direct or by the Bureau. For more information, visit the
SI9AM Web page at: http://www.si9am.se

V2, ANTIGUA. Bud, AA3B, will be active as V26K from Antigua (NA-100)
between November 22-26th. Activity will include the CQWW DX CW Contest
(November 24-25th) as a Single-Op/All-Band/Low-Power entry. Outside of
the contest, activity will be all CW on the HF bands only. QSL via AA3B.

VK9X, CHRISTMAS ISLANDS (Update). Pekka, OH2YY, informs OPDX that his
good friend Pekka Ketonen, OH1TV, will be joining him at Christmas Island.
The VK9XM callsign will be used and there will be two stations. They will
have two yagis to cover the bands 20-10 meters and a dipole for 40 meters.
They will operate on SSB and CW. Dates and QSL info will remain unchanged.
The schedule for the operation is from Oct. 6th (ca. 12Z) to Oct. 12th
(ca. 24Z). QSL via his home callsign, direct or by the SRAL QSL Bureau.
Direct QSLs go to: Pekka Ahlqvist OH2YY, Vapaalanpolku 8B, 01650 Vantaa,
Finland.

VP2V, BRITISH VIGRIN ISLANDS (Update). Steve, AA7V, will once again be
active as VP2V/homecall from Virgin Gorda (Tortola) between September 26th
and October 1st. Activity will include the CQWW DX RTTY Contest (September
29-30th) as a Single-Op/All-band/High-Power entry. He mentioned in July
to OPDX that he will probably not take a keyer/paddles and possibly a
microphone. Steve states, "I will lug my Ameritron amp down there and
(hopefully) run 400w. I have a G5RV and an 80/40 trap dipole which will
both hang off the porch of one of those cliffside villas. If any time,
I will try 17 meter RTTY. Thank goodness no 160 in this contest." QSL
via AA7V direct or LoTW. NO BUREAU QSLS. For more details on Steve's
activities in the coming months, see OPDX.1072.

XV29, VIETNAM. Yasu, JL7XBN, will be active as XV29FM from Vung Tau between October 19-22nd. Activity will be on 20/15/10 meters using the modes FM, SSB, PSK, RTTY and JT65A. More details and QSL info is forthcoming.

Z8, SOUTH SUDAN. The "DX-World.Net" Web page is reporting: "Jim, K7QI, is the first operator to be issued with the new Z8 prefix for an upcoming stay in South Sudan. Within the next few weeks he plans to be active from Juba as Z8AAA. QSL via K7GSE who will update this news in the coming days." LAST MINUTE UPDATE FROM "DX-World.Net" Web page: "Jim, Z8AAA, will be home on September 25th for couple of weeks before heading back to Southern Sudan with a new Yaesu FT 2000D and a Hex beam. He hopes to be on the air sometime in October or November and thanks all for emails and best of luck messages. Will keep all informed of any more news.."

ZL, NEW ZEALAND. Members of the Quake Contesters Group will be active as ZL3X during the CQWW DX RTTY Contest (September 29-30th) as a Multi-Single Low-Power entry. QSL via ZL3PAH or LoTW. Operators mentioned are Mark/ ZL3AB, Don/ZL3DMC, Andrew/ZL3DW, Geoff/ZL3GA, Graeme/ZL3GK and Phil/ZL3PAH.

Taunton Ham Radio Operator to Attend National Conference:

Posted: 08 Sep 2012 05:04 PM PDT
http://www.eham.net/articles/28951

TAUNTON -- It's no bologna that Robert Mims takes being a ham radio operator seriously. Mims, 66, will be among an elite group of 10 "region directors" across the country attending a three-day meeting next week in Dallas. The U.S Army, in a statement, describes the conference as part of its developing strategy to counter "escalating attacks on the country's communications infrastructure." Although Internet and cellular communication have become ubiquitous, in terms of the new standard of global communication, they're not infallible. And that's where traditional ham, or amateur, radio experts play an integral role with their expertise in short-wave, radio interconnection. "We're the backup," explained Mims, who is director of the Army's Military Affiliate Radio System (MARS) in Federal Emergency Management Agency (FEMA) Region One, which covers New England. Mims said he and his fellow directors will have a chance to meet and consult with newly appointed Army MARS Chief Stephen G. Klinefelter. Klinefelter now serves as a civilian operations officer at Network Enterprise Technology Command (NETCOM) in Huachuca, Ariz.

//
Somerset Man Fights for Right to Place Ham Radio Device on School Property:

Posted: 08 Sep 2012 05:04 PM PDT
http://www.eham.net/articles/28950

Gibbs claims officials included that right of easement in a 1995 deed: SOMERSET COUNTY -- A lawsuit filed by Richard Gibbs, Sherwood Drive, against Somerset Area School District asking the court to enforce his right to hang a ham radio device on Eagle View Elementary School property will move forward. Gibbs conducts his ham radio operation within his home, which abuts Eagle View Elementary School along Discovery Lane. When he sold 11 acres to the school district for the elementary school's construction, the sale was subject to any easements for existing utility or aerial transmission lines, Gibbs said. Within these easements was an antenna wire with support pole erected and installed by Gibbs for his ham radio operation, according to the lawsuit. When the school was built, the device was dismantled by the contractor and never replaced, he said. Gibbs said he spoke to the contractor as soon as he was aware of the dismantling of the antenna wire. The school district's solicitors, William Carroll and

Benjamin Carroll, said Gibbs waited too long to file the lawsuit. "This does not explain the length of the delay in bringing this action before the court," they wrote in their response. Gibbs said he approached the school district in 2011 about exercising his right and erecting an antenna. The discussions ended in an impasse. He then filed suit. "The primary objective of the lawsuit is for the court to enforce the easement requirements in the 1995 deed," said Gibbs' attorney, Joseph Policicchio of Somerset.

1721. iPhone App To Help You Regain 20/20 Vision Naturally

GB2RS NEWS

Sunday 9th September 2012

The news headlines:

* ARDF World Championships this week

* New allocation in the Philippines

* Gough Island to be activated

The RSGB ARDF World Championships team flies out to Serbia on Monday 10 September. All nine of the UK competitors are self funded. UK ARDF events using the IARU rules have been run by the RSGB since 2002. In contrast, most eastern European nations have been pursuing this radio sport for over 50 years and have a great deal of experience. These nations dominate the results, with Russia, the Ukraine and the Czech Republic particularly successful. There are four days of competition and the results will be posted on the event website each evening at www.ardf2012.org. Wednesday 12th sees the first of the classic races with both the 3.5 and 144MHz bands in use. The inaugural World Sprint ARDF championships take place on Thursday 13th and this format uses 3.5MHz. Friday 14th is the second day of the classic races, with competitors using the band they did not use two days earlier. Finally there is a Fox-Oring race on the Saturday and this also uses the 3.5MHz band. Watch out for the M40 and M70 team results. In the individual results, Andrew G4KWQ (M40) and David M3WDD (M50) are our best prospects and there is a chance that the RSGB might get someone on the podium for the first time.

Amateurs in the Philippines have been granted some additional spectrum. Depending on licence class, amateurs will be permitted to operate from 135.7kHz to 137.8kHz, 472kHz to 479kHz and 7.201MHz to 7.3MHz, with Class B and Class C allowed to operate HF mobile.

ZS6KX will be going to Gough Island sometime this month. He is hoping to be issued the callsign ZD9KX. If you made contact with a ZD5KN on Gough Island you will not be getting any credit for the contact as that callsign has never been issued.

The Royal Naval Amateur Radio Society has organised a social event in Coventry and all are welcome. It will take place on 14 to16 September. The main event is a gala dinner on the Saturday evening and will include pre-dinner drinks and entertainment. On Saturday a coach trip from the hotel in Coventry to the National Memorial Arboretum is also

to be run as part of the event. Membership of the RNARS is not a requirement to attend this social event. Details are on the RNARS website.

Cray Valley members started operating 2O12L on 25 July, in the first 10 hours over 3,300 contacts were made. The station closes at 4pm today, 9 September. As well as introducing visitors to amateur radio the station exceeded the world record for special event station QSOs on 21 August and reached their target figure of 60,000 QSOs at 2305UTC on Friday 31 August.

Copyright © RSGB 2012. Not for public release before Monday 11 September 2012 except as a GB2RS broadcast. And now for the details of rallies and events for the coming week

North Norfolk Amateur Radio Club Car Boot Sale will take place today, 9 September, at Muckleburgh Military Collection, Weybourne NR25 7EG. Radio & non radio pitches are available from 7am, doors open 10am. The Radio Museum will be open and admission is free. For further information see www.gb2mc.com.

The Friskney & East Lincolnshire Communications Club Rally will also take place today, 9 September, in the Friskney Village Hall, Church Road, Friskney. Details from Bren, 2E0BDS on 01754 820 060.

The AMSAT-UK Space Colloquium is next weekend, 15 & 16 September, at the Holiday Inn, Guildford, GU2 7XZ. There will be a lecture programme as well as demonstrations. See the website at www.uk.amsat.org for more details.

On 16 September, the Torbay Annual Communications Fair will be held at Newton Abbot Racecourse, Newton Abbot, Devon TQ12 3AF. There will be trade stands and Bring & Buy as well as an RSGB bookstall. Doors open from 10am and admission is £2. Details from Mike Dixon on 01803 557 941.

Now for the news of special events

It is planned that GB2OWM will be on the air at the Orkney Wireless Museum at Kiln Corner, Kirkwall between Thursday 6 September and Wednesday 12 September during the 22nd Orkney International Science Festival. Listen out for the station between 2 and 4.30pm on weekdays and Sunday afternoons and on Saturday morning between 10am and 12.30pm. Operation will be primarily on HF SSB.

To celebrate the 39th Ryder Cup, GB39RC will be operational from Verulam Golf Club in St Albans until 30 September. Operation will be on 10, 15, 20 and 40m using mostly CW and RTTY. Full details of the QSL route is given on QRZ.com.
